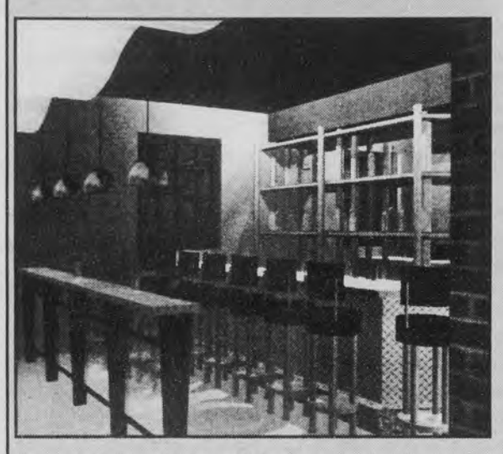
Swartz basement renovations underway

By Tracy Thiffault

The University has budgeted over $500,000 for the current renovations to the basement of Swartz Hall in an effort to provide students with an alternative, non-alcoholic social setting for use on Friday and Saturday nights. The activity center, which will include a bar, game room and dance floor, has been a work in progress for the past two years and is scheduled for completion in late November.

When opened, the center will have state of the art sound and lighting and will resemble a live club in New York City. This was the intention of the student board of managers who worked with the Office of Campus Activities and Programs (OCAP) to plan and design the center.



An artist's rendering of the bar area in the new Swartz basement. The $500,000 renovation project will be completed in late November.

The board of managers consists of six students: Alex Mccausland '02, Jane Scott '02, Dustin White '02, Odu Onyeberechi '00, Jackie Claus '00 and John Ozhuthual '01. These students were selected by Bucknell Student Government (BSG) to make recommendations and provide insight into what students desired for social activities on campus.

According to Kari Conrad, assistant dean of students and director of OCAP, students wanted a new place to hang out and socialize. "This will fit what Bucknell needs," Conrad said. "There's something for everyone here."

The committee plans to host a band during one night of every weekend and have a DJ playing music the other night. Entrance will be free, and snacks and drinks will be sold at the bar. Students may use declining balance or cash.

The club will resemble similar spaces at other schools such as Dickinson, Franklin and Marshall and Gettysburg.

"I think a lot of people who don't like the fraternity scene will come," said Mccausland.

There will be one night club manager, and staff will be equipped to handle problems, should they arise. "I hope not to deal with that on a frequent basis," Conrad said.

Conrad said that the construction of the new dormitory will help to bring students to the area near Swartz. The one entrance to the club will be facing the new dormitory.

Conrad is optimistic about the project. "I don't want to hear students say there's nothing to do on this campus," she said. "I think it will be great."

Bro Adams to resign

President to remain with the University for one more academic year

By Heather Napolitano

William D. Adams has recently announced that he plans to step down from his position as the President of the University at the close of the 1999-2000 school year. With his departure, Adams will leave five years of dedicated service to the University community.

While his announcement may have come as a surprise to some, Adams had initially anticipated an approximate five to eight year time frame for his work at the University. Five years falls just short of the national average of presidencies at private institutions which is, according to Adams, roughly six years. The University, itself, has also been accustomed to longer tenures such as that of Gary Sojka, Adams' predecessor, who served for 11 years.

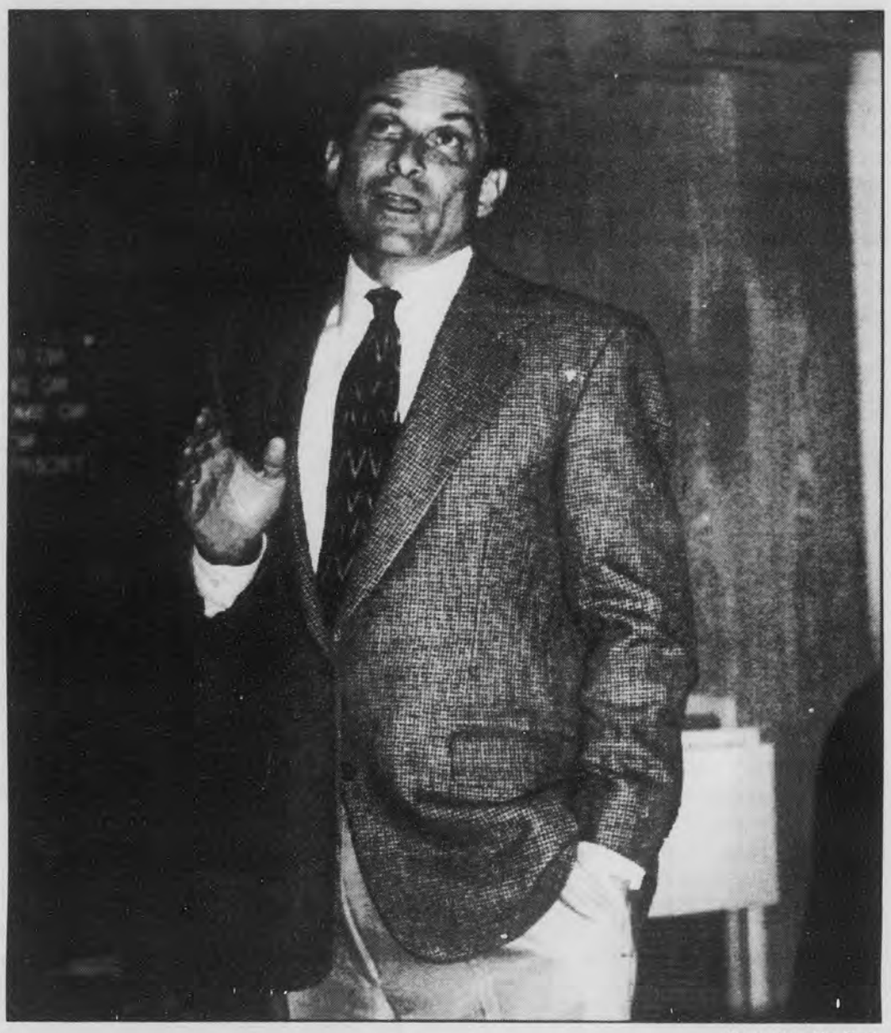
"My decision was inflected and shaped by what I knew to be on the horizon for Bucknell," Adams said. "I knew that big issues would require a longevity that I wasn't ready to commit to, and I knew that if I were going to make the decision to leave it would be better to do it now."

In a statement released to the members of the University community in mid-June, Adams also cited the completion of the initial goals set for his presidency–in particular the strategic planning process and the completion of a comprehensive campaign–and the desire to face new challenges and opportunities as reasons driving his decision.

"We have done a great deal of planning" Adams said. In the past four years, efforts have been directed at thinking with respect to such things as physical infrastructure, financial structure and organizational structure. Preliminary and somewhat abstract planning has also begun on the educational program.

In terms of the campaign, Adams notes that, with one academic year remaining, the University is only $7 million short of its goal of $150 million. "We will be able to go beyond the goal we set for ourselves," Adams said. "I'm proud of that."

Adams is also proud of a number of initiatives taken in the past four years, namely diversity and gender equity. He is proud of the discussions which have been held on alcohol and its implications. "What I'm proudest of is that the University is growing in stature," Adams said, "and I'm proud of the students. I'm proud of the young people that are being attracted here ... and of course in the end it is all about the students."



Bucknellian File Photo

President William Adams, citing completion of several of his long-term intiatives, announced his resignation after five years of service to the University.

There is certainly more to be accomplished in this final year for Adams. The Capital Campaign has been successful in the overall dollar figures, but the University remains underfunded in some projects. Funding has not yet been completed for the O'Leary Center–which will

Interim Dean of Students steps into unfamiliar surroundings

Longtime mathematics professor Schweinsberg to replace Chapman

By Chris Ellis

Interim Dean of Students Allen Schweinsberg has been a member of the University community for 30 years, serving as a mathematics professor, a department chair, and a Dean of Faculty. When it comes to understanding the history and institutions of Bucknell, few are as well-versed or as knowledgeable as he.

But this year, Schweinsberg may feel more like a first-year student than one of the faculty's most experienced members.

"In many respects, I feel just like a first-year student would upon coming to campus," Schweinsberg said. "I left good friends and familiar surroundings to be plopped down amongst strangers. I have entirely new tasks to perform, very new responsibilities, and I have to prove myself all over again. It should be an enjoyable and challenging experience."

Scott Solomon—The Bucknellian

Dr. Allen Schweinsberg, a University mathematics professor for 30 years, will replace Richard Chapman as Dean of Students on an interim basis.

You'll have to excuse Schweinsberg it takes him some time to become accustomed to his new surroundings. Following the abrupt departure of former Dean of Students Richard Chapman for the University of Maine, Schweinsberg, a mathematics professor of 30 years, became one of the most integral parts of finding a suitable interim replacement for Chapman and welcoming the class of 2003. For him, the offer to become the interim Dean of Students was as engaging as it was sudden.

"I was minding my own business, sitting outside Dean Mark Padilla's office waiting for a mathematics candidate to

Sigma Alpha Mu to recolonize chapter

By Laura Cardinal

When students walk across campus this week and next, they are bound to feel the excitement and tradition of rush as it emanates throughout the campus.

As men and women all over campus engage in this event, it is important that the men realize that this year there is another option open to those wishing to rush. The fraternity Sigma Alpha Mu, better known as SAMMY, is returning to campus to participate in rush events and to recruit new members. To seniors, SAMMY is nothing new although its premature homecoming should be a surprise. However, to those men still looking to establish themselves at a particular fraternity, SAMMY offers an alternative which was not previously scheduled to be available.

SAMMY, which has been a member of the fraternity system at the University for 67 years, was closed in the spring of 1998 in order to enact a newly revised, re-colonization effort. This was a joint decision made by the University and by the SAMMY national board of directors. The plan was for SAMMY to re-establish itself at the University three years after its initial closing date. This would give the fraternity time to reorganize its recruiting and colonizing efforts.

So, if SAMMY isn't scheduled to return to campus until 2001, then why are they recolonizing this year? Thanks for their early return should be divided between the hard work of their national representatives and Dean Baker.

After reviewing the plan submitted by SAMMY to reestablish itself in three years, Baker felt that perhaps this was too long a duration for the fraternity to be inactive at this University. For this reason, he suggested to the national representatives that since their closure at the campus was not discipline related, they should consider re-opening for the fall of 1999.

In order to recruit members the nationals have sent two field representatives, Marty Shapan and Brian Ratzker, to the University to recruit members. Though their program will be significantly modified from the full-scale rush events planned by the other fraternities, they will be official participants and will be able to offer bids to new members.

Anyone interested in becoming a SAMMY member should email Shapan at *sam.rep2@aol.com* or attend any of the four planned SAMMY rush events. An informational meeting is planned from 5-7pm this

New dorm to stress student interaction

Construction underway on innovative new dormitory that will eliminate dingles

By Nicole Gull

In the past several years, the University has faced an increasing problem with housing as the student body continues to grow. However—for those who haven't noticed the yellow trucks and growing pile of dirt behind Swartz Hall—the University is making a huge leap as construction is underway for the newest dormitory on campus.

The University has been planning the structure's design for approximately two years now. On each floor there will be two identical, air conditioned halls which consist of nine double rooms, a Resident Advisor room, and both male and female restrooms surrounding a central lounge fully equipped with a kitchen, television and dimming overhead lights. Also, the basement will be stocked with approximately 20 washers to accomodate all residents' laundry needs.

"The pervading concept behind the circular design is communication and interaction," says Dan Remley, director of Housing and Residential Life. The central lounge will be constructed largely of glass, allowing residents to feel asthough they are a part of the hall and constantly interact with their hallmates if so desired.

In addition, the hall will feature elevators for easy access and four windows to filter natural light.

With this unique design in mind, Remley notes that thoughts of using the halls for a specific purpose are still in consideration. For instance, the halls may be somehow tied in with first year foundation seminars or even theme halls such as substance free living. However, like all other dorms on campus, the new dorm will be open for all students, and so the committee continues to seek student suggestions on exactly how each unit may be used to maximize its design.

In addition, choosing double occupancy rooms gives the committee hope that dingles may finally be eliminated from the University's residential life. Remley stresses that there is a general aim to provide a good balance of housing options to the student body and hopes that the project may relieve some pressure to place students in both Hill and Loomis.

In light of the developments, Remley asserts, "The Swartz renovation in the basement coupled with the new dorm will continue to make uphill a vibrant part of campus." Students are encouraged to visit the Office of Housing and Residential Life in its new Vedder Hall location and take a look at plans for the dorm to come.

Photos by **Andrew Rabinowitz**—*The Bucknellian*

The Swartz Parking Lot has given way to construction work on the University's newest dormitory building. The still-unnamed dorm will feature elevators and elaborate kitchens.

Athletic director Hartzell resigns from the University

By Joshua Gish

After 11 years of dedicated service to Bucknell University, Rick Hartzell has declared his resignation as director of athletics and recreation in search of new professional opportunities. His resignation, effective August 15, prompted an immediate search for a successor.

Hartzell stressed his love for the university and the difficulty with which he made this decision. "I care very deeply for Bucknell University, its students and our athletic department staff. But at this point in my professional life, it is simply time to focus on new challenges and new opportunities and to re-energize myself," Hartzell said in a press release. He also cited that he was looking forward to the new opportunities ahead of him and that although difficult, he knew he had made his decision for the "right reasons."

Since Hartzell's arrival in 1988 Bucknell's varsity athletics program has expanded from 23 to 28 men's and women's sports. Under his guidance, Bucknell has won six of the past nine Patriot League President's Cup for overall excellence in athletics and has become a national leader in student-athlete graduation rates.

Hartzell came to Bucknell from the University of Maryland Baltimore County, where he acted as the athletic director and head of the physical education/recreation department for three years.

President Adams expressed his feelings for Hartzell by stressing the importance of his guidance in "the improvements to our athletics and recreation facilities." Adams described Hartzell's tenure as "terrifically effective service" and wished him "future success" as his contributions to Bucknell's athletic legacy will not be forgotten and his presence will be missed greatly.

Associate director of athletics, Brad Tufts, will serve as interim director immediately following Hartzell's departure. For a profile on Tufts, see page 12.

DEAN from page 1

finish interviewing," Schweinsberg said of the initial stage of his appointment. "President Adams, who was there for another reason, walked by and said, 'Oh. I need to see you.' Before I knew it, I was sucked into the whirlwind.

Stepping into a Dean's position at any time is difficult, but Schweinsberg assumed the title of Interim Dean of Students at one of the most challenging times in the position's recent history. University construction on a new residence hall—a project in which Chapman played an integral role—and a music building combined with the announced resignations of Adams and Athletic Director Rick Hartzell will make this year a challenging one for university administration.

In addition, major University plans and initiatives that will address, among other issues, alcohol consumption, diversity initiatives and the University's internal judicial system will provide further unique—and formidable—tasks for the Dean's office.

Although Schweinsberg has some administrative experience—he served as Dean of Faculty for one year— he knows that his goals will not be accomplished alone.

"Dean Chapman said to me before he left that we had an excellent group of Deans and directors who knew their jobs, and that would make for a smooth transition," Schweinsberg said. "Everything I've seen so far confirms that. I'm delighted to be working with these folks."

Schweinsberg has held the Interim Dean of Students position for nearly a month, but still feels like his true role has yet to be understood fully. You see, in nearly his entire term thus far, there have been very few Students to be a Dean of.

"I've experienced August—a month where you primarily deal with staff," Schweinsberg said. Now I get to experience September, when everybody's back on campus. I'm looking forward to seeing what it's really like to be a Dean of *Students*."

For nearly 40 years, Schweinsberg has been consumed with becoming or serving as a mathematics professor. Combine 10 years at the University of Pittsburgh earning bachelors, masters and doctorate degrees with three decades of service at Bucknell, and assuming the role of Interim Dean of Students should seem like a welcome change. It may be a worthwhile year, but Schweinsberg is quick to point out that the change, while challenging, is nothing if not temporary.

"I think it's refreshing to walk away from a job you like, knowing you'll come back to it," Schweinsberg said. "This will be an invigorating experience, but when it's done, I'll still be a mathematics professor. That's where I belong."

NEWS BRIEFS

Two Killed and Two hurt in Roller Coaster Mishap

Two people were killed and two other injured last Saturday night during an accident on a roller coaster at the Gillian's Wonderland Pier amusement park. The police report said that at 10 p.m. one of the roller coasters had crashed into the rear of another. A small child and adult were killed another child and adult were taken to an area hospital and treated then released. One witness said he heard what sounded like a car or truck coming to a sudden stop.

The police report said that one of the coasters apparently became stuck on the track and was hit from the rear by the another approaching coaster. The people in the first car were knocked out and killed during the crash. The ride is shut down until an investigation can determine what happened and steps can be taken to make sure that this type of accident does not happen again. Gillian's Wonderland Pier is located 10 miles south of Atlantic City.

Mysterious Black Ooze found outside plant in Kentucky

The Federal government has confirmed the findings of workers at a Kentucky uranium enrichment plant. Radioactive black ooze was found seeping outside of the fence of the Gaseous Diffusion Plant in Paducah, Kentucky. The workers found the ooze on July 15 when they tried to install devices to monitor another nearby contamination site.

The site is an sanitary landfill once used by the uranium enrichment plant. Only until the ooze was properly tested was it determined that the materiel was contaminated. The radioactivity levels are hundreds of times higher than levels found naturally in the soil and nine time higher than the plants 'action level'. Radioactivity contamination of that level should have brought an immediate response to seal the contaminated areas inside the plant. Labs tests confirmed the presence of uranium and technetium.

Technetium was accidentally brought to the plant during the 1950s, '60s and '70s in shipments of recycled uranium. The uranium came from nuclear reactors used to produce plutonium for nuclear weapons. The plant's current management said it was unaware of radioactive waste entering the landfill.

After the Quake, Turkish Towns May Be Abandoned

Adapazari, Turkey was once a thriving industrial center, but now it looks much more like a war zone. Three-quarters of the buildings in the town were left uninhabitable after the devastating Aug. 17 earthquake that devastated much of eastern Turkey. Tens of thousands of people can not enter the damaged buildings and must sleep outside in tents and other make shift shelters.

The danger from future quakes and the level of destruction from the last quake are so great that officials are contemplating a radical solution: simply pulling out and abandoning this city of 180,000 people. Officials believe that relocation is a better alternation than reconstruction.

Regardless of the path taken, the future of these people is in peril. No family has escaped from the loss of life or property. Hundreds of people are believed to be entombed in the mountains of rubble and debris. The town was rebuilt after nearly being leveled by a powerful earthquake in 1967. The town was smaller then and rebuilding was a better option.

Pro and Anti-Independence Leaders Vow for Peace in E. Timor

Pro and anti-independence leadersin Indonesia agreed Sunday to ends years of bitter fighting during Monday's referendum on the future of the troubled territory. Indonesia's military and police forces have also pledged to maintain security during the voting process. The U.N. is sponsoring a peace deal that will decide the fate of the mainly Roman Catholic East Timor.

438,000 registered voters will decide whether to remain apart of Muslim-dominated Indonesia as an autonomous region or become fully independent. As part of the peace deal leading up the vote rival factions have agreed to keep their armed supporters off the territory's streets, to lay down their weapons and respect the outcome of the vote, which is expected to be announced on Sept. 7.

News Briefs compiled by David Arnold courtesy the Associated Press Website

SAMMY from page 1

Friday in the Scullery Room of the Langone Center.

If the recruitment is successful and the new members of SAMMY prove themselves to be a responsible and stable organization then they will have the opportunity to regain their house after one full academic year. It is located on University Avenue, and is currently being used for general student housing. When the house is granted back to SAMMY, it will become an alcohol-free house as per the chapter's recolonization guidelines.

Dean Baker looks forward to the revival of SAMMY at the University, saying "I am very pleased and excited that they chose to take our advice and return to campus this year. They are a traditionally strong fraternity and will return with success, with the help of their national chapter." This confidence and support comes, in part, from the Sigma Phi Epsilon fraternity, who successfully re-established themselves in 1997, leading the way for other fraternities to do the same.

As Dean of Housing and Res. Life, Dan Remley hopes to use student participation to improve campus residence living.

Remley stresses change for Residential Life

By Anne Monoky

The University's Housing and Residential Life office spent much of its summer changing the location of its office. Director Dan Remley hopes that the physical changes are accompanied by a change in the usefulness of the office to students.

Remley brings to his position a set of several goals. First, Remley and the ResLife Office plan to continue to utilize student input into housing decisions. As Remley explained, "a good example of that [use of student input] is the building of the new residential hall wherein students have been on nearly every level of planning." By utilizing the student's feedback, the office has been able to figure out how to "best to use a new building."

Another goal of the office would be to increase the use of technology. Remley thinks, for instance, that the use of technology would make processes like room selection run much more quickly and easily. He believes that technology would extend student's participation by allowing them to actually see the evolution of processes such as room selection, thus reducing students' frustration in such procedures.

Remley aspires to take advantage of the technology that is present on campus and incorporate it into the everyday duties of ResLife. "We want to take on the mentality that we have the technology and explore those types of options" he said.

Remley went on to describe the goal of improving the system of Resident Advisor (RA) recruitment. He questioned, "How can we make the position of RA more viable? How can increase student interest?" In general, Remley would like to see the application pool for the RA position strengthen.

One goal that preceded Remley but that he would like to continue is that of the equability of space. Remley explained that the current addition of the new residential hall will certainly eliminate the problem of overcrowding. He added that the office is moving in a positive direction in order to get rid of the use of 'dingles'.

With the idea of changing the climate of alcohol use on the University campus, Remley would also like to enhance the options for substance-free living. "This is not only a marketing campaign, but we need to see what the students needs are relative to that topic and create a viable option support of those needs."

Another interest that the office will focus on is that of the Special Interest Houses on campus, houses like the Leiser House, the Martin House and the Seventh Street House. The office, according to Remley, needs to be dedicating resources and providing support to the individuals of the house as well as the purpose of the house. Remley would like to restore the idealism and missions of these houses.

In doing so, the office would like to include the participation of Alumni for the enhancement of such programs. He also encouraged inquiries into creating other interest group housing on campus in order to explore this marriage between students' interests, academic pursuits and housing.

One major evaluation to the operation of ResLife, for Remley, would be to look at the incorporation of student's interest with the office. For example, Remley spoke of the possibility of the editing of room selection.

Library introduces "Technology Courtyard"

By Heather Napolitano

The summer months have provided the University with the opportunity to make a number of physical alterations on campus. None of these changes, however, may be as instantly gratifying to students as the physical and technological overhaul that has taken place on the main level of the Bertrand Library.

This University funded project has allowed for the creation of several new services, and has redesigned a number of existing research tools in an attempt to make them more beneficial to students.

The most significant changes to the library have occurred around the ISR Technology/Media Desk. This new service point combines functions of the CCS Help Desk and Instructional Media Services. This single location will provide both hardware and software support with both increased hours and increased desk staffing.

Adjacent to the ISR Technology/Media Desk is the new Technology Courtyard which houses 28 state-of-the-art multimedia PCs and Macintosh computers. These workstations will now allow students to work collaboratively on projects which include image scanning, web¹page development, video editing and a range of other multimedia production functions.

The Reference/Information Desk has been restructured in attempt to make it more comfortable for library users to consult with Reference staff. This area will still function as a place for individuals to ask questions, find given information or begin researching a topic, but beginning this semester, the reference librarians will also be holding office hours to assist students with more involved research needs.

Changes in the research area itself are underway; it is currently in the process of being outfitted with brand-new computers which will replace the older units.

A number of student and faculty resources have been made more readily available to those who wish to use them. The video collection, music CDs and multimedia software collection have been moved into open shelving thus allowing library users to browse these resources. Many reserve materials are now open to browsing as well as being available in the electronic reserves room on the library's home page.

Just inside the main entrance to the library is another user-friendly modification: a new 24 hour computer lab has been created. The lab is home to 12 new PCs, six new iMacs, a photocopier and vending machines. This location will remain open 24 hours a day, seven days a week for the majority of the year thus avoiding interruptions for those working when the library is closing.

Courtney Yohe—*The Bucknellian*

The University Library added 28 multimedia PCs as part of its summer renovations. A new 24-hour computer lab was also created.

Students may also work in any of the new lounges or in the new media viewing/laptop area. A plasma screen referred to as "virtual Bucknell" has been installed into one popular lounge area allowing visitors to see what's happening on campus and around the world.

According to James Van Fleet, librarian/information specialist for science and information resources, thus far students have been very receptive to the changes made to the library. "We've had twice as many people in this semester as last ... People are really voting with their feet."

University changes registration process for Capstone courses

By Katie Marston

In its attempts to make the common learning agenda a more fulfilling experience, the University is implementing a new, more efficient process for the registration of the capstone course. In the past, juniors and seniors found themselves forced to register for a less desirable topic area for this graduation requirement. Due to the small, close environment of this fifteen person class, it is difficult to satisfy everyone's course selection needs.

According to Marge Kastner, the University's common learning coordinator, the new system will "put perceptions of fairness into the process in order to make seniors happy with their capstone course."

With the intention of increasing the number of students who can get into one of the Capstone courses of particular interest to them, juniors and seniors will pre-register for their desired capstone courses, and then plan the rest of their schedule around that. This process will begin with tomorrow's arrival of the Capstone web page, which can be accessed directly from the University home page. Students are required to apply for courses through the satisfaction of the criteria to be approved by the faculty, located on-line, by September 22.

Some courses require that the student personally visit with the instructor to ensure that the qualifications for the course are properly met. In the event that more students than the recommended amount qualify for a particular course, priority will be given to seniors and those who have not yet taken a Capstone course. On the web students may also access a tentative course guide for the spring semester to prevent any scheduling conflicts.

Once a student gains faculty permission for a Capstone course, the student will receive a form through campus mail to take to registration. The pre-registration program will take up to seven ranked selections in the hope that at least one of the four top choices will be met.

As the final portion of the common learning agenda at the University, the Capstone Experience serves the purpose of integrating the knowledge and perspective acquired and developed within and outside of the major. The Capstone Experience should provide students with the opportunity to reflect and evaluate their entire educational experience.

Just as the freshman foundation seminar serves as a transition from high school to college, the Capstone Experience will relate the topic of focused study to questions that will engage the students after they leave the University, preparing them for the real world. The new pre-registration process will help to ensure that the University student will be able to gain a better understanding in the major to be carried over and applied to their future lives.

ADAMS from page 1

serve as the new geology building–or the athletic center, despite the generous gift recently given by the Langones. Virtually no commitments have been made to the creation of the new art building. The goal for financial aid has been modestly exceeded however the administration now hopes to surpass that goal as their sense of the need for financial aid endowment has increased since the campaign began.

The 1999-2000 academic year will also be dedicated to establishing a plan for creating more residence hall infrastructure, relieving pressure on academic space and relieving pressure on faculty program space.

Meanwhile, the board of trustees will be filtering through candidates as they look to appoint a successor for Adams. James W. Schubauer, chairman of the board of trustees, said in a June 21 statement, "Initial planning will begin immediately for the presidential search and information will be provided as the process develops."

Adams hopes that a successor will be chosen during the spring semester. He does expect a seamless transition at the close of the academic year that will not create any noticeable impact on the lives of students.

Adams announced to the University on Tuesday that he will leave vacant the position of the Vice President of Enrollment Management and Student Affairs and allow his successor to make the appointment.

In order to fill the void, Adams made two interim appointments: Charlie Pollock, assistant to the president and secretary of the University, is serving as the Interim Vice President for Student Affairs and Secretary of the University; Mark Davies, director of admissions, is assuming the responsibilities of the Assistant Vice President for Student Services and Enrollment Planning on an interim basis.

Said Schubauer in his statement, "This period of departure, of course, will require extra effort from all of us."

Adams' immediate future will hold a year of sabbatical. He is interested in a study on liberal education and its future in higher education although he does not find it inconceivable that something else might attract his attention.

In the long run, Adams is unsure of what he would like to do professionally. While there might be a life for him outside of higher education, remaining in that field will be the most logical step for him.

"I do want to make sure that people know how much I've enjoyed my time here at Bucknell and how much I admire this University. It is a special place and has enormous additional potential ... I feel good about leaving it in the sense that I feel that I have contributed, and I will look forward to watching it in the future."

EDITORIAL

The Chrysalis Ball in review ... a success, but ignored by many

Great motivators often refer to 'seizing the day'. *Carpe Diem.*
This past April, the Bucknell community had a chance to do just that. In conjunction with the Tradition Task Force, BSG, BAC and many other campus organizations and offices, the University sponsored the first Chrysalis Ball, an all-campus formal in the Fieldhouse. The event was highlighted by the popular swing band Cherry Poppin' Daddies, and included all the amenities. The Fieldhouse was completely "dressed up" to give the event a proper mood—curtains were drawn, tables surrounded the sizable dance floor and Dining Services supplied snacks and beverages.
With over 1,300 in attendance donning their best threads, students, faculty and administrators alike were treated to a spectacular evening like none in recent past. The University used to hold a similar all-campus formal decades ago, but the tradition had died out. The revived tradition seems primed to continue for years to come.
Especially in the face of alcohol policy debates, the Chrysalis committee was able to put together an alcohol-free event that held its own and then some.
Assistant Dean of Students Kari Conrad, director of campus activities and programs, was particularly impressed with the energy of the night as well as the committee members' hard work. She also mentioned that she did not hear one negative comment from event attendees.
What was missing then? Only those that did not 'seize the day'.
Although Chrysalis seemed to provide students with a perfect opportunity to participate in an alternate social event, many opted to let the chance pass them by. Sure, an all-school formal dance with a big-name band, food, etc. may not be for everyone, but it is disappointing to see students not give such a great event a chance, and worse, to criticize it without attending.
Although *The Bucknellian* does not wish to point fingers, we would still challenge leadership groups on campus, especially members of the Greek system and athletes, to take the initiative in supporting truly worthwhile events like the Chrysalis Ball. Believe it or not, students look up to you—you are visible parts of the Bucknell community and hold the power to lead this campus.
Both groups were highlighted by the BARC II report—which probed into Bucknell's binge drinking problem—as important pieces to the solution. Nevertheless, neither had a strong showing at Chrysalis, a key forum to prove that Bucknellians can have without alcohol.
Where were these factions' leaders—presidents, executive board members, captains? A few were there, but they were most certainly in the minority.
The Interfraternity and Panhellenic Councils even helped sponsor the event and agreed to not hold social events on that night, but still the Greek population at the ball was negligent. Additionally, at least two fraternities went back on their word and held their spring formals on that night. If you sponsor an event, one would logically think that you would encourage your members to support the cause.
The issues raised here are especially pertinent in light of the efforts planned by the Office of Campus Activities and Programs to devise all-campus activities for the fall semester. From the semeseterly concert to "Fall Frenzy" weekend, the University is—after many years of simply paying lip service to the idea—finally providing meaningful events designed to attract the entire campus community. We can only hope all campus groups realize the importance and meaning of such events.
Disappointment is really the issue at hand—it's a shame more Bucknellians did not take advantage of Chrysalis and reap the benefits of some of their hard working peers. As the University continues in its efforts to make students one 'community,' it is imperative that student leaders become an integral part of events that truly should be "campus wide."

Is it worth the money to renovate Swartz basement?

Yes

By Rebecca Rowland

If only one-quarter of the university is of legal drinking age, why does it seem that only one-quarter of the school has chosen not to drink? Is it because students naturally assume that with college comes drinking? Is it because going to parties and getting drunk is the coolest thing to do? No, it is because going to parties and drinking is the only thing to do.

Ask any student why they engage in underage drinking and inevitably the answer will be "what else is there to do?" Here in Central Pennsylvania the levels of culture and sophistication are somewhat limited. The off-campus entertainment is limited to roller-skating, bowling, and going to Penn State. Take into consideration that 900 of the school's underage drinkers have no off-campus access and, well, the situation is bleak.

A museum, theatre, club, coffee shop, or even a funky ethnic area would offer desirable and sober activities. Universities whose locations provide these alternatives have an almost non-existent underage-drinking problem. Sadly, Bucknell bears no resemblance to a city school so the drinking continues.

This year the administration has decided to take action against this situation. The basement of Swartz Hall will be turned into an alcohol free nightclub. Different from the 7th Street Caf, Swartz basement will convey more of a rock/dance/party attitude.

An architect was brought in to design the changes for the renovation and construction has commenced. What is the cost for this project? Half a million dollars. Whoa. That is a lot of money, right? A lot of money ill-spent many of you are saying. Bucknell is a drinking school, always has been always will be. Why waste good money on a facility no one will use, perhaps specifically because it was designed to provide an alcohol-free experience?

Well, since when has the administration been in the habit of breaking the law? It is illegal to drink before 21 or provide alcohol for those under the legal age. While the administration isn't exactly buying beer, it is partly at fault for the lack of non-alcoholic weekend activities.

By building this hip, on-campus alternative to frat parties, the administration is reacting proactively to the underage drinking problem. The fact that they are spending a fair amount of money shows only that they are committed to creating this alternative. By spending as little money as possible and demonstrating only a base desire to see this project succeed, the administration would be admitting that they did not expect positive results. And why shouldn't they? The amount of money spent is proportional to the enthusiasm of the administration and, as we all can see, they are hoping to create an effective way to stem the underage drinking problem and even add one more cool place to go Friday night.

No

By Ryan Delahanty

Bucknell is undergoing many changes. Physically, the campus is being inexorably altered with the addition of a new freshman dorm and a music building.

More importantly, the Swartz basement, which currently houses a T.V. lounge, study room and washers and dryers, is being renovated into a non-alcoholic "nightclub."

Following the national trend of dissuading binge drinking and the resulting rowdy behavior on college campuses, Bucknell is trying to offer options to non-drinkers among the student body. Spending $500,000 is not the proper way.

I am absolutely for finding new and innovative ways to keep the student body happy and busy on the weekends without the use of alcohol. From personal experience, I know that Lewisburg is not the most happening place and offers very little in the way of entertainment off the campus.

Other schools, closer to major cities, have a myriad of options whether it be going to the movies, seeing concerts, or just spending a night on the town.

With that said, I genuinely applaud the administration for its attempt to provide a safe and fun environment where people can enjoy themselves.

On the other hand, I cannot possibly see a positive outcome. A multitude of problems may occur: First and foremost, for all the money that is spent (yes, it's an exhorbitant amount), there is the very real likelihood that no one will go there and secondly, the "nightclub" might become a haven for drunk kids who want to dance, be loud, and cause other problems associated with drinking.

Finally, the administration doesn't really grasp to what extent people here on campus dri[illegible] "binge drinking" is defined as consuming more than five drinks in one setting, then I think 90% of the campus falls into that category every weekend.

Bucknell has rightfully earned the reputation of being a "party school" and is regarded as a heavy drinking school due to the lack of other activities open to the student body. The main priority among most of the students on the weekend nights is to drink beer fast, hard and excessively.

Just imagine what would happen if a few miscreants on a Friday night decided to get drunk and head over to the new "nightclub" to "mess around." Finding their alcohol cut off and a few sober kids dancing could potentially end up as a bad combination.

Finally, spending half a million dollars is a hefty price to pay just to steer kids away from drinking. Why not spend the money on educational programs and try to increase awareness among students about the pejorative effects of alcohol?

I appreciate what the administration is trying to do but they just don't get it. Wasting as much money as they are will not help alleviate the current drinking problem the Bucknell campus has.

All I know is the drinking will continue no matter what is done. We can only hope the administration comes to realize this fact.

Welcome back Bucknellians! Don't be shy this year. Voice your opinions by writing for Ops!

Preventing violence

By Josh Guyan

I'm sure all of you have heard plenty about the series of shootings that have taken place recently. I'm sure all of you have your ideas as to why this is happening and what we should be doing to stop it.

I've read about almost all the recent shootings, trying to come up with a common thread linking them. I was looking for something these horrible tragedies share that could possibly be a clue as to how to stop this senseless violence. The only tangible common link between these atrocities is the easy availability of lots and lots of guns.

Guns are the link between all of these senseless shootings in schools, office buildings, neighborhoods, and most frightening, preschools.

I know what you are thinking, guns don't shoot little preschool kids, sick, deranged, violent people do. You are absolutely right. But besides the adjectives I have already used and others like them, there aren't that many similarities between the shooters that can be easily dealt with.

After the Columbine shootings, many in Congress proposed as a solution that we place a copy of the Ten Commandments in every classroom in America. They proposed this because 1) they want to put religious stuff in the classroom anyway and 2) the shooters in the Columbine massacre had an aversion to religion and seemed to be targeting, among others, religious students.

Tom Delay (R) from Texas was the leading proponent of this solution and it passed through Congress. It was supported by mostly Republicans, but to my surprise, was also voted for by many Democrats. Do any of you actually believe this could be a solution to this serious problem?

There are many problems with this solution in my view. First, the Supreme Court has already said that you can not put the Ten Commandments in public schools because of the Constitutional guarantee against laws respecting the establishment of religion. The decision in Stone v. Graham (1980) said among other things that the Ten Commandments, while containing many aspects of Western law, also contains purely religious statements with no secular value. So the law passed by Congress can not even be implemented without a Constitutional Amendment.

Second, lack of religion is not a common link among these shooters. Mark Barton, the Atlanta shooter who killed his family and nine people in the day-trading offices, was very religious. He had recently converted to the Jehovah's Witnesses, but was a churchgoer in another major Christian religion before that.

Racism seems to be key in many of the shootings, but is not a factor in many others. The recent shooters seem to always be white males, but let us not forget that thirteen people die everyday in mostly inner city shootings where the shooter and victims most times are not white (it is also sad to see that we are only now waking up to the violence in our society when it is white suburbanites dying).

No, the common link between all this violence is guns. It is something tangible and can be regulated much easier than religion or hatred. It is also perfectly constitutional to regulate guns. The Second Amendment certainly protects the rights of citizens to bear arms, but those guns can be closely regulated without breaching the Constitution. Individual states can actually outlaw all guns.

I am sure many of you are gun owners and I assure you the policies that have been proposed do not take away your guns. The NRA likes to paint the picture of a slippery slope where any gun law paves the way to a gun-free society (during the gun control debate in Congress, they spent $100,000 a week making that point to our representatives). That is simply paranoia.

Even the more strict gun proposals only call for things like waiting periods, picture licensing to purchase guns, banning assault weapons, banning armor piercing ammunition, banning certain clips that hold too many bullets, and so forth. It is certainly strange that only now when crime is actually down we are getting concerned with the violence in our society, but whatever heightens our collective awareness to the need for gun control is fine with me.

The most sensible, realistic, and obtainable solution is gun control. Who out there could not stand to wait two extra days for their gun, or substitute a shotgun for that new assault rifle, or pass on the armor piercing rounds to help the struggle to save the lives of innocent men, women, and increasingly, children?

I don't want to grow up!!

By Rebecca Rowland

Boy, am I glad to be back! And I mean GLAD! Perhaps as a sign of my relative adult-ness, I was advised to get a "grown-up" job this summer. The only things worse than grown-up jobs are the grown-ups you have to work with. It fills my heart with joy to see so many young faces; so happy to be where you are, so happy to be alive!

Maybe my particular field (data entry/stock room) breeds particularly unpleasant people, but I think it is safe to say that after a few years in the real world, people develop a chip on their shoulder the size of the Gateway stairs and a scowl on their face as deep as the mighty Susquehanna.

The extreme negativity might have something to do with the fact that, as adults, they do it for a living. As college students, we breeze in around mid-May, work kinda hard, get our paychecks, think "cool, beer money," go to the beach for a week, and blow Dodge mid-August. Meanwhile, Selma and Earl are still hauling boxes in November. They had their days of capricious youth, now they are stuck in a dead-end job. Just thinking about it makes me scowl.

Perhaps the only redeeming quality that "grown-up" summer jobs have is the humor factor. Didn't think 9 to 5 could be funny? Actually, who am I kidding? 9 to 5? Try 8 to 5:30 (I swear those were my hours). Well they can be. Sure these people boss you around, are mean to you, and complain about you behind and in front of your back but, by golly, they are funny. Just listen to them. One woman in my office preempted everything she said with, "Well my husband said..." Except she said it in a heinous Virginia accent and then finished the sentence with a really stupid statement. Imagine it: "Way-el, mah husband said that I ain't got to sleep on the couch no more; all we have to do is buy a bigger mattress." What? This woman amused me to no end.

Another funny co-worker was the bitter old lady in the office. You know the one, nothing was ever okay in her life, everyone was out to get her. She would call her husband and yell at him on the phone and then, after they hung-up, tell me how he snores and is a good-for-nothing bastard. She really hated our boss and whenever he left the room she would say "Day and night that man gives me headaches, always blaming everything on me. The only way I stay here is to remind myself that he is going to hell." Yikes! I almost miss her.

My friends and I turned into hermits this summer. The only friend I saw was the one who worked in the restaurant my family and I eat at all the time. I was just so tired. I didn't want to go out, I just wanted to sleep. I would get home at 6:00 (I hit killer rush hour) and watch "The Simpsons." I guess I finally understand why my Dad is so tired at the end of the day. The two of us actually bribed my little sister into doing all of the chores for us; if she set the table, cleared the table, emptied the dishwasher and loaded the dishwasher my dad would buy her that heart charm bracelet from Tiffany's. Well, as far as I know she is the only ninth grader at Sherwood High School with such nice jewelry.

Boy am I glad to be back! No responsibilities except classes, no 12 hour days, no annoying coworkers, just happy students and late nights.

You know what that woman in my office would say at a time like this, "way-el mah husband said..."

A place of our own

By Laura Day

By now, a week and a half after the fact, most of the students on campus have heard of the devastating earthquakes in Turkey and California. However, international news like this does not spread rapidly on campus. Due to this 10-day info-gap, much news and current events go either unnoticed or unacknowledged by the majority of Bucknell students.

In the news this week were the breaking stories of Hurricane Dennis's threat to the coast of North Carolina and the peace agreement between Israel and Palestine. And if these issues seem too esoteric, a Penn State student was found unconscious with a .68 blood-alcohol level a few nights ago.

No matter what magnitude an event may carry, inside the Bucknell Bubble, news seems to be swept under the rug and left to collect dust for these four years of a student's education.

No matter how many classrooms in which a student sits, nor how many lectures to which a student listens, his education will be futile without finding relevance to our ever changing and increasingly interdependent world.

The only efficient way to stay informed in our fast-paced society is to keep up with the "current event race." Unfortunately, when the C-Store sells a newspaper that is three days old, it is difficult to even keep up with the onslaught of information, nonetheless stay at the front of the race.

Furthermore, a vast majority of students are hooked up to the Internet through Bucknell's Resnet system. Although this provides access to news websites, such as MSNBC.com and CNN.com, seldom does one find these sites on a student's Favorites list. Instead, students spend time talking to students all over the world or friends who live practically in their backyard.

Despite this constant use of the technological highway, the news of the day remains an enigma. Until students realize the importance of current events in our world of increasing telecommunications and shrinking barriers, the Bucknell Bubble will simply continue to suffocate them.

And as Bucknell is attempting to teach the future generation how to better our world, it is counteracting its attempt by not emphasizing the importance of current events.

Together, students and teachers must relate what is taught at this university to the current events of society. This way, the future can truly be brighter with the hope that the learned individuals of Bucknell will put their knowledge towards the betterment of the world.

Today it's Bucknell, tomorrow it's the world, our futures and more . . .

By Jim Leahy

College is not a life sentence, or is it? In the last few months, weeks, and days before August 20, in an effort to keep myself psyched, I made it known to everyone around me that going to college did not mean the end to our lives.

To the contrary, college would fly by so fast that it would seem like it never happened. Or so we hoped. But upon further review, it came to me that college could be called a life sentence. And funny though it may seem, that realization came while running by myself in solitude on Sunday near the golf course.

Life can be defined both as our general existence on this planet and our everyday relationships and the course of events we encounter between birth and death. For my argument, I will define life as what we do with ourselves after college. By using that definition, you might be able to see what I mean when I call college a life sentence.

When we are sent away as "adults" upon the close of our high school careers, our lives flash before our eyes. We cannot believe that sleeping, eating, learning, and other routine activities will not take place at home but rather at some alien place that is in many cases far from home.Some people are scared and others are upset but everyone is excited.

"For the first time in our lives, we are free and we have a whole new path to cut through the jungle of life."

For the first time in our lives, we are free and we have a whole new path to cut through the jungle of life. What lies at the end of the path many people do not know but whatever it is, our lives here at Bucknell have something to do with it. Getting involved, doing the reading, and talking to professors will have a profound impact on what we can accomplish upon graduation.

Learning, though, is the biggest part of our life here. Learning how to become adults in our actions, thoughts, and approach to life. Learning when to say "no," when to walk away, and when to just deal with it. Knowing when to keep everything in moderation and when to just not do anything. All of these things can be learned here. One just has to know where to look.

Freedom is another thing that many of us are experiencing for the first time. We can do what we want when we want to. Freedom lets us learn all the information in the world. When you are feeling stressed out one day, just look from the Academic Quad at the Federal Penitentiary off in the distance. That should be enough inspiration to work even harder so that one day you are not back in Lewisburg for the wrong reason.

So you see, college is a life sentence, a sentence to learn how to live life to the fullest. Class of 2003 that is my message to you. Everyone here should learn the lessons of life because they will become necessary when this place is nothing but a fond memory. Good luck to you all.

Is the east or west the coast with the most?

Seattle, Washington native gives his first impressions of Lewisburg and the east coast in general

By Kevin Mueller

College: a time of new beginnings, of lasting friendships, of higher learning and of late night cramming sessions. And while these common characteristics can be said about hundreds of colleges around the nation, each school comes with its own unique traits that can influence its students in many different ways.

Before applying to Bucknell, I preformed the usual investigation associated with a college search and found the school to be a compelling choice. Needless to say I applied, was admitted, and chose to come across the county to the borough of Lewisburg for my continued education.

Coming from Seattle, you might expect that I would have had no concept of what life was like out here on the east coast. On the contrary, I had been advised by more then one source as to what I should expect. Parts of the advice have proved themselves true as others have seemed to be fiction.

The Abercrombie/J-Crew stereotype has defiantly held strong. Many Bucknellians, from seniors to freshmen, enjoy this pricey brand of clothing. But who is to say that this is a negative trade mark. From what I have seen, students here have received equal treatment regardless of garment preference.

Another rather negative but untrue label that I had heard, dealt with the prevalent "snobby" attitude that was rampant throughout the campus. When I was first informed of this aligation, I was quick to assume that it was a direct result of the east coast's "social class system" which from my understanding was prevalent throughout the flatter side of the country.

You see, out west there is a general knowledge that we are much more laid back and accepting then our eastern counterparts. So upon my arrival to the school, I thought I would be getting glared, scoffed, and snickered at for the first few weeks until I found my place. Not true. In fact I found that my experiences were just the opposite of these initial misgivings. The students have seemed more friendly and less up tight then most of my Sea-town bros back home. This was definitely a pleasant surprise.

The lack of diversity on this campus is more than enough cause for distress. Although before coming here I knew for a fact that the ethnic make-up of Bucknell was primarily homogeneous, I was still taken aback by the overwhelming presence of Caucasians strolling to and from class. This was one part of the Bucknell community that my Seattle up bringing did not prepare me for.

To be honest, there really is not a whole heck of a lot of difference between folks from the west and east. Sure, the New Jersey students (which seem to comprise over half of the population) might have a little twang to their speech. And the Long Islanders; well, I won't even go there. But we are all here for the same general purpose.

Although sometimes partying can overshadow the education that has brought us together, I think there is definitely a feeling of "being in the same boat" which only adds to the prevailing positive attitude here.

A capella Groups Reign Supreme On Campus

Silhouttes, Bison Chips, and Two Past Midnight are back and better than ever with new talent

Allison Bagby

THE SILHOUETTES

The lovely voices of the Silhouettes, the University's only all female a capella group, are celebrated throughout campus. A student run organization, some members hold leadership roles, however strive to work as a team. "Generally, we work as a cohesive group and lead each other," Amber Riley '01 said.

After holding auditions over the weekend, the group welcomed three new members: Molly Campbell '03, Kate Marr '01 and Caitlin McGeehan '03. "The new members are all extremely impressive and will add both strength and dimension to the solid existing group," Beth Van Epps '02 said.

An annual tradition, "Christy's" will open the Silhouettes' season over Parent's Weekend with performances Friday, Sept. 24 and Saturday, Sept. 25. This event also includes the Bison Chips and Two-Past Midnight.

Throughout the year, the Silhouettes will perform at Parent's Weekend, Sibling's Weekend and BAC Coffee House nights in the Bison.

Last year, the Silhouettes toured in Maryland over fall break and spent time performing at Vassar in the spring. This year they will travel to Boston, Tufts, Yale and Penn State.

The Silhouettes most current CD, "I Never...," is available in the Bookstore. The group hopes to produce a new CD, with old favorites and new songs, this spring.

"We arrange our own music from either an existing arrangement that we will make into an a capella piece or even straight from a recording. We will sit down and write out all the parts, or sometimes we will have a 'jam' session where we will all get together and improvise parts that we know. That's the fun part," Riley said.

Beetna Kim—The Bucknellian

The Silhouettes gather during auditions for new talent. Three new members were selected.

Beetna Kim—The Bucknellian

Two Past Midnight get together to select new members and practice for their first performance of the season. They will sing at "Christy's" over Parents' Weekend.

THE BISON CHIPS

Though strange, it is not uncommon to encounter a group of men singing Madonna's "Like A Virgin" on campus. These daring individuals make up the University's all male a cappella group, the Bison Chips.

Formed nearly 25 years ago, the current Chips are made up of a handful of men who, according to their web page, share a "love of wine, women and song."

"The Chips are different than most singing choirs, it's a brotherhood of guys who have so much fun hanging out together," Jordan Rice '02 said.

The Chips have a new CD coming out in September and some of the songs can be accessed on the University's home page under "Sound Booth." Along with the Silhouettes, the Chips will perform at "Christy's" over Parent's Weekend.

At the time of publication, the Chips had not revealed their new members.

TWO PAST MIDNIGHT

"Hello and thank-you for choosing Two Past Midnight for your listening pleasure. Please return your seats to their upright positions and please stow all children in the overhead compartments. Have a very nice day!" That little quote from a boy named Jesse lies somewhere in the middle of one of Two Past's songs in the "Sound Booth" on the University's homepage.

Two Past Midnight is the University's student-run, co-ed a capella group. "Members of Two Past have a lot of fun while entertaining Bucknell and the surrounding area," Matt Griffin '02 said. Last year, Two Past traveled to Lewisburg, Williamsport and Elizabethtown. This year they hope to add a performance at Penn State to their agenda.

The group's repertoire includes modern, pop, vocal jazz and oldies. The diversity of the members is reflected in the diversity of their songs.

Six new members were recently welcomed: Jeff Clark '03, Becca Dykema '02, Adam Hargus '03, Amanda Martin '03, Melissa Milanak '03 and Brian Strojny '03. Now 15 strong, Two Past hopes to release a new album in the spring or early next fall.

Beetna Kim—The Bucknellian

The Bison Chips warm up for the 1999-2000 season.

Weis Center announces performing arts season

Robin Manning

While Lewisburg may lack the action and glamour of a larger city, the Weis Center for the Performing Arts' 1999-2000 season offers a dose of the activity and energy found on the busy streets of New York City.

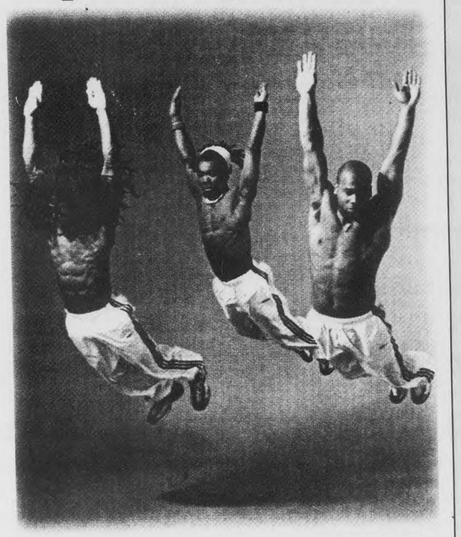
This year's events include talented artists from country singer Kathy Mattea to concert pianists like Lois Svard and hip-hop dancers in the Rennie Harris Puremovement as well as classic plays including Shakespeare's "Macbeth."

The University invited performers from around the world to charm and enthrall the community. Gaelic Storm, famous for the steerage party scene in *Titanic*, has played in London, Frankfurt and Tokyo. The Acting Company and the Paper Bag Players are making their annual stop in Lewisburg while completing their forty-first season of performances.

Productions in the Weis Center this season are for both individuals interested in a quiet evening of classical, orchestral music as well younger audiences. The Paper Bag Players specialize in family amusement with stories, songs ans plays enacting typical household situations.

Performers like Kathy Mattea and the Rennie Haarris Movement might appeal to young adults while Carl Neilsen's Philharmonic of Odense and the Dayton Ballet of Romeo and Juliet cater to the more mature audiences.

Pianist Lois Svard will open the season with a performance of Franz Liszt's Sonata in B Minor and works by Eric Satie, Igor Stravinsky and Alexander Scriabin. Svard will perform at 8 p.m. Friday, Sept. 17 in the Weis Center.



Courtesy of the Weis Center

Rennie Harris Puremovement is one of the many performers slated for the Weis Center this year.

Dance opportunities for everyone

All levels encouraged to participate in dance department

By Courtenay Mastain

Opportunites to dance at the University are numerous, beginning with open auditions for the Bucknell Dance Company at 2 p.m. this Sunday in Tustin Dance Studio.

Known to its members as BDC, the company provides devoted dancers an opportunity to work and learn together and then perform in concert at the end of each semester. Plans for the year are in progress with a variety of commissioned pieces from guest artists as well as student and faculty choreographed pieces scheduled for the fall concert on Dec. 3 and 4.

Danna Frangione, professor of dance, will choreograph a piece for the fall concert while the spring concert will feature Professor of Dance Er-Dong Hu's restaging of a major Chinese folkdance. The fall concert will also feature pieces choreographed by Jen Schmermund '00 and Sarah Wagner '01.

"The fall concert will be physically demanding and technically challenging including two commissioned pieces from international dancers. Commissioned dancer Heather Waldon's piece is in celebration of the focus semester on Ireland and will deconstruct Irish dance," Frangione said.

Another performance opportunity is the Choreographer's Showcase. In its second year at the University, the showcase, founded by Cara Alaimo '00, Krystal Rickard '00, Rianna Romanowski '00 and Claire Welsh '00, includes dancers at all levels.

"The department of theatre and dance has been changing over the past few years. With the dance department growing in size and classes filling up, it has also become more competitive. The showcase is another way to get people dancing," Romanowski said.

"The showcase is a way to enable dancers at all levels to experience an alternative and less traditional dance environment," Frangione said.

For those enrolled in dance classes, a studio concert on Nov. 4 will allow everyone involved to perform as a celebration of dance.

All of the concerts are fully produced by the department of theatre and dance which includes several key individuals. Heath Hansum will design the lights along with several interns and students while Elaine Williams will design and build the scenery for the fall concert. New to the University is Paula Davis-Larson who will design and create the costumes.

"We already have a good dance community and are looking for more people to enjoy dance at all levels," Frangione said. "The dance community's embracing nature strives to find opportunities for everyone to perform."

Art gallery unveils two new exhibits

Yu-Ling Huang—The Bucknellian

Bucknell's Art Gallery showcases pieces from "Mel Edwards and Seymour Lipton: Drawing and Sculpture".

By Courtenay Mastain

A reception last Friday unveiled two unique exhibits: "Videophoto: Laurie Long, Alix Pearlstein, Joe Sola" and "Mel Edwards & Seymour Lipton: Drawing and Sculpture.

The work of three young artists, "Videophoto" moves between the two mediums of video and photography to explore issues of desire and identity. Stuart Horodner, director of the Art Gallery explained the variety of method's each artist used in creating their work.

Laurie Long used a tiny pinhole camera to document the enthusiasm and boredom of the dating process; Alix Pearlstein exploits depth of field devices which allow her to interact with magazine cutouts; and Jow Sola records, among other things, the fear and thrill of amusement park rides. The Art Gallery features combinations of still photography and video tapes by each artist.

Both Seymour Lipton and Mel Edwards work in metal and claim a commitment to a humanistic art based on drama, history, politics, and formal rigor. Yet each artist represents a different, distinct generation of American sculptors.

Though the Art Gallery owns drawings by Lipton and sculptures by Edwards, this is the first time the artists' works will be exhibited together.

"This project room exhibition will feature works from our collection and borrowed works to examine aspects of welded and assembled sculptures and the relationship between preperatory drawings and finished works," Horodner said.

The Art Gallery is open 11 a.m. to 5 p.m. on weekdays and 1 p.m. to 4 p.m. on weekends.

Yu-Ling Huang—The Bucknellian

"Videophoto: Laurie Long, Alix Pearlstein, Joe Sola" is another attraction at the Art Gallery this semester.

An exciting year for theatre

The exceptional class of seniors involved in theatre at the University ensures that the 1999-2000 season will be a unique experience for the department of theatre and dance.

"The training these students have experienced through classes and stage work will reach fruition this year," Associate Professor of Theatre Gary Grant said. "In order to put on a really good show, you have to train."

The culmination of their efforts will be realized with more student-directed shows than ever before. Renee Brody '01 and Andrew Baldwin '00 will direct for the first showcase.

Returning to the University, Associate Professor of Theatre Bob Gainer will direct "Tea in a China Cup" as the mainstage production for this semester in October. Students from Theatre 240 will direct "Cocktails" in November and December.

In addition, many of the seniors are participating in independent studies and will give lecture-demonstrations in their area of study. Donald E. Jones will present a lecture on the African influence on Greek drama, while Andrew Baldwin will discuss "The Maids", the show he will direct this fall. Jen Schmermund will incorporate both dance and theatre into her presentation, Liz Asti will conduct a lecture and workshop on the music of Stephen Sondheim.

"This class of seniors is a very diverse group with crossing interests," Grant said. With a challenging line-up of shows, there are many opportunites for students to become involved in theatre both performing and backstage.

I Heath Hansum, lighting designer and technical director and Elaine Williams, associate professor of theatre and scene director, encourage students to take advantage of classes as well as the experience of working on a show. New to the University, Paula Davis-Larson will design and create costumes for many of the shows along with her assistant, Amy Rinker.

In addition to the shows put on by the department, there are other opportunities. The theatre group Company will announce its auditions later in the semester. A student-run theatre group, members gain experience in all aspects of theatre by rotating duties for each production. Backstage experience can also be gained by working on performances within the dance department.

Later on in the year, Jeremy Walker '00 and David Carpenter '00 will direct "An Evening of Tom Stoppard" as part of their senior theses. Auditions will be held in November.

Opportunities to become involved in theatre at the University are numerous. "This is going to be a very exciting year," Grant said.

Beetna Kim—The Bucknellian

Students attended an Open House hosted by the department of theatre and dance this past weekend.

Broadway Theatre Review

"De La Guarda"

By Andrew Kohn

"For an uncomplicated visceral, sensual, primal thrill, try dropping in," *Time Out* said. "De La Guarda" is definitely a theatre adventure worth experiencing. The play opens with actors on bungee cords flying over the top of a large piece of paper stretched across the theatre. The audience's view is limited to silhouettes streaming over their heads as balloons and other strange paraphernalia fall onto the paper overhead. With low lights, the music evokes a rainforest ambiance. And then suddenly the silence is broken.

Actors begin to pop their heads through the paper with their bodies soon following. Before the audience becomes aware of the scene, bodies fly down into the crowd, then bounce back up towards the ceiling.

The pounding of drums creates the rythmn for the actors' dance under large waterfalls. Water splashes everywhere. The energy generated by the actors electrifies the audience as they leap around the theatre.

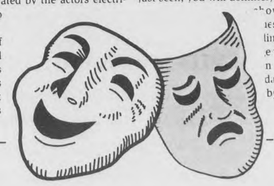
After 20 to 30 minutes of leaping actors and waterfall dancing, the audience learns to expect the unexpected. As a sudden flash of bright light fills the theatre, the actors are amongst the crowd.

Did I mention that there are no seats at this show? The actors go from person to person engaging them in a variety of dances. A man behind me found himself lying on the wet cement floor after an actress flung him down. In the next second the woman next to him joined him on the floor with an actor wrapped in her dress. Anything goes at "De La Guarda!"

Throughout the remainder of the show, the actor's continue to soar overhead, providing a brilliant show defined by the power and energy of the actors.

And then with a flash the show is over. The actors are covered with sweat, water, paper and an aura that can only be explained as pure joy. The audience can do nothing but stare in awe and clap vigorously.

When you leave the show you may be a little wet and have a little dirt on you, but you know you have experienced something wonderful. Whether you are astonished, thrilled, or totally amazed by what you have just seen, you will definitely feel something. It is not a show you leave saying, "I guess it was good." The traveling "club" comes from Argentina and can still be seen in New York. "De La Guarda" should be experienced by all.



Add some spice to your life and write for A&E...call Courtenay x4070...I'm waiting.

University receives grant from Luce fund

By Kathryn Kopchik

LEWISBURG, Pa.—The University has received a five-year $410, 917 grant from the Clare Boothe Luce Fund to support women in science and engineering. Under the grant, Alison Draper, assistant professor of chemistry, was named a Clare Boothe Luce Professor for the next five years. She will join the faculty at the University this fall.

A graduate of Clark University, Draper holds a doctorate, with honors, in toxicology from the University of Kansas Medical Center. Her research has focused on chemical inhibitors as a means of identifying the role of specific human enzymes in the metabolism of drugs and other xenobiotics (substances that are foreign to a biological system).

Draper has conducted her research at the University of Massachusetts Medical Center and, since 1996, as a postdoctoral fellow at the University of California at Davis. Beginning with a project to characterize the exposure of firefighters in Worcester, Mass., to diesel exhaust, Draper continued her research with a dissertation project exploring the potential for clinical drug interactions to be predicted more readily.

Scott Solomon—The Bucknellian

Alison Draper, named a Clare Boothe Luce Professor, will be conducting research at the University in biochemistry.

Following her arrival at the University, Draper plans to examine the response of macrophages (large white blood cells that ingest foreign substances and infectious microorganisms) and inflammatory cell lines to urban air particulates. This exposure will serve as a model for understanding how enzymes are regulated in these cells when exposed to a complex mixture containing components that both stimulate and suppress enzyme activity.

Draper also will work with undergraduates in an introductory environmental chemistry course as well as faculty and students in the University's interdisciplinary program in cell biology/biochemistry.

The Luce chair is named for the late Clare Boothe Luce, "whose remarkable career spanned seven decades and nearly as many professional interests: i.e. journalism, politics, theatre, diplomacy, intelligence," according to Henry Luce III.

"Everything she did seemed to be unprecedented. In her time there were no footsteps to follow. When she was born, in 1930, there was no significant feminist movement, no women politicians, no list of distaff leaders and writers and thinkers. By the time of her death in 1987, she had truly become a national symbol of women's accomplishment and potential.

"Under the terms of her will, she chose ... to establish a legacy that will benefit current and future generations of women with talent and ambition in areas where, in our society, they continue to be grossly underrepresented. Those fields are science and engineering, "he said.

Macromedia delivers

By Scott Hagadorn

Internet statistical expert Forrester Research reports that the average time spent on a web page is one minute, seventeen seconds. This statistic could soon be easily changed, as Macromedia's Flash 4.0 is redefining the capabilities for creating "high-end web sites."

Flash software incorporates vector graphics and animation features for developing advanced multimedia web sites. Animated images, high fidelity sound tracks, interactive sites, you name it, Flash can create it. Like Realplayer and Quicktime, Flash requires a browser plugin to view its embedded HTML movie and advanced multimedia features.

One particular web site, balthaser.com, used Macromedia Flash to create one of the most graphically advanced web pages on the net. Taking Flash software to the extreme, Balthaser created a site that incorporates state-of-the-art design with stimulating sound effects. It takes nearly 12 minutes to download the 947K page but I urge you techsavy individuals to have the patience and check this one out. The greatest thing about Balthaser's site is that it is essentially a movie, so there is no need to click through cumbersome links to view the entire site. However, you do have the option to stop the movie and click on certain buttons if something catches your eye.

"The average time spent on a webpage is one minute, seventeen seconds."
—Forrester Research

Other sites that are incorporating Flash to attract visitors include Ford.com, audiusa.com, and novell.com. It is apparent from the complexity of these URLs that high-end web development requires resources that most internet start-ups can't get a hold of. Balthaser Studio's base price for the development of a 25K movie with Flash is $2500. I think that most of us would opt for spending $299 for the actual software and attempt to learn it ourselves. Regardless of the price, Macromedia has delivered one killer application in the world of web development.

Reports reveal dangers of prolonged creatine supplements

Part One of a two-part creatine series

By Katherine Nowak

In the past 40 years, the NCAA has contributed lengthy efforts to banning performance-enhancing substances which had hit the market, gaining sudden popularity before ever being tested or approved by the FDA. According to Nutritional Supplements, there have been approximately 88 substances banned. The controversy regards one such substance that was omitted from the 1999 list of banned substances- xreatine. Never having been FDA approved, creatine has become the latest fad in athletics, occupying the shelves of GNC stores nationwide.

Sarah Debrun—The Bucknellian

Creatine occurs in the human body naturally as an amino acid produced in the liver and stored in the muscles. Ninety-five percent of creatine is found in skeletal muscle, with other concentrations in the brain and the heart, according to a study done by Sahelin in 1998.

During physical activity, you burn energy in the form of adenosine triphosphate, or ATP. The molecule is converted into ADP after the body breaks ATP's high energy bonds between the phosphates and the rest of the molecule, releasing energy. The body's supply of ATP is not infinite, and the ADP must be converted back to ATP. The conversion process is accelerated by creatine, which can also be found in one's diet—fish, milk, and red meat.

There exists the possibility, that, if creatine is taken as a supplement over an extended period of time, the body will eventually cease producing its own, and therefore form a physical dependence on the supplement, much like any other physical dependence associated with drug use, says Nutritional Supplements. One may soon need to raise the amount being consumed in order to attain a consistency in energy and exercise capacity.

Dependency is only one of the dangers. Creatine also alters the amount of hydration in a muscle cell, increasing the amount of water it can retain, and therefore increasing the work potential of individual cells. The after-effect of this on the body is not only an artificial increase in muscle mass, but extreme dehydration, as well as possible damage and tears to muscle fibers. The growth in muscle size can overstress one's bones and tendons, which are unprepared to take on the task of supporting a novel, increased amount.

Apart from muscle strain and injury, there have been reports of adverse effects of creatine on the kidneys and the liver, including kidney stones and liver failure. The side effects may be due in part to chronic dehydration caused by the supplement and the lack of water intake.

There lies a point at which over-the-counter performance-enhancers permit an individual to surpass the apex of his natural ability. The consequences can be grave. Western culture's obsession with the ideal body has influenced many to go to great lengths to achieve this perfection. Creatine has been around for only a decade.

Society has already witnessed reports of various side effects, as mentioned by Nutritional Supplements— asthma, headaches, muscle cramping, kidney stones, nausea, dehydration, increased sensitivity to sunlight and even mental changes involving increases in aggression. Long-term effects are therefore yet unknown, but the current warning signs should not be ignored.

EVOLUTION AND DOMESTICATION
Gary Sojka, department of biology
FORUM 1: TUESDAY, SEPTEMBER 7, NOON
WALLS LOUNGE, LANGONE CENTER
Lecture will encompass the theory of Evolution, previewing a discussion about the close association between humans and other species. The human obligation to earth's plants and living creatures, including those domesticated by humans, will be addressed.

DO RELIGIONS EVOLVE? RELIGION AND SOCIAL EVOLUTION
John Burris, department of religion
FORUM 2: TUESDAY, OCTOBER 5, NOON
WALLS LOUNGE, LANGONE CENTER
Species competition as addressed by Charles Darwin and the contemplation of Darwin's theory in relation to it being the product of his time and social setting more so than an observation of nature's processes.

EXTINCTIONS AND EARTH HISTORY
Craig Kochel, department of geology
FORUM 3: TUESDAY, NOVEMBER 16, NOON
WALLS LOUNGE, LANGONE CENTER
The talk will discuss the significance of the evolutionary sequence, looking at the times and causes of extinctions, as well as modern processes paralleling extinction.

SCIENCE & TECHNOLOGY

Former University president and microbiologist raises endangered sheep

By Kathie Dibel

LEWISBURG, Pa.—Gary A. Sojka, microbiologist and former president of Bucknell, spent many nights sleeping in the barn this spring. His wife, Sandy, wasn't angry at him. It was lambing time for the Sojkas' rare Tunis ewes, and some of the mothers needed help during birth.

Eleven new rust-colored lambs are now gamboling around the farm, much to the delight of the Sojkas. Not only have they added to their flock of nine ewes and two rams, but the newest arrivals wil help preserve the endangered breed of sheep that first came to American shores in colonial times.

The Sojkas join George Washington and Thomas Jefferson in raising the Tunis sheep. The breed came from Tunis on the northern coast of Africa and eventually was brought to America. The original American Tunis sheep were two rams that survived the ocean voyage to the colonies.

"The question is, to whom were they bred? But their offspring were among the first domestic ruminants developed in America," Sojka said.

Courtesy of Public Relations

Gary A. Sojka, microbiologist and former University president, trims the hooves of one of his Tunis ewes. Sojka is raising the sheep to help preserve the endangered breed that first came to America in colonial times.

The breed became practically extinct during the Civil War since most lived south of the Mason-Dixon line and were consumed by starving Confederates, Sojka said. Other breeds were brought in later, and animal husbandry became more sophisticated. Sheep, and other domestic animals, were bred for certain commercial characteristics. As scientists manipulated genetics in an attempt to perfect a breed, genetic diversity dwindled alarmingly, he said. In Western Europe, for example, 230 native breeds of cattle existed at the turn of the century; 70 of those had became extinct by 1988 and 53 were endangered.

"The progenitor breeds are being left behind," Sojka said. "The livestock is becoming more and more identical, and the risk is enormous. We continue to eliminate natural environmental resistance. A single, deadly pathogen could come along and wipe out an entire breed in the absence of genetic variety. We need to have something to fall back on that is less a part of a factory. Let's have a few safeguards."

There will be no Dollys (the cloned sheep) on the Sojka farm, just lambs born the old-fashioned way, one or two at a time.

The Sojkas became interested in raising the endangered domestic sheep after he retired as the University's president in 1995 to become a member of the biology faculty. He and his wife bought a farm 22 miles from campus. Sojka was casting about for animals to raise that would not only be fun for them but have relevance for his students.

He started with five of the Tunis sheep three years ago. Sojka received his Ph.D. in genetics from Purdue University and with this background decided to try to find a genetic link among the pedigrees within the Tunic sheep. Between 1860 and 1975, the Tunis flock was decimated, he said. "We don't know what happened in between those years to all the distinctive traits. It's a very interesting genetic journey."

Although Sojka has authored or co-authored more than 40 published papers on carbon metabolism and genetic adaptations to the environment in photosynthetic bacteria, he's been a long time away from the research lab. He served 11 years as University president and 13 years as the dean of the College of Arts and chairman of the biology department at Indiana University in Bloomington, Ind.

Courtesy of Public Relations

In the lab, Sojka, with students Michael Wolujewicz '00 (center) and Michael Hemphill, '00 examine blood samples from the Tunis ewes for clues to their genetic history.

The research he wants to do with sheep is molecular genomics, which has required a lot of reading and research since his retirement from educational administration. "I'm the oldest post-doc in academia," the 58-year-old Sojka laughed.

Undergraduate research is a top priority at the University, so Sojka has enlisted the aid of students to conduct some of the research This summer, Michael Wolujewicz, a senior biochemistry major from Clarks Summit, Pa., and Michael Hemphill, a senior pre-med student from Franklin Lakes, N.J., looked for genetic markers in individual sheep to identify ones that are identical.

"We can use biology to fill in some gaps in their archival biological history," Sojka said. "This is modern biology. We'll give it a shot. Where it goes nobody knows."

Hemphill's participation is through the biology department's summer research program. He has worked with Sojka in the laboratory since his sophomore year. Wolujewicz is an Undergraduate Research Program scholar.

"After our initial preliminary steps have been covered, it can be possible to eventually trace the origin of the first American breed and uncover its relatedness to other breeds, " Wolujewicz wrote in his research proposal. "Therefore, our results may be of particular importance to breeders and other wildlife managers."

Sheep research is a whole lot grubbier than working with a cage of white mice.

The students went to the farm to collect blood samples from the lambs that they took back to the lab to examine markers of polymorphic regions DNA that are genetically distinguishable among the sheep. By the time they got samples from the frisky lambs for their research, Hemphill and Wolujewicz were sweaty, dirty and bloody.

"This has been a great experience," Wolujewicz, who plans to be a dentist, stated. "Even handling the sheep was good, from collecting samples on the farm to working in a molecular lab."

"It combines both worlds," said Hemphill, the future doctor. "That was the first time I used a needle. We are learning valuable research techniques, and making decisions on our own."

Sheep also must be wormed, inoculated and sheared. Their hooves must be trimmed. (Mrs. Sojka refers to the hoof-trimming as a pedicure). The lambs must be delivered. The former college president has traded in his wing-tips and well-tailored suits for boots, jeans, T-shirts and a ball cap. He does the work, with help from Mrs. Sojka and some farmhands.

As a biologist, Sojka is enjoying handling as many of his own veterinarian chores as possible, but calls in a local vet when needed.

All of the sheep have names, and the Sojkas know each one and who begat whom. "Ethel had Elvira and Natalie had Naomi," Mrs. Sojka related. They name them because as she said, "It's hard to talk to Number 2743. They all do have different personalities."

In addition to working with upperclass students on research, Sojka teaches a first-year foundation seminar on domesticated animals and plants, drawing on his research and experience with endangered breeds. He also teaches introductory biology courses.

A core part of the seminar is teaching "There is a covenant between us and those animals on whom we depend," Sojka said. "We don't want to anthropomorphize or sentimentalize them, like Babe the Pig. But we owe them, and the bond between us is important. We give the animals respect, kindness and protection. That's our deal with them. What we want to get across to our students is our proper place among the living creatures on this planet."

Sojka plans to build his flock to produce 90 lambs a year, but the sheep were just the first endangered domestic breed the Sojkas decided to raise on the farm. They now have 24 cuckoo Dorking chickens.

Yu-Ling Huang—The Bucknellian

Gary Sojka examines samples in a further search of the sheeps' genetic pedigree.

New technologies will aid researchers in predicting coastal disasters

Learning how to track tsunamis could spare lives; tsunami research program leaders are hopeful

By Katherine Nowak

Since 1990, ten tsunamis, great sea waves produced by subsurface earth movement or volcanic eruptions, have taken more than 4,000 lives, reports the May 99 *Scientific American*. The inevitability of tsunamis necessitates better technology and an emphasis on the education of coastal communities about events that signify the possibility of a tsunami.

Picture the peaceful Bismarck Sea, 12 minutes before sunset. All around, men, women and children of Sissano, Arop, Warapu and other villages of the coast, sit by the lagoon. Meanwhile, deep in the earth, forces strain the underlying rocks beneath the sea and within minutes, an earthquake of a magnitude of 7.1 shakes nearly 19 miles of the coastline, deforming the ocean bottom and transforming the tranquil sea surface into a wave, rising a vertical 30 meters above the horizon. The village is flattened, taking the lives of an estimated 2,200 villagers, including 230 children.

This event occurred on July 17, 1998 in Papua New Guinea. A retired colonel, John Sanawe, witnessed the event, and recounted his story to Hugh Davies of the University of Papua New Guinea, calling the sounds "distant thunder, a nearby helicopter, that gradually faded for a few minutes before turning into a rumble similar to that of a low-flying jet plane." Sanawe was overcome by the wave, which swept him a kilometer into a mangrove forest on the inland shore of the New Guinea Bay, where other villagers lay upon broken mangrove branches, battered by debris. More than 30 survivors lost their limbs to gangrene (the death of tissue due to loss of blood), and to saltwater crocodiles and wild dogs which predated upon the villagers before help could arrive.

Courtesy of Environemntal News Network

Comparable disasters have struck Hawaii and Alaska, and today, research suggests that the West Coast of the United States is destined for a tsunami upsurge, due to a crustal plate of the Cascadia subduction zone off the Pacific Northwest coast, which is advancing under the continent of North America, and could lead to tragedy before 2045. As crustal plates slip past one another along a rectangular base inside the earth, quakes are produced, as the seafloor motion displaces the ocean bottom, explains *Scientific American*.

Three overlapping physical processes lead to the evolution of a tsunami: the generation by any force that disturbs the water column, propagation from deeper water near the source to shallow coastal areas and the inundation of dry land. Of the three, propagation is best understood and can be tracked by computer simulations that help predict future tsunamis and guide disaster surveys and rescue efforts. According to *Scientific American.*, the theory of propagation predicts that the deeper the water and the longer the wave, the faster the tsunami.

Most tsunamis occur in the Pacific Ocean, eighty-six percent of them caused by undersea earthquakes around the Pacific Rim. In the study of the physics of tsunamis, a primary detail is the differentiation between wind-generated tides or waves, usually observed in the ocean, and tsunamis. Tsunamis are not generated by the gravitational pull of moon or sun, as are true tidal waves, but by undersea earthquakes or volcanic eruptions, meteorite impacts and underwater landslides. Their speeds may ultimately exceed 700 kilometers per hour, and although not dangerous in deep water, they can speed silently and undetected across the ocean and arise as destructive waves as they surface at the coast.

Hawaii is therefore especially susceptible. Since 1895, says *Scientific American*, 12 damaging tsunamis have struck Hawaii. In 1946, Hawaii suffered the most destructive of all—a tsunami that took the lives of 159 victims who were killed by waves generated nearly 3,700 kilometers away in Alaska's Aleutian Islands.

One belief is that a tsunami once killed more than 30,000 people within 120 kilometers of a catastrophic eruption of the Krakatoa volcano in the Sunda Straits of Indonesia in 1883. The explosion has been said to have generated waves as high as a 12-story building.

Frank I. Gonzalez, Tsunami Research Program leader and director of the Center for Tsunami Inundation Mapping Efforts in Seattle's Pacific Marine Environmental Laboratory has documented three of the most recent devastating tsunamis: those in Nicaragua, Indonesia and Japan. He noted one situation on the Sissano Lagoon in a large quake of 1907, where people, after feeling the disturbance, walked to the coast in curiosity to investigate, thus warranting their confrontation with the tsunami.

This example accentuates the need for education and preparation. Over 300 million people live and work in coastal regions, and at least as many tourists travel through these areas every year, and there is little time between quake onset and tsunami formation to warn all of the danger.

Congress took action in 1997 and spent $2.3 million to establish the National Tsunami Hazard Mitigation Program. The states who have taken part include Alaska, California, Hawaii, Oregon and Washington.

Their partnership, says Scientific American, has chosen three focuses, estimating threat to specific coastal areas; researching how to expedite tsunami detection and their destructive potential; and teaching coastal occupants the appropriate action to take when tsunamis strike.

The formation of inundation maps provides guidance of threat evaluations and the recent development of six deep-sea reporting stations, a project known as Deep-Ocean Assessment and Reporting of Tsunamis (DART), can pinpoint the location of, for example, a large Alaskan quake and predict how long the stimulated tsunami would take to reach Hawaii.

In the next two years, the marine laboratory of Gonzalez plans to establish five such stations across the north Pacific. Gonzalez is hopeful, dedicating his time and efforts to both inundation mapping as well as to the station-building enterprise.

FEATURES

Bucknellians peer into the past:

Professor Dennis explores Bucknell's history in a new interactive website

By Kristen Jancuk

As you walk around campus day after day, have you ever stopped to wonder how the University developed into its present-day form? Where was the library? What was the main academic building? Now, students and faculty can explore Bucknell's history over the Internet though the Online Photo History, a new edition to the University website.

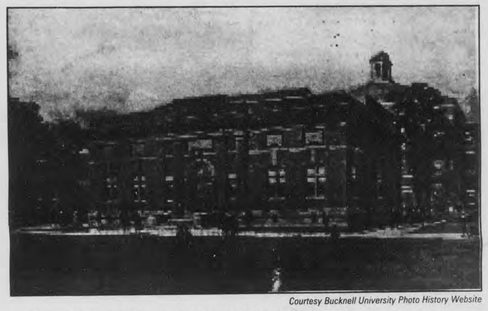
The Online Photo History, created by Professor Russell Dennis of the education department, provides pictures, maps and historic data about University life between 1865 and 1985. Visitors get a virtual tour of the campus, learning the layout of the University through various years and "visiting" old and new buildings as they appeared on campus.

Courtesy Bucknell University Photo History Website

The Vaughn Literature building in 1945 before Coleman Hall helped complete the academic quad.

Dennis began the photo history project as part of his EDUC 250 class in the mid-1970s. This class, entitled 'Higher Education in the United States," studied the historical development of higher education in the United States.

"I thought that students might be interested in the history of Bucknell as an example of how a particular type of higher education institution developed in the 19th century, so I focused upon the evolution of the University of Lewisburg from a denominational college chartered in 1846 to the emerging small University of the early twentieth century," Dennis said.



Courtesy Bucknell University Photo History Website

The Carnegie Library as it appeared in 1865.

At the time, Dennis took his classes on a tour of the campus to show how it had developed but sought a more useful tool for presenting the University's progress. He began developing a series of maps and used these for many years to show how the University had developed.

After receiving and ITEC grant in 1995, Dennis began work on the creation of an instructional resource for showing the historical development. With help from Mary Beth James in Computer and Communication Services, Doris Dysinger from Archives and Special Collections and several student assistants, Dennis completed the project for its initial use in the fall of 1996. Since then, it has continued to grow and was recently added to the University web site.

The project was first based on a 1958 map provided by Physical Plant, which was then modified to fit all the other years featured on the site. Buildings were added to or deleted from the map as necessary. In addition, photographs of buildings and the landscape, taken as close as possible to the year of the maps, are also part of the site.

The site contains text information as well as credits for the project and a description of its development. Several different sources were used to compile informations, including: *Buildings and Areas Notebook, Memorials of Bucknell University: 1919-1931* and *The Rise of Bucknell University.*

The University has recently denoted Dennis' photo history one of its "Noteworthy Websites." The history can be accessed directly from the University homepage.

Karate comes to campus

By Kristen Jancuk

The recent development of a Shotokan Karate Club on campus is certainly a welcome addition to the University. Students are always eager to learn something new and meet other studeents with a common interest. However the new group has also prompted some interested students to ask, "What is Shotokan Karate?"

Shotokan is a form of Karate that was founded by Master Funakoshi Gichin in 1922. There are several other forms of Karate that differ from Shotokan in various ways but all types are drawn from the same root, each taking a different view of fighting and training. The Shotokan view is that the purity of technique is the most important aspect of the practice of Karate. The idea behind this is that one elegant technique will finish off the opponent more quickly and efficiently than a series of complicated maneuvers. This ability is essential in a fighting situation.

The word 'Shotokan,' properly pronounced 'show-toe-kahn,' means "House of Shoto," referring to the building, or dojo, in which Gichin, the founder, originally taught Karate. Practicioners of Shotokan Karate in Japan almost never refer to their Karate by that name.

The word Shotokan is usually used by outsiders to describe the style done by the Japan Karate Association groups.

Though many people like the feeling of power that 'strong' Karate gives, self-defense is not the only purpose for Karate training. There are many reasons that people choose to practice Karate. Some people take up Karate to lose weight, to improve cardiovascular health or to enjoy competitive activity. Some take the Japanese martial arts very seriously and feel that Karate training will instill within them discipline and self-control. Ahren Green, who has organized the Shotokan Karate Club on campus, says "Practicing this art has many potential benefits, both mental and physical, which are realized though continual training... training benefits anyone willing to put their time and energy into satifying its demands."

The club has been recognized by the University and has received practice space in Harris lounge on Tuesdays and Thursdays from 6:45 p.m. to 9:00 p.m.

University celebrates "Hawaiian style"

By Kim Spigelmire

On Saturday, August 28th, the campus community gathered for its first all-class event of the 1999-2000 school year, the Bucknell Luau. Throughout the day, students from all four classes were able to participate in games and arts and crafts, listen to various types of music, and of course partake in a delicious outdoor picnic and barbeque.

The weather cooperated perfectly with the day's events, enabling students to better enjoy the activities. The Luau ran all afternoon, with students participating in various activites and enjoying the entertainment. The Luau began at 1:00 p.m. with the Latin music of the "Rumba Club." The band, which played a variety of Latin-style dance music, traveled from Baltimore, Maryland for the events. At 2:00 p.m., the open-play volleyball tournament began. In the spirit of good fellowship, though, the competition was never formalized and no prizes were awarded. A DJ took over for the Rumba Club between 3:00 and 4:00 in the afternoon, providing an intermission before the second band of the day, "Rasta Revolution," from Virginia Beach, Virginia, took over. Their reggae-style music had a slightly more mellow tune than the "Ramba Club."

In between listening to the "groovy tunes" and playing volleyball, students took place in other activites. Students busied themselves at several arts and crafts stations and sampled food from the concession stands. Students expressed themselves artistically by making "wax hands" in all sorts of poses and colors.

The afternoon was completed with a barbeque and picnic catered by Dining Services. The delicious menu included grilled chicken, sausage, salad, fruit salad, pasta and desert. Of all the activites, the cookout brought the most students together and the uphill LC area was pleasantly crowded. Overall, the day was a great way for studens to come together in a relaxed atmosphere before the first full week of classes.

NCAA places Bucknell on probation

Sanctions imposed due to violations committed by wrestling program in '94-'96

By Peter Van Emburgh

On July 15, President William Adams announced to the campus community that the National Collegiate Athletic Association (NCAA) Division I Committee on Infractions decided to place Bucknell's athletic program on four years' probation retroactive to February 1999.

The penalty and others stem from violations of bylaws committed in Bucknell's wrestling program between 1994-1996. Findings by the committee found violations of NCAA rules governing recruiting, summer athletics camps, employment of student-athletes and prospective student-athletes, extra benefits, ethical conduct and institutional control.

"For one thing, the NCAA appears not to have recognized the steps we have already taken in the past two years to ensure compliance with NCAA rules," Adams said.

According to the NCAA report on the infractions committed, the former head wrestling coach and former volunteer assistant coach provided an "improper recruiting inducement" to a prospect through summer employment.

The employment arrangement continued after the prospect became a student-athlete and the wages were excessive for the type of work performed and the actual hours worked.

The penalties affect both the university and the wrestling program, despite Bucknell's earlier self-imposed remedies.

The committee also noted that at the time of the violations, there were "inadequate institutional policies and procedures designed to deter such violations and a lack of institutional control over the wrestling program by the university."

Adams noted that in the fall of 1996, after learning of possible NCAA violations in the wrestling program, Bucknell itself notified the NCAA and began to investigate the infractions.

The violations related primarily to the recruitment of one student-athlete and the extra benefits paid to him.

The university placed the wrestling program on two years' probation, implemented additional sanctions, adopted detailed new reporting procedures in key compliance areas and hired a new coach.

"We also shared our investigation results with the NCAA and proceeded to cooperate fully with the NCAA's own inquiry, including two days of hearings before the Infractions Committee," Adams said.

The committee applauded the university's actions, and as a result, made a decision not to impose all the penalties available. The report noted that due to the seriousness and number of the infractions, the committee imposed a number of penalties regardless.

Some of the penalties include: four years probation of the entire athletics program, public reprimand, prohibition of new preferential grants in wrestling for two years, prohibition of post-season wrestling team competition (individual competition will be allowed, however) and prohibition of off-campus recruiting for wrestling for one year.

In addition, the university will be required to develop and implement an internal athletics compliance-education program, with annual reports to the committee during the probationary period.

"Because of the probation, we have to be extremely diligent in our compliance efforts," said Interim Director of Athletics and Recreation Brad Tufts.

"Bucknell remains absolutely committed to complete compliance with NCAA rules, and we expect no reoccurrence of a matter that has now reemerged into the public eye nearly three years after we self-reported the allegations," Adams said.

Tufts named Interim AD

By Carmen Mauriello

Mr. Brad Tufts, a 41- year university employee, was selected by President Adams to serve as the university's interim athletic director after the retirement of 11-year athletic director Rick Hartzell. A recently appointed search committee composed of Bucknell administrators, coaches, teachers, and students will choose the school's new athletic director by this spring.

Tufts is a 1959 graduate of Colgate. He moved to Lewisburg just a few weeks after his graduation to accept a position as Bucknell's Sports Information Director, and he has remained a resident of Lewisburg and an employee of the university ever since. Tufts served as the assistant director of public relations from 1964 to 1980, and he then became assistant director of athletics for sports information from 1980 to 1990. He began a 9-year tenure as associate director of athletics in 1990.

In addition to his full-time positions, Tufts has served the university in several other capacities over the years. He coached the men's golf team from 1967 to 1975, accumulating two conference championships and an impressive 80-38 dual-match record. He served as editor of the school's monthly news magazine "The Bucknell World" from 1976 to 1980. Tufts also chaired the Bucknell Athletic Hall of Fame Committee for 9 years. When women's golf originated as a Bucknell varsity sport last fall, Tufts became the team's head coach. He will continue to serve as the women's golf coach this year.

As interim athletic director, Tufts is looking to "administering the department in such a way so we continue to do the many good things that have gone on here in the recent past." He pointed to the school's excellence in the Patriot League and the numerous honors that Bucknell's student-athletes have received in past years as the strengths of the athletic program.

Another goal that Tufts set for the year is, "to manage the department funds and those we raise through the Bison Club in such a manner that we get the most out of them." Said Tufts, "I would be extremely gratified if by the end of this year we had increased giving to the Bison Club, because the giving has increased in each of the last several years."

The raising of funds for the athletic department is crucial for another aspect of Tufts' position: the planning of the new athletic center. He calls his involvement in this project "an exciting and important part of my job this year." Tufts will also continue working with the other Patriot League athletic directors in handling league affairs.

An unfortunate but critical aspect of Tufts' job this year will be managing the school's compliance program with the NCAA-enforced probation. The NCAA placed sanctions on Bucknell's athletic program over the next four years due to a major violation in the wrestling program that the school reported two and a half years ago.

See TUFTS, page 12

Langones contribute to proposed athletic complex

By Carmen Mauriello

Bucknell athletics took a giant leap forward with Kenneth and Elaine Langone's 11 million-dollar donation towards the development of a state-of-the-art athletic center. The new facility will be built on the current site of Davis Gym and will house a 50-meter pool, a 3,800-seat arena, and a 6,500-square-foot student fitness center.

The pledge was announced April 24 at the spring meeting of the Bucknell Board of Trustees by Arthur D. Kinney Jr. '56. Kinney, a former board member with Langone '57, is the chairman of the current fund-raising effort called The Bucknell Campaign. With the Langone's donation, The Bucknell Campaign has totaled commitments of $143.3 million.

The Langones honored Kinney for the, "wonderful, tireless, and unselfish work he has done for the university," by naming the center's swimming pool complex after him.

Courtesy of Bucknell World

Due to the generosity of the Langones, the center is nearly funded.

President William D. Adams recognized the Langones' pledge as "another magnificent manifestation of their strong dedication to our students."

"Ken and Elaine Langone's steady commitment to Bucknell over the years has allowed the university to become a stronger institution in many ways," Adams said.

Commitments toward the $23 million athletic center now exceed $17 million. Adams emphasized the need to quickly raise the remaining funding needed for the project. Said Adams, "I hope that all Bucknellians with interests in athletics and recreation, and who realize the strategic importance of the proposed facility, will now rally to the cause and help us complete this important project."

The sense of urgency about the new athletic center is due to the fact that Bucknell's athletic facilities are well below par in comparison to other Patriot League and NCAA Division I schools. Davis Gymnasium has become very outdated since its construction 60 years ago. Bucknell's pool is only 25 meters and is ranked at the bottom of the Patriot League. Bucknell students, athletes, and coaches have begun demanding an expanded and advanced weight training and fitness center to replace the overcrowded Annex.

Richard W. Johnson II, vice president for university relations, emphasized the importance of enhanced recreational facilities in increasing Bucknell's appeal to younger students. "The interest of the student body in general fitness is extensive," said Johnson. "Improved and expanded fitness and conditioning facilities will deliver a strong message to prospective students that Bucknell is vitally interested in their physical well-being as well as their intellectual and scholarly horizons."

Recently retired Athletic Director Rick Hartzell pointed out the need for an improved swimming and basketball complex. "In order to remain competitive in the Patriot League and in recruiting and training. With their pledge, Mr. and Mrs. Langone have helped ensure that Bucknell will continue to have one of the premier athletic programs in the country," Hartzell said.

Although a date has not yet been set for the center's groundbreaking, Interim Athletic Director Brad Tufts stated that part of the center would hopefully be completed by the spring of 2002.

BEYOND THE BUBBLE

Number 13 is Unlucky for Sampras: Pete Sampras, who was looking for his record 13th Grand Slam men's title, withdrew from the U.S. Open on Tuesday before his first match because of a back injury. The four-time champion has a small herniated disc in his lower back and said he injured himself during practice on Sunday. "I was hitting with (Gustavo) Kuerten," Sampras explained at a news conference. "I went for a shot and I felt my back go out a little bit. It was just a backhand return of serve and I felt something go. It was like being stabbed by a knife. I walked off the court and I saw the doctor and got some treatment. But the last 48 hours, I was struggling just to get around my hotel room. I got a CAT-scan and an MRI and it showed a herniated disc."

Sampras also said that the injury is one of the lowest points of his career. "It's very hard. I was looking forward to playing here. I love playing the U.S. Open," he said. "The way I've been playing the last two months, I really liked my chances here. It's just a fluke thing. I've never had back problems before."

The 28-year-old star will now have to wait until at least the spring of 2000 to break Roy Emerson's record of 12 Grand Slams, which Sampras tied at Wimbledon in July. Budge Patty was the last No. 1 seed to withdraw from the U.S. Open, dropping out of the 1950 championship with an ankle injury.

Woods Wins for the Fifth Time This Year: Tiger Woods came alive just in time on Sunday to hold off Phil Mickelson and win the NEC Invitational in Akron, Ohio by one stroke. The victory was his fifth on the PGA Tour this year. The $1 million payday makes Tiger the first player to surpass $4 million in one season. He now has played three full seasons as a pro and has won 12 times on the PGA Tour. "Winning never gets old," said Woods. "Not only when you can win, but when you can beat the best players." He has earned more than $8.9 million and already is 12th in career money.

College Football Kicks Off in '99: The college football season opened its 1999 season this weekend with five games featuring seven top-25 schools. The very first game of the season saw the third-ranked Arizona Wildcats get embarrassed in Happy Valley by Penn State. The Nittany Lions used Chafie Fields' 110 receiving yards to blow out the helpless Wildcats 41-7. The game also marked the beginning of Joe Paterno's 50th season coaching at Penn State.

The second game of the day was in South Bend, Indiana, where the University of Notre Dame took on the Kansas Jayhawks. The Irish took a 20-0 lead into the second quarter, but saw it dwindle to just 20-13 in a matter of two and a half minutes. Kansas looked ready to close the gap to four points, but Irish cornerback Clifford Jefferson blocked Joe Garcia's 49-yard field goal attempt. That play turned the momentum in Notre Dame's favor, as the Fighting Irish rattled off 28 unanswered points and cruised to a 48-13 win over the Jayhawks.

There were few surprises in Saturday's match up between top-ranked Florida State and Louisiana Tech. The Seminoles got 121 yards from star receiver Peter Warrick and a pair of touchdowns from Anquan Boldin, as they routed Tech 41-7.

The Texas Longhorns showed that they will have difficulty coping with life after Ricky Williams, the all-time leading NCAA rusher and last year's Heisman Trophy winner. The 16th-ranked Longhorns had three punts blocked by unranked North Carolina State and blew a five-point lead in the final minutes as the Wolfpack pulled off a 23-20 comeback victory.

The No. 9 Ohio State Buckeyes and No. 12 Miami Hurricanes squared off in New Jersey for the annual Kickoff Classic on Sunday. Miami quarterback Kenny Kelly completed 17 of 25 passes for 245 yards and one touchdown to lead the Hurricanes to a surprising 23-12 victory over Ohio State. It was the Buckeye's lowest point total since 1996 and the first time they lost a season opener since 1986.

Soccer kicks off with new beginnings

First-year Head Coach Brendan Nash institutes a new defensive system

Steph Metz—The Bucknellian

The men's soccer team hopes that recent injuries won't prevent an improved season.

By Justin Knox

The Bucknell men's soccer team is looking to improve upon last year's disappointing season. They are looking to regain some confidence, and rack up some wins, but it is not going to come easy for them.

First-year Head Coach Brendan Nash will try to restore some confidence to the team. One major change from last season is the employment of a new defensive system.

"We have been working extensively this pre-season on putting a new zone defense system into our game," Nash said. "Our two assistant coaches, Doug Hess and Eric Hymowitz, have really put a lot of time into the system."

Sam Graziano '01 feels that the system will help the team to also improve its offensive system, which struggled last season. "I think that the zone defense will be less tiring for us, and let our offense open up a little more," Graziano said.

Employing the new defense has turned out to be a bit tougher than expected. The team has been plagued by injuries during the pre-season.

"We've had five or six [members] of the team go down with injuries, and about half of those guys were involved in the new defensive scheme" Nash said.

The team remains optimistic despite the setbacks. "We are just going to play with the lineup a bit, I think we'll be OK" Nash said.

Geza Lendvai-Lintner '01 feels the same, "Hopefully those injuries aren't too extensive, and everyone can get healthy early in the season."

Nash also is looking for some specific players to step up and take more of a leadership role, including Graziano, Lendvai-Lintner, goalkeeper Nate Fitzgerald '99, and Nate Hopfinger '02.

The players seem to feel comfortable in this role, ready and anxious to accept this challenge.

"I'm just glad I'm in a position to be able to have the opportunity to help the team out" Hopfinger said. The team has eight freshmen and the team wants them to experience a winning campaign so they can build on this season.

"We have 17 games scheduled for the season, and on paper I think we can win them all, we just need to start capitalizing and performing better," Graziano said. "I don't think we have any pushovers on our schedule, but sometimes we need to be a little overconfident, let the younger guys have a positive experience," Lendvai-Lintner said.

Cross-country team has high expectations for 1999 season

By Rose Sedo

It happens with every new season. Athletes graduate, and with their departure, the dynamics and structure of an athletic team will shift. For better or worse, the challenge lies in the team's transition from one year to the next.

With the start of their 1999 season right around the corner, the Bucknell men's and women's cross-country teams needs to make this transition.

There is no doubt that the Bison men's and women's cross-country teams had impressive seasons last year. There should also be no question that they have the potential to win another Patriot League title this year, as seen in their high rankings in preseason polls. After all, they hold the undisputed title of being the most successful team in Bucknell athletics.

But what exactly happens to a team when legendary runners like Julie Sweitzer, Jonathan Dietrich, and Matt Kodak graduate?

Head Coach Art Gulden speculated on this question. "Well, you certainly can't try and replace those kinds of runners. It's hard to find someone who can just run away from everybody in a race. We definitely did the work this summer, and now it's just a matter of finding out who our pleasant surprises are."

The endurance and quickness of the athletes are also determining factors from one year to the next. "Last year I would say we were quick. We would crush teams during the first two miles of the race," Gulden said. "This year we have core strength and depth. So we'll still beat those same teams, but instead it will be in the last two miles of the race."

Clearly the strategy of the team is now entirely focused on its strength and its depth. But the team's success depends upon how much progress it makes this fall.

The team captains maintain a very positive outlook. "With the experience of upperclassmen, we have a strong lead pack. That is what is going to make us stand out in a race and determine our success, because we won't let up," said Jen Hart '00.

The team's first home meet is Saturday, September 11 at 10 a.m. Spectators are greatly encouraged to come and show their support for the Orange and Blue.

Sarah De Brun—The Bucknellian

Even with key losses to both squads, the team is still ranked high in the polls.

Tim Schew—Where are you?

Steve Sasson—The Bucknellian

Brad Tufts, Interim Athletics and Recreation Director, is approaching his sixth decade as a staff member at Bucknell.

TUFTS From page 11

Tufts referred to the probation as, "something that will place new demands on coaches and administrators. I'm confident that we'll answer those demands and move forward."

Tufts is approaching his sixth decade here at Bucknell. During that time he has worked with five different athletic directors and countless coaches, served the university in several valuable capacities, and earned numerous accolades for his integrity and dedication. But after all he's accomplished here at Bucknell, Tufts' favorite part of the job is still getting, "the great opportunity to see young people grow and mature from freshman to seniors." Tufts said. "We're here for the students; that's what's fun for us."

Bison athletics capture President's Cup

For the second straight year Bucknell topped Patriot League

By Michael R. Brophy

For the second straight year, Bucknell University has captured the Patriot League Presidents' Cup. This announcement came at the conclusion of the 98-99 academic-athletic year, marking the sixth time that Bucknell has won this prestigious award.

In addition to the Presidents' Cup, the Bucknell women captured the league championship trophy and the men tied Lehigh for the championship.

The awarding of the Presidents' Cup began nine years ago. It is presented annually to the Patriot League school whose athletic teams perform the best throughout the academic-athletic year.

The winner is chosen through a point system that is based on tournament finishes or on a team's final regular season standing.

Bucknell competed in all of the Patriot League's 22 sports and finished third or better in 14 of them. In total, the Bison captured five league titles and finished second in four other sports.

The superior athletic play of the Bison resulted in a total of 94 points towards winning the Presidents' Cup, 49.5 points from men's sports and 44.5 from women's sports. This total score far surpassed the next closest schools, Army and Lehigh, by nine points.

In the nine years that the Cup has been awarded, Bucknell has won the trophy an unsurpassed six times. The Bison also became just the second Patriot League school to ever sweep the men's championship, women's championship, and Presidents' Cup trophies in the same year.

In addition to the trophies awarded, several Bucknell coaches received accolades on their superior performance over the past year.

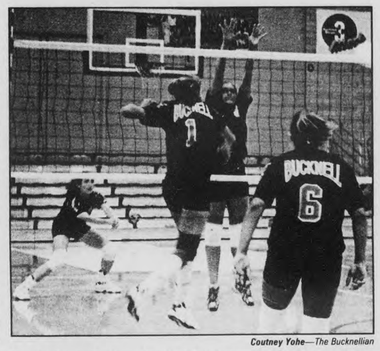
> *"In the nine years that the Cup has been awarded, Bucknell has won the trophy an unsurpassed six times"*

Coach Art Gulden won the Coach-of-the-Year award for his work with the men's and women's cross country team as well as with the women's outdoor track and field team. In addition, Coach Terrie Grieb won softball's Coach-of-the-Year award.

The fall 1999 athletic season begins this week and all of Bucknell's athletic teams will be trying once again to claim the Presidents' Cup for Bucknell.

Team looks to defend title

By Kevin Abt



Coutney Yohe—The Bucknellian

Last year's squad advanced to the NCAA Tournament at State College, after downing Colgate in the Patriot League Championships.

The 1998 season for Bison volleyball was one of its best in school history. Bucknell won the Patriot League championship, which qualified them for their first ever trip to the NCAA tournament. However, the team graduated two of its most versatile players last year and this year should prove to be a test for Head Coach Cindy Opalski. "This year I'm looking to get 12 to 15 players to come together and step up in key situations," said Opalski.

After last year's amazing run, that culminated in playing Penn State in the NCAA tournament, Bucknell will rely on a combination of senior leadership and the enthusiasm of the underclassmen. Despite the loss of co-captains Emily Pomeroy and Tristen Voget, the Bison will be returning with a core of players that know what it takes to win.

This year's co-captains are Michelle Lesh '00 and Jen Post '00. Both played an intricate part in last years' team and hope to use their experiences in a positive way. "Playing without Emily and Tristen will be difficult this year, but I'm confident we will find the right combination to fill in the gaps," said Lesh.

"Junior Brooke Bader had a solid sophomore season and she should be a vital part of this years' team," said Opalski.

The Patriot League should give the Bison plenty of competition this year. Colgate, who only graduated one senior last year, should be a formidable opponent.

"Army and Navy have strong programs this year as well as Lehigh," Opalski said. "In past years, we knew we had a win before we even stepped on the court. This year, however, will not provide us with any easy wins."

Bucknell scrimmages Susquehanna University this Tuesday before opening their season at the Marist Invitational Tournament. The tournament features Marist, Fairleigh Dickinson and Wagner along with Bucknell.

The Girls of Summer

Commentary

Peter Van Emburgh
Sports Editor

In front of 90,185 attendees at the final match of the tournament, the USA Women's World Cup team put a fitting exclamation point on a summer of soccer that swept America off its feet. After America's draining, dramatic penalty-kick shoot-out win over China, the women's team was riding a euphoric high that perfectly capped a monumental tournament.

Despite setting several attendance records at every stadium that they set foot in, the team established a world-class, world-caliber event for women that will undoubtedly spark the growth of women's soccer around the world. I am fortunate enough to say that I had the opportunity to watch US take on the world.

While in Washington, D.C. for a large part of the summer, one of my friends had suggested that I go with her to see a Women's World Cup game at Jack Kent Cooke stadium. I didn't even know that the tournament existed, nonetheless, that it was being hosted here in the U.S. Secondly, how did the tournament get placed in the new JKC stadium? I figured that there would be a doubleheader with a monster-truck rally at the dismal, unoccupied RFK stadium.

In any case, I figured, why not?

Due to a perfectly marketed campaign, I started to notice more and more commercials by Gatorade, Adidas, Nike, even Monistat— featuring Mia Hamm and several other players promoting the upcoming event.

My friend and I eventually bought tickets to see the first round of the playoffs with the USA and Germany dueling it out. I couldn't believe just how many people were at this game! It was a sporting event, fully devoid of drunks and hooligans (then again, that's what also makes sporting events interesting)-just thousands of soccer-loving Americans out for good, clean fun. Outside of the stadium, entourages of German folk fans were dressed in full cultural attire and singing their songs. What an interesting venue, I thought.

Once I entered the stadium, I was handed a package of yellow "bangers." These bangers were to be inflated and "banged" together, I was told. This was not your typical "hat day" or "bat day" at Yankee Stadium-apparently, this was "bangers day." To my amusement, I inflated my "bangers" and it seemed that I had two long, yellow inflatable crayola pencils. Sure enough, when they were banged together it did, in fact, make a pretty loud noise.

Before the game started, I began to think about the USA head coach, Tony DiCicco and the pressure that rested on his shoulders for the first round, single-elimination playoff game. As coach of Team USA, he has merely been entrusted with the future of women's sports in America. That, plus the millions of dollars that the sponsors have gambled on the Women's World Cup.

If the team had lost, surely he would have been blamed for his strategies or even gender. America had predetermined that anything short of a World Cup victory would be devastating. This team had already captured the attention and hearts of young female fans and even David Letterman, who raved about the team's "babe factor."

When the game started, the crowd erupted and cameras went off like enormous strobe lights. I also witnessed the most booming "U-S-A" chant. Whenever Mia Hamm, star forward, got the ball, the crowd gave a thundering cheer. Watching the US pummel Germany was a remarkable feat to witness, even from the nosebleed seats.

Clearly, I was swept away in the momentum of the game and forced myself to stay home to watch the final game on July 17.

Brianna Scurry's fingertips, Kristine Lilly's head and Brandi Chastain's foot made all the difference against China in the World Cup final. Playing through heat, exhaustion, and tension, the two best women's soccer teams on the planet couldn't shake each other for 120 minutes, including a sudden-death overtime.

So it went to a penalty-kick shoot-out, which soccer players dread. The pressure is enormous, the consequences huge and the shoot-out is no real indicator that the best team won.

The first four kicks went flawlessly past the goalkeeper. However, China's third kick in the shoot-out resulted in a very controversial save by Scurry, who sent it left with a diving save. Scurry was brought under intense criticism following the game, because she skittered forward (which is illegal), thus reducing the angles of the kicker towards the net. Upon instinct, she then dove left, blocking the shot. In any case, many applauded her "savvy" and said that it's only cheating if you get caught.

Following the save, Chastain kicked the final goal in the net, clinching the World Cup victory. Almost infamously, she is remembered by removing her shirt, exposing just her sports bra and jumping around jubilantly. (Her name is Chastain, not chaste).

The victory quickly became one of the summer's hottest and most talked about events. Reflecting upon the course of events leading up to the victory and the emotions that followed, many speculated that a women's professional soccer league would gain popularity. I feel that it would be an extremely detrimental risk that will have no more success than MLS or WNBA has experienced.

However, it was the greatest moment for a team that captured America with its style and grace, and now had conquered the world.

Bison look to rebound from '98

By Carmen Mauriello

Average just isn't good enough at Bucknell.

The university's teachers, coaches, students, and athletes strive for excellence— nothing less. That's why the 1998 Bucknell football team's average 6-5 record, which placed them in the middle-of the pack in the Patriot League, was so disappointing.

And that disappointment inspired the Bison to excel in rigorous and demanding off-season workouts in hopes of producing extraordinary results on the football field come this fall.

The team returns 22 seniors, 14 starters, 35 lettermen, and three All-Patriot League performers. This year's Bison senior class will have big shoes to fill.

The '98 senior class was the most successful in school history, with 29 wins over four years. Fifth-year Head Coach Tom Gadd called the '99 seniors, "a real good class with a real sense of urgency."

Gadd reported that his current squad's strength lies in the defense. "We have lots of guys back on that side of the field," Gadd said. "Our attitude is real good."

Eight starters return from the top-rated rushing defense in the Patriot League in '98. Included among the returnees are two First Team All-Patriot League performers in senior nose guard Eric Green and senior linebacker Shawn Redd.

Green has started 32 of 33 games in his Bucknell career, and he anchored last year's defensive line with 36 tackles and eight tackles for loss.

Redd, last year's sack leader and the second-leading returning tackler, joins returning starters Vince Ficca '01 and Robert Kuhn '01 to compose one the finest linebacking corps in the Patriot League. Kevin Eiben '01, the '98 Bison's team leader in tackles with 91, returns at strong safety.

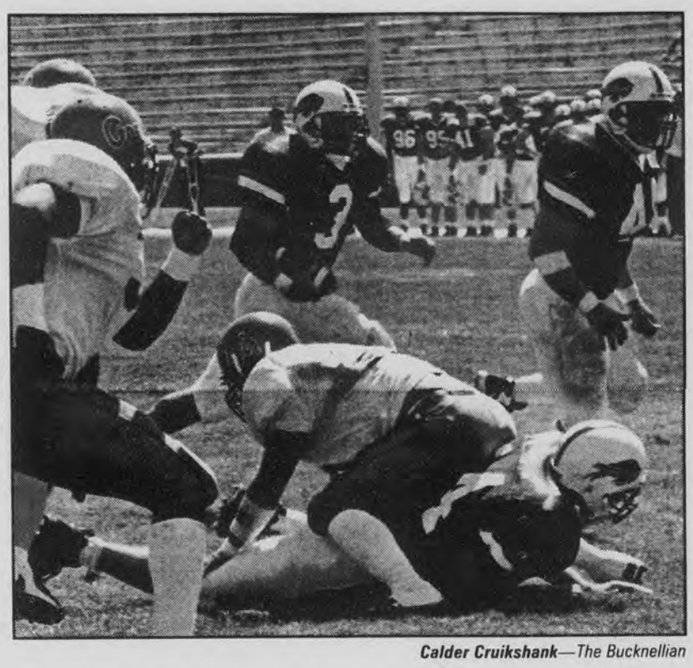
The Bucknell offense will have no easy task in replacing six starters and 10 lettermen. Gone are four-year starting center Neal Thompson, All-Patriot League offensive tackle Jason Wancowicz, and big-play receiver Ron Rockett.

Gadd identified the offense's strength as the skill positions. Senior quarterback Don McDowell provides veteran leadership in his third year as the signal caller. Dan Palko '00, second in the Patriot League in all-purpose yards in '98, returns at tailback. Fullback Jason Marrow '01 led the team in scoring last season with 11 touchdowns.

With the loss of three starters to graduation, Coach Gadd called the offensive line, "a concern position." The Bison will look for stability in First Team All-Patriot League left tackle Lucas Carlaw '00. Gadd added that some "young but talented" freshmen and sophomores are competing for the other offensive line positions.

The Bison special teams are solid with senior Brian Kramer handling the punting duties for a third straight season. Kramer's '98 punt average of over 38 yards per attempt ranked him fourth in the Patriot League.

The departure of All-Patriot League placekicker Ross Coleman leaves relatively untested Matt Faircloth '01 and Joe Lourdeaux '02 to vie for time. Return specialists Jabulani Powell '02 and Palko provide big play potential for the Bison.



Calder Cruikshank—The Bucknellian

Dan Palko (#3) and the rest of the squad look to run over opponents.

Bucknell's Patriot League schedule is imposing, with clashes against nationally ranked Colgate and Lehigh looming.

"Lehigh and Colgate are the favorites (in the Patriot League) since they return their all-league quarterbacks," said Gadd. "The league is getting better top to bottom each year."

Gadd is optimistic about his veteran squad and is pleased with the progress his players have made over this off-season. He thinks the team will continue to develop and improve the more it plays together.

"The first three or four games a football team develops a character," said Gadd. "Hopefully we can get through those games and develop a good football team."

The Bison open the season this Saturday at home at 12:30 p.m. against Morgan State. Bucknell then travels to Colgate for an important Patriot League game on September 11. Said Gadd, "Knowing that we play Colgate second is a sobering thought."

The Bison must gel, and gel quickly, to have a chance at the Patriot League crown. But with a plethora of talent and senior leadership, the Bison are poised to erase the memory of '98 and create a championship legacy.

Bucknell builds confidence, poise

Calder Cruikshank—The Bucknellian

The field hockey team is full of depth and experience as it begins the season against Drexel.

By Jennifer Cruickshank

New uniforms aren't the only reason the Bucknell field hockey team looks great this season.

Having graduated only one senior, the returning Bison are ready to begin their quest for the Patriot League title. After last season ended with a down-to-the-wire loss to Holy Cross in the Patriot League Tournament, the primarily veteran Bison are looking to seek their revenge.

Their first victim was an unsuspecting Susquehanna squad, whom the Bison blanked 9-0 last Saturday. Eight different players from all four classes found the net, exemplifying immense team depth from both the field and the sidelines.

"Everyone will get an opportunity to play both on offense and defense," said head coach Heather Lewis. "There is no one player I expect to contribute any more than another player."

The team's depth is solidified by senior leadership from tri-captains Katey Twombly, Jenny Zimmerman, and Malina Anderson. Each of the three seniors return with All-Patriot League honors from last season and multiple years of experience as Bison starters.

"Our senior leadership is tremendous," added Lewis. "They make up the core of our team, and we will go as far as they take us."

The Bison will accept nothing less than another berth in the Patriot League Tournament with a championship to follow. This year, for the first time, the Patriot League champion will receive an automatic bid into the Division I NCAA Tournament.

"We definitely have a good chance to win the league," said Twombly. "But it's a long season and we just have to concentrate on taking it one game at a time."

Bucknell will host Drexel University this Wednesday to open the regular season.

University, community begin rebuilding process after Monday evening flood wreaks havoc

By Jared Silliker

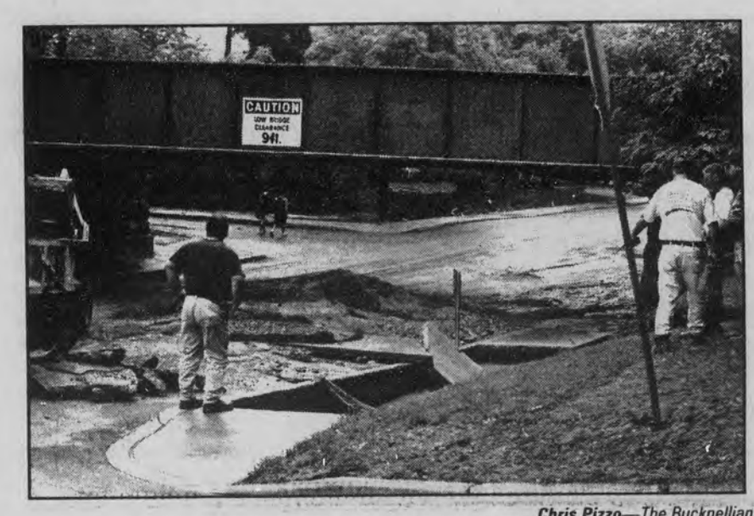
For many University students, Mother Nature brushed much too close early Tuesday morning. After several hours of severe rain, water rose to extreme flood levels, wiping out many parts of campus and Lewisburg.

An awesome display of nature, the flooding caused significant damage and forced many students from their homes. Water levels were over a foot in many main floors of houses and nearly covered parked cars.

Hardest hit were South Sixth Street and the Hunt/Harris parking lot, while parts of Route 15, Seventh Street, Loomis Street and Market Street were also flooded.

The University Physical Plant reported that approximately 10 inches fell during the storm that lasted from late Monday night until after sunrise on Tuesday.

"To dump seven or eight inches in a couple of hours is unheard of," Vincent DeCerchio, director of Public Safety, said. "Once the flood peaks, there's not much you can do."



Chris Pizzo—The Bucknellian

Employees survey damage on St. George Street during the morning after the flood. The Hunt Hall parking lot, adjacent to St. George, received some of the most severe damage.

Although there were no reported injuries, the damage continues its far-reaching effects. Virtually all residents of Sixth Street were evacuated tentatively throughout the day on Tuesday.

Dan Remley, director of housing and residential life, reported that the University has accomodated all students who were not able to find housing on their own. Many have already been placed in vacancies throughout campus.

"We will house them through the duration depending on the conditions of their individual houses," Remley said. Affected students who do not have meal plans have also been given free meals in Bostwick Cafeteria

Tom Sauers, the code enforcement officer for Union County, reported that currently 13 out of approximately 40 Sixth Street residences are inhabitable. Gas and oil leaks as well as electrical and structural damage are among the major problems facing clean-up crews.

"The students have been doing very well, and have been very cooperative [in evacuating]," Sauers said.

The water also wreaked havoc on vehicles parked along Sixth Street and in the Hunt/Harris lot. Cars' interiors were left with a coating of dirt and debris, and many suffered irreparable body damage as the current floated cars into each other. Tuesday morning saw many students alerting car insurance companies and calling towing services.

Chris Pizzo—The Bucknellian

Sixth Street was one of the hardest-hit areas during Monday night's flood. All Sixth Street residents were evacuated from their homes for a least one night. This picture was taken late Tuesday morning, after water had receded.

William Neitz, Lewisburg acting chief of police, reported that over 80 vehicles were disabled on Sixth Street alone.

The response to the rising waters was a difficult one for Public Safety and the Lewisburg Police.

C.A.L.V.I.N. and H.O.B.B.E.S. moves into Galloway House

By Rhiannon Bruce

With a new academic year comes yet another new location for the C.A.L.V.I..N. and H.O.B.B.E.S. house. The move to the Galloway house marks the organization's third relocation in three years.

Two years ago, the organization was housed in the Sigma Phi Epsilon house. However, upon learning that the fraternity would be recolonizing and reclaiming the house, C.A.L.V.I.N. and H.O.B.B.E.S. made the decision to move into Hulley house.

However, "we didn't find out we had Hulley house until after forms for substance free housing were due, and there were a lot of people who didn't want to take the chance that we didn't get a house at all," said member Jamie Piperberg '01. The group also found problems with Hulley House's location and size, which were "crucial to the house performing it's purpose of providing a place for interested students to spend their time," Piperberg said.

The club is very happy with this year's residence, located on the corner of Third Street and St. George Street. "We're thrilled with the house. It's beautiful, the lounge is huge and we have a great kitchen," Piperberg said. The group hopes to stay in this location to make the decision to live in the house easier for members in future years.

Casey Twele—The Bucknellian

C.A.L.V.I.N. and H.O.B.B.E.S, the University's substance free social organization, moved into Galloway House, its third residence in three years.

For those who don't know, C.A.L.V.I.N. and H.O.B.B.E.S. stands for Creating a Lively Valuable Ingenious New Habit of Being at Bucknell and Enjoying Sobriety and is an organization promoting substance free living at the University. Their house is a key part of their organization as it is substance free and provides housing for its members if they prefer to live in such an environment.

According to Piperberg, members

Admissions attracts diverse, talented first-year class

By Melissa Coates

With each passing year, it is apparent that the University is becoming increasingly selective. The 889 students that comprise the class of 2003represent a class that is significantly smaller than the 953 students in the class of 2002.

> *"Bucknell is becoming more selective... this is a trend that will continue as more people learn about Bucknell and what it has to offer."*
> *—Mark Davies, Director of Admissions*

Director of Admissions Mark Davies is pleased with the admissions process thus far. "Bucknell is getting more selective...this is a trend that will continue as more people learn about Bucknell and what it has to offer."

Davies is confident that although admittance to the University is becoming more challenging, the process will produce long-range benefits in terms of the types of students it selects. Davies believes that as a result of a finely tuned admissions process, the University becomes able to select a student body of "highly competent and very talented individuals who retain the potential to make great contributions to the Bucknell community."

As of August 1999, 51,253 inquiries of the University were received. Davies commented that "an increased percentage of those inquires came from areas other than the Mid-Atlantic region. The class of 2003 reflects geographic and socioeconomic diversity." Students of the class of 2003 represent 38 different states across the country. And with 13 different foreign countries represented in this new class, it can be affirmed that the University is attracting a wider range

Public Safety Log

September 1, 1999

THEFT—A University student reported to Public Safety that a concrete statue of a lion was removed from the front of Sigma Alpha Epsilon Fraternity. No suspects or witnesses could be located. Lewisburg Police were notified.

INFORMATION/HARASSMENT—A University student reported to Public Safety about being the victim of several pranks in his residence hall. The victim's roommate admitted to committing the pranks, however no charges were requested. A residential life report was filed.

September 2, 1999

HARASSMENT BY COMMUNICATIONS—A University student reported to Public Safety about receiving harassing phone calls in a Vedder Hall room. The incident is under investigation.

September 3, 1999

INFORMATION—A University student reported to Public Safety that unauthorized calls were made using her PAC number. The incident is under investigation.

INFORMATION/VEHICLE ACCIDENT—A University employee reported to Public Safety about witnessing a vehicle strike a parked car on Moore Ave and leave the scene. East Buffalo Township Police were notified. The incident is under investigation.

INFORMATION/VANDALISM—A University student reported to Public Safety that his car was vandalized while parked on South 7th Street. Lewisburg Police was notified.

September 4, 1999

VANDALISM/TAMPERING WITH FIRE EQUIPMENT—A University student reported to Public Safety that a fire extinguisher in Vedder Hall had been partially discharged. No suspects or witnesses could be located. The incident is under investigation.

INFORMATION/LOST WALLET—A University student reported a missing wallet to Public Safety.

September 5, 1999

ASSIST LOCAL POLICE—Public Safety was requested to assist Lewisburg Police on South 7th Street with a University employee found lying on the sidewalk. The individual was transported by ambulance to Evangelical Community Hospital Emergency Room for treatment of an alcohol overdose.

ASSIST LOCAL POLICE—Public Safety detained three University students who were involved in a disturbance at Dunkin Donuts. Lewisburg Police issued citations to the students for underage consumption and the operator of the vehicle was cited for DUI.

MEDICAL TRANSPORT - A BU student requested transportation to Evangelical Hospital Emergency Room for treatment of abdominal pain. Student Health Services driver provided the escort.

MEDICAL TRANSPORT—Public Safety responded to Swartz Hall for the report of a student with abdominal pain. The student was transported by Student Health Services driver to Evangelical Hospital Emergency room for treatment and later returned to campus.

September 7, 1999

INFORMATION/FLOOD DAMAGE—Public Safety received numerous (7 to date) reports of damage to student vehicles from flood waters. The vehicle information and pictures were forwarded to the University General Counsel for insurance purposes.

INFORMATION/MEDICAL ASSIST—Public Safety responded to Chi Phi Fraternity for the report of a University student who had injured his shoulder. The student was transported by ambulance to Evangelical Hospital Emergency Room for treatment.

INFORMATION/PUBLIC DRUNKENNESS—Public Safety responded to Malcolm Street for the report of a University student lying in the roadway. The student was returned to her residence hall and left in the care of friends. A University citation for public drunkenness was issued.

ADMISSIONS

from page 1

Helen Hunt—The Bucknellian

Director of Admissions Mark Davies and his staff helped to attract Bucknell's most selective class ever. The University's acceptance rate fell to under 44 percent from 49 percent for the class of 2002.

of academic candidates. Also, with minorites representing 13 percent of the class of 2003, Davies is proud of the University's increasing attempt to reach a variety of applicants with different backgrounds.

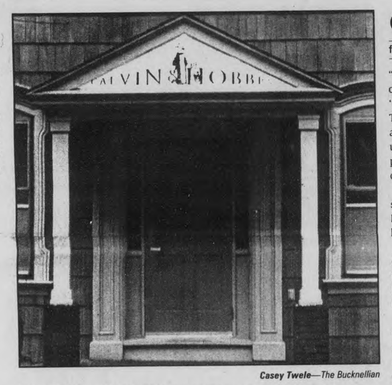
The admissions office received 7,011 applications for the class of 2003. Of those applications, only 3,071 offers of admissions were extended. The acceptance rate for the class of 2003 was 43.8 percent. Compared to an acceptance rate of 49 percent for the class of 2002 and 54 percent for the class of 2001, it becomes fact that the University is getting harder to get into.

Davies offers a possible explanation for the declining acceptance rates. "The class of 2002 contains 953 brilliant and talented students. However, the class has 73 more students than we expected it to have. More applicants accepted our admissions offer than we predicted. Due to housing complications, and our desire to keep a balanced student faculty ratio, we can't afford to be over target again. We reduced our offers for the class of 2003 by 500."

The class of 2003 contains 889 enthusiastic and capable students.

Fifty-three percent of the class graduated in the top 10 percent of their high school class, and 79 percent graduated in the top five percent of their high school class. The average SAT verbal scores are within the range of 570 to 650, while the average SAT math scores fall between 590 and 680.

With such praising statistics for the class of 2003, Davies anticipates a highly productive year. "I look forward to seeing them grow and mature and become comfortable with their interests here at Bucknell."



Casey Twele—The Bucknellian

C.A.L.V.I.N. and H.O.B.B.E.S. hopes that it has found a permanent home in Galloway House.

GALLOWAY

from page 1

"want to have a place where anyone who wants to can just come and 'hang out,' do homework, watch TV, play pool, etc., when there isn't a formal event scheduled. It also is useful to have a universal meeting place. It makes planning spontaneous activities a lot easier."

President Michael Potts '00 states, "C.A.L.V.I.N. and H.O.B.B.E.S. is a family and families should live together."

Most of the people who live in Galloway are formal members of the organization (those who attend 50% or more of the meetings) although some are informal members.

Anyone interested in joining the organization is invited to attend any of its open activities. In-house activities are planned including barbecues, card nights and movie nights. The group is also planning a trip to Rickett's Glen this Saturday.

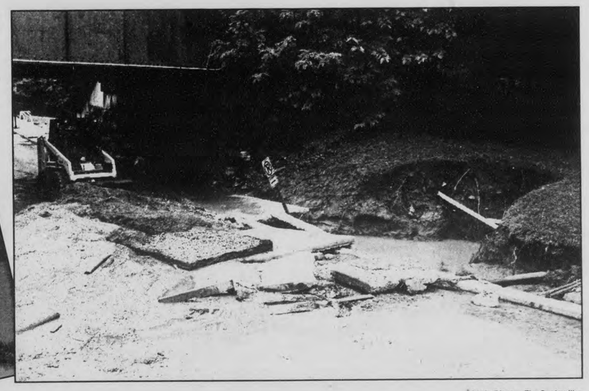
Serenity Edwards—The Bucknellian



Chris Pizzo—The Bucknellian

Nearly 10 inches of rain fell on the morning of Tuesday, September 7 causing extreme flooding throughout campus. Sixth Street was the hardest hit (upper left and below) where waters rose to over a foot in many first floors. The sidewalk was completely washed away (above) under the St. George St. overpass.

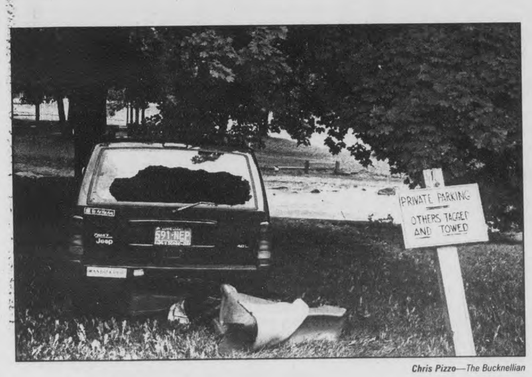
The Flood of 1999

Chris Pizzo—The Bucknellian

Stephanie Metz—The Bucknellian

Cars were completely ruined—many floated with the strong currents, coming to rest only after hitting other vehicles (above). A layer of mud and debris could also be found on interiors (left).

Many students were forced to evacuate their houses due to oil, gas, electrical and structural damage. Many are temporarily being housed in campus vacancies.



Chris Pizzo—The Bucknellian

Serenity Edwards—The Bucknellian

"Our main function was safety and life support"

FLOOD from page 1

"I've never seen the water this high—it happened so fast ... we were limited in our ability to prepare," DeCerchio said.

Since the area receives many flood warnings, it is often a challenge to decide when a dangerous situation is at hand.

"We got a flash flood warning, but had to wait until there was tangible evidence [to alert students]," DeCerchio added. "In some areas the water went from inches to feet in a matter of 5-10 minutes. We were calling RA's and trying to travel about campus warning people and watching for dangerous areas at the same time."

Other problem areas on campus included the train overpass on St. George Street where entire pieces of sidewalk were washed away. Areas of Loomis Street as well as the intersection of Seventh Street and Moore Avenue were also flooded. Significant water also collected in the library, the Music & Art Building, Swartz Hall, the stadium locker room and the fieldhouse.

Meanwhile, Neitz and the Lewisburg Police dealt with matters on Sixth Street and traffic congestion on Rt. 15 and Market Street.

"Our main function was safety and life support. Property is definitely secondary at that point," Neitz said of his force—which amounted to only two officers for much of the morning until reinforcements could be contacted.

The police used air horns and megaphones to alert Sixth Street residents to the unfolding danger around 4 a.m. Some moved to upper floors, while others evacuated.

For students, the eventful morning was both exciting and demoralizing. Some spent time rafting down Sixth Street, while others merely watched from the safety of their porches as their cars disappeared under the water. A group of friends was able to capture the waterworks on video—a startling documentary.

"I've never seen the water this high—it happened so fast ... we were limited in our ability to prepare."
—Vince DeCerchio, Director of Public Safety

The hard rain began around 11 p.m. and water was collecting on streets by about 2 a.m. Cars were reported to be floating and covered by about 4 a.m. Although the rain stopped after another hour or so, the water did not stop rising until approximately 6:30 a.m.

The flood marks the second time in the last month that Lewisburg has been hit with over seven inches of rain at one time. A much smaller flood occurred on Aug. 20.

Chris Pizzo—the Bucknellian

Located downhill, the University Fieldhouse was another flood target. Employees and volunteers here attempt to clean up the fieldhouse during the afternoon after the flood.

Monday's flood came on the heels of previous damage

By Laura Day

Even before the University suffered through the floods of last Monday, flood damage had already wrought havoc in many University and community programs. On August 20, as close to 900 first-year students attempted to move into their dorms and begin their college careers, six inches of rain fell, creating a situation which seemed to be a milder version of the disaster which occurred at the beginning of this week.

One of the most severely affected areas on campus was the Bertrand Library. The torrential rain threatened the special collections and University archives found on the lower two levels of the Library.

Stacks Manager Amy Golder-Cooper explained that the excessive amounts of water could not run off the roof fast enough and seeped through the air vents into the library. Once the water reached the first lower level, it seeped through the floor and down the hallways to the second lower level. Sump pumps, drains and pipes could not handle the deluge.

James Hostetler, associate director of construction and planning, said, "Our drainage system couldn't keep up with the amount of surface water that came down. If the water didn't come though the halls, it came up the floors, it came through the walls. The window wells filled up and water poured through the windows. It just hit us hard."

The physical plant staff quickly responded to the situation. Hostetler complimented the 185-member team as it accomplished "feats of Herculean efforts carried out in a natural catastrophe. It was a pleasure to see them work. I am just astounded and proud to be a part of an organization that did a heckuva job."

In addition to the physical plant staff, the Union County Emergency Services and the Library Disaster Team pitched in to help. The joint effort paid off as the books, collections and archives were saved through people furiously working with squeegees and mops to soak up the water. The nine member Library Disaster team removed hundreds of books from lower shelves.

As a result of their efforts, only a total of approximately 60 books were damaged, and the special collections were all rescued. Golder-Cooper emphasized the potential damage to the library. She described the situation as "frustrating, and definitely scary." After the books were saved, they were placed in rooms with dehumidifiers and fans to dry.

The August 20 downpour had enough warning and occurred at a time when the library was fully staffed, which prevented many books from being ruined. In addition to the chaos of first-year student move-in and the flooding in the library, the rains also threatened the new telephone switch system at Trax Hall. However, due to the efforts of Hostetler's team and all of the other help on campus, the system was saved. Had the system been inundated with water, the campus would have been without phone service.

Four large pumps, several sump pumps, fans and other equipment were either rented or bought by the University to deal with the massive amounts of water. Hostetler said the flash flood was the worst he had seen in his sixteen years at the University.

The underpass beneath Route 15 was flooded and eventually blocked off. Additionally, many buildings, including Dana Engineering, Rooke Chemistry, Music and Art, Harris Hall, Taylor Hall, the Gateways, Phi Kappa Psi and Ward House suffered flooding.

Arrest made in 1998 rape case

West Milton man linked to assault of University employee

By Jared Silliker

A 10-month investigation has ended with the arrest of a West Milton man for the rape of a 64-year-old woman last year. Gerald Funk Jr., 27, was charged this August after evidence linking him to the Sept. 11, 1998 crime was gathered through a search of area burgularies.

Funk was charged with attempted criminal homicide, aggravated assault, rape and robbery. The victim, a University employee, was walking to her job on campus when she was attacked, choked and assaulted near the intersection of Seventh Street and St. George Street.

"I wanted to make sure the student body was aware that an arrest was indeed made in this case," William Neitz, Lewisburg acting chief of police, said. Neitz headed the lengthy investigation, and was recently promoted to his current position after former chief Ronald Kerstetter resigned.

After Funk admitted to committing a burgulary near the same time last year, a further background investigation was conducted. Searches followed and evidence was collected as the focus intensified on Funk. There was then a request for DNA evidence to be examined, which positively connected Funk's DNA to the evidence found at the scene.

Funk waived his preliminary hearing and awaits trial in October.

Edwin Cowell assumes Associate Dean position

By Anne Monoky

In January, Edwin Cowell started his new position at the University as Associate Dean of Students, replacing Joyce Bylander. Combining his backgrounds in psychology and multicultural affairs, Cowell plans to bring a new sense of community to the campus.

As for defining his immediate goals, Cowell feels as though he must take this task one day at a time. His position requires him to step back and look at what everyone on campus does and then use these observations to better student life and involvement. He wants to incorporate the individual programs on campus—such as Greek life, specialized student organizations and the Common Learning Agenda—and in some way pull them all together to create a common focus.

"I don't feel that you can just come onto a campus and just implement policies and programs," Cowell said. "You must experience the campus first."

Cowell stressed his need to learn more about the students and student life. "I really want to get to know people and students on campus." He wants to develop a stronger collation among all the organizations and programs on campus.

Cowell plans to integrate himself into campus life by participating in programs dealing with sexual assault and first-year student orientation. Cowell is also the chairman for a committee that President Adams created known as the Campus for Diversity Committee which a part of the President's Plan for Diversity.

"I feel that it (my current position) was a natural progression in my career," Cowell said. "Multiculturalism is part of my everyday life and I would incorporate it in any position that I am in."

Cowell also expressed enthusiasm in potential that the University has for creating a better sense of community on campus. "I felt comfortable with Bucknell's size and I appreciate the caliber of students that Bucknell attracts."

White House agrees to give clemency to Puerto Ricans

Twelve of 16 convicted members of the Puerto Rican nationalist group FALN have accepted clemency offered by President Clinton. The prisoners signed the papers renouncing violence and agreed as a condition of parole to not associate with other members of the nationalist group. FALN is the Spanish acronym for the Armed Forces of National Liberation. The group has been blamed or claimed responsibility for 130 bombings in New York and Chicago. The bombings took place during the 70's and early 80's. None of the group currently in jail is convicted of any involvement in the attacks. They were convicted of seditious conspiracy and weapons charges. Their sentences range from 35 to 90 years.

Violence escalated in East Timor

Indonesian President Habibie put East Timor under military control following last weeks vote of independence. Indonesian troops began rounding up residents and forcing them to leave the bloody territory. Independence leaders warned that pro-Indonesian militias were conducting a terror campaign. Thousands of people were forcibly moved to the docks and put on boats. Others sought refugee in a UN compound. Last week East Timor's largely Roman Catholic residents voted for independence from Muslim Indonesia. East Timor was invaded by Indonesia in 1975 after gaining independence from Portuguese. East Timor had been a Portuguese colony for centuries.

Gadhafi marks 30 years in power with display of military force

Libyan President Col. Moammar Gadhafi staged a massive military parade. He displayed long-range missiles, warplanes and tanks. The event was to mark his 30th year in power. The parade was the largest in Tripoli since United Nations sanctions were lifted in April. The sanctions were lifted after Libya's handover of two suspects in the 1988 bombing of a Pan Am airliner over Lockerbie, Scotland. The explosion killed 270 people.

Serbian trade union calls for general strike

The trade union said it is organizing a general strike later this month to protest rising prices and the collapsing economy. No general strike has succeeded in Serbia in the last 10 years. This strike is being supported by a wide variety of trade unions throughout the country. The strike is part of a larger demonstration against the government of President Slobodan Milosevic.

Tanker derails near Detroit, hundreds evacuated

600 people were evacuated in suburban Detroit after a railroad tanker derailed. The tanker possibly contained toxic chemicals. It may have contained ethylene oxide, which can cause severe burns and is potentially lethal if inhaled. There was no sign of leakage from the tanker but officials were being cautious. The evacuation is part of an overall effort to reduce potential casualties and monitor for further damage. The cause of derailment was unknown.

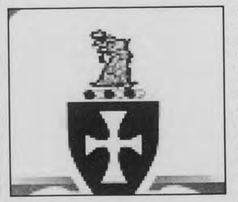
Sigma Chi undergoes reorganization

Efforts of Dean Roy Baker, national headquarters help chapter to avoid closure

By Chris Ellis

After a summer of discussion with members of the Sigma Chi fraternity's national organization and current Sigma Chi members at Bucknell, the University has created and accepted a reorganization plan under which the fraternity will be allowed to retain its charter and remain open at the University.

The reorganization plan, which demands that the chapter abides by strict mandates in the upcoming year, caps a summer in which the fraternity's status was in considerable doubt. The University Council on Greek Life (COGL), after the chapter failed its comprehensive annual evaluation, had recommended that the chapter be closed for a period of three years. The office of the Deans of Students, though, headed by Dean of Greek Life Roy Baker, comprised a plan which included recommendations from the Sigma Chi National Association with considerable University input to attempt to keep the chapter on campus.



"One of my responsibilities is to do anything possible to keep fraternities open that are salvageable," Baker said. "I'm certainly the person at Bucknell that holds them accountable, but my role is also to be their advocate and to salvage them when it is appropriate and possible to do so."

In developing the plan, Baker worked closely with Sigma Chi members and national association officials to create a plan that contained some disciplinary action, but also provided clear mechanisms to reorganize the chapter. According to Baker, the existing members' desire to remain on campus and work with the office of the Deans of Students to develop a comprehensive reorganization plan was the driving factor in the effort to keep the house open.

"We believed that they (the members of the fraternity) were sincere in trying to repair the damage done and in trying to develop appropriate mechanisms to correct the problems in the chapter," Baker said.

The plan mandates that Sigma Chi be placed on suspension until certain measures are undertaken to help stabilize the chapter's membership in the short term. Included among these mandates are: a complete review of the chapter's constitution and bylaws, a review of its member recruitment plan and pledge education program, the completion of a proposal for reorganization of its alumni program, and the repayment of all outstanding fees owed by the chapter to the Interfraternity Council and the University

Another key component of the reorganization plan was a formal membership review of each active member of the chapter. Certain individuals were reviewed and granted "alumni status" within the fraternity, which bars them from entering the Sigma Chi chapter house or attending any function sponsored by the chapter.

After the chapter has its suspension removed, it will be placed on social probation for the remainder of the academic year.

The development of the plan follows a series of events which led the University to recommend to the Sigma Chi National Organization that the chapter be closed for a period of three years.

The first steps toward the recommendation of closure came when the chapter failed its annual COGL evaluation for the second time in three years. According to professor Sue Ellen Henry, newly-appointed chair of COGL, their evaluation reflected a pattern of adverse behavior by the chapter.

"The concerns (regarding Sigma Chi) were continued violations of University Policy and COGL requirements rendered through past evaluations," Henry said. "These two concerns combined to make the cost-benefit ratio of having this group on campus out of balance; it cost the University too much to have this group here."

After COGL made its recommendation, the University's Committee on Campus Activities (CCA), which oversees COGL, took the recommendation one step further. CCA recommended to the University—not the Sigma Chi National Organization—that the chapter be closed.

The Office of the President then accepted COGL's doctrine that the recommendation of closure be forwarded to the Sigma Chi National Organization. After the recommendation was made, the Office of the Dean of Greek Life worked closely with the National Organization to develop a reasonable and effective reorganization plan.

"The Sigma Chi National Fraternity asked us if we would entertain options other than closure, and we responded that we would," Baker said. "However, 'other options' needed to include a complete change in the way the chapter had been operating during the past three years."

"The reorganization plan is not what CCA wanted and it's not what COGL recommended, so in that sense, I see it as problematic," Henry said. "On the other hand, if this (the plan) is the thing that forces this organization to begin to understand its problems and take responsibility for itself, then that is a good thing."

"One of my responsibilities is to do anything to keep fraternities open that are salvageable. I'm certainly the person at Bucknell that holds them accountable, but my role is also to be their advocate."
—Assistant Dean of Students Roy Baker

Both Baker and COGL will monitor the chapter closely for the remainder of the academic year and ensure that the chapter complies fully with the requirements outline in the reorganization plan. According to the plan issued by the Office of the Deans of Students, "Any violation of the conditions of 'social probation' or failure of the chapter to make good faith efforts to end its suspension in a timely way may result in the immediate close of the chapter for a period of three years, at the sole discretion of the University."

"The overriding message here is that this group must take responsibility for itself," said Henry. "What I would hope this group would be asking itself is 'how does failing two of three COGL evaluations signal that there are problems in our organizations, and what can we do to remedy those problems?'"

Doug McCormick '00, President of Sigma Chi, declined to comment on the plan.

EDITORIAL

A commendable response in a time of crisis

The past week has been, to say the least, a trying one for the University and community. After a storm created of the remnants of Hurricane Dennis dumped nearly 10 inches of rain in less than 12 hours, Lewisburg was hit with its worst flood in more than six years.

Sixth Street, St. George Street and Hunt Hall's parking lot were amongst the hardest-hit areas, but no student was rendered immune from the flooding. Buildings throughout campus—including uphill areas—received some flooding, and the secondary effects of the flood seemed to affect everyone.

From those students who had classes or meetings canceled because of flooding, those who needed to find accommodations (or accommodate) those who were evacuated because of the high water, or even those who did business with the several Lewisburg business who were ravaged by the waters, no one's life went without disruption in the past few days.

It could be argued, of course, that the University or borough could have done a better job of notifying students of the impending flood, or could have given evacuation orders earlier rather than later. But for the most part, the water came so high and so fast that nothing could be done to save most of the property extensively damaged by the high water.

In fact, the efforts of the undermanned Lewisburg Police staff may have saved lives, at least of the elderly residents and guests of Sixth Street.

But in this time of crisis, now is not the time to assign or determine blame. Instead, this is the time to offer praise where it is due. And because of the efforts of University officials and members in responding quickly and decisively to the crisis, it is easy to find recipients of praise.

The office of Housing and Residential Life is to be commended, for being quickly able to make arrangements for all those evacuated from their residences, even those who may not be able to return to their Sixth Street homes for weeks or months. The Office sometimes earns the reputation as highly bureaucratic and extremely slow-moving. But in a time of emergency, its quick action helped, in some small part at least, to alleviate the hardship of displaced students.

Likewise, University Dining Services should be lauded for being able to quickly and effectively serve the need of those with no meal plan and no residence.

The office of the Deans of Students, led by interim Dean Allen Schweinsberg, responded to the situation in the best way possible—with speed and honesty. On a campus where rumor travels fast and is often interpreted as fact, Schweinsberg's all-campus e-mails served not only to keep the community aware of measures being taken and to provide information to flood victims, but also helped to ensure that information regarding the flood was delivered in a timely and concise fashion. this helped not only alleviate panic amongst some victims, but also helped to quell rumors of damage and of the University's response.

But, perhaps most importantly, University students should be commended for the calm and reasonable way in which nearly everyone responded to the disaster. From those who risked personal safety to rescue an elderly couple from a car on Sixth Street during the flood's most violent hours to those who have provided accommodations and support to displaced victims, the University community has responded to the flood with the kind of patience necessary to keep order in a troubling time. Bucknell is never regarded as a school with much feeling of all-campus community, and after the aftermath of the flood has subsided, maybe it will return to its fragmented state. But during one of the school's hardest hours, professors, administrators, employees and students have all acted in a manner than has helped to alleviate as much panic as possible.

If there is a silver lining amidst the crisis, the reaction of the University community would be it.

Will Hillary Rodham Clinton ever be elected Senator of New York?

Yes

By Ryan Delahanty

With the 2000 Senatorial elections just around the corner, New York has become a battlefield of words and mudslinging from its two primary candidates, Mayor Rudolph Giuliani and First Lady Hillary Rodham Clinton. The main issue has been the fact that Clinton is not from New York and is unfamiliar with the issues. Perhaps more importantly, how can a "Southern gal" understand the unique breed of people that make up the Empire state. Despite these legitimate concerns, Mrs. Clinton will make an impact on the New York Senate race and is a very real contender.

The First Lady created a swirl of controversy when she announced that she was examining the possiblity of running for the Senate seat vacated by Daniel Patrick Moynihan. Speculation ran rampant in New York papers and tabloids while Clinton withdrew and then reconsidered and then announced her formal candidacy. Throughout this ordeal which has lasted several months, Giuliani has felt the need to steal some of Clinton's press coverage by labeling her as naive to the New Yorker's needs and calling her a "carpetbagger". None of this has seemed to faze Hillary as she has been a virtual "lightning rod" throughout her public life and that of her husband.

Mrs. Clinton, while on her "listening" tour of New York, has come to understand the main issues and concerns of the citizens. Her propsed platform consists of two major areas: education and health care reform. First, Clinton wants to increase the number of teachers and their salaries in order to encourage more qualified applicants. If elected she has promised to try and get federal funds for public schools. With regard to healthcare reform, she wants to make prescriptions part of Medicare, have full health coverage for children no matter their economic status, and to make it easier for less fortunate people to get the medical assistance they need.

New York City, which has a population of about eight million people, is a place with a large contingent of blacks, hispanics, and women — the three largest majorities of the Democratic Party. Hillary Clinton should be able to easily win the women vote on the basis of her gender and the other minorities will be sympathetic to her Democratic standing. Also, the vacant seat in the Senate is a demcoratic one and the other New York Senator, the newly elected Democrat Charles Schumer, is a staunch supported of the First Lady, as is Daniel Patrick Moynihan. These alliances are likely to help her win a handful of votes. The issue of Clinton as a "carpetbagger" is not really that important to New Yorkers as is reflected by Robert Kennedy's election to the New York Senate in 1964. Kennedy also carried the same label and was associated with both Massachusetts and Washington D.C. before his stint as Senator.

Hillary Clinton has proven to the American public that she can persevere. New Yorkers will gladly endorse a candidate that has proven he or she is up to doing the task. Without a doubt, Mrs. Clinton has a legitimate shot at for the Senate and perhaps should be taken a little bit more seriously from the Mayor.

No

By Rebecca Rowland

Pizza Hut has the Big New Yorker pizza. Frank Sinatra crooned about the wonders of the Big Apple in "New York, New York." One is able to drive, talk, think, act and walk like a New Yorker. And don't you dare try to generalize that a New Yorker is a New Yorker is a New Yorker; an Islander is different from a Manhattan-ite is different from an up-stater and don't you forget it. New York, and more specifically New York City, has inspires more fascination than almost any other place in the world. Those from New York are proud of it. No matter where else they live in the country, New York is always home and a fellow New Yorker is always a brother. So, how in the heck does Hillary Clinton think she is going to beat Rudolph Giuliani in the race for New York's vacant senate seat?

From a purely political point of view, both Giuliani and Clinton are skilled politicians. Giuliani made New York City almost normal during his term as mayor; by cleaning up Times Square and working to preserve historical buildings and districts, he not only won support and cooperation from the city's elite, Republican and Democrat alike, he has made visible progress in a city renowned for its amount of red tape. Clinton, on the other hand, has never held an elected office. However, she has proven herself as a people person who has gained valuable experience through her work in her husband's administration. But this race will not be purely political; not in this state and not when the candidates are NYC's good old boy versus a Southern Belle who has never resided in the state of New York (sorry Hill, weekends in the Hamptons don't count.)

In an effort to raise funds and garner support, Hillary decided to go on a "Listening Tour" of the state. Unwilling to announce her candidacy, she traveled around New York to just, you know, see what the whole state was up to. Then, she started house hunting. With Bill and Chelsea in tow, she toured the A-list sections of the state looking for a place to plant her deep New York roots. Afterall, she has "always been a Yankee fan." I wonder if she realizes that New York has another baseball team and, that by pledging allegiance to the Yankees, she alienates half of the state's baseball lovers.

There is not one thing "New York" about Hillary Clinton. She doesn't identify with the various ethic groups and has had no experience that will prepare her to deal with the politics of a city as large as New York City or a state as large as New York. There is nothing wrong with her running for an elected position, I just feel that she should start with either a smaller state or one she identifies with more.

Look, I'm going to be honest; I just don't think the Southern wife of a shamed politician will ever beat an Italian New Yorker for any elected position in the state. How do I know? Call it a New Yorker's intuition; yeah my family is from there, and 14 years later you bet we still consider ourselves Empire state-rs. Sorry Hill, listen to this: go back below the Mason-Dixon line.

Come out and cheer on the team!

By Jim Leahy

Sitting in the stands of Christy Mathewson Memorial Stadium last Saturday, I was tempted to run into the middle of the field and yell "where is everybody?" The crowd at the home opener for Bucknell football's 1999 season was almost non-existent and something has to be done about it.

High school back on Long Island brought many fond memories. One of these memories is of football games with standing room only crowds and a plethora of school spirit. The crowd was engrossed in every play of the games and the cheerleaders got us to roar madly with little effort. Going to the games was fun and the players on the field appreciated our support. There was always a crowd to keep the athletes motivated. Shouldn't college athletics be the same? At least I thought so.

I enjoy sporting events, regardless the level of competition and sport. Most people I know do too. Just look at some of the other colleges around the country and their madness for football. Michigan and Notre Dame draw over 100,000 fans and Penn State is no different. Last Saturday, our crowd seemed more interested in the score of the Penn State game than of the action taking place in front of them.

Admitedly, Bucknell and Penn State are in different leagues of competition and have a different fan base. Yet, why can't we look like we are even remotely interested in our own school's game? While our fellow students were out there showing off their hard work last week, we just yawned collectively. At several times during the game, I could clearly hear the Morgan State side cheering louder than we were.

Honestly, how hard is it to just open your big mouths and let your friends and classmates know you care. Cheer up, sitting out in the sun isn't so bad. While you are at it, work on your tan. As long as your presence is felt, you are adding to the atmosphere of support for the football team. Hey, they might be motivated to play even better than they did last week.

In a perfect world, that stadium would be rocking week in and week out. Every play would have us fans on the edges of our seats. I know we are talking about Bucknell and not Penn State but that shouldn't stop us, we should get out there and have some fun. I would love to see a larger turnout next time; it would make everyone's experience at the game more fun. And keep this in mind; coming down is free, one of the few free things here at Bucknell, take advantage of it. I'll see you at the game.

OPINIONS

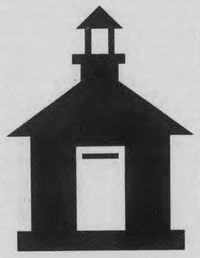
Taking a stand on education

By Josh Guyan

I am very happy this week to see education at the top of the news and the number one issue being debated between the frontrunners in the upcoming election.

I read an article today detailing the strict new testing for public schools sweeping across the nation. The article stressed a few reservations about the effect of frequent testing on the quality of education but I feel that, overall, schools, especially traditionally poor schools, can benefit from this new testing.

In addition to the testing of school systems, money for schools and teachers is being tied to student performance on standardized tests. This offers an incentive for schools to make kids learn rather than just offering an education to be seized by the student.



George W. Bush, the fund-raising record setter, actually discussed an issue this week and proposed vouchers for the parents of children who attend public schools that are below par. While I think vouchers are a good idea and I like the idea of parents having more say in their children's education, I do not think they will work; I see two reasons for the ineffectiveness of the voucher system.

First is the potential for a sticky Constitutional debate when tax dollars are used for parochial schools. This would fall under the First Amendment's guarantee that no federal money will support one particular religion. The voucher program in Ohio has come under Constitutional fire lately and I believe the ACLU would crusade against all voucher programs.

The second reason I see for the vouchers systems' failure is that I do not believe they will help those who need it most. As of now, most state voucher programs give parent less than $1,000 to help pay for the private or parochial school of their choice. The program George W. Bush calls for would allow for the expenditure of as much as $1,500.

Unfortunately, most parochial schools cost around $3,000 and private schools traditionally cost more than parochial ones. Therefore, the $1,000 or $1,500 could help middle and upper class parents subsidize sending their children to private schools, but those that cannot afford to pay the difference, those that the voucher system is aiming to help, will still be stuck in underfunded public schools.

Al Gore's proposals are more to my liking. They include tax incentives to send kids to college and required computer literacy by the eighth grade. He would also push for increased funding for hiring more teachers and refurbishing schools that have fallen into disrepair, much like Clinton has tried to do.

I feel the computer literacy requirement is especially important. As stiff as he is, Gore really has the pulse of the new economy. He understands the growing role of computers and information based industries and their need for qualified employees.

I do not want to seem like I am completely shutting Bush down. I like what he and others are trying to do for the Republican Party. He is putting a moderate, compassionate face on a party that for too long has let itself be spoken for by House extremists. I like what he did for the educational system in Texas and I like that he has chosen education as the topic for his first major issue.

However, when I look at the two proposals and try to determine which one will be the most effective, I have to say I favor Gore and his program.

No matter which candidate wins, it will benefit us all to make education a major issue for the 2000 election. Making the candidates think long and hard about how society is going to bring young people into the information age can only lead to better educational programs.

The problem of nationalism in Indonesia

East Timor struggles to gain its independence and restore stability

By Devin Keithley

Nowadays, we hear about groups all over the world demanding sovereignty and independence from their mother country, be it Kosovo from Yugoslavia, or Chechnya and Dagestan from Russia. Indonesia is also having trouble coping with nationalism within its boundaries. The large sprawling Muslim state must deal with the East Timorese and their call for freedom.

The eastern half of the island of Timor, or East Timor, was a Portuguese colony for about 400 years. In 1975 after socialist revolution in Portugal freed all of Portugal s colonies, East Timor, like Mozambique and Angola among others, declared independence. But within a year the Indonesian army overran East Timor and annexed the small country. Since then, according to the BBC, about 200,000 East Timorese have died in the fight against Indonesia for independence. The people are mostly Catholic and speak Portuguese, and thus feel different from the rest of Indonesia.

On Monday, August 30, the citizens of East Timor, or about 99% of the voting age population of that region, went to the polls to cast their votes on a referendum on autonomy. This referendum would create an autonomous political division within Indonesia. A "no" vote would prompt the Jakarta government to began down the road to granting full independence to East Timor.

On Saturday September 4, the UN officially announced the result of the vote: 78.5% against the referendum (or in other words, for independence), and 21.5% for the referendum. This, of course, does not mean that East Timor is now independent. As UN Secretary General Kofi Annan said on Saturday, "Those who voted to accept the proposed special autonomy must not consider this outcome a loss. Nor indeed should the majority consider it a victory; for there are no winners and no losers today." The ttouble is that the government must now review the results, which will take months. They are not due to make a decision on East Timor until November. Even then it would probably just take an order from President B. J. Habibie to sway the Parliament to go with East Timor. Habibie has already said he respects the results of the vote and wishes to honor them.

If the story were as simple as this, there would be no problem. However, the problem lies in the condition that East Timor has been in since the vote was originally organized in May of this year. Pro-Jakarta militiamen have been rampaging the people of East Timor and clashing with the pro-independence East Timorese rebels.

The violence seems endless, and the government in the Timoreses capital of Dili has fallen into anarchy. Hope of an end was diminished when just hours after the results of the vote were announced on Saturday, the militia fired shots near the UN compound. Two UN staff have been killed and 24 civilians were massacred in the village of Malina, south of Dili., and six UN workers are missing.

Jakarta's response has been to send the military into Timor to secure a peace. Habibie said he ordered the security forces to take "all steps" to safeguard security. "I also instruct the entire ranks of the Indonesian armed forces," he added, "to take firm action against all sides who attempt to sully the pride of the nation, undermine the authority of the government and security and public order." As of Saturday, the government plans on sending 1,400 more soldiers, and 400 special police to East Timor.

"If a peace-keeping force controls the chaos and restores some stability to the Dili government...then this will hopefully set an example for other aspirant states around the world."

The people of East Timor deserve peace until the November conclusion comes from Jakarta at which point can become fully independent. With conditions such as these, the people of East Timor cannot live in this peace. The government plans on making life unbearable for the people of East Timor in an attempt to either bring them back into Indonesia, or perhaps to destroy their national identity.

The UN found that 50,000 people have fled East Timor and are refugees in Australia and other parts of Indonesia. The Australian government has taken considerable interest in East Timor, since Australia is so close to the island, and has been on a course to invest more in Asia in recent years.

At this point it seems that foreign intervention, simply to secure peace and stability in East Timor, is needed badly. Australia seems ready and willing to give aid, and many other countries may be willing as well. Xanana Gusmao, the rebel leader of the East Timorese who was just released from jail in Jakarta this Tuesday, asked for a UN "multi-national force to the save the [East Timorese] from a new genocide." In my mind, a UN peace-keeping force would be best for the situation, especially one lead by Australia's military.

I do not believe that the United States military should become involved as an entity or as a leader of the peace-keeping force because of recent American mistakes made in the Yugoslavian intervention of earlier this year. Australia has a lot of reason to take interest in East Timor, whereas the United States has little to gain from direct involvement in the crisis.

If a peace-keeping force controls the chaos and restores some stability to the Dili government, and if independence goes smoothly in November, then this will hopefully set an example for other aspirant states around the world. However, the East Timor example will not stop the world from fragmenting further.

This is one of the largest problems in the world today. Groups seeking independence the world over have continually used Woodrow Wilson's "right to national self-determinism" as if it were one of the Ten Commandments. In reality, there are over 5,000 nations in the world today, and we can't have every one of them becoming separate indepdent states. In my opinion, there should be no rule on self-determinism. If a nation wishes to be free, it has the right to take whatever means necessary to form a new state, but that doesn't mean that it automatically has the right to be free.

I don't think that East Timor should be free just because of some blind statement made eighty years ago that any people has the right to be indepedent, but because the people of East Timor have taken every method to break free and are now going the diplomatic route. I hope that all goes well for the pro-independence supporters and that the violence ends before independence comes, in the hope that it indeed will.

All washed up and ready for revenge

By Rebecca Rowland

Once upon a time, there was a sophomore at Bucknell. She wasn't an ordinary sophomore, no, she was a special sophomore. She was special because, 4 months prior to the start of the school year, the magical car fairy gave her a car.

The car was a lovely 2-door, black, Jeep Cherokee sport. The car fairy told her, "Now be careful with this car. Treat it like a member of your family." And the sophomore did. She kept it clean, fixed its air-conditioning, gave it fog lights and played only the best music on its in-dash CD player.

Then, one day, an evil fairy named Dennis decided to play a trick on the sophomore and her car. One night, after the sophomore tucked her car into a parking space for the night, Dennis came and rained on the car. But it was no ordinary rain, it was evil rain. Dennis made it rain so much that a little creek near the sophomore's car started to rise. And that little creek rose so high that it washed over the sophomore's car. It filled it to the top with water and mud and weeds. Just to be extra mean, Dennis moved the car forty ft. and 90 degrees from where the sophomore tucked it into bed.

The next morning, when the sophomore woke up, she heard a terrible rumor. Someone told her that all the cars parked behind Hunt Hall were flooded. "No!" she thought, "This can't be!" But when she ran to go see her 4-month old car, it was true. No amount of love could bring the Jeep back. Dennis had cut short its young life and the poor sophomore had no choice but to put the car to sleep. The fairies from the towing company towed the car to the Jeep cemetery and there it sits in purgatory, waiting for the insurance agent to decide where it will go in its afterlife and how the poor sophomore will be compensated for her loss.

A scary story, isn't boys and girls? Well, it gets scarier. The sophomore wasn't the only one the evil fairy Dennis decided to play a trick on. Dennis also decided to take away other sophomore's cars, and not just sophomores either. Dennis took cars from juniors and seniors, too. Not only did he take cars, he enlisted the help of his evil friends Susquehanna and Appalachian and together, they took away houses too! Not one person that lived in the magical land of Bucknell was unaffected.

The day after Dennis left, the poor residents spent their hours sifting through their possessions, taking pictures of the damage Dennis caused, and having their cars towed. "Why gods?" they asked, "Why did you send the evil fairy Dennis to take away our happiness? Was it because our cars were so nice? Because our houses so big? Was it because, as college students, many don't think we deserve such fineries?"

But then the sadness turned to anger. "Why didn't someone see Dennis coming?" the inhabitants of Bucknell questioned. "The magical land of Bucknell is in a valley by a river, below mountains, could we not have predicted this would happen? Shouldn't those who have lived here for a long time prepared us?"

But then they began to think. Maybe the old time residents, or "Townies" as they were called in the magical land of Bucknell, did not warn the Bucknellians on purpose. Maybe they were the ones who didn't think the sophomores and juniors and seniors deserved such nice things. And in their anger, the Bucknellians decided to do something. Something drastic.

Days passed and the land of Bucknell was quiet. But then, one night, it began to rain again. The students were prepared this time, however, and with the first drop they ran outside. With angry fists pumping in the air, they began to riot. Having had plenty of practice rioting, the Bucknellians frightened the townies so much that they immediately began the flood warnings and the residents of the magical land of Bucknell were happy again.

LETTER TO THE EDITOR

Administration and COGL, Let the Greeks be heard

To the editor:

Once again the interests of the Greeks have been pushed aside by the University. House Party is now in the middle of March? Due to apparent scheduling errors the University has informed the Greeks that our event that was originally scheduled for mid April is now on the weekend of March 24 and 25. Barring a climatic miracle this weekend will be too cold to host parties and bands outside, and again the interests of Greeks, and every student and alumni that enjoys House Party weekend have been pushed aside.

What is it going to take for 60% of the student body that is Greek to finally be heard? The University complains that we do not participate in events like the Chrysalis Ball and other planned activities; however, how do expect us participate in University sponsored events when they have taken away virtually everything that the Greeks called their own in the past three years? House Party might as well be called winter formals now. COGL, Council on Greek Life, has made drastic changes to the Greek system in the past year, but their decisions have been inappropriate and uneducated. Many of the faculty who sit on COGL know very little about how the Greek system truly operates today, yet the decisions that they make still somehow effect the livelihood of every fraternity on this campus.

Something drastic needs to happen at this University or the Greek system will cease to exist. We need the University to compromise with us and ask our advice before simply making decisions on our behalf. We are essentially powerless because the University has usurped all of our power from us. So rather than offering up opinions and theories it is time that someone offers up suggestions and solutions to this controversy.

How do we solve this issue? We the Greeks will agree to participate more thoroughly in University sponsored events if we are given more leeway on events like House Party. Additionally, it must be required that every serving member on COGL attend one Greek philanthropy event, one community service event, and one registered party before sitting on this committee. Then every month each member must meet individually with the Presidents of the Panhellenic and Interfraternity Councils for one half hour to discuss Greek life at Bucknell.

By doing this we will be able to find faculty members to serve on COGL that truly care about the Greek system and are willing to learn about it in order to make more educated decisions on our behalf. I also would like to challenge the faculty, rather than complaining all the time about the state of the Greek system and how the Greeks come drunk to class every Thursday morning, take part in Greek events and see what we are really all about. Accept invitations to fraternity scholarship dinners, attend parties, help sponsor community service events, and if you so desire expect more out of your students who are Greek, because I guarantee that they will perform.

We will not settle for House Party on March 24 and 25th. The University must take the first step towards compromise.

Pete Kadens
President, Interfraternity Council

'Peace, Love and Music'

University shares summer concert memories

By Kristen Jancuk

Courtesy Brain Stoos

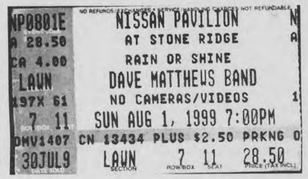
Fans gather at Woodstock '99 in Rome, New York.

Summer is famous for its family vacations, trips to the beach, evenings at the community pool and barbecues and picnics galore. In recent years, summer has also become the season of music, marked by huge tours and concerts from some of the biggest names in music.

In the mid-Atlantic, summer was ushered in by the HFStival, a one-day concert featuring big name bands and local music, sponsored by 99.1 WHFS in Washington, D.C. Usually held at RFK stadium in D.C., this year's concert was relocated to the new PSINet Stadium in Baltimore here bands like the Red Hot Chili Peppers, Silver Chair, Orgy and Lit performed in a sold-out show.

The concert's popularity has been steadily increasing since it began in 1990, as has its name. While originally a predominantly local show, the HFStival now draws crowds from out-of-state and has merited mention on nationwide cable stations such as MTV. "The HFStival was one of the highlights of my summer! I had such a great time because I was able to listen to a huge variety of bands while at the same time enjoying the unique atmosphere of an all-day concert with so many different activities and types of people," Kim Spigelmire '02 said.

On a larger scale, Woodstock '99 was held in Rome, N.Y., over a three-day span, from July 23 - 25. Featuring over 80 performers, the concert attracted over 220,000 fans for three more days of "peace, love and music." Though fires, riots and overzealous fans showed the darker side of the concert, these incidents were surprisingly few and far between.



The concert was such a success that a double live Woodstock '99 CD and video are scheduled for release sometime in late September or early October. "It was easily the most incredible experience I have ever had in my life — the atmosphere was amazing," Brian Stoos '01 stated.

Another popular multi-artist summer tour was the third and final Lilith Fair, featuring some of the music industry's most popular female performers. The tour, headlined by Sarah MacLachlan and Sheryl Crow, visited 33 cities between July 8 and Aug 31. In addition to sponsoring a day of all-female performers, such as the Dixie Chicks, Shawn Colvin and Lisa Loeb, Lilith Fair also raised money for various nonprofit organizations. The tour made contributions to women's shelters in each of its city stops as well as donating money to national organizations such as the Breast Cancer Fund, LIFEbeat and the National Organization for Women (NOW).

Many solo band tours also traveled across the country this summer, some old favorites and others doing nationwide shows for the first time. The Dave Matthews Band began its sixth summer tour in late June, shortly after the end of the Dave Matthews and Tim Reynolds acoustic tour that stopped at the University in February. Promoting the band's sixth album *Before These Crowded Streets*, performances included songs from that album, plus crowd-pleasers such as "Jimi Thing" and "Crash Into Me." Fans in several cities were lucky enough to catch songs such as "Granny," "The Maker" and "True Reflections" that don't appear on any of the band's albums. "I went to two DMB concerts and had a great time at both—he played a variety of songs and even though I have been to seven shows I always have a great time," Sarah Chance '02 said.

Jewel, who performed at the original Lilith Fair, has also had a busy year. She released her second album, *Spirit*, earlier this year as well as a collection of poetry in late 1998. She began touring this summer to promote her album, as well as her collection of poetry, *A Night Without Armor*.

Her tour, which began on June 25 and ended on Aug. 28 suffered only a brief interruption, during which she joined in the celebration at Woodstock '99. While her tour didn't enjoy as many sold-out shows as some acts, thousands of fans attended her performances, which included released as well as unreleased songs, poetry readings and several duets betweeg Jewel and her good friend and fellow musician Steve Poltz.

Perhaps one of the most-awaited summer tours was Jimmy Buffett's yearly performance. After releasing his latest album, *Beach House on the Moon*, Buffett began his tour on June 1 and is still traveling the country. Nearly every show sold out within minutes and many Buffett fans resorted to using fake tickets and climbing fences to catch a glimpse. Several cities were lucky enough to merit two or three performances, giving fans an extra chance to spend an evening with the legendary performer. Buffet has set tour dates for November and is expected to continue with a winter tour as well.

Finally, very lucky Pink Floyd fans were thrilled to hear that Roger Waters, the former bassist and vocalist for Pink Floyd, would also be touring this summer. Beginning July 23 and finishing Aug. 21, Waters' tour attracted huge crowds, and surprisingly few shows had any remaining tickets.

In addition, the small venues that Waters chose to play inadvertently encouraged excessive ticket scalping. The tour covered the eastern United States and parts of Canada and is expected to resume in late spring or early summer after Waters has completed a new rock album. "The Roger Waters show was truly an evening to remember. Roger sounded better than ever, and the other band members made it sound as if all of Pink Floyd was on stage. Roger definitely lived up to his reputation as one of the great performers. The setlist could not have been any better, and the special effects, along with the atmosphere, also made it one of the highlights of the summer," Dave Reddy '02 said.

Literary magazine captures creativity

By Katie Councilor

Fire and Ice, the newest of the University's three literary magazines, was created last semester by four first-year students, Sarah EnDyke, Ruth Li, Radhika Akkapeddi and Rachel Zeigler. They started *Fire and Ice* (*F&I*) to give students a new flavor to try: a less traditional, more original magazine that was not simply words on one page and art on another.

The *F&I* creators had several goals and ideas in mind when they started. The first was to bring together words and art on the same pages, rather than keeping them separate. "Each page has its own image, its own style and personality," EnDyke '02, said. "This allows the reader to have a more complete emotional experience with the works.

Another goal was to combine student work with the work of prominent artists. This served two purposes: to help sell copies of the magazine and "to demonstrate the evolution of student to professional," EnDyke explained.

The aspect of *Fire and Ice* that sets it apart from other literary magazines is that it does not just include art, short stories, poetry and photography, but also includes comics. Most literary magazines steer clear of comics because many people write them off as being immature and childish. *F&I* thinks differently; they feel that comics are an American tradition.

"As many of us stand on the border between childhood and the adult world, we should realize that we don't have to leave our childlike wonder behind, for taking parts of them with us throughout life can help create an equilibrium amidst the stresses and fast-paced movements of the adult society," EnDyke stated.

Fire and Ice goes beyond the borders of the classic literary magazine, and is distributed beyond the borders of campus. Last semester, *F&I* debuted at the Pittsburgh comic convention, where it sold over 100 copies. Many dealers purchased the magazine to display in stores all over the United States, including Chicago, San Diego, New York, Atlanta, New Orleans and Ohio. *Fire and Ice* then traveled to the Detroit Motor City Conference where over 150 copies were sold.

Currently, the *F&I* team is working on the Fall '99 edition, due for publication in December. The issue will feature the work of two outside artists, one of whom is prominent in the entertainment industry. Matt Busch is an official artist for Lucas Films, and has worked on many movies, including "Con Air", "Star Wars: Episode 1" and "The Devil's Own." Busch is creating a full color original wrap-around cover for *Fire and Ice*.

The second contributing artist is "Poe" creator Jason Asala. In his comic, Edgar Allan Poe narrates the story of his lifelong search for his lost love, Lenore.

Students have been expressing a growing interest in the new magazine. Their energy and innovation in creating the magazine allows for both its readers and creators to explore themselves, their culture and the themes presented.

Anyone who is interested in contributing work to *Fire and Ice* can send submissions to *Fire and Ice* c/o Sarah EnDyke, C2117.

Wink Thinks

By Eli Winkler

Jacqueline Flicker—The Bucknellian

Now that the summer is over and a new school year is upon us, we here at *The Bucknellian* know that you probably have some issues that need to be addressed. You know what I'm talking about: the nasty tan line that will not go away, the J-crew shirt that still has not arrived, or that guy or girl from the summer you just want to forget about. Well, have we got news for you! Due to popular demand, the man with the answers is back! Yes, *The Bucknellian* is once again proud to present Eli Winkler a.k.a. "Wink Thinks."

If you are familiar with the University, you will be thrilled to know that Winkler is once again ready and able to tackle the questions of the University students. Winkler seeks to leave no question unanswered and no problem unsolved. Whether you are having trouble in a relationship, feeling down, having roommate issues, or you simply need someone to talk to, Wink is your man. Although his stunning good looks and vivacious personality may have won the hearts of many, in Winkler's mind he is still just a servant of the people, eager to share his words of wisdom with anyone in need of help. So if you are still sitting next to the Langone Center on a Friday night without a date, talking to the cafe workers who are out for their smoke break, Winkler is eager to help you ask out that special someone. So without further adieu, *The Bucknellian* gives you, the students of the University, Wink Thinks.

Dear Wink,

I have always had my own car and have driven pretty much every day since I got my license years ago. Over the summer my parents decided to buy a new car for no reason in particular, and as a result of their purchase my family was left with an extra automobile. Partially due to my driving needs, and my constant nagging, my parents let me drive the new car for the majority of the summer. However, when it came time for me to travel back to Bucknell, my parents did not think that it was reasonable for me to drive the new Porsche to school. I did not know why, but they said something about not being responsible enough. Even though I was disappointed about not having my own car, I was confident that my roommate, a good friend of mine, would let me drive hers. However, she has decided that she cannot take the risk of letting me drive, and that she is not confident with my driving skills. To put it mildly, this enraged me. It's not like she is driving my Porsche; she has a two door Geo Metro, and she herself has already been in her fair share of accidents. On the other hand, I have a clean driving record, so I do not really understand where she gets off making all of these comments. Therefore, I ask you, should I confront her about what she said to me? Additionally, how do you think this would change our friendship?

Sincerely,
Without Wheels

Dear Without Wheels,

Even though Mommy and Daddy decided to give you the new Porsche it does not necessarily give you the right to drive your roommate's car. You see, it is her car, not yours, and whatever decision she makes you will have to live with. I understand that you do not feel as though her Geo lives up to your Porsche, but that attitude is not one that I would be proud of. After all, what gives anyone the right to judge someone simply based upon the kind of car they drive? Maybe she paid for her car with her own money, and she is proud of it. There is a strong possibility that maybe she does not want to take the risk of having her car damaged, and even though you may have a better driving record, it is her car to either wreck or to keep in good condition.

On the other hand, I do understand your frustration and anguish regarding the comments that your roommate made. In my mind, I feel as though they were probably a bit unjust and she could have figured out a better way to express her concerns. You should tell her that the comments she made hurt you. Do not confront her and risk turning the situation into something more than just words. If you do in fact confront her, she may think that you are trying to start something with her and it may turn physical, when in fact all you want to do is talk it over. Therefore, I urge you to simply sit down with her in a calm setting and discuss it. There is no need to turn a friendship into a head-on collision, especially when it is about something as trivial as a car.

Lastly, I want to address your question regarding the status of your friendship. Personally, I do not think that this will change your friendship, and more importantly I don't think that you should let it change your friendship. Sometimes friends get into arguments; however, you should not give up on things when this happens. Friendships, and moreover relationships, require constant attention and they are things that need to be worked on. If you talk to your friend in a civilized manner I am sure that everything will be legit. On that you have the Wink Thinks guarantee.

Perhaps you and your friend should take a ride together in her car, and turn a tough situation into a positive one. The two of you should sport her Geo as if it were your Porsche. After all, as Tupac says, "picture me rollin'."

Until next time, relax, have fun and let Wink's wisdom be your guide.

If you are interested in writing to Wink there is no need to worry: all questions are confidential and answers are always thorough. However, please write questions that are decent because we cannot include material that is libelous or an invasion of privacy. Questions or comments can be sent to Eli Winkler at box C2815, attn: Wink Thinks.

Please note that Wink Thinks is meant to be instructional as well as entertaining. However, it is in no way a substitute for professional counseling.

Amnesty International fights injustice

By Helen Shen

"It is better to light a candle than to curse the darkness." This is one of the many mottos that Amnesty International lives and works by. Throughout the world, over one million members of Amnesty International strive to promote human rights. On a much smaller scale, the University chapter of Amnesty International consists of about 20 members and meets every other week for about 45 minutes.

Amnesty's two leaders, Brianna Beechler '02 and Tiffany Bohn '02, have many plans in store for this school year. The chapter has a successful history as well as a bright future. Last year's "Focus on the Death Penalty" week drew in large audiences, as did a banquet which celebrated the anniversary of the Universal Declaration of Human Rights. However, perhaps the greatest edification is that last year the chapter wrote several letters petitioning campaigns for Amnesty International's headquarters and received several updates on the impact of their letters.

"We hope to do all we can [this year] to add to the international effort by Amnesty to aid in the release of prisoners of conscience," Bohn stated. With a substantial group of activists, Amnesty is already preparing for trips to conferences, campaigns, letter writing and petition activities. "We have a promising group of students this year that have demonstrated their interest in working towards a better standard of life," Bohn continued.

What does the University chapter of Amnesty strive for? "We hope to bring more awareness to the Bucknell community about the atrocities in human rights violations globally that so often go unnoticed," Beechler said. She continued, "Each Amnesty member can make a difference in the scheme of things simply by making someone else aware of what's occurring."

This year's activities include anti-death penalty Congressing, and U.S. petitioning on Tibet and Kosovo. "This year, I would also hope to do more work with other politically active organizations on campus such as FLAC&B, SEAC and Students for a Free Tibet in order to strengthen our resources in the fight for human rights," Beechler said. The group also plans to write letters concerning the recent imprisonment of an Uighur businesswoman, Rebiya Kadeer, who is serving time for a crime she did not commit.

Both Beechler and Bohn have a history with Amnesty and its beliefs. Bohn was president of her high school chapter and was always deeply involved in the news around her. "I chose to get involved in Amnesty...here at Bucknell because it seemed like an easy and direct way to help make some kind of a difference in the situation as an individual," Bohn states. Beechler's reason for getting involved mirrors the attitude that supports the worldwide Amnesty organization. "What motivated me was that I was so offended by the myriad of human rights violations that I could not just sit there and watch them take place in good conscience," Beechler continues.

Amnesty has an important role in the University community. Both leaders believe that Amnesty has a positive impact on the campus. "By signing our petitions, the Bucknell community is saying that they, too, are aware of these violations and will not allow them, in good conscience, to continue."

Frangione and Kuhn travel to Taiwan to dance

As ambassadors of dance, professor and student learn valuable lessons and appreciate their freedom of expression

By Courtney Spohn

This past summer Danna Frangione, director and associate professor of dance, and Kristy Kuhn '00 spent one month in Taiwan where they taught a dance class to high school freshmen. They also performed a duet at a show in Taipei.

When speaking of their trip, Frangione and Kuhn are modest. They emphasized the importance of having a sense of the social and political climate in Taiwan in order to fully appreciate their experience.

Unlike American students who are encouraged to explore career choices, students in Taiwan are assigned their profession by the third or fourth grade. In addition to their studies, students must perform janitorial chores. They spend the majority of their day at school which they attend year round.

Taiwan has only one professional dance company supported by the government and three independent companies. Hundreds of young children begin the initial training yet, once in high school, the potential dancers have been cut to 50 students. Of three schools of dance, the premier University graduates 25 dancers each year. Students leave the schools as dedicated, motivated and competitive dancers. This strict system is what makes the dancers in Taiwan the best technical dancers in the world.

Frangione has spent the past six summers traveling to Malaysia, Singapore and Taiwan. She had the opportunity to teach abroad through a respected colleague who holds power throughout Taiwan's dance community. As some of the only Caucasians, Frangione and her family were literal traffic-stoppers. "People [in Taiwan] used to compliment me on my nose and light skin," Frangione said.

Each year she has been abroad, Frangione has taught high school freshmen at Tsoying High School in Kaohsiung, Taiwan's second largest city. A prestigious dance school, Tsoying holds auditions for enrollment. The competition continues once students are admitted. "I've seen slapping and kids kicked out for making a mistake," Frangione said.

Taiwan can afford to kick dancers out for any slight imperfection in body type, technical skill or style. Kicking students out of the dance program is seen as a blessing, for it allows the student to pursue another profession rather than being handed an arbitrary profession from the government. Frangione admits to having a hard time accepting Taiwan's policy, "I believe dance should be very embracing," she said.

Even as freshmen in high school, a group ranging in age from 15-17 years, the students have the technical ability of professional dancers in the United States. Kuhn grew wistful thinking about the students in Taiwan, "I wish I could do some of the things they can," she said.

Rather than exploring the country as previous students have, Kuhn spent most of her time teaching with Frangione. "I wish all the dancers here [at the University] could go," Kuhn said. "It's inspirational—they all work so hard. It gave me incentive to push myself and work hard."

After three weeks in Kaohsiung, Frangione and Kuhn traveled to Taipei to work on and perform in a show celebrating "mature" women in dance. These professional dancers, as they age, feel compelled to resign and allow the next generation their opportunity due to a limited number of avaliable spots. In Taiwan, a 30-year old dancer is considered to be past her prime and mature.

The Taiwan dance culture is now beginning to play with the idea that older women can still contribute to the art. The show in Taipei highlighted the work of three women, including Frangione. Frangione's students from the previous year performed the dance she choreographed for them and then Frangione and Kuhn performed a duet.

Though they speak modestly of their role in the show, it made a huge impact in the dance community. As experimental show, it included a discussion panel which attracted media attention from television stations and newspapers.

From their experience, Frangione and Kuhn brought back a continually growing desire for their art and dedication to live their lives to the fullest.

Ryan Medel-The Bucknellian

Danna Frangione, professor of dance, and Kristy Kuhn '00, traveled to Taiwan this summer to teach dance and perform.

A selection of poems by Olga Sedakova

RAIN

To his holiness John Paul II

"It's raining,and they say there is no God!"
old nanny Varya used to say
at our house.

Those who say there is no God
now light candles before icons,
petition for liturgies,
and are mindful of different religions.

Nanny Varya lies in the churchyard now,
and the rain pours down,
magnificent, incomprehensible, abundant,
it pours and pour without knocking on anyone's door.

THE NOTHING

Feeble
completely feeble,
like the nothing
that creating hands haven't yet touched,
the hands of hope,
and to its lure

a sprout rises up from a tilled black field
a four-day Lazarus rises
tied hand and foot
in his burial shroud
that is deader than death:

the nothing
the absolute nothing,
my soul! be silent

The Stadler Center for Poetry to open season with renowned Russian poet

By Jolene Hart

courtesy of the Stadler Center

The Stadler Center will host celebrated poet Olga Sedakova as the year's first poet-in-residence.

As the Stadler Center for Poetry's first event this fall, the University has the privilege of hosting internationally acclaimed poet Olga Sedakova. Arriving earlier this week from Russia, Sedakova will appear in a series of events that highlight her works as the University's poet-in-residence from Sept. 8-15.

The highlight of Sedakova's visit will be a bilingual poetry reading in which Sedakova will present her work in Russian while a student will recite the English translation. This form of presentation will allow for the original language of the poems to be heard, enriching the entire experience.

A Professor of Religion and Philosophy at Moscow State University, Sedakova is recognized worldwide as one of Russia's foremost poets. She began writing in the seventies and has published a number of extensive collections, including *The Silk of Time* (1991) and *The Wild Rose* (1996), which were translated into English.

Her writings have been published and translated in England, France, Finland, Italy and Israel. Much of Sedakova's poetry centers around religion, using vocabulary of the ancient language of the Slavonic Church. However, her works have been said to include symbols that apply to both secular and Russian Orthodox views.

Sedakova's works have been published in numerous Russian literary magazines such as *Druzhba odov*, *People's Friendship Magazine*, *Novy Mir* and *Lanterna Magica*. "Sedakova sees herself as a keeper of traditional Russian culture," Slava Yastremski, director of the University's Russian program, said. This role is evident throughout her poetry.

In 1998, Sedakova was the recipient of the Vatican's Vladimir Solovyev Humanities Prize in Poetry, reflecting, among other things, Pope John Paul II's love for her work. Sedakova's poem, "Rain," is dedicated to the Pope.

Other events planned for Sedakova's visit will be a workshop in which she will lecture on the art of translating literary texts. The workshop, to be held at 4 p.m. next Wednesday, Sept. 15, in room 11 of Bucknell Hall, should be especially interesting to students of English, modern language and women's studies, as well as those who wish to learn more about poetry, translation and Russian culture.

Sedakova's appearance at the University is greatly due to the collaboration of Yastremski and Cynthia Hogue, director of the Stadler Center for Poetry and associate professor of English Yastremski first met Sedakova during his sabbatical in Russia in 1996-97. Sedakova came highly recommended and it was soon proposed to host this renowned poet at the University.

After her visit, Sedakova plans to make appearances at several other campuses, including Penn State, Amherst and Colombia University. The events within the next week will be co-sponsored by the Russian Program of the Modern Language Department, the University Lectureship Committee and the Association for the Arts.

Concluding her stay at the University, Sedakova's poetry reading will be held at 8 p.m. this Sunday, Sept. 12, in Bucknell Hall and all are welcome to attend. A reception has been planned following the event.

"Must see TV:" A complete preview of the fall line-up

by Sahanna Ravindranth

As television viewers across the country prepare for the most anticipated event of the summer—the fall television season premieres they can expect a hodge-podge of shows shaped for almost any type of TV viewer. From teen dramas to unconventional comedies to melodramatic series, the 1999 fall television season is sure to keep viewers glued to their sets night after night.

Coming to NBC this fall is a mixture of shows all deserving of the promo "Must See TV." Reminiscent of "The Wonder Years" (minus the adorable Fred Savage), "Freaks and Geeks" delves into the '80s world of high-school outcasts. A cast of newcomers play the kids no one wanted to be seen with. If you want to relive those tragic high school days, this is the show for you.

Next in line is "Cold Feet." Despite the title, this comedy/drama goes beyond issues of marriage to explore all the various stages in a relationship from the initial dating period to the first baby and beyond. The show digs deep into the famed immaturity of males, fear of commitment and the stress of being a new parent, all the while continuously exhibiting the rocky steps to a perfect relationship.

After a much-anticipated arrival, "The West Wing" hits small screens all over the country this fall. Starring big names such as Rob Lowe, Moira Kelly and Martin Sheen,"West Wing" offers a comedic and intriguing look into the stress-filled world of White House staff. This is the story of a group of young staffers who try to find a balance between making decisions which shape the country and making decisions for their personal lives.

With the next major network, ABC, comes a host of comedies and dramas. "Wasteland," a new series created by Kevin Williamson (who brought "Dawson's Creek" to fame), seems to be a sure-fire hit. Based in New York City it explores the life of a group of twentysomethings trying to deal with the reality of life after college. With a diverse bunch of characters including a 27-year old virgin, a Southern belle and a college stud, a common thread is woven as each searches for friendships, careers and sex after their college experiences. This show is a must see for those wondering what life after college is really like.

David E. Kelley, creator of smash hits "The Practice," "Ally McBeal" and "Chicago Hope," brings us another unique show, "Snoops." Depicting the unconventional and wacky tactics used by three private detectives, they leave no stone unturned when solving a mystery-murder. Think "Charlie's Angels" meets "Melrose Place."

To round out the line-up, the network will introduce "Once & Again," a grown-up romantic drama. "Once & Again" is the story of divorced parents who are trying to get seriously involved in an adult courtship. Specifically aimed at hopeless romantics, viewers will find themselves wrapped up in the story, hoping for these divorcees to find their way to each other.

Along with these are the veterans of the small screen—"ER," "Friends," "Dawson's Creek," "Beverly Hills 90210," "Party of Five," "X-files," etc., which have left loyal viewers on the edge of their seats for this upcoming season. The stories of rape, marriage, relationships and uncovering conspiracy theories which remained unfinished last season will surely excite viewers with their stunning plots.

Shortage of physicians in rural areas remains longstanding problem

Jefferson Medical College program gives priority to Bucknell students

by Katherine Nowak

Established in 1974, the Physician Shortage Area Program (PSAP) of Jefferson Medical College has addressed the challenge of finding practical solutions to expanding the number of rural physicians. This special program gives priority to Bucknell students. Its focus is on cooperative family medicine in physician shortage areas including the Pennsylvania counties Beaver, Clairon, Clinton, Cumberland, Indiana, Lebanon, Lycoming, Schuylkill, Susquehanna, and Wyoming, among others.

The program's objective is to recruit students who wish to become involved in a family medicine practice in rural areas and small towns. Selective consideration measures are taken for admission. A three-year family medicine residency training is carried out, and practice in an underserved area is anticipated. The aim is to improve distribution of physicians in Pennsylvania. Students with non-urban backgrounds are encouraged to attend one of the six cooperative program schools for undergraduate education and apply to the PSAP in their senior year to Jefferson Medical College. Twenty-four applicants are admitted each year, with selective consideration given to graduates of the six cooperative program schools, which includes the University.

Preparation in the sciences and mathematics is basic, including laboratory experiences along with biology, general and organic chemistry and physics at minimum. An emphasis on a wide breadth of disciplines, humanities, social and behavioral sciences, is stressed, as well as on effective writing skills.

Motivated towards the practice of medicine, students will undergo a six-week clerkship in a rural area, serve a senior outpatient subinternship in family medicine, complete a three-year family medicine residency, and finally commit to practice in an underserved rural area or small town.

Questions raised on the program's application address a student's current residence and its distance to the particular physician shortage area for which he or she decided to apply; connection or relationship with shortage area and reason for choosing it; whether student has ever resided in an environment similar to the area applied for; and if the area the student currently resides in is a physician shortage area.

Courtesy of Medical Supplies

Dr. Fred W. Markham, M.D. from Jefferson Medical School, gave a presentation on the program at Jefferson on Tuesday, September 7, discussing the training offered by the program in family medicine. "Famiy medicine" was defined and the application profile for the program was overviewed.

Those students who commit to the program and who decide to practice family medicine in a non-metropolitan area have an opportunity for increased financial aid. Involvement in this growing field allows personal medical care opportunities for people of all ages and types of problems. The range of income for family physicians varies depending on practice type, geographical location and number of hours worked. In 1987, the average net income of family doctors was $87,100. However, the Legislated Resource-Based Relative Value Scale, initiated in 1991, has brought modifications, and future family practitioners are expected to be reimbursed at 30 to 40 percent above their current rate. Most procedure-oriented (surgical and hospital-based) specialists, on the other hand, will face decreases. Rural area physicians will also qualify for an additional reimbursement of up to 30 percent.

According to a study conducted by Jefferson's Howard K. Rabinowitz, M.D., PSAP graduates were three times as likely as their non-PSAP classmates to later practice in a rural area of the US (34% vs. 11%), three times as likely to be practicing in an underserved area (30% vs. 9%), four times as likely to be a family physician (52% vs. 13%), and more than eight times as likely to have a combined career in family practice with practice in a rural area (21% vs. 2%). The vast majority of PSAP graduates (84%) were practicing in either a rural or small metropolitan area or one of the primary care specialties.

Rabinowitz concluded that the outcomes of the PSAP program have therefore been quite successful over the last 25 years. The study demonstrated that "this modest medical school educational program has had a disproportionately large impact on the rural physician workforce, and that this effect has persisted over time."

"Based on these results, policy makers and medical schools can have a major impact on resolving the shortage of physicians in rural areas, by implementing programs similar to the PSAP," said Rabinowitz.

The program's success is encouraging, in that it will aid access to medical care for large and growing segments of the population.

Rabinowitz has also taken great efforts in designing a large national study to determine "those factors that are most predictive of physicians' caring for underserved populations, and the relative importance of these factors." Some include a student's personal and educational background.

"Although some data exist regarding the importance of individual background factors related to a physican's practice in underserved areas, limited information is available on the impact of educational and economic factors, and almost no information is available on the relative importance, interaction, and interdependence of these factors," said Rabinowitz in "Predictors of Physicians' Care for Underserved Populations: Modifiable Factors."

The results of the investigation will render policy makers with significant knowledge regarding the relative importance and correlations among the factors defined as most predictive of physicians' caring for underserved and rural populations.

Jefferson medical college should also be commended for its recent research. Its scientists have been working on developing methods to isolate blood stem cells. They have also investigated radiation after surgery and its benefits to high-risk prostate cancer patients.

More information on Jefferson College and the PSAP is available at:

Creatine: the facts and the fiction

By Matthew Trunnell

Want a perfect body? Bigger muscles? Less fat? Many people believe that creatine is the answer to everyoneís desire for better fitness. But the popularity of creatine has urged researchers and fitness trainers across the country to look past the hype to find the fact behind the fiction.

Courtesy House of Nutrition

Last week, we looked at the dangers of prolonged use of creatine. This week, we try to dispel some of the myths behind what creatine does and does not do. The truth is that while no one knows everything about the effects of creatine supplementation, there is enough information available to make an informed decision about whether creatine might benefit you.

Myth #1: Your body will stop producing creatine naturally. Creatine occurs naturally in body; most is acquired from the food we eat. It has been reported that creatine users can develop a physical dependence, where the body will stop producing creatine all together. In this scenario, the person may have to use more and more creatine to reach their fitness goals. The fact of the matter, however, is that a physical dependence can only develop if a person uses creatine for extremely long periods, and maybe not even then. Even so, the smart way to take creatine is to alternate supplementation every month or so; for example, using it for the next three weeks, and then taking the next three weeks off.

Myth #2: Creatine is good for endurance activities. This myth is potentially the most harmful of any of the associated short term problems. Although creatine does increase the energy level in muscles, it does not increase the endurance of those muscles. That is why creatine use is most often associated with weightlifting or sprinting, and not distance running. In fact, due to the dehydration that can occur if water intake is not increased (especially during the first few weeks of usage), some endurance athletes that chose to use creatine have reported muscle tears and strains.

Myth #3: Creatine makes you gain weight. It is easy to label creatine in a category with supplements that are focused on gaining weight. In practice, however, creatine has a different effect on everyone. Depending on a person's metabolism rate, body fat composition, and fitness routine, creatine can do many different things. Muscle gain is most often associated with creatine, but is only likely to happen with an intense workout schedule and increased metabolism. It is possible for a person with a slow metabolism and light fitness routine to gain fat with creatine.

Myth #4: The more creatine, the better. Since the FDA has not examined creatine for approval, there is some debate as to how large a dose is enough to be effective. It is important to remember that the marketers of creatine are also the ones that determine what the recommended intake is on the bottle. It is also curious that those suggested use values are not scaled for the user's body weight; should a 250-pound bodybuilder take the same amount as a 150-pounder just starting a fitness program? One thing is for sure: saturating your body with too much creatine is probably a not a good idea, due to the effects on the kidneys and liver. As everyone knows, the kidneys and liver suffer from the burden of filtering out an overload of substances in the blood. This is more likely to affect those who already have kidney or liver problems, but it is better to err on the cautious side.

Air pollution related deaths preventable

By Brienne S. Terril

Australia's Commonwealth Science Council recently released a report stating that some preventive steps and monitoring actions could drastically reduce air pollution, which is responsible for eight thousand deaths a day. The report is the result of a conference held in Brisbane, Australia, July 19 through July 23, which examined the effects of air pollution on world health.

Pollution is responsible for close to 3 million annual deaths, according to the Environmental News Network, and of those, 2.8 million are due to indoor air pollution.

The World Health Organization estimates that ninety percent of the deaths occur in developing countries. The greatest source of the pollution in both developed and developing countries is diesel engines.

"Transport and industrial emissions generate smog that destroys sensitive tissues (in the bodies of people and animals), as well as produces fine carcinogenic particles that reduce lung function, and are ultimately responsible for many untimely deaths each year," Peter Manins, a scientist at Australia's federal science agency, CSIRO, wrote in the report.

In many Asian and African countries, though, the indoor use of coal for cooking and heating is a serious problem. Manins suggests simple preventive steps such as ventilation to reduce the problem.

Other steps discussed at the conference include replacing fuels such as coal with kerosene and natural gas in developing cities in a way that will elliminate the need for cars, thus decreasing car-related pollution.

All the attendants of the conference, including experts from Pakistan, India, Sri Lanka, Bangladesh, Malaysia, Brunei Darussalam, New Zealand, South Africa and Australia, did agree that air quality monitoring is essential in providing for public health.

CSIRO has developed AirWatch to measure particle levels primarily for the benefit of third world citizens. The CSIRO scientists hope that "this tool, costing 390 US dollars, can be used throughout the developing world," said Manins.

Sojka introduces science and religion lecture series with discussion on Darwinian thought

"Today we're going to talk about Evolution ... so, Toto, this can't be Kansas!"

By Katherine Nowak

In his lecture at the Univesity on Tuesday, September 7, Gary Sojka called science a self-correcting discipline, plastic to a degree, itself evolving. As independent advances continue to stem from various diciplines, all are held together in unison by one idea—evolutionary theory. "In the face of all challenges, evolutionary thoery has only gained," said Sojka.

"What is it that people do not want to believe about evolution?" The question can be answered by examining Aristotle's *Scala Naturae*, which illustrates a progression from the simple to the lowly to the exalted. The 'exalted' refers to human beings. "We were never sufficiently humble to put ourselves in the middle," said Sojka.

In discussing the initiation of evolutionary thought to the launching of the theory to the current view, Sojka noted that Darwin was not the first to bring up evolution. Among the theorists were Linnaeus, Lamarck, Malthus, Cuvier, Lyell, and finally Darwin, followed by Mendell and Wallace.

It is important to point out the distinguishing historical features of the times during which these theorists conducted their work. Societal influence was of significant bearing. *Scala Naturae* was combined with the day's Judeo-Christian beliefs, remaining consistent with religion, thus forming what appeared to be a solid world view.

Stephanie Metz—The Bucknellian

Sojka discusses the launching of evolutionary theory and the historical figures of science before Darwin.

Darwin was not ouside this world view—his grandfather, Erasmus Darwin, was a natural theologian. But even he had doubts about the Genesis story, highly concerning himself with the concept of 'mechanisms.'

Prior to Darwin's *Origin of the Species*, "what experience did people have of the world?" asked Sojka. "Most did not have the opportunity to experience what lay beyond their surroundings. Today, we are granted with access to the breadth of biodiversity."

Lamarck, disbelieving his day's predominating commitment to the belief of spontaneous generation, attempted to give the world a theory. His philosophy—"use it or lose it," connotated that the environment influences inherited traits in such a way that allows them to be inherited. "Use and disuse" saw a progress on a scale driven by the internal need for perfection.

The Lamarckian perspective differed much from Cuvier's, an early paleontologist, dedicated to tracking fossils through sediment. A disbeliever of evolution, Cuvier believed that the layers of sediment that he observed were due to past catastrophies.

During this time, natural theology was the dominant field of study. Academians attempted to understand the plan and patterns of God. Then came the Beagle Voyage, whose collected specimens pointed at evidence of evolutionary trends. The questions raised were "How does diversity come about?" and "In spite the variation, there is similariy; therefore, at what point was there unity?" The resemblance of the species of the Galapagos islands to the mainland of South America but not other regions dictated at ecological influence.

Evolutionary theory became the closest to the single unifying theory ever possessed by Biology.

Soon after Darwin's voyage, Malthus began his studies on populations. Darwin credits Malthus with the key observations that lead to the theory of Natural Selection. Wallace was as well a huge influence, paralleling Darwin's views.

"How is diversity held by unity?"asked Sojka. "By descent with modification, all the way back to a starting point—a common origin."

The theories of Darwin, Malthus, and Wallace countered Essentialism, the Scriptures and Aristotle's *Scala Naturae*. They moved our species out of their special place in the creation story. "Evolution was a bold departure," said Sojka. "It stated that we are all essentially related because we are all alive."

Periods that challenged evolutionary theory came and went. One that was distinguishing was that of Mendell's genetics. People were wishing for an alternate genetic theory, since Darwin had been vague on the issues of genetics, not possessing the modern mendellian view.

But rather than demolishing his theory, genetics, especially population genetics, became "a solid pillar supporting Darwinian theory."

In the 1950's and 60's came the wave of molecular biology. The tools and approaches of the DNA manipulators were yet another solid support. Paleontology, cell biology, population genetics, comparative biochemistry and physiology are today held together by the idea of evolution. Competing information has not been found.

Agricultural advances have also played an influential part. Early huntergatherers discovered seeds, beginning sedentary land occupation. Competition, territoriality, conflict and ancestral history became important, as animals and plants became domesticated. "Domestication is not an entirely human endeavor," pointed out Sojka. "We can only domesticate that which chooses to be domesticated."

"There is a covenant between the domesticated and the domesticator." The bond was made possible by the processes of evolution, animal breeding, and artificial selection.

SCIENCE EDITORIAL

Kansas has declared war on evolution

By Katherine Nowak

Kansas—It has been called a creationist victory, evasive of the broad and unifying theory essential to science, the theory of evolution. Despite its prehistoric Inland Sea and 150-million year old fossils that have recently been uncovered in the west, Kansas nevertheless has denied evolution's existence, setting standards on what an individual is permitted to learn.

"This is the most egregious deletion of evolutionary theory," said Peter Folger, spokesman for the American Geophysical Union in Washington, D.C.

In examining the current state of the religion versus science debate, what attracts attention is this month's issue of *Scientific American* which says that "top scientists are more atheistic than ever before."

The approaching millennium is signaling efforts and movements to reconcile these scientists with religion. *Newsweek's* cover "Science finds God" appearing last year was one such attempt. The relationship between science and religion is being called humility theology, and an obsession with the sponsoring of conferences and collegiate lectures has been born.

Scientists' reactions— Pure aversion to this attempt.

So what does the typical scientist hope and believe? A Bryn Mawr College psychologist once attempted to explain. In 1914, with a follow-up study in 1933, James H. Leuba surveyed American biologists and physicists on their religious perspectives. The poll's two main questions were "Do you believe in a God who is in affective and cognitive communications with man?" and secondly, "Do you believe in an afterlife?"

Options offered were yes and no, don't know, and agnostic.

The study was since duplicated in 1996 and 1998, in curiosity of present views, leading many to sneer and criticize the phrasing of the two inquiries, angry at the narrowness implied. As in Leuba's day, 40 percent of scientists today, chosen from *American Men and Women of Science*, believe in God. This finding is not consistent with Leuba's proposition that with time, cardinal beliefs would gradually fade and result in a percentage lower than 40 of the scientifically-oriented whom believe in God.

You can clearly be a scientist and have religious beliefs. Science and religion are simply seeking *different*, not opposing truths. There is little reason that one should impose on the other- they can coexist. Our universe is not black and white.

The theories of Leuba were however verified in a sample of men and women surveyed from the National Academy of Sciences (NAS). 90 percent of NAS members voiced religious disbelief. Mathematicians were surprisingly more believable than were biologists and physicists.

There appears to be a sense of reward for being irreligious when involved in organizations such as NAS. For one, an individual stays clear of controversy. When NAS was asked about evolution, NAS members' response was ambiguous, stating that it too was controversial. But in 1998, NAS issued a report promoting school teaching of evolution in public schools, reiterating that whether "God exists is a question about which science is neutral." To what extent was their declaration genuine?

It appears as if both sides, the creationists and the scientists, are what British zoologist, Richard Dawkins labels "intellectually dishonest." He believes that a compromise will never be achieved and that "to live with contradictions such as doing science during the week and attending church on Sunday" belongs under this label.

Scientific American asks "Are the deepest contemporary scientific minds drawn to atheism, or do the higher echelons of academia select for the trait of disbelief?" If you examine the question carefully, you will discover the implication at evolution, "Do echelons of academia *select*?" The philosophical inclination of the inquiry seeks to justify the need of scientists to hold on to stable ground.

This need may point at what appears to be the sixth sense of human beings- the sense of control. Humans, especially those involved in the sciences, need to believe that what has and is being studied is 'all there is.' Their drive for control and stability clings onto the faith that science encompasses and explains all— science thus becoming their 'religion.'

On the opposite side of the control-seekers are the flood geologists, whom are Noah-believers, in search of evidence of a flood.

Which is more destructive? An aching need for control or the illusion that the Bible's symbolism has stemmed from naturally occurring incidents? Is organized religion an enemy?

"The assumption that religion kills the courageous scientists is a myth," says Philip Hefner, a Lutheran theologian devoted to linking science and faith in his pro-science journal *Zygon*. "The strategy is to avoid either extreme."

But what are the implications of what has occurred in Kansas?

A native to Kansas, Leo Sandon wrote in his August *Daily Item* editorial "I am saddened that Kansas now competes with Alabama for the distinction of leading the nation in educational cretinism."

"Evolution is not just another theory, it is the theory," he said.

For clarification, the definition of a 'theory' is now required. Scientific theory gives plausible, logical explanations about a set or subset of FACTS, as the theory of relativity of Einstein and the theory of gravity of Newton. No one has questioned these two. In popular language, a theory is a mere speculation or guess. What has occurred in Kansas is the mistake of not being able to distinguish between the two definitions.

Despite differences in posture, many similarities in spinal cord and skull juntion exist between humans and apes.

3.5 million year-old fossils of early hominids have been uncovered, yet the belief that the world was created in six days about 10,000 years ago still remains despite this evidence.

What ignorance! Scientific theories, the working assumptions which have helped us to learn about how the world works, being refined and modified constantly, are now being threatened. This is an insolent stab at the hard-working scientist.

Meanwhile, creationists are teaching a dogma with no theory, no testing, no evidence. Their style reiterates biblical text. Science, however, has not made lowly attempts at criticizing this method of approach. The only puzzle now is 'how can religion be taught over evolution?'

If anything, both should be taught, permitting students to make their own decisions, to enjoy the freedom of belief, the freedom of speech and print. The alteration of standards by Kansas's Aug. 11 decision violates this privilege, depriving youth of experience.

Those who will desire to pursue science and medicine will be handicapped by Kansas' ruling. Where will they seek instruction?

The National Academy of Sciences and the American Chemical Society has "condemned the board's action as a setback for science education." Who, I demand, determines what one should learn? Who has the justification to dictate over beliefs? That knowledge is free to everyone should not have to be said.

Learning should not be constricted, whether it be learning of science or learning of Genesis.

My outrage is directed at the arrogance of human beings, whom have, since the appearance of the theory of evolution, been removed from the top of the line. Today, some may deny our common ancestry and ignore the natural changes that occur over time, but what cannot be denied is species competition. Every day, millions of people fight for their lives, competing with nothing other than—bacteria! Bacteria are competing right back, becoming immune in the face of antibiotics. Is antibiotic resistance not illustrative of Darwinian principles?!

Creationism can today be taught in Kansas and Alabama, if so desired, while evolution is excluded. New science tests, to be given in 2000-2001, will disinclude macro-evolution. Where does the justice behind this decision lie?

"This is an attack and a wake-up call for earth scientists, biologists, for any scientist," Folger said.

ABC News has also reported that the new standards Kansas has set have chosen to dismiss information about the Big Bang theory as well.

This is an embarrassment. Laura Scott, writer for *Kansas City Star* states that the decision has given "a negative impression of Kansas schools." This is an attempt to instill religion in schools. "If teachers begin to feel pressure from parents to stop teaching evolution, will school districts back the teachers up?" Scott asks.

The decision about teaching evolution in schools has been left to the local boards of education. Evolutionary content will however not be part of assessment tests. Evolution, according to the state, "does not exist as a subject of science education." This latter phrase will not only cause a disadvantage to Kansas students planning to attend college, but is an insult to scientific achievement, experimentation, observation and dedication to Darwinian theory. What I sense is people's ingratitude for the knowledge imparted on them by decades of scientific thought.

Hot Situations
Deserve

Play the
COOL FROM Nestea® Hot Facts Sweepstakes!
You could WIN
A Ski Trip to Vail, Colorado
a 3 day / 2 night weekend for four
Or a Casio® CASSIOPEIA™ E-100 Color Palm-size PC
HOT FACT #1
What percentage of students go on a "hot" date each week?
A. 22% B. 32% C. 42% D. 52%
Each week throughout September, look for one incomplete Hot Fact (like the one above) in this campus newspaper.
When you spot it, log onto www.coolcore.com and choose the answer that best completes the Hot Fact.
Complete all four and you will be automatically entered for a chance to win in the Hot Facts Sweepstakes.
Be sure to look for next week's Hot Fact!
www.coolcore.com

Open to U.S. residents, who, as of 9/6/99, are enrolled in a U.S. college. No purchase necessary to play. Void in Florida and where prohibited.

To enter via internet: Access the COOL FROM Nestea Web site at www.coolcore.com starting 12:01 AM (ET) on 9/6/99 through 11:59 PM (ET) on 10/3/99 to see that weeks Hot Fact(s) on screen. Every time you log on, you will be instructed to complete the on-screen entry form, including your name, the name of the college you are attending and the letter A, B, C or D, representing the word(s) which complete(s) the Hot Fact(s) for that week. Answer(s) need not be correct to be eligible but you must submit your answer to each of the four Hot Facts (one Hot Fact published each week as described in Rule #1 of the Official Rules) to be entered into the sweepstakes. Starting 12:01am (ET) on 10/4/99 through 11:59pm (ET) on 10/31/99, all four Hot Fact(s) will appear on screen in case an internet participant misses one or more of the Hot Fact(s) that were featured. While you can, if you wish, log on each day, only one sweepstakes entry per e-mail address that includes all four answers will be entered into the sweepstakes drawing.

To enter via mail: On plain 3" x 5" paper, hand-print your complete name, address, zip code, (optional) daytime and evening telephone numbers and the words "COOL FROM Nestea Hot Facts". Mail your entry in a hand-addressed 4-1/8" x 9-1/2" (#10) envelope, with first-class postage affixed, to: COOL FROM Nestea Hot Facts Sweepstakes, P.O. Box 4941, Blair, NE 68009-4941. Limit one entry per envelope. Entries must be received by 11/15/99. IMPORTANT: On the lower left-hand corner of your mailing envelope, you must indicate the name of the college you are attending. For Official Rules, by which entrants are bound, including a list of participating colleges, send a SASE to: Hot Facts Rules Request, P.O. Box 4948, Blair, NE 68009-4948.

Depth leads Bucknell to early victories

Key wins against Wagner, Fairleigh Dickinson and Marist capture Invitational

By Justin White

The defending Patriot League volleyball champions opened their season "championship style", by capturing the Marist Invitational with victories over Wagner, Fairleigh Dickinson and tournament host Marist.

The Bison started the tourney with a 3-1 triumph over Wagner. Bucknell won the first two games by the narrow margins of 15-13 and 15-11, but they then lost the third game 15-9.

The Bison came on strong in the final game to close out the match with a decisive 15-5 victory.

Bucknell was led by outstanding performances from junior Brooke Bader, 18 kills, and sophomore Shannon Walker, 14 kills.

Other key contributors were co-captain Jennifer Post '00 (23 digs), and Molly Brown'01, who handed out 29 assists to her fellow Bison teammates.

Head coach Cindy Opalski was pleased with the team's ability to have "different people contribute, which is a great sign of our balance this season."

It was this same balance that helped push the Orange and the Blue to win the 1998 Patriot League Championship and reach the NCAA tournament last season.

In its second match, Bucknell defeated Fairleigh Dickinson in four games, being stressed to a 16-14 win in the pivotal third game.

The Bison, led by senior co-captain Michelle Lesh's 15 kills, eight service aces and 12 digs, displayed their formidable strength and depth with three players tallying double-digit kills.

Walker and Nicole LaMothe '01 added 15 kills and 10 kills respectively, while Brown had another solid game with 48 assists and no errors.

The third game of the tournament matched the home team Marist College against the Bison. The Orange and Blue recorded a tough 3-2 victory, including a 15-1 thrashing in the third game.

The team again showed its versatility with a standout performance by freshman Jennifer Wrigley, who produced 18 kills and 10 digs.

According to Opalski, "the seniors (Lesh and Post) are expected to be in the forefront, while other players need to step up their game," as Wrigley and others were able to do throughout the weekend.

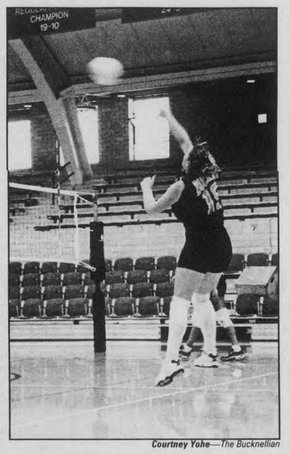
"The seniors are expected to be in the forefront, while other players need to step up their game."
—Head coach Cindy Opalski

However, the coach believes that the team still needs to show improvement in four vital areas, namely intensity, focus, enthusiasm and consistency, if it intends to repeat as Patriot League Champions.

The team has shown signs of championship play in the beginning of the 1999 fall season, but Opalski stated that her players did not show the necessary consistency which championship-caliber teams need to maintain.

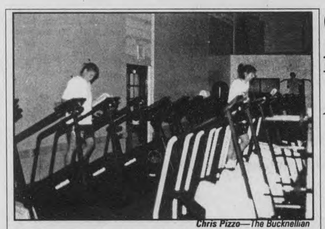
This can best be exemplified by the first three games of the Marist match, in which the Bison won the first game 15-11, lost the second 5-15 and then bounced back to a 15-1 win in the third game.

The Bucknell women's volleyball team hopes to improve upon its record and consistency as they host the Bucknell Triangular, with matches against Youngstown State and Iona, this Saturday in Davis Gym.



Courtney Yohe—The Bucknellian

Bucknell won the Invitational with great balance and versatility that thrashed their opponents.



Chris Pizzo—The Bucknellian

The new annex features treadmills, staircimbers and is just a part of the promised athetic facility expansion.

Annex improved

By Rose Sedo

Within my first week back on campus, there was already talk about it. Still, I dodged what rumors I could and decided to see the new and improved Annex Weight Room for myself. Needless to say, I was momentarily stunned by its complete transformation.

Upon entering, large vertical mirrors stretch across the previously bare and depressing walls. There are new black treadmills in the far-left corner. A row of stair climbers and stationary bikes adorn the back wall, behind the new, shiny Cybex equipment. These changes may seem a little overwhelming and the University promises even greater things to come.

When the plan for The Bucknell Campaign was developed in the early 1990s, the need to address the obvious inadequacies of the university's athletic and recreational facilities was extremely apparent.

The original plan included the addition of a new pool, the construction of a new health and wellness facility (fitness center) and a total renovation of Davis Gymnasium.

However, after two years of negotiation, the objectives took a slight turn. The campaign's leadership decided that the proposed project was plagued with a number of significant shortcomings, and the plan was reevaluated.

Through input from interested students, alumni and staff, the original plan has been enhanced substantially. The pool will now stretch to a length of 25-yards x 50-meters and the student fitness facility will cover 6,500 square-feet. There are also blueprints for a new 3,800-seat arena with unobstructed views from all seats.

The hope is that the revised plan will develop a fully functional and modern athletic complex capable of meeting Bucknell's needs as the university enters the 21st century.

As of now, the project is in the first of three phases. By December 31, 2000, the university community should expect the completion of the new swimming pool, the new fitness facility, a new weight training center for varsity athletes, addi-

Orange and Blue finish fifth at Navy Invitational

All-American Watts '00 returns to lead Bison

By Mike Brophy

Starting off the season ranked 15th in the country, the Bucknell men's water polo team was looking to improve upon its position with a strong performance in last weekend's Navy Invitational Tournament.

Bucknell benefits from the return of five starters, including leading goal scorer and All-American Josh Watts '00. 12 lettermen are also returning this season from last year's 18-12 squad.

The Bison went 3-1 in their opening weekend of play, finishing in fifth place.

Bucknell began the tournament this past Saturday with a very impressive victory over the US. Merchant Marines.

Playing with great confidence, the Bison took control of the game early and coasted to a 13-2 win.

Later in the day their momentum was quickly snapped, as St. Francis edged the Bison by a close margin of 11-9.

Going into Sunday with a 1-1 record, Bucknell needed to win two straight games in order to claim the fifth place spot in the tournament.

Bucknell showed its determination with a 12-8 victory over George Washington. Later in the day they faced Iona for a shot at the fifth place spot.

Tied at the final buzzer, the game went into overtime. Bucknell prevailed in dramatic fashion with a goal by Bill Ruth '00 with just 30 seconds remaining.

Head coach Mike Wooster was pleased with his team's performance over this weekend, saying, "I am happy with how they played. The team showed a lot of heart."

Wooster was energetic about the upcoming season, and he said that his goal was for the Bison to be on top of the east division and within the top 13 ranking at season's end.

Several players showed tremendous talent this weekend working for the three wins.

Tom Choate—The Bucknellian

The men's water polo team is ranked 15th in the nation.

Junior Tate Greditzer had an impressive weekend, scoring 16 goals.

James Miante '01 demonstrated great defensive skill, and sophomore David Kennedy had a strong showing in taking over the goalie position.

Bucknell is now 3-1 and hopes to carry its momentum this weekend as they travel to Slippery Rock to face Navy and Salem Teikyo.

Beyond the Bubble

ESPN Celebrates 20th Anniversary: Tuesday, September 7th officially marked ESPN's 20th anniversary of sports broadcasting. Regarded as a joke in 1979, ESPN has since risen to become the nation's largest and most-watched cable sports network, reaching over 76 million American homes. In addition, they have also established three other cable sports channels, a radio network, a website, a magazine, an awards show, and even a chain of restaurants.

Behind top-rated broadcasters such as Chris Berman and Dan Patrick, ESPN has completely changed the flow of sports information across the country. Before 1979, only major sporting events were televised, and they were usually shown on tape delay in the evenings or on weekends. ESPN, however, has given fans the opportunity to view all varieties of live sports from around the world. Fans were primarily limited to daily highlights of local teams before ESPN's rise. Sportscenter, the network's most famous program, has since made it possible for the public to see highlights, statistics, and important sports news from around the nation almost instantly. Fortunately, their efforts have not gone unnoticed. In twenty years, ESPN has been honored with an astounding 62 Emmy awards for excellence in sports broadcasting.

The network will celebrate its special day with a three-hour special hosted by Chris Berman. The program will highlight ESPN's history and its most memorable moments during the past two decades.

Orioles' Mascot Hit With Lawsuit: Vincent Minervini of Keansburg, N.J has filed a $35 million lawsuit against the Oriole Bird, claiming he got roughed up by the mascot during a game. Minervini alleges that Jeff Gartner, one of the three men who perform as the Baltimore Orioles' mascot, struck him with his tail, pushed him in the chest and took his property without permission. He also claims that two policemen and an usher manhandled and falsely arrested him during a May 1997 home game against the New York Mets. Minervini is seeking $5 million in damages for each of the seven counts in the complaint. He does not specify what, if any, physical injuries he suffered.

CSU Fans Celebrate Win With Riot: After their shocking 41-14 victory over rival Colorado, fans of Colorado State were upset to see police guarding the field at Mile High Stadium in Denver. Some fans hurled debris at the officers, who responded by firing tear gas and mace into the stands.

The officers were ordered by the Denver Broncos to prevent any damage to the field or the tearing down of goalposts. When they arrived on the field with a few minutes remaining in the game, the Colorado St. fans greeted them with boos and a barrage of debris. Debris was also thrown at the opposing Colorado players, making it dangerous for them to exit the field to their locker room. The police then attempted to lob several pepper-gas cans into the stands, but most of them were thrown back onto the field.

Colorado offensive guard Ryan Johanningmeier said the CSU crowd, "didn't show much class. There is class in winning and class in losing, and I think the crowd acted like they never won a game before." So far no injuries or arrests have been reported.

Novotna to Retire from Tennis: Jana Novotna, one of the game's fiercest competitors over the past thirteen years, officially announced her retirement from tennis, effective at the end of this year. "I've been thinking about this for a very long time," she said. "It's really difficult to point out one thing. I just feel the time for it is right." She also stressed that her nagging ankle injury had nothing to do with the decision.

Novotna, who will be 31 next month, won her 24th WTA Tour event this season at Hannover. She has earned more than $10 million in her thirteen-year career. She claimed her victory at Wimbledon a year ago fulfilled her greatest ambition in tennis and made her decision to leave the sport less troubling. "Winning Wimbledon last year and having the wonderful year that I had just made everything much easier," she said. "I said throughout my career that winning one Grand Slam tournament would be very fulfilling and it would be a dream come true for me. It finally did happen. That was the greatest thing that ever happened. I can just look back and be very happy and very thankful for the career that I've had. I'm very happy with this decision."

Field hockey downs Davis and Elkins

By Jennifer Cruickshank

The depth of the Bucknell field hockey squad resurfaced this past weekend as the Bison journeyed seven hours to crush Davis and Elkins University, 5-0. Five different players found the back of the net, while all 17 field players saw considerable playing time.

"It's always nice to get out to a good lead," said forward Maura Higgs '01. "And our team depth really starts to show, especially when all of our goals are scored by different people."

Senior co-captain and Patriot League Defensive Player of the Year, Jenny Zimmerman, started the scoring surge as she drilled home the first Bucknell goal of the regular season off of a scramble in front of the net. Zimmerman also tallied an assist in the game, making her the Bison scoring leader.

Later in the first half, Higgs connected with sophomore Melissa Maher, who beat the Davis and Elkins goalie to bring the Bison to a 2-0 halftime lead.

The second half was more of the same as the Bison controlled possession for the majority of the game and outshot Davis and Elkins 21-5. Senior co-captain Katey Twombly, midfielder Amy Marvel '03, and last season's Patriot League Rookie of the Year Dena Ebert '02 each tallied a goal to seal the victory. Twombly also picked up an assist off of a perfectly executed penalty corner pass to give Marvel the first collegiate goal of her young career.

"Everyone played well today," said Zimmerman. "We really came together as a team and everything we have been working on in practice just started to click."

Although Davis and Elkins failed to test the Bison defense, senior co-captain Malina Anderson, junior Katie Yingling, and sophomore Erin Plasteras have been rock solid in Bucknell's first two matches. However, the strong Bucknell defense will face its toughest challenge thus far as it hosts Towson this Wednesday evening.

Calder Cruikshank—The Bucknellian

Melissa Rhoads '02 prepares to defend the goal during practice drills

Women's soccer heads in right direction

By Joshua E. Gish

"Whatever it takes to get it done."

This motto of the 1999 Bucknell women's soccer team demonstrates the players' desire to succeed. And with a season opening victory over Duquesne under their belt, the Bison are headed towards a very promising year.

Bucknell, ranked fourth in the Patriot League's preseason poll, aims to improve upon last year's record of 7-12.

According to head coach Chrissy Findlay, the team, "has what it takes to be at the top of the Patriot League."

Lead by captains Katie Senderowitz '00, Sarah Stopper '00 and Anna Hall '02, the Bison return solid starters, a deep bench and a committed, hardworking mindset.

Assistant coaches Danielle Rausch and Eric Hymowitz are helping Findlay to guide the team.

"The experience and leadership of our captains in the end of this transitional phase has really helped to reinforce what my philosophy is, which is to come out to play, to work hard and to show commitment to the team," Findlay said.

Eight members of last year's freshmen class received solid playing time, allowing them to develop commitment to both themselves as players and to the team as well.

This experience will prove to be crucial to the '99 Bison as they continue to improve in practice and games with hopes of a fulfilling season.

Of Bucknell's ten players from the class of 2003, eight were recruited and three or four have earned starting roles this season. One of these freshmen, Kelly Irvin, was described by Findlay as a, "hardworking, skillful player who fulfilled expectations regardless of what was needed."

Youthfulness, talent, commitment, and tremendous depth look to be on the side of the Bison. Findlay is confident that the 1999 squad will far outshine last year's results, and with the return of four of the team's five seniors from abroad, this goal seems attainable.

The team is suffering from injuries to Talia Ciccone '00, who will have surgery on a torn ACL she acquired early in the preseason, and Katie McElligott '00, who is not playing at 100 percent due to a foot injury.

The Bison avenged last year's loss to Duquesne as Tara Utchel '03 scored on a corner kick with less than four minutes remaining in the first overtime to give Bucknell a 1-0 victory.

The Bison lagged a bit in the first 45 minutes, but they were able to overcome their difficulties and play a commanding second half.

"They (Duquesne) underestimated us," Findlay said.

The Dukes outshot the Bison 11-8 but Bucknell keeper Kerrin Wetzel '00 came up big with 12 saves. Findlay described Wetzel as a "pleasant surprise" and with her passion and work ethic the coach feels very confident with her in the net.

The Bison played over 68 minutes of soccer against Towson last Saturday, but within 1 minute and seventeen seconds of the game being declared official at the 70th minute, it was ended due to lightning. At the time, the Bison were leading Towson 3-2 behind sophomore Meredith Barnes' 2 goals.

The Bison will lock horns with St. Joseph's on Wednesday, September 8 at home.

Bison start on wrong foot

By Justin Knox

The Bison came into the season looking to improve upon last year's relatively disappointing season, and they hoped to do just that as they traveled to Monmouth, NJ last weekend. Due to poor executions, Bucknell couldn't capitalize and failed

In order to do that, they will have to adjust. They must adjust to a new head coach, a new defensive system and for a while, a "new" lineup. The Bison resorted to a "new" lineup with several injuries to key players.

Head coach Brendan Nash was forced to juggle players into positions that they weren't used to playing. The Bison weren't quite able to make these adjustments in their first game, falling to Monmouth 2-0.

However, do not take that score at face value, as the Bison showed signs of potential and progress despite a few letdowns.

"Yeah, we did have a few miscommunications in the new defense," said co-captain Bill Epley '01, "and they both pretty much led to the two goals Monmouth scored."

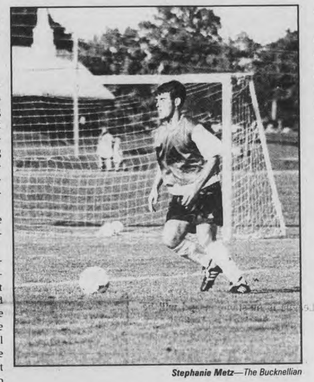
It could very well have been a totally different outcome had the Bison converted on opportunities.

"We really did dominate possession time, and had a lot more scoring chances than they did," said Epley. Poor finishing was the problem that plagued Bucknell last season, and it started out as a major problem in their first game this year. "Finishing our scoring chances, I think, was our biggest problem," said Junior Geza Lendvai-Lintner. "Yeah, our defense did lapse a couple times, but to win we have to score."

The offense should be revitalized once Bucknell's injured players return to the lineup.

"I'd say our biggest problem in the Monmouth game was inexperience. Inexperienced players playing where they're not used to playing," Nash said. "We really had a patched up lineup, not the lineup that we want, in the game. Our injured guys are starting to get healthy, and hopefully we'll have them back for our first Patriot League game in mid-September. Then we can put the lineup together as we really want it to be."

The banged-up Bison play host to Robert-Morris this Tuesday, when they will try to even their record at 1-1 on the season.



Stephanie Metz—The Bucknellian

Andy Aurand '02 and the Bison need to take advantage of more scoring scoring chances in order to improve

Newcomb '88 named head of athletic communications

Todd Newcomb returns to Bucknell with plenty of experience

By Peter Van Emburgh

After 11 years of working in the Patriot League office, Todd Newcomb '88 has returned to his roots in Lewisburg. With the departure of Sports Information Director Pat Farabaugh this summer, Newcomb was interviewed and offered the position as Bucknell's athletic communications director and as assistant director of athletics and recreation.

"We're delighted to have Todd back with us," said Brad Tufts, interim athletics and recreation director. "He brings great loyalty to Bucknell."

Prior to arriving at Bucknell, Newcomb was serving as the interim executive director of the Patriot League for the past year. He also served as the league's associate executive director from July 1997 to January 1999, and as the assistant executive director from August 1989 until 1997.

In both these positions, he was responsible for the promotion and publicity of the Patriot League, its activities and the accomplishments of its student-athletes. However, Newcomb realized that he desired the opportunity to develop relationships with student-athletes, which he couldn't accomplish at the league office.

"I would go out of my way at the Patriot League Championships to get to know the athletes, because it was so rewarding to me to get to develop relationships with these kids," Newcomb said. "Coming back to a campus, I look forward to being able to promote the athletes, work with the coaching staff and support the university that is so special to me."

"His experience with the Patriot League is outstanding and will be very beneficial to the athletic department," said Pat Flannery, head coach of men's basketball. "Everyone here is excited to have him here."

A 1988 graduate of Bucknell with a bachelor of arts degree and a double major in economics and history, Newcomb began his career as an athletic communications intern with Bucknell and the Patriot League in 1988-1989. The title of his position wasn't the only thing that was going to see some changes.

Newcomb has several initiatives that he has established since he took office on August 1. He believes that the Athletic Communications office should work harder to develop better media relations with the community and then eventually expand relations regionally and nationally. Newcomb noted that the local media extensively covers high school sports, and their coverage of Bison athletics won't improve overnight.

"But I think that we should make the media realize that Bucknell has special products," Newcomb said. "My staff and I just have to make it easier for them to cover it."

Newcomb plans to make press coverage easier by rearranging the "press box" at basketball games in Davis Gym. He wants to make the athletic communications staff more visibly available at the home games for media assistance.

Newcomb feels that the office will also improve the Bucknell coaches' recruiting procedures for all 28 sports.

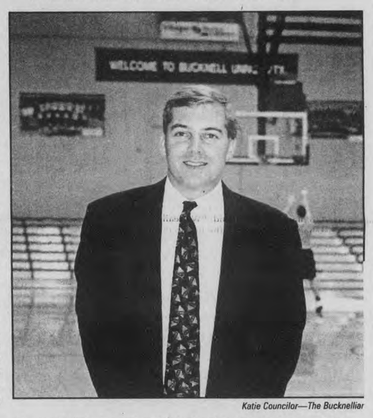
"Todd brings outstanding professionalism and knowledge to our Athletic Communications office," Tufts added.

The Athletic Communications office has many responsibilities for the athletics department, in addition to assisting with recruiting and press coverage. Newcomb has dedicated himself to nominating student-athletes for national awards and basically promoting the university, the athletes and their accomplishments.

Through his league experience, Newcomb has observed other schools' athletic communications efforts extensively and can now apply the techniques from other Patriot League schools to Bucknell's program.

"With a combination of this institution's strengths and that institution's positives, I'm going to try to figure out what will work best for Bucknell's communication office," Newcomb noted. "In terms of personal goals, I see myself and family comfortable and happy back at Bucknell and I don't foresee a dramatic change down the road."

"I'm very confident that Todd will be successful in telling the world about Bucknell and the excellence of its athletics department," Tufts said.



Katie Councilor—The Bucknellian

Newcomb looks forward to developing friendships with the athletes.

ANNEX

From page 13

tional coaches' offices and conference rooms and a new training and therapy suite.

The $2.4 million Phase II calls for a connecting point of access for all of Bucknell's athletic facilities with a spacious new lobby, ticket office and a new location for the Bucknell Athletic Hall of Fame.

Finally, Phase III features the new arena with "walk down" seating, which is one of Bucknell's highest priorities for funding.

The total project, as envisioned, requires $23.1 million, but it is a necessary undertaking. "If Bucknell is to remain competitive in the Patriot League and in the East in terms of recruiting, training, and competing, these facilities are crucial," said Rick Hartzell, recently retired athletic director.

Yet, as with all kinds of change and progress, new regulations must be established in order to ensure safety, comfort, and convenience. "As in any situation where large numbers of people are involved, compromises need to be made so that overall everyone involved can have the best experience possible," said Strength and Conditioning Coordinator Terry Fike.

Don't let mother nature prevent you from writing for Sports!

Carmen's Football Picks

Football's back, and so is the *Bucknellian*'s weekly prediction segment. This weekend marks the beginning of the 1999 NFL season and the schedule presents several interesting matchups. College football's third weekend is highlighted by clashes between Top 25 teams, and of course, the ole' Orange and Blue matchup.

NFL

San Francisco at Jacksonville

In this duel of injury-riddled quarterbacks— however, Brunell has too many weapons...

Pick: Jaguars 27-17

Minnesota at Atlanta

Moss and company prevail in the replay of last year's NFC Championship game...

Pick: Vikings 31-24

Pittsburgh at Cleveland

The Dawg pound will be in full effect with the first game of the "new" Browns, but they'll need to call back Jim Brown to win this one...

Pick: Steelers 27-10

Miami at Denver

A third straight NFL title isn't going to happen without Elway...

Pick: Miami 21-17

College Football

Georgia Tech at Florida State

Is Tech for real or are they another Florida State blowout victim? Heisman hopeful Peter Warrick provide the answer to that question...

Pick: Seminoles 38-17

UCLA at Ohio State

Can the Buckeyes stop the bleeding after their anemic performance against Miami? They've got too much talent not to...

Pick: Buckeyes 31-21

Notre Dame at Purdue

Notre Dame isn't going to need the luck of the Irish to pound out this victory on the ground, with its defense making Purdue's offense seem like a light summer Brees...

Pick: Irish 35-24

Bucknell at Colgate

After two straight losses to the Red Raiders, the Bison are hungry for revenge. The young and talented Bucknell offense will be clicking on all cylinders, and the veteran defense will do the rest...

Pick : Bison 21-17

A New Era

While I was flipping through the channels last week, a report on Sportscenter about baseball's All-Century Team caught my eye.

An ESPN commentator explained that fans could vote over the next few weeks for whom they believed were the 25 greatest baseball players of the 20th century. Being an avid baseball fan, I was already proposing my list in my head and hoping to learn where I could get a ballot.

But the commentator went on to shoot down many of the athletes whom I and many other voters thought were worthy candidates. He was shocked to learn that in the early voting many fans had selected stars of today over some of baseball's past legends.

Well, I'm not surprised in the least. There's something that's been happening in baseball over the past few years that hasn't happened in the sport in a very long while - excitement. America's favorite pastime is starting to actually become its favorite pastime again.

Commentary

Carmen Mauriello
Sports Editor

After the player strike ruined 1994 season, baseball reached an all-time low. Attendance was diminishing, games were dull, and the money-driven players weren't appealing to fans. People just didn't love the game.

But something magical- even miraculous- has been happening lately. Thanks to Saint Mac and Saint Sammy, people have been coming out in droves to the ballpark- and even more importantly, they're having fun. Pennant races are down-to-the wire, rivalries are bitter, and ballparks are electric and enthusiastic. Fans are becoming fanatics for their favorite teams and players.

Gosh, it sounds like the good old days when a hot dogs and crackerjacks were only a dime. If you think this excitement sounds familiar to baseball's mid-century glory days, you're absolutely right.

Just like my father checked every day on joltin' Joe DiMaggio's hit streak, I and millions of others follow the heroics of Mark McGwire and Sammy Sosa. Just like his generation wore Dodger blue or Yankee pinstripes, my generation stands loyally behind our teams in good times and bad.

It's odd how a few years ago I would flip past baseball games on television because they were so dull. You couldn't have paid my friends to go to a baseball game. It was as if the fans were on strike.

But last September I witnessed a standing-room-only crowd in the Bison watch McGwire hit his 62nd homer. And when talking with my Bucknell friends about their summers a few weeks ago, at least 6 or 7 of them said that afternoons at the ballpark were a staple of their summer.

This excitement has led fans to become enthralled with today's MLB players. Powerful hitters like McGwire and Sosa, dominating pitchers like Randy Johnson and Pedro Martinez, and exciting athletes like Derek Jeter and Ken Griffey Jr. have captured the imaginations of fans everywhere.

For many younger fans, the level of baseball being played today is the highest they have ever witnessed, with the game being quicker and more intense. And today's bigger, stronger, and faster stars are the best baseball players they've ever seen perform. Therefore, how could anyone be surprised that many of today's fans believe that some of today's top performers are among the game's all-time greats?

Critics of my opinion will point to names like Babe Ruth, Ty Cobb, Ted Williams, Hank Aaron and Nolan Ryan and to dynasties like the Yankees and Dodgers. And they'll point to the wins and championships they tallied, the records they set and the legacies they created.

All these points are well-taken. I would never deny the greatness or downplay the legacies of these true forebearers of the game. Indeed, most of the best baseball players of this century played in an era well before my time.

But it's hard for younger fans to relate to these stars of the early to middle parts of this century, because we didn't experience their brand of baseball. We weren't a part of their excitement, we didn't see them set records and we didn't follow their championships. All we have are pictures, movies and facts. But it's not the same as being there, as being a part of the magic.

As much as older baseball historians, who witnessed the greats of the past and present play, try to compare eras - they can't. No one, short of Kevin Costner in "Field of Dreams", can accurately compare players in different eras because they will never compete against each other in their respective primes. It's a darn shame, but they won't. So in my eyes, every person's list of this century's greatest baseball players is acceptable. Baseball fans will focus on the players that inspired them from the era of baseball with which they most closely identify.

So when people call so-and-so "the greatest" or a record "unbreakable", I sit back in my chair and turn on a game. I see home run records toppled, strikeout records challenged, championships won, and dynasties formed. And I wonder how many players will be called "the greatest" before someone realizes that there will never be a true "greatest", just true greats. All while I'm sitting in my chair, watching America's favorite pastime and wearing my dad's old Dodger's cap.

Bison run over Morgan State, 37-10

Evans Mitchell—The Bucknelian

LaMario Bradwell '01 finished with a game-high 94 yards rushing.

By Carmen Mauriello

An age-old football adage says that the game is won or lost in the trenches. The Bison dominated the battle in the trenches versus Morgan State, pounding out 160 yards and three touchdowns on the ground and holding their opponent under 100 yards rushing.

They won the game in dominating fashion too, 37-10.

The Bison defense set the pace early by allowing Morgan State no first downs and only 17 total yards in its first four possessions, giving their offensive counterparts excellent field position.

After Bobby Young '02 deflected a punt, the Bison offense quickly capitalized. Junior fullback Jason Marrow's one-yard scoring plunge culminated the 35-yard drive that gave the Bison a 7-0 lead, which they never would relinquish.

Later in the first quarter, Bucknell again found the endzone when LaMario Bradwell '01 broke loose for a 42-yard touchdown romp down the right sideline. Bradwell, who rushed for a game-high 94 yards on 15 carries, recognized the solid performance of the revamped offensive line.

"We've got so many guys at so many different positions that can hurt you," Bradwell said, "that it's even that much better when the offensive line is able to do that much damage."

The Bison went into the locker room comfortably ahead 24-3 after an 11-yard scoring strike from Don McDowell '00 to Mark Wyland '02 and a 33-yard field goal from sophomore Joe Lourdeaux.

Bucknell stumbled somewhat in the third quarter when an errant punt snap led to an easy Morgan State touchdown, narrowing the gap to 24-10.

But that's as close as the Bears would get, as McDowell hit freshman wideout Jim Horan for a 41-yard touchdown on the third play of Bucknell's ensuing possession.

Less than five minutes later, Marrow found the endzone for the second time of the day and the 13th time in his last 11 games to close out the scoring.

Bucknell head coach Tom Gadd, who moved his perfect opening day record at Bucknell to 5-0 with the win, will use the game to measure his team's progress and to identify areas for improvement.

"There were some lapses, and there were times we sort of stalled out, but we made a lot of big plays, and I think it's a good game to be able to come back and evaluate and assess now," Gadd said.

Big plays on both the offensive and defensive sides of the ball were key in Bucknell's victory. The Bison defense, which held MSU to just 179 total yards for the game, recovered two fumbles, registered a punt-block and stuffed its opponent twice on fourth down.

Strong safety Kevin Eiben '01, who led the Orange and Blue with eight tackles, a pass break-up and a 31-yard punt return, thought the defense, "played real well but there's still areas we need to improve."

The Bison offense took advantage of turnovers and excellent field position to strike quickly and crush the Bears' hopes.

Bradwell's 42-yard touchdown run and Horan's 41-yard touchdown reception exemplified the offense's speed, talent and big-play ability.

"We're hopeful of being a big-play offense, so hopefully that's an omen of things to come," Gadd said.

This Saturday Bucknell will travel to Hamilton, New York to challenge Patriot League favorite Colgate. The Red Raiders opened their season last week with an impressive 28-21 victory over I-AA powerhouse Maine.

After last year's matchup resulted in a 38-21 Bucknell loss, the Bison have been anxious for revenge.

"Anyone who follows Bucknell football knows that this is one of our biggest games of the year," McDowell said. "We've been looking forward to this for a long time."

Bucknell dominated Morgan State 37-10 on Sat.

Women's golf enters its second season

By Andrew Bevan

Back for its second year of competition, the Bucknell women's golf team is anxious to begin its 1999 season. The season begins this weekend when the Bison travel to St. Francis College (PA) to play matches against Mount St. Mary's and St. Francis.

Head coach Brad Tufts is optimistic and enthusiastic about the upcoming season. "Everyone on the team is really looking forward to it," Tufts said.

Returning to the team are sophomore stars Hilary Mainka, Bridget O'Mara and Kerry Stewart. The Bison return junior letter winners Christine Freda and Heather Mann along with veterans Annie TenEyck '02 and Eileen Kennedy '01.

The Bison are bolstered by the addition of four new freshmen members, Amy Jones, Molly Campbell, Jess Hetrich, and Catherine Crews.

"This freshman class brings proven success with it," Tufts said. Mainka is excited about playing with the talented group of incoming freshman. "It definitely looks good with the new faces coming in," Mainka said.

Tufts was recently appointed Interim Director of Athletics and Recreation for the University. Due to the demands of this job, Tufts has hired an assistant coach for the team, Kevin Jamieson. Jamieson, a Lewisburg resident and the assistant golf professional at the Williamsport Country Club, "has been a great help," according to Tufts.

Alison Draper—The Bucknellian

The women's golf team feels it has great depth and a great future.

Tufts sees the first match as a strong indicator of how the Bison will fare this year. He believes that last year's squad "did quite well for a first-year team" but is expecting much improvement this year.

"I hope we will be competitive with most of the people we play with," Tufts said. Mainka shared her coach's expectations, saying, "I think our team will do 100 percent better than last year."

Some of Bucknell's toughest competition this year includes Hartford, Rutgers, Princeton, Yale and Boston College. After Sunday's match, the Bison will venture to the Dartmouth Invitational to face some of the top teams in the Northeast.

According to Tufts, the biggest challenge facing the squad is its lack of collegiate experience. However, he believes that the team has great depth and a promising future.

"I do not think the team is far away from challenging the top teams in the East," said Tufts.

Sports Trivia (an easy version)

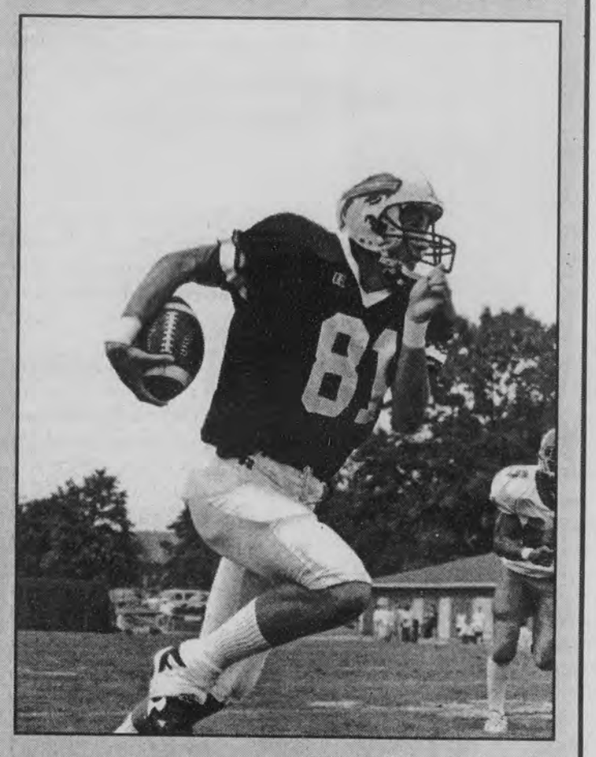
Exacting Revenge...



Marcy McMillan—*The Bucknellian*

Jim Horan '03 and his Bison temmates defeated highly-touted Patriot League foe Colgate 21-16 last Saturday. It was Bucknell's first win against the Red Raiders in the teams' last three meetings. Bison quarterback Don McDowell '00 led his team to the victory with three touchdowns. Bucknell became one of the favorites to win the Patriot League title and earned a great deal of national respect with the win. See game report, page 16.

Community's flood recovery continues

Students share stories, experiences as another potentially destructive storm looms

By Jared Silliker

Last Tuesday's flood left many students' houses and cars in disarray. Besides the destruction, the eventful morning provided some unique stories of survival and helping others. Currents that originally made for some fun rafting quickly became dangerous, both to property and those that braved the elements.

One student, Abby Hopkins '01, found out just how strong the currents were the hard way. After the vehicle she was riding in stalled on Seventh Street sometime between 2 and 3 a.m., she attempted to walk up the hill across from the Seventh St. Cafe. Hopkins soon found herself in knee-deep water on the Loomis Street foot bridge that crosses Miller Run.

"People were yelling at me to go one way or another and the Public Safety officer was just standing there," Hopkins said.

An initial attempt to escape the heavy waters proved futile as she ended on her knees. Lucky for Hopkins, she was able to grab hold of the railing at the last instant. A moment's hesitation and Hopkins may have been sent rushing toward the Music and Art Building.

Hopkins' only refuge from the floodwater was a Jeep Cherokee driven by Mike Rizzi '00. Rizzi saw Hopkins in trouble and was able to maneuver his Jeep, equipped with lifted tires, close enough for friends to pull Hopkins into the vehicle.

Courtesy of Mike Morris

Water on Sixth Street covered all but the tallest cars during last Monday's flooding. Many residents of Sixth Street are still unable to return to their homes because of flood-related damage.

"I barely grabbed the railing—otherwise, I would have gotten sucked under the Music and Art Building," Hopkins added.

Another impressive rescue mission was carried out on Sixth Street, near St. Louis Street intersection. The residents of 114 S. Sixth Street—Joe Tierney '00, Mike Kagey '00, Tim Nageli '00, Mike Morris, '00 and Jeremy Sutton '00—were out rafting on the cur-

President Adams releases "State of the University" report

By Anne Monoky

As in past years, President Adams has written a State of the University Report for the campus community. This report provides an overall summary of the progress and changes that have occurred at the University within the past year. As Adams says, "I do so with a keen sense of both the opportunities and challenges we face as we seek to sustain and build upon the successes and achievements of the past several years."

In this year's report, Adams provides a brief description of the first-year students, indicating that the Office of Admissions will soon produce a full report. The class was selected from an applicant pool of 7,004, the third largest of the University's history. Including both early decision and regular admission, the University admitted fewer than 44 percent of those who sought admission.

The University's goal to enhance the diversity of the student body showed slow but measurable progress over the past year. Adams reported that 13 percent of the entering class is composed of minorities. The geographical diversity of the University proved to be consistent with years past as 85 students came from the far west and 56 are enrolled as international students.

These new students to the University will be witnessing change. Most obvious are those changes occurring in the vicinity of Swartz Hall and the Weis Center. Adams explains, "The new residence hall, intended exclusively to improve conditions for students already living in campus facilities through the addition of 300 beds, is now rising on Swartz field and should be completed on schedule next summer."

Planning for the renovations of the indoor athletic facilities and the construction of the Siegfried Weis music building has commenced. These projects are aimed to benefit the educational and recreational opportunities for students and prospective students.

Other changes include the renewal and modernization of the physical plant . Changes have been made to Bucknell West; to the Bertrand Library; and to Vaughn Literature's auditorium. The future holds much promise for major renovations of Coleman Hall, Hunt Hall and the Elaine Langone Center.

Many of these renovations have been made possible because of the University's intense concentration on fundraising, including the successful *Bucknell Campaign*. Adams reported, "In all categories,

The University's Greek community completed its two-week rush process with "Bid Day" festivities last Saturday. For a complete list of bid acceptances, see page 3.

Officials urge caution as Floyd approaches

By Chris Ellis

Less than two weeks after the remnants of Hurricane Dennis dumped almost 10 inches of rain on Lewisburg and wreaked havoc on the campus and community, Hurricane Floyd, now threatening the Carolinas, may be ready to dump even more rain on central Pennsylvania. University officials are urging caution in the wake of the latest flood warnings.

Floyd, which has been downgraded to a class three hurricane, is expected to veer eastward into the Atlantic Ocean as it moves north, but the storms surrounding the hurricane could threaten Lewisburg residents with flooding again.

Although it is almost guaranteed that Lewisburg will experience some rain during the next two days, the amount of precipitation received is contingent on Floyd's' path. Depending on whether the hurricane moves inland or toward the Atlantic Ocean, Lewisburg could receive anything from moderate showers to a storm even more severe than that of last Monday. The hurricane, which was the first hurricane of the season to achieve Class Five status (sustained winds of 150 mph or more), has weakened as it has moved up the Atlantic Coast.

The Lewisburg Police Department and the Office of Public Safety are preparing residents for possible destructive storms. In a release distributed to all students via e-mail and campus mail, Director of Public Safety Vince DeCerchio warned students of the possible danger and altered that evacuations of campus buildings vulnerable to the flood may be necessary.

"We will attempt to keep the University community informed, as we are able, based on information we obtain from local weather and civil authorities as soon as we receive that information," the release said.

The University cautioned that residents Sigma Alpha Epsilon, Kappa Sigma and Phi Gamma Delta fraternities, Larison, Harris, Smith, Hunt and Vedder Halls, and Edwards, Calvin & Hobbes, Carey, Martin, Leiser, Hulley and 23 University Ave. Houses may be forced to evacuate their residences. Resident Assistants and Peer advisors for the downhill residences will receive periodic updates regarding the University's response plan should emergency action be necessary.

ADAMS from page 1

the University received over $25.4 million in gifts last year. Of the latest impressive total, $15.7 million was directed to endowment, $2.9 million to facilities, and more than $6 million to the annual fund." Consequently, the University's endowment market value has been pushed to an all-time high of approximately $395,000,000 (as of June 30, 1999).

Adams believes that monetary investment should be focused on areas of the University where investment will have the greatest impact on the quality and strength of the University. Financial issues will be discussed in greater detail in the coming months with the members of the Committee on Planning and Budget.

The changes, however, are not only physical and financial, but organizational too. Over the summer, the resignations Director of Athletics and Recreation Rick Hartzell and Dean of Students Richard Chapman were announced. National searches to fill the position have already begun, but in the interim Brad Tufts and Allen Schweinsberg have accepted the positions of Director of Athletics and Recreation and Dean of Students on a temporary basis.

The search for the University's 15th President is also underway.

As Adams pointed out in a campus e-mail, one of the complexities of the presidential transitions is the future of the position of Vice President of Enrollment Management and Student Affairs, the one position that remains unfilled among the president's senior administrative staff.

Said Adams, "as we acknowledge and effect the transitions and changes immediately before us, we can and should be reminded of how much there is to admire and rely upon in our collective accomplishment and promise."

"Bucknell Campaign" nears fundraising goal

$144.2 million of $150 million already raised for University-improvement plan

By Heather Napolitano

The future is bright for *The Bucknell Campaign*. Launched in November 1996, this ambitious fundraising effort has already reached the $144.2 million mark, and with more than a year remaining until its conclusion on December 31 of 2000, the University now anticipates that it will surpass its initial goal of raising $150 million.

The campaign is structured to meet three primary objectives: to increase endowment for financial aid, academic initiatives and building maintenance; to significantly increase annual giving; and to raise specific dollars to fund the construction of facilities.

"We've been tremendously successful in two of the three goals," said Vice President for University Relations Richard Johnson, "and we're making definite progress towards the third."

New gifts and commitments to endowment are being considered successes thus far in the campaign. The administration is particularly enthusiastic about the increasing funds for financial aid, which is where a majority of the money raised for endowment will be devoted. According to Johnson, nearly 300 new scholarship funds have been created during the course of the campaign, and students have already become recipients of these new scholarships.

Stephanie Metz—The Bucknellian

Vice President for University Relations Richard Johnson helped to spearhead the "Bucknell Campaign," which has already raised nearly $150 million for University initiatives.

Said President Bro Adams in a report released this month on the unmet needs of this campaign, "the major goal of *The Bucknell Campaign* is to ensure that we remain accessible to future generations of Bucknell students, regardless of their ability to pay."

Another positive outcome of the campaign at this stage is the significant increases in annual giving. In the past, alumni participation averaged between 32 and 37.5 percent. Last year, however, 40.1 percent was reached, an all time University record.

"Our current goal is to reach 45 percent alumni participation," said Associate Director of Annual and Special Gifts Stephen D'Ambrosio, "but I would like to see the annual giving rate for the reunion program move up to 50 percent."

As a result of this increased alumni participation, more than $6 million was raised in annual gifts last year as compared to the sum of $3 million that was raised 5 years ago.

Said Johnson, "the campaign has given thousands of people the opportunity to participate."

The greatest obstacle that now remains is creating dollars to devote to campus buildings. The University has four new facility projects on the horizon. Of these four projects, the Siegfried Weis Music Building is the only one that is fully funded and under construction. The majority of the money has been raised for the athletic center and the psychology and geology building, but the art building still remains at the starting gate.

The fundraising efforts for these facilities may have been setback by the fact that "we've found that early estimates that were done on buildings have proven to be too low," said Johnson.

In fact, all of the monetary goals set in the initial stages of the project have been rethought and revised in the course of this effort. Initially, the University hoped to raise $104 million for endowment, $26 million in annual giving and $20 million for facility construction. These objectives have been recently expanded to include an additional $12 million for endowment, $8 million in annual giving and $10 million for facilities.

In short, if all the money needed to satisfy each of these areas is raised, roughly $180 million will have been collected and the University will have successfully completed its most ambitious fundraising effort in its history.

Said Johnson, "I am very confident that we'll get there."

AFTERMATH from page 4

rents after waking up at approximately 3 a.m. The group also began capturing the flood on video, when they noticed girls from across the street yelling and motioning to them. A Suburban driven by an elderly man and his wife had become stuck in the water. The couple, the owners of the Towne Tavern on Market Street, made it out of the vehicle, but remained stranded in the water for some time. They held on to the vehicle's sides, but were unable to move to dry land.

Using their raft, Tierney, Kagey and Nageli were able to reach the couple and escort them to the street side. The residents of 108 S. Sixth Street—Carolyn Yankowski '00, Christine Frankovich '00, Kate Wood '00 and Jen Smardon '00—took the couple into their house and gave them dry clothes and towels.

Besides rescues, there were several other hazards facing students. Although police were supposedly out waking up residents, those of 112 S. Sixth Street—Katie Caruso '00, Erin Corbo '00, Cory Shulte '00 and Kate Conroy '00—were not awakened until approximately 4:30 a.m. when the aforementioned Tierney called the house. Their main worry thereafter was the electricity that had still not been turned off as water levels rose over outlets. Trapped on their second floor, the four did not have any contact with police officials until late Tuesday morning. Additionally, the water took its toll on parts of the house's structure.

"We saw the steps and railing of our porch floating by," Caruso said. "The current was so strong that it took out part of the foundation ... you could see right into the basement."

News Briefs

Coast Guard Now Shoots from the Air at Drug Boats

The Coast Guard has stepped up its attempts at stopping drug boats by using the addition of sharpshooters to disable the boats. The Coast Guard now uses sharpshooters firing from helicopters. The intent is to disable the high-speed vessels from bringing the narcotics into the United States. The previously classified policy is part of an anti-drug strategy called Operation New Frontier that has already netted a record 53 tons of cocaine. Six tons were seized and 13 suspected smugglers were arrested as a result of shots fired on the high-speed smuggling vessels. Barry McCaffrey, the White House drug-control adviser, feels that the new measures have put new fear into the drug criminals. The estimated street value of the confiscated cocaine is around $3.73 billion, near 481 million doses. The Coast Guard said that nearly 400 speed boats are used each year by smugglers to carry cocaine and other drugs from Colombia to the United States.

UN Security Council proposes peacekeeping force for E. Timor

The Security Council has drafted a resolution mandating the implementation of a multinational peacekeeping force for East Timor. The peace keepers would not be funded or commanded by the UN but would have UN authorization to use force to quell the violence in East Timor. The Security Council is not following normal procedures for the creation of the force.

After an initial deployment of four months, the peacekeeping force would be replaced by a UN peacekeeping operation. The Secretary-General of the UN, Kofi Annan has recommended that Australia run the operation. Australia would most likely contribute the majority of the manpower and resources. The peace keepers will be sent to East Timor to quell the murderous rampage of pro-Jakarta militias. The militias are trying to reverse the East Timorese vote of independence. Indonesian troops enforcing martial law have done nothing while the militias killed and looted.

Hurricane Floyd heads north

Hurricane Floyd is a Category 4 storm with a 600-mile-wide of punishing rains and winds. The storm surge is creating tides 20 feet above normal. The extremely high tides have created severe flooding in low lying areas. The sustained winds of the storm have diminished slightly to nearly 120 mph.

Declassified Pictures Show Saddam Hussein's Plan

Newly declassified US intelligence photographs offer new glimpses of Iraqi President Saddam Hussein's campaign against his own people and the special treatment given to those loyal to him. The photos show how hundreds of Kurds have been killed and 900,000 have been made homeless during Saddam's repression of the Kurdish minority in northern Iraq. 160 homes of Shiite Muslims in southern Iraq were bulldozed in response to protests against the inadequate distribution of food and medicine. Hussein has also spend nearly $2 billion on presidential palaces since the Gulf War.

Before and after aerial photographs show how a lakeside vacation resort, 85 miles west of Baghdad, has been built. The resort has stadiums, an amusement park, hospitals and homes for loyal government officials. Iraq claims that its people are dying due to lack of food and medicine, yet Hussein spends hundreds of millions of dollars for the entertainment of loyal party officials, says the State Department.

Bucknell cancels Homecoming Parade

University revamps weekend to encourage participation

By Katie Marston

Homecoming at the University has always been a chance for unification of the entire community. This year, the alumni office has reexamined the effectiveness of this weekend in fulfilling its mission. As a result, there have been several improvements made in the schedule which are aimed at satisfying the community as a whole.

The traditional Homecoming Parade has been completely eliminated from the schedule of events for the weekend of October 15-17.

Although the parade was one of the weekend's centerpiece events, the University community's attendance and participation in the parade has significantly declined over the past few years. In 1998, there were 50 entrants in the parade, 33 from the Lewisburg community and only 17 from University organizations. With only one-fifth of the parade representing the University, the streets were lined with members of Lewisburg, rather then Bucknellians. This had people questioning the purpose of the University's continuing to hold the Parade. This long-standing event may be a tradition, but it no longer appears to be supported and embraced.

With the hope of encouraging school spirit and unity on Homecoming Weekend, the Office of Alumni has reallocated the attention of the events to their more enthusiastic members. The majority of the support for the weekend is found in fall sports fans, recent graduates and loyal Bucknellians. In an attempt to attract the younger graduates—specifically those from the class of '97 and '98—the Zero Year Reunion has been planned at the Bull Run Inn.

This event, sponsored by the Student Alumni Association and the Office of Alumni, Parents, and Volunteers, is a chance for recent graduates to have their first reunion experience and to maintain contact with their fellow classmates. They will also have the opportunity to learn how to remain involved in the University community.

This year, the annual Bison Club Breakfast and Hall of Fame Induction is also expected to attract more sports fans due to the cancellation of the parade, which interrupted the breakfast. The newest inductees into the Bucknell Athletic Hall of Fame will be honored at this event.

The third adjustment to the Homecoming schedule is the inclusion of students in the Alumni Association Post-Game Reception. In the past, this celebration served alcoholic beverages and therefore excluded the younger members of the campus community. It will now be open to the all University students after the football game versus Duquesne on the Saturday of that weekend.

The Office of Alumni has been working with the Campus Activities Office to merge ideas for a successful and exciting Homecoming Weekend.

The purpose of Homecoming is to unite the University community, igniting school spirit and a continued sense of tradition. The Office of Alumni hopes to satisfy this goal with their refocusing of exciting events to stimulate support for Homecoming Weekend.

Music building designs undergo change

By Nicole Gull

When the proposal for the new Siegfried and Claire Weis Music Building was originally presented, it surpassed the scheduled budget. Plans were be redesigned and adjusted according to budget restrictions, causing a small setback in construction. However, despite this unexpected obstacle, the committee is hopeful that the project will be completed by the fall of 2000.

According to James Hostetler, associate director for construction and planning, the architectural insights involved in this project have been in the making since January 1998. The building will replace the current Music and Arts Building located across from Hunt Hall.

The Music Department will move into the new building uphill while, for now, the Art Department will remain in the existing building.

The new building is 31,000 square feet and is located between the Weis Center and Swartz Hall, behind Coleman Hall. It will be in the formation of a "T" and will house classrooms, practice rooms and faculty office space. The far side of the building will consist of a recital hall open for both student and public recitals. In addition, the new building will interrupt the road behind Coleman, recovering some space for the insertion of a small green area.

The layout of the hall is simple yet highly functional. There will be two main entrances—one on the Coleman end and the other on the stadium end of the building. Upon entering the building from Coleman Hall, the ground floor will offer classrooms and lecture halls while the second floor will consist of faculty office space.

The basement, much like the current Music Building, will hold practice rooms. Hostetler affirms that great attention has been given to acoustics and minimal sound transmission. The practice rooms are actually built into the hill to aid in maintaining the best sound quality possible. The recital hall, on the far side of the building, has the seating capacity of 175 people.

Hostetler adds that the music building's construction necessarily will have to be integrated with the construction of the new dormitory on Swartz Hall. In an attempt to economize materials, both buildings will utilize much of the same materials. This will also keep the new buildings in accordance with the architectural and aesthetic pattern already established throughout campus.

The construction of the two projects has also led to concerns about the availability of campus parking. Hostetler assures that the committee will "certainly make provisions for those individuals that are handicapped in addition to service vehicles and emergency vehicles."

Chair of Presidential search committee named

By Tracy Thiffault

Trustee Lee Hamilton '57 has recently been appointed chair of the Search Committee that will embark on efforts to find a replacement for President Bro Adams upon his retirement from the University this spring. This announcement, along with other administrative actions, was publicized to faculty, staff and students in a memo distributed last Thursday.

The memo was sent out by James W. Schubauer '56, chairman of the Board of Trustees who appointed Hamilton. Included in the memo was a projected schedule indicating that the full Search Committee will be chosen no later than September 27.

The committee will consist of the chair of the faculty and one other faculty member, one administrator, one member of the Alumni Board, one student and eight trustees. According to the memo, they will convene for the first time at the end of September or the beginning of October, at which time a formal announcement of the search will be made.

In addition to naming Hamilton as chair of the committee, several preparations have already been made to advance the replacement process. Hamilton has solicited proposals and interviewed potential search firms specializing in college and university presidential searches. A draft of the job description for the president's position is also being prepared for review and issuance by the Search Committee.

Jerry Rackoff, director of institutional research and assessment, has been appointed the on-campus administrator. He will support Hamilton on logistical and administrative matters requiring on-campus attention. "At this point we understand that there will be tasks ... but the specifics of those duties won't be determined until the committee has been formed," Rackoff said.

Rackoff also said that the University is planning a national search for Adams's replacement. However, many details have yet to be decided until the committee meets for the first time.

Hamilton could not be reached prior to the publication of this article.

FORUM

EDITORIAL

'Watch the weather channel' . . . and other notes . . .

In a week with no major controversies, *The Bucknellian* would like to make some general comments on a variety of campus issues.

• The first, and likely most important item—stay tuned to the weather channel, and keep track of where your car is parked. This may seem to be an obvious point, especially for those who lost their vehicles last week, but we should all learn to respect nature's power. With this in mind, we suggest you not try to battle this power if it raises its ugly head again—get out its way and sit tight. In looking back on last Tuesday's flooding, kudos goes to those who lent a helping hand in a time of chaos and need (see page 1). Whether rescuing others or aiding in evacuation and cleanup efforts, it is good to know that unselfish hearts are out there in our community—one never knows what is to come, and it's nice to have these people around.

• The Greek system's Bid Night and the newly dubbed "Welcome Day" went mostly according to plan this year and was free of any major incidents and injuries. An "incident-free" bid weekend was integral to the Greek system's image, and the accomplishment is laudable. Besides the common complaint that "It's not like it used to be," the only criticism was the exclusion of non-Greeks from registered social activities this past weekend. This rule seems to hold both pros and cons. Positively, it was an effective way for the Greek system to limit the size of crowds and keep away potentially irresponsible non-members. Negatively, the action seemed to go against efforts to foster a relationship between Greeks and non-Greeks. On a campus that many feel is separated based on Greek affiliation (or non-affiliation), keeping non-Greeks from Bid (Welcome) Day parties serves to uphold and promote a sense of elitism. And some would simply like to socialize with all of their friends, regardless of connection to a Greek organization.

• This coming weekend provides an excellent opportunity for Greeks and non-Greeks to socialize together. In the first major effort by the Office of Campus and Activities and Programs to provide a meaningful alcohol-free weekend alternative, "Fall Frenzy" weekend will hopefully attract a large and diverse audience. Carefully planned and properly advertised, the weekend was devised as a way to bring all campus groups together. The efforts are certainly commendable, but it remains to be seen if the campus community will respond in kind. Last year's "Chrysalis Ball" was planned with similar intent, but failed to gain the support of many campus groups, including certain Greek organizations and athletes. The University is finally making a concerted effort to provide programs that have the potential to be enjoyed by all students—let's hope that the campus responds to the efforts with attendance.

• Finally, the progress of the "Bucknell Campaign" for campus improvement is to be commended. In his State of the University address, President Adams stressed the need to increase campus diversity and modernize areas of campus in need of repair. The campaign will play an integral role in both of those efforts. The tangible rewards of the fundraising campaign can already be seen in construction of the Siegfried Weis music building and the Swartz Field dormitory, and in planned renovations to the University fieldhouse and pool. Arguably the most important aspect of the campaign, though, is the University's goal of increasing the number and size of the financial aid awards to be given. An increase in financial aid dollars available is possibly the most important element in increasing the school's geographic and economic diversity. Construction and renovation is nice, but we can only hope that the University uses a sufficient portion of the Campaign dollars to increase the diversity and improve the caliber of students that will use those facilities.

TV: Break us out of the bubble!

By Kevin Mueller

Bucknell students are among the brightest in the natioh. Let's face it, our University's standards make it tough to gain acceptance without a fairly high past academic performance.

With all of these involved young minds walking the campus each year, it is easy to think that we have got it all. A good education, decent food and an environment crafted to broaden our minds. There is, however, one often overlooked aspect of this community that serves to downplay the splendor of Bucknell.

It has been argued that the absence of television in campus dorm rooms is a good idea. After all, keeping students minds on their work is hard enough without a TV to detract from study time. I disagree. The lack of an easy-to-access, daily global news source on campus has effectively trapped a large number of our fellow students in what has been affectionately referred to as the "Bucknell Bubble." This reference sights the "out of touch" feeling that many students who live on campus have to deal with on a daily basis. What is going on in the world outside of Lewisburg? Although this label may seem a bit comical, it is nonetheless a very serious issue surrounding a sizable number of students.

First year student, Aaron Spector, a Swartz hall resident had this to say about his news experience so far at Bucknell. "The only reason I know what is going on in this world is because of my geography class. There definitely is a bubble around here; there is a giant hurricane off the coast of Florida and I had no idea about it until today."

Many who live in Swartz have expressed the same view about this unique problem. The simple fact is that without readily available television coverage of current events, students in campus residence will be much less informed.

Although the ever-growing Internet has provided some options for current news, the fact remains that students are not spending the hours required to search through numerous web pages and Internet addresses.

"The only time I am ever on the Internet is to write email messages and to do research," says Jeff Wasikowski '02, "I do not really have any time to browse for news."

The one public television that graces most dorm lounges around campus is often crowded with students watching programming other than the news. This makes it extremely difficult for an individual student to flip to an information station. And with the delivery of a national newspapers added cost and time requirement, there simply are not enough students getting educated about the current world they live in.

The simple solution to this problem lies in the necessity of television access in the Bucknell's dorm rooms. Without the readily available convenience of news at the touch of a button, this University is effectively undermining the entire goal of its existence; to educate. How can students spend years at this school to prepare themselves for life in the real world when they do not even have easy access to what is going on in their world in the first place?

We need to be expanding the minds of the students who attend this institution, and one major way of achieving this important goal is to make sure that our students are informed about world events. Numerous other schools around the country grant their students this privilege, with the knowledge that their students are mature enough to handle the added enticement that TV can bring.

It is time that the administration pop the bubble that has been shielding its students from world events for so long. Its time to bring reality to the student body.

LETTERS TO THE EDITOR

Lewisburg residents also hit by flood

TO THE EDITOR:

In her article "All washed up and ready for revenge," we think Rebecca Rowland did an excellent job of reinforcing the stereotype that all Bucknell students are snobby, stuck up rich kids who think of no one but themselves. To even suggest that the "townies" knew about the flood and tried to hide it from students is completely ridiculous. It's amazing that Miss Rowland believes that Bucknellians should riot to have flood warnings issued. Additionally, it appears that she was expecting a community task force of residents to warn the students that the flood was coming. After consulting the law books, we have found no law stating that it is the job of Lewisburg residents to alert students to what's going on outside the "bubble" they have secluded themselves in.

No one could foresee the devastation that the flood would bring to Lewisburg and the surrounding community and the residents of Lewisburg did suffer substantial damage to their permanent residences. Even with their homes flooded, many University employees made the trip to campus and exhausted themselves to made sure that the students did not have it as bad as they did.

Physical Plant employees were on campus as early as 4:30 in the morning working on cleaning up the mess and school officials would spend the early morning hours and the next couple days working on providing accommodations to students left homeless by the flood. Local police and town officials did all that they could do to ensure the safety of Sixth Street residents where flooding was the worst.

Though it is unfortunate that so many students lost vehicles, possessions and their campus residences, they can still call mommy and daddy anytime that they want and go home. The residents of Lewisburg affected by the flood are not so lucky.

Their homes, the places where they raise their families and keep all of their possessions will take much longer to repair. And while the residents try to repair flood damage to their homes in the coming months, we do not foresee any shortage of Jeeps on this campus, as we are sure most students will somehow find a way to have their marvelous spectacles of automotive technology back speeding through town either through insurance or the "magical car fairy," mommy and daddy.

To add insult to injury, Miss Rowland suggests that the students of Bucknell will unite and riot during the next rain storm. As for that, we have enough faith in the campus community to know that very few think that the "townies" are responsible for the flood and the damage caused. Miss Rowland's article offended many of the Lewisburg residents and those of the surrounding communities that are employed by the University. She owes an apology to those individuals for her outrageous remarks concerning the flood.

J.A. Wally Dietrich GR
Nate Kraft '01

TO THE EDITOR:

As regular and avid fans of the Bucknellian, we were shocked and appalled by a recent article in the last issue (All washed up and ready for revenge, Sept. 9). The article focused on the recent flood that affected Bucknell and the surrounding communities.

The author, Rebecca Rowland, wrote the article as if it were a child's bedtime story. This is not what bothered us, nor did it bother any other person who expressed disdain for the article. It was the angle on which she focused her story.

The author expressed her belief that Lewisburg residents both knew about and purposely withheld information about the strength of the storm. To put it simply, this is ludicrous.

One only had to turn on a radio, TV, or look in a newspaper to understand the strength of this storm that was heading toward our area.

And while a large number of the victims were Bucknell students, the author would have only had to walk to Lewisburg's high school gymnasium.

There, she might have realized that many of the residents blamed for not raising an alarm were left with only the clothing on their backs and no "daddy" to bail them out.

This type of sensationalist journalism only creates one thing: tension between two overlapping communities: Lewisburg and Bucknell. We can only hope that the residents of Lewisburg were not as outraged as we were, and that maybe Rebecca Rowland has realized the mistake that she has made.

Monica Montgomery '01
Keenlan Cleary '00

Editor's Note: *Rebecca Rowland's article in last week's issue, "All washed up and ready for revenge" was a satire. It was written about a serious subject in a fairy-tale style in order to convey its satiracal intent. Perhaps this aim was not met. Miss Rowland apologizes for any offense her article may have caused.*

OPINIONS

Education's effects on society

Attempting to find a solution to the nation's growing problems

By Josh Guyan

Ok, I know, I just wrote an article last week on education. I just happen to think it is an important enough issue to warrant two articles. In my opinion, education is the closest thing we have right now to a universal solution to this nation's problems.

Obviously there is no one issue that can solve every problem, but I do not believe there is any other issue out there that can have as much effect on as many issues as education.

The Economy: We live in a world of global capitalism where competition is fierce and getting fiercer by the minute. We cannot just sit back and relish being the one and only superpower, just hoping it will last forever.

More and more information is becoming the key to success and we need workers who have the background knowledge and skills to sort through that information to come up with the right answers. If we do not do it, someone else will. That is a simple fact.

Companies need smarter, better-trained computer literate employees to make it in the global market. There are many cultures and nations out there that stress education much more than we do (Israel, China, Japan, India, Finland etc.) and we have to catch up, fast.

We have the best University system in the world, but not every American has the opportunity to attend one. Lets change that and start competing.

Race Inequality: Rather than initiating equality of outcome programs such as many affirmative action programs, we should be concentrating on equality of opportunity. We need the best of the best in the important positions in society. Capitalism does not care what color, gender, sexual orientation, or ethnic background you are. All it cares about is what you know and how well you get the job done.

The problem we have is that minorities in this country are not being given enough access to the right education to get the skills that capitalism demands. Of course this is not the complete answer, we still have to deal with discrimination, but education could do a lot to advance many minorities in this country and show people the stupidity of discrimination (it's a little harder to be a racist after you

study Colin Powell).

We have to make sure that every American no matter where he/she lives gets more or less the same basic education and access to college.

Quality of Government: Right now Congress is debating a bill on campaign finance reform. Everyone knows we have a problem with big money controlling our politics. This is why we cannot get enough laws passed protecting the environment, controlling guns and lowering taxes, all of which are very popular.

People feel detached from politics because they know it takes money to get things done in Washington. The Republicans are loving it because they get all the money from Big Business and most of the other people with deep pockets (doctors), but the Democrats have their contributors as well (Trial Lawyers, ACLU, Teachers).

So the Democrats are trying to change things by banning soft money and issue ads. The only problem is that this course of action violates the First Amendment for reasons of free speech. Maybe education can help the situation.

Why can money control politics? Candidates need money so they can get votes for election. A candidate with more money is much more likely to win. Believe me, I can get you the documentation.

The increasing cost of campaigns is largely due to the need to advertise on TV. This wins elections because a lot of people watch TV and when they see an ad they believe it because they do not know any better on account of their complete political ignorance.

America is very much politically ignorant. Most people think George W. Bush is his father running for re-election and so they are going to vote for him. It is sad, but true.

So educated citizens mean educated voters that will not be so dependent on TV ads for their political information. They might actually read The New York Times or watch Meet the Press (yeah right) and figure out who would be the best representative in office. Think of all the issues we could work on with better representatives accountable to a more educated citizenry.

It is pretty obvious what we need to do. It is not quite as obvious how we should do it. Whatever we do, it needs to be done soon. There must be urgency in our education reform.

All Americans deserve a first rate primary education and the opportunity to go to college. Not everyone can go to college, but we need the criteria to be much more performance oriented than checkbook oriented. How else are we gonna get the best and brightest into the important positions in society to compete against the world?

Bring it on, China.

Fashion Fads

By Rebecca Rowland

Fashion trends come and fashion trends go; one decade everyone was wearing skirts with poodles on them, the next they weren't hip unless they were wearing polyester. I have, however, always believed that the '90s have been relatively fashion trend free. One day, when it is Spirit Week at my kid's high school, and he or she asks, "Mommy, what did you wear in the '90s?" I picture myself saying "Um, khakis and flip-flops?"

But boy was I wrong (as I have been for the past week or two). I guess it was while I was looking through a fashion magazine this weekend when it suddenly hit me — the fashion trend for the '90s, at least 1999, is "Too small chic!" Now, I am not referring to some people's insistence that, yes, they are an extra-small; no, what I am talking about is the sudden emergence of 3/4 length sleeves and Capri pants.

I wonder why it is suddenly cool to look like you are wearing someone else's clothes—someone who is 2 inches shorter than you. I am not criticizing this trend, I am simply pondering its obvious, um, shortcomings. When, exactly, can you wear these clothes? If its not quite a pair of shorts and not quite a pair of pants do you wear them when it is not quite hot but not quite cold?

As for 3/4 length shirts, I find nothing more annoying than shirtsleeves that just don't quite reach my wrists. When I wear these shirts I constantly roll the sleeves up to my elbows therefore ruining the visual effect.

Maybe the trend is more than purely aesthetic. Perhaps it is akin to the corsets and white powder women in the 18th and 19th centuries wore to show that they didn't have to do any physical labor or perform manual labor in the fields. I've got it, maybe the trend has something to do with people's desire to be tall.

Everyone who is considered important in our pop culture is tall: basketball players are tall and supermodels are too. In a man being tall is considered a sign of great attractiveness and helps him get ahead in the world. Tall women are considered sexy, empowered, and graceful.

Society at large must think that by wearing clothes that don't quite fit we are conveying the attitude of "I am so tall I just can't seem to find anything that fits. Why, yes, I am a supermodel." Take into account women's sudden desire for 4 inch high platform shoes and I think I have solved a great societal quandary.

So the legacy we hope to leave by our clothes is that we were a society of tall, powerful people. When anthropologists examine clothing samples of ours in 200 years, the impression they will get is that, is that, oh no!

If all the anthropologists have is our clothes they'll think we were short! They won't know that they were too small! The anthropologists will look at our short sleeves and pant legs and think we had underdeveloped limbs! They will look at our 4 inch shoes and think we were only 4 and 1/2 feet tall!

Quick everyone, start wearing extra long pants and sleeves!

Travel with the team!

By Jim Leahy

Last weekend, a group of my friends and possible enemies went into Hamilton, New York, and beat up on Colgate University. That very same day, a group of students, myself included, got on a bus, early in the morning, and went to attend a sporting event. Now, you might think that we were headed to Hamilton to cheer on our football team. Wrong. We went to Baltimore and Camden Yards to watch the Orioles play the Mariners. What is wrong with that picture?

If you read my column last week, you might remember that I was asking the student body of this school to show some spirit and come out to the football games. This is sort of a sequel.

Some people I know would have loved to take a bus to Colgate and watch the game and I bet that there are others too. This would have cost some money, but somewhere around fifteen or twenty dollars for the bus per person would not be such a hardship. And the admission to the game would not have been that overwhelming. Look at the first game of the season. Morgan State had a nice showing of support and that must have been nice to hear if you were a player on their team.

Now do not get me wrong. I am not finding fault with the trip to Baltimore. I am only finding fault with the day on which the trip happened. That bus should have gone to New York! And for those of you who care, the organizations that run these trips are student led. Speak out and let those who are in the positions of leadership make the necessary changes. Hey, if you speak out loud enough, things are bound to change.

To wrap it up, football is cool. Most people like it in some form or another. On Sunday every television in every lounge had a professional football game on. A bus to an away game might just catch on when people realize that going to their college's football games is not such a bad idea.

For one more suggestion, if the league championship is in question when Bucknell goes to play Fordham on November 20th, there had better be a bus going to the Bronx because I would be the first person on it.

Building up school spirit

By Emily Novick

Fall Frenzy Weekend, which will occur this weekend September 17th and 18th, has just been instituted by the administration. It is part of Bucknell's new movement away from its party school reputation of binge drinking, kegs, and Greeks and towards the wholesome idea of traditions, football games, and "good clean fun."

The new committee responsible for Fall Frenzy and other such events as Midnight Mania, the Masquerade Ball, and the Crysallis Ball is being formed under excellent leadership and advisement. The first annual Fall Frenzy Weekend will begin Friday evening with a band, free food, a pep rally for fall sports teams, and jello wrestling. The festivities will continue into Saturday with a tailgating party, the football game, a banner competition with an ice cream prize, the Bison Chips, and Karaoke at the night's close.

The activities seem never ending but the pending question is whether students will make this fall weekend frenzy or fizzle. Traditions are difficult to create; they do not just pop up over night, but are instead shaped and molded over the years. T.O.K.E.N.S., the committee responsible for the tasks of forming new traditions at Bucknell, is not faced with an easy task.

Prying students' fingers one by one away from their beer bottles or pulling them two handedly up from their comfy couch will not be easy. But it seems as if T.O.K.E.N.S. has approached the battle between school offered weekend activities and the actual social scene correctly. The activities offered this weekend are happening during down time. Since social life doesn't begin until after 10, Fall Frenzy Weekend is offering students traditional fun to fill that empty time.

The activities offered are also appealing to students. The amount of people who would be interested in watching their fellow students wrestle in a pit of jello greatly exceeds those who would be interested in playing bingo.

It seems as if T.O.K.E.N.S. leadership is pointing the committee in the direction of success. Now it is up to the students to decide whether Fall Frenzy Weekend will become a new tradition here at Bucknell.

Parking: Where do we go?

By Maren Johnson

Attention Bucknell University students, raise your hand if you have received a parking ticket since your return to campus.

Chances are that many of you have indeed tried, and failed, at parking in an "off-limits" area due to the lack of student parking available on campus this year.

Due to a larger student body and a shrinking supply of parking spaces, students have expressed frustration about having a car on campus. Let's face it, Bucknell may be a school that attracts an affluent community, but I doubt that any of us have enough money to be paying parking tickets every week.

The largest problem appears to be a domino effect created by the loss of the Swartz parking area. With that lot gone, students living in Swartz must park elsewhere.

The only available parking spaces are those that would normally be used by other students wanting to park uphill.

Finding a parking space in the LC parking lot is near impossible, especially during the day. The parking behind Phi Psi and Lambda Chi is mainly staff designated and usually filled with fraternity cars as well.

Due to a larger student body and a shrinking supply of parking spaces, students have expressed frustration about having a car on campus.

For some reason, the most convenient student parking, that which surrounds the academic quad, has all been designated to the staff. However, as I myself discovered, it is not all clearly marked as such, giving the illusion that some small areas are for students.

After talking with a handful of students, many of them mentioned that it would have been appreciated if the university had made the students aware of the parking problem prior to bringing their vehicles to school.

There is no doubt that being able to have a personal vehicle at school is a privilege, but why not make it a privilege that we can enjoy and benefit from.

For those students who live on campus in the university's small houses or those living off campus, it is necessary to have parking spaces on campus that are readily available.

Usually I like to offer up suggestions for a solution, rather than just offer a complaint, but in this case, a solution may be difficult to come by.

I would rather that this simply be taken as one student's (and most likely, many students') effort to make a plight heard and acknowledged.

Cleaning the shelves: censoring magazines

By Allyson Demerath

As I was getting ready for my wonderful 8 o'clock class the other day, I heard some interesting comments on the radio. The interesting news story of the day was about how a certain coalition, whose name was not given, is working towards censorship of beauty magazines.

Apparently this group wants beauty magazine covers—Cosmopolitan and Glamour in particular—to be covered with brown paper. They argue because these magazines can be found in the checkout isles, near the gum and candy in most grocery and convenience stores, they are in plain view of young children.

The coalition is concerned that young, literate children are being exposed to explicit phrases and article titles. The story made me think.

Let me start by admitting that I have been known to read both of the above mentioned magazines. While I believe the magazines have a right to print what they chose, I also think these advocates may have a point.

If I had a younger brother, sister, or even children, I do not think I would want them reading some of the eye-catching phrases on these magazine covers. What the magazines chose to print in the actual articles is their business. However, everyone from impressionable ten-year-olds kids to easily offended grandmothers view the colorful covers.

Magazines are certainly not the only ones guilty of flamboyant marketing. It seems as though in the last decade, the media has been forced to use increasingly drastic and shocking marketing ploys just to get consumer's attention. Ranging from the violence in movies to the explicit language used on sitcoms, I feel our generation is becoming more immune to excessive material.

Controversial ads, television shows, movies, and videos that were once considered vulgar have become commonplace. Through repeated exposure, the general public has grown immune to this current trend.

However, subconsciously, people are seeking out more creative and original work. For example, The Blair Witch Project has become one of the most successful horror films of all time, yet it has no special effects or gory killings. Instead, it is shocking because of its unique and realistic novelty.

The marketing trends of today need a serious change. The focus should center on creativity. While companies may grab the public's attention by using outlandish and often offensive material, this method does not always sell the product. Rather, an honest approach may be a refreshing change.

CardioKarate

Working out and learning self-defense

By Kristen Jancuk

Laura Kamienski demonstrates self-defense techniques. Courtesy of Laura Kamienski

While everyone is excited about the newly improved facilities in the Davis Gym, the Stairmaster routine can sometimes seem a little mundane no matter how many calories you burn or floors you climb. Fortunately, for students seeking a more active and interesting aerobic workout, there is a solution: CardioKarate.

CardioKarate is a workout that moves beyond the realm of self-defense into a true aerobic workout. Certified instructor Laura Kamienski teaches this aerobic kickboxing workout, licensed by the National Association of Professional Martial Artists. The class combines aerobics and martial arts techniques into a single workout designed to burn calories as well as provide some basic self-defense techniques. "I combined my love of teaching aerobics and my love of Tae Kwon Do to create a great workout which my classes really seem to enjoy."

The class consists primarily of floor work in a rhythmic, add-on format, combining various martial arts techniques. While many may assume that the class is primarily concerned with self-defense rather than a cardiovascular workout, it is in fact designed with all the components of an effective aerobics class, including a proper warm-up and a 25-40 minute cardiovascular workout, as well as a cool down and stretch. Kamienski then continues with a strengthening section, usually focusing on abdominal conditioning.

On occasion Kamienski does focus more on the self-defense aspect. "Although no aerobic workout replaces self-defense training, during the course of my classes I try to impart self-defense awareness, techniques and strategies I've picked up along the way," Kamienski said. In past classes Kamienski has partnered participants up to demonstrate and practice strategies for escaping from and defending against some basic wrist grabs and holds. "[This] has been very successful and has encouraged some women to further their self-defense training by joining either a martial arts class or self-defense course," Kamienski continued.

A first-degree black belt in Chin Mu Kwan, a form of Tae Kwon Do, Kamienski is the assistant instructor of martial arts at the Burns School of Tae Kwon Do in Selinsgrove, PA, where she practices as well. She has been teaching aerobics for over five years and teaches women's self-defense seminars in the community. "I think that women need to understand that they are capable of learning to defend themselves against male attackers."

The first class, which met Wednesday, Sept. 8, attracted a huge group of participants who sweated their way through 45 minutes of kicking and punching. Due to the oppressive heat and humidity, Kamienski had to cut the class slightly short and is hoping the weather will be more cooperative this week. Despite the heat, student response was positive. "I really enjoyed the class because it was so high-energy and the moves we learned were actually useful for self-defense," Kim Spigelmire '02 said. Although last week's class was predominantly composed of women, the class is open to both male and female participants.

"CardioKarate is a great place to learn some self-defense techniques and combinations, get a kick-butt workout and have a fantastic time," Kamienski said. Classes are held at 5 p.m. on Wednesdays in the dance studio on the second floor of the Fieldhouse.

Wink Thinks

Jacqueline Flicker—The Bucknellian

Dear Wink,

As is the case with most people on this campus, at least the ones who have access to a computer, I have this little thing called Instant Messenger. While a significant number of people think that it is quite possibly the greatest thing ever invented because it allows you to talk to all your good friends, without paying exhorbitant long-distance fees, for me it is a totally different story. Yes, Instant Messenger has become the bane of my existence.

You see, when I brought my computer to school I knew that my roommate didn't have one, and I naturally assumed that he would ask to use mine every so often. I had no problem with this. Why wouldn't I let him use it? I am a nice guy. To ensure that you fully understand the situation I had better add that my roommate has a girlfriend who he met over the summer at a concert and has only seen once since. To put it bluntly, their relationship is just plain weird. They talk like they have known each other for years, but in fact have only known each other for a short while. So, as soon as we got to school, my roommate asked me if I would mind putting Instant Messenger on my computer so he could talk to his girlfriend once in a while.

To make a long story short, what he called "once in a while" has become hours every day and it is driving me crazy. I can rarely use my own computer, and when I do get to use it his girlfriend ends up talking to me. I think that she has too much time on her hands or has no friends or something like that. To make matters worse, I came in from class the other day and found him sitting at my computer when he should have been at class. When I looked at my computer to see what he was doing I realized that he was looking at some freaky web site that I will not even go into, but I am sure that you get the idea. To say the least, I was mad that he was using my computer in this way, and being sneaky about it,too.

Therefore, my question is: how do I tell my roommate that I do not want him using my computer anymore? I do not want to get into a big argument with him, but I cannot take it anymore. After all, it is my computer and I do not get to use it. Please help me. What should I do?

Sincerely,
Confused in Cyberspace

Dear Confused in Cyberspace,

I completely understand the anger that you may be feeling right now, and let me tell you that your feelings are justified. To put it mildly, your roommate has taken advantage of your generosity and will probably continue to do so until you put your foot down. You cannot let yourself be jerked around by this kid who clearly has no regard for your property or appreciation for your flexibility. In my opinion, you should say something to your roommate; you have to for your own good.

There are clearly two problems here associated with your need to tell him how you feel. The first is the way in which your roommate may react. I have no doubt in my mind that he will react in a hostile manner if you simply tell him that he can no longer use your computer. Therefore, I urge you to sit down and have a talk with him. Tell him that you feel as though you can never use your computer, and emphasize the fact that you don't approve of his questionable activities (on your computer). He will most likely try to make some sort of excuse blaming the problem on you, saying, "Well, you just had to ask." In my opinion this is simply a cop out on his part, so I urge you to not buy into his excuses. You must be firm. That is the key to his understanding and your happiness. You may also consider coming up with some sort of compromise with your roommate so that he can in fact use your computer once in a while. I think that he may be very offended if you simply tell him that he can no longer use the computer. Therefore, try to reach a mutual agreement. It may be difficult at times, but in the long run it will work out for the best.

The next problem that I fear will result from your confrontation with your roommate is the way that your relationship with him may suffer. If you do not care about how your roommate treats you, or vice versa, than I say go for it and truly tell him how you feel. However, if you value your relationship with him than I advise you to express your feelings in a manner that will allow you to continue your friendship. In my mind, I do not really know if I would want to be good friends with a person who seems so manipulative, but that is my opinion, so take it as you wish.

In the end I think that you should tell this guy how you truly feel. It seems to me that he was very discourteous towards you, and you should react in such a way that he will understand your anger. Be cool, though. I wish you the best of luck.

If you are ever placed in a situation where you feel you are being taken advantage of, I suggest you weigh your options, think about how you feel and sit down and have a talk with the person. Then after you talk it over, react accordingly. After all, communication is the key to any healthy relationship. Until next time, relax, have fun and let Wink's wisdom be your guide.

If you are interested in writing to Wink there is no need to worry—all questions are confidential and answers are always thorough. However, please write questions that are decent because we cannot include material that is libelous or an invasion of privacy. Questions or comments can be sent to Eli Winkler at box C2815, attn: Wink Thinks.

Please note that Wink Thinks is meant to be instructional as well as entertaining. However, it is in no way a substitute for professional counseling.

The members of the Alpha Phi Omega fraternity. Courtesy Alpha Phi Omega

Alpha Phi Omega serves the community

By Helen Shen

Perhaps when first hearing about Alpha Phi Omega, one is extremely attracted to its co-ed environment. First-year students may be excited to learn that A-Phi-O, as it is most often called, is open to all University students. However, upon a closer inspection, one is bound to discover the true depth of the organization. It is a group that works hard, driven by the determination to serve the chapter, the campus and the community.

A-Phi-O's 80-member chapter meets at 7:00 p.m. every Tuesday. At the most recent meeting, They were faced with about 40 pledges. "We wanted them to know the three basic principles that we go by in A-Phi-O: leadership, fellowship and service," Pledge Leader Laura Beth Dunn '01 said.

What has A-Phi-O accomplished in the past? The list is impressive. Every spring semester, they sponsor a blood drive on campus. In addition, last spring the group participated in a Students Against Multiple Sclerosis fundraiser, a 24-hour dance marathon that raised money for children who are suffering from multiple sclerosis nationwide. When Halloween rolls around, A-Phi-O creates a haunted house specifically designed for the children in the community. In light of the Halloween spirit, they also trick-or-treats for canned goods which they then donate to a nearby food pantry. In addition, they will be participating in "Cropwalk" which takes place in October. The true spirit of A-Phi-O is further illustrated by their assistance in cleaning out the Red Cross last Tuesday, when the sudden flood took over many buildings in the Lewisburg area.

Members are extremely enthusiastic about the coming year. "I can't wait to get everyone going [on their initiation]. The pledges will soon see that A-Phi-O is a great opportunity for them," Dunn said. "I hope that everyone will stick with A-Phi-O and really get involved. My goal is to let everyone have a great time."

Getting involved means that each member has to complete at least 15 hours of community service each semester. Many members complete more. With the University Chaplain Ian Oliver as one of the advisers, the group has a bright future.

A-Phi-O was founded by a group of Eagle Scouts who christened it with its name. Although one may imagine that A-Phi-O is like a typical fraternity, nothing could be further from the truth. "A-Phi-O is just a group having fun and doing service together. It's really a great way to get to know other people," Dunn said. "Over the years, it's become more of an organization than a fraternity," supplies Scott Harney '01, a leader of the group. Indeed, A-Phi-O is not alcohol-affiliated and does not have a house on campus. However, members do pay dues and are required to go through initiation.

A-Phi-O initiated new pledges on Tuesday, Sept. 14. "We look for pledges who are outgoing, loyal, helpful in serving others and passionate," says Dunn said. Indeed, such a group is needed in order to continue that good work.

SCIENCE & TECHNOLOGY

Biologists create new strain of "smart mice"

Princeton researchers apply gene that controls memory function, finding that it increases intelligence

By Debra Lowry

By adding only one gene to a mouse's embryo, scientists have created a significantly smarter strain of mice. They call them "Doogie" mice, named after the 16 year-old doctor genius on the television show 'Doogie Howser, M.D.' says *The New York Times*.

Dr. Joe Tsien, a Molecular Biologist from Princeton University, led the revolutionary study. He claims that his new discovery will enable us to develop medicines for various human cognitive disorders, including memory loss, age-related memory fading and Alzheimer's disease. Developing medicines is not all that this new discovery could lead to—It also gives strong implications at improving intelligence. The gene could, hypothetically, be entered into a human embryo, resulting in the creation of a multitude of 'Doogie Howsers.'

The New York Times reports that the study's original purpose was to determine how memories are formed in the mammalian brain. As it turned out, the mice, as a result of the implanted gene, not only had better memory, but also appeared smarter. The mice underwent six distinct tests during which they performed better than the normal, control mouse subjects. Each test exercised different association areas of the brain.

The gene that Dr. Tsien altered had to do with the NMDA receptor that is thought to be vital to the memory mechanism. Many genes make up the subunits in the NMDA receptor, but the main gene involved in NMDA formation makes up the NR1 subunit. Other important subunits include the NR2A and NR2B. The NR2B subunit is more common in young mice, while the NR2A subunit is more prominent in aged mice.

It has been shown by Dr. Tsien that mice who lack the NR1 gene in the hippocampus (area of the brain important in memory function) did have the poorest memory. Dr. Tsien decided to make an attempt at enhancing the NMDA receptor by exploiting a natural change that occurs over a mouse's life span, to show that, without a doubt, the gene is related to memory.

The NMDA receptor, shaped like a cylinder, is embedded in the outer membrane of certain brain cells. Its central channel is usually closed, unless it receives two simultaneous signals from two different nerve cells, after which the channel would immediately open. The open channel allows a current of calcium ions to flow into the cell. This current produces a long-lasting change in the cell, making the cell more responsive to the next time that either of the two nerve cells is active alone.

Courtesy of Biosis

By implanting one gene into the DNA of mice, scientists succeeded in increasing intelligence and memory functioning, leading them to call the mice "Doogie mice."

The simultaneous signals have been long thought of as the basic mechanisms of memory due to the way that the brain makes an association between the two events. It has been shown that the degree of simultaneity is very important. The younger the mouse, the shorter the time period between the two signals. It is therefore significantly harder for older mice to remember things, because the degree of simultaneity has to be so great. For young mice, there is a small period of delay between the two signals.

Because it appeared that the NR2B subunit plays a vital role in the memory process of younger mice, Dr. Tsien chose to focus on this gene. He created a strain of mice that had extra copies of the NR2B gene. He also attached a promoter (short DNA sequence) in front of the gene to cause it to only be active in the forebrain and hippocampus.

Dr. Tsien's results, says *The New York Times*, showed that the new strain of mice were more intelligent. Although the NMDA receptors underwent only a subtle change, the aftereffects were significant. The channel of the receptor remained open for 250 thousandths of a second in the experimental mice as compared to 100 thousandths of a second in normal mice. The extra 150 thousandths of a second seems to be the reason for increased intelligence.

The gene that Dr. Tsien manipulated for mice is 98 percent identical to the DNA sequence of the human gene. Tsien's study proves that there is a good chance that humans will behave in the same way as mice when implanted with the gene—Although, this is yet to be proven. There could be many reasons against the procedure being applied to humans. Changing the human brain in this way could be detrimental for us. Perhaps nature intended the tapering off of learning ability with age.

Society will have to wait and see what Dr. Tsien's discovery will bring for us. There are many ethical issues surrounding the creation of a "perfect" baby by using what we know to enhance a human being above the average—above normality.

Pittsburgh burn victim rescued by skin transplant

By Todd Seitz

A ten-year old boy with burns over eighty percent of his body was saved by having replacement skin grown for him in a lab, reported the August 4, 1999 edition of the Pittsburgh Post-Gazette.

Sammy Thompson was burned in an accident at his home in Glenville, West Virginia on May 21, 1999. Apparently, he had accidentally kicked a can of gasoline onto a hot lawnmower, igniting the fuel. The resulting third-degree burns over eighty percent of his body lead doctors to believe that Sammy had only a one in ten chance of surviving.

With such extensive burns, skin grafting was not feasible, and doctors realized that some sort of skin replacement was required. The victim was flown to the hospital by helicopter, and the burn team sent a sample, about the size of a dime, of his undamaged skin to Genzyme Tissue Repair, based in Cambridge, Massachusetts. At Genzyme, scientists start with a patient's own cells and grow skin which can be grafted onto the patient's body.

Courtesy of Pittsburgh Post Gazette

Doctors predicted that Sammy Thompson, ten-year old burn victim from Pittsburgh, had a very slim chance at survival.

Once Sammy's underlying tissues had been prepared to accept the new skin, cadaver skin was used as a temporary covering for the twenty-one days it would take to obtain the lab-grown skin. In preparation for the new skin, Sammy underwent numerous operations to clear the wounds of debris, sometimes as deep as the level of fat.

On June 16 and June 25, two separate grafts were made of the new skin, and Sammy left the hospital for rehabilitation on August 4. The lab-engineered skin, although a life-saver, is by no means a miracle cure. The skin will never appear normal, and Sammy still has a long-road of rehabilitation ahead of him. As he grows, he will need repeated grafts because the skin will not grow and develop as he does.

Although the procedure is far from perfect, great strides have been made in developing functional substitutes for damaged tissue. This technology encompasses a field known as tissue engineering. In recent years, dozens of small companies have gone to the public markets to obtain funds for research into aspects of tissue engineering. As is evident in Sammy's case, developments in tissue engineering are improving the body's ability to heal, icreasing patients' quality of life.

Skin has lead the way for tissue engineering, as scientists have been developing skin substitutes for over twenty years. Skin has become the first successful lab-engineered tissue made available to people. Due to the limited use of cadaver skin because of the HIV epidemic, and the three to four weeks that it takes for replacement skin to be grown, scientists have developed skin that can be stockpiled for use when needed. This skin is known as 'ready-to-wear skin.'

One version of this skin is composed of a bio-engineered dermal (inner) layer of skin combined with a synthetic epidermal (outer) layer. This engineered version would be used as temporary skin in a case such as Sammy's until enough healthy skin was available for grafting.

Another model, called Apligraf, is a completely bioengineered skin product. The epidermal layer consists of keratinocytes, and the dermal layer consists of fibroplasts in a cell-compatible collagen (primary structural protein of skin) matrix. Living human skin consists of these same basic components. The body provides missing cell types or materials as it heals. Foreskins recovered from circumcisions serve as an abundant source of keratinocytes and fibroplasts for the tissue engineers to work with.

Experimental treatments involving these two skin types have thus far been successful in clinical trials. Engineered tissues must gain approval from the Federal Drug Administration before being put to use. Apligraf, in particular, is the first engineered skin to win approval for treating leg ulcers.

A broad range of tissue and organ substitutes are presently under development. Cartilage, for example, appears to be the next bio-engineered tissue. Engineered cartilage will be used to replace joint cartilage where it has been damaged in patients. As this technology grows, so-called tissue engineers will approach the point where they will be able to fabricate parts of the human body to be used as 'spare parts' for patients who suffer from birth defects, diseases or serious accidents. This would replace transplanting, allowing patients to receive treatments before becoming seriously ill. Many years down the road tissue engineering may be able to produce complex body parts, such as arms or hands.

The effects of this technology is far-reaching and the possibilities for new medical techniques involving tissue repair, replacement and regeneration are endless. Although tremendous strides have been made, we still have a long road ahead to meet the high hopes that many hold for this technology.

Where did they learn to count?

S & T staff frustrated by confusion over millennium

By Matthew Trunnell

As the countdown to the end of the year continues, the now-familiar millennial hype is growing. Even the word "millennium" is starting to become a fixture in commercials, the news and in conversation. Two reasons that have led to this increased focus on the turn of the year: the Y2K computer issue and the misconception that the year 2000 is the beginning of the next millennium.

Certainly Y2K computing is worth our attention. But isn't anyone else struck by the inaccuracy of this year being labeled "the last in the century?"

This falsity is so pervasive that most people who know the facts have given up trying to correct others who do not. Defiant about this apathy towards ignorance, I urge you to spread the news.

How could an issue like this have become confused? Is the public really that misinformed?

For those of you who may need reminding, 1999 is not the last year in this century or millennium. It is the ninety-ninth year in the 20th century. The last year in this millennium will be next year. The 21st century will begin in the year 2001.

If this is still not making sense, hear me out. Our Gregorian calendar counts time after the birth of Christ. The first year was year number one, so the first century lasted until the year 100. The second century began in the year 101. This makes 2000 the hundredth year in the 20th century.

So we still have another year to go before anyone needs to celebrate the millennium (not that I won't be celebrating this time around, mind you). How could an issue like this have become confused? Is the public really that misinformed?

A personal theory that explains all this nonsense is the Power of Marketing Dollars. I believe that a change in four digits is enough for the hype to continue, not because we cannot count to 100, but because the potential marketing value of the millennium is so great. Already, people are booking special travel reservations for their "millennial celebration," with resorts around the world jacking up their prices. Next year some marketing guru will find a clever way of saying, "Oops! It's *this* year, 2000, which is the last one in the millennium! Sorry about that everyone!"

Some of you may be asking, does any of this really matter? Well, besides the fact that two consecutive New Year's will be celebrated as millennium changeovers, no. I just have a hard time believing that the shade has been pulled over everyone's eyes so effectively.

Bucknell boosts bandwidth

By Scott Hagadorn

At the inception of Resnet on the University campus in 1996, the connection speed to the Internet was an impressive 1.17 Mbps (megabits per second). Classified as a shared T1 connection and very impressive at the time, the burgeoning world of the Internet is now imposing new demands for information never previously conceived. With the availability of streaming video and audio, the demand for this data has increased exponentially over the past year and subsequently created Internet traffic that is slowing even the fastest lines of major ISPs. At universities across the nation, "fat pipes" are an essential resource for those looking to use the Internet for work and play. So as the demand prompted a call for greater bandwidth, Bucknell's computer systems management took the stand this September and met the need for speed with the implementation of a T3 Internet connection.

Chris Pizzo—The Bucknellian

Gene Spencer, Associate Director for Computing and Information Services (left) and John Jantzi, Systems Integrator (right) plan appropriate systems upgrade for the University.

In 1997, the University increased it's connection speed to the Internet from a shared SMDS T1 connection to a full duplex T1 which allows a transfer rate of 1.54 Mbps both into and out of the Bucknell Ethernet router. In 1998, after plans failed to implement two full T1 connections, a sluggish Internet connection pushed the University's network managers and operators to consider an even faster alternative, a T3. Capable of transferring data at speeds up to 45 Mbps, this type of upgrade would surely provide adequate bandwidth for the current traffic loads.

While a full T3 line allows 45 Mbps of transfer, the University's computer system administrators have limited the connection to 10 Mbps due to its adequacy at the time, classifying the connection as a fractional T3. Gene Spencer, Associate Director for Computing and Information Services and John Jantzi, Systems Integrator, claim that it will be "technologically easy" to upgrade the connection in increments as needed. As demand on the Internet increases on campus to a point where the current bandwidth becomes saturated, the appropriate upgrades will be made.

John Jantzi, systems integration supervisor for ISR, claims that the campus internet speed is managed so that the 10 Mbps connection never exceeds thirty percent usage over 5 minute intervals. This number may approach, but never exceed 50 percent during the busiest Internet usage times on campus, which typically occur around midnight. Packets of streaming entertainment data increasingly slow the Internet connection on campus. Streaming MPEG 4 video and the ubiquitous MP3 file are among the most common "pipe cloggers." However, with the new 10Mbps connection, the typical PC or Mac can download at improved rates of around 30-45K/second compared to the previous 1-5K/second so net video and music are now much more accessible.

This year, Yahoo Internet Life rated Bucknell University number 59 out of 200 of the nation's most wired colleges. Currently the leader in our class of universities for what we do, this faster connection to the Internet will soon open up opportunities that will set us apart from even the largest institutions.

BIOLOGY SEMINAR SERIES

Seminars will begin at 4 PM in Rooke Chemistry Auditorium, with reception at 3:30 PM

Sept. 17—"Host-specificity in Dipteran parasitoids of tropical ants" Dr. Shellee Morehead, Burpee Postdoctoral Fellow, Biology Department, Bucknell University, Lewisburg, PA.

Oct. 1—"Darwin meets Newton: The sensory basis for different Arthropod antennae" Dr. Paul A. Moore, Laboratory for Sensory Ecology, Depart ment ofBiological Sciences, Bowling Green State University, Bowling Green, OH.

Oct. 22—"Molecular evolutionary biology of photosynthetic and nonphotosynthetic plants" Dr. Claude dePamphilis, Associate Professor, Department of Biology, Penn State University, University Park, PA.

Oct. 29 (Homecoming)**—"OCA-B: a B cell-specific transcription coactivator"** Dr. Sean Stevens, Research Associate in Molecular Biology, Rockefeller University, New York, NY.

Nov. 5—"The constitutive transport element (CTE) of Type D simple retroviruses: a ticket for export on an mRNA pathway" Dr. Amy Pasquinelli, Post-doctoral Research Fellow, Department of Genetics, Harvard Medical School, and Department of Molecular Biology, Massachusetts General Hospital, Boston, MA.

Nov. 12—"Ecology, behavior and reproduction of two sympatric Malagasy lemurs" Dr. Natalie Vasey, Department of Anthropology, Pennsylvania State University, University Park, PA.

Arts & Entertainment

Davis-Larson brings costume design to University

By Courtenay Mastain

Bringing characters to life through her costume creations, Paula Davis-Larson, professor of theatre, is a valuable addition to the department of theatre and dance. Formerly a professional dancer, Davis-Larson admitted that when she first began to design, she missed being on stage as a performer. "I realized that my emotional self is on the stage, reflected in the costumes, even more so than when I was performing," Davis-Larson said.

After 12 years as a costume designer at Arizona State University, Davis-Larson discovered her love of teaching. Recently completing her M.F.A. in theatre and dance costume design, she was eager to fulfill her dream.

"It was important to me to be somewhere that had strong dance and theatre departments," Davis-Larson said. Her interest in combining theatre and dance drove Davis-Larson to seek out the position as costume designer at the University. "I wanted to be at a small university dedicated to teaching and Bucknell appeared to be the place that would fit best because I could really contribute," she said.

Amy Rinker, a former student and friend of Davis-Larson, also left Arizona State as a recent graduate and will spend the year at the University as the costume design intern. Graduating with a B.F.A. in dance education, Rinker viewed the internship as an opportunity to branch out her interests to include theatre. "I've only worked on dance costumes and so I am really excited about the opportunity to design for the theatre," Rinker said.

In addition to designing and overseeing the costume studio, Rinker is taking modern and ballet dance classes and a drawing class. "Students have so many opportunities; there is so much to do on campus," Rinker said. Her current role as assistant to Davis-Larson for the upcoming mainstage show, "Tea in a China Cup," will help Rinker gain experience in designing, the main focus of her internship.

"Every show I work on becomes my favorite," Davis-Larson said. "For many of the productions, I try to reinterpret a time period and find something new in the costumes that will put the world of the play in a created time period which the audience can relate to," she said.

Davis-Larson's current favorite, then, is "Tea in a China Cup," the story of three generations of a Protestant family from Northern Ireland, told from the perspective of the third-generation daughter. The costumes for "Tea in a China Cup" call for attention to detail. "Color and texture are important details which reveal the characters," Davis-Larson said. The process of developing the costumes is as lengthy and tedious as the rehearsal process the actors undergo.

Aiding Davis-Larson and Rinker in the whole process is Mary Kokie '02. A costume design and fine arts major, Kokie works as costume design T.A. at least ten hours every week doing alterations, building costumes and doing "whatever needs to be done," she said.

The process of creating the costumes for a show begins with extensive research of the time period, conducted primarily by Davis-Larson. The designers strive for an accurate interpretation to which they can eventually add their own individual twist, Davis-Larson commented. "As a costume designer, you have to investigate the characters as much as the actors do," Rinker said. "You also need to look at the emotions and politics of the time period."

After the research is completed, design meetings with the director and other designers begin. "This is just the conceptual work," Rinker said. "Initially everyone performs their individual tasks and then we sit together and work as a whole," she said.

At the design meetings, patterns are selected and the costumes get pieced together. After multiple fittings with the actors, the finishing touches are completed. "You almost think it's never going to end and then it's opening night—and you're still not finished because there's always something that needs to be done," Kokie said.

Ryan Meidel-*The Bucknellian*

Paula Davis-Larson in one of her favorite locations, the costume shop. Working with intern Amy Rinker, she will create many costumes in her first year at the University.

"Costume designing is very satisfying," Davis-Larson stated, "because after all of your hard work, you have a tangible product that you made. It is unlike other fields," she continued.

Davis-Larson is also designing the costumes for the fall dance concert. Among her challenges is creating costumes for Professor of Dance Er-Dong Hu's piece—a deconstruction of "Romeo and Juliet." "This is a perfect opportunity for me because the piece incorporates both theatre and dance," she said. "I envisions the costumes as very modern and hip," Davis-Larson said.

Davis-Larson is also working to reconstruct the costumes Danna Frangione, professor of dance, used this summer while she performed in Taiwan.

"Designing for theatre and dance is very different. With theatre, you are responsible to the script, so you have less freedom," Davis-Larson said. "Designing dance costumes allows me to be more free, except that I have to observe the dancers' need to be able to move."

In addition to designing, Davis-Larson is teaching two courses this semester: Introduction to Theatre and Costume and Fashion. "With Introduction to Theatre, students who are not theatre majors are introduced to theatre. I hope to develop the whole curriculum so that I may offer the costume class every year," she said. Davis-Larson explained that she is currently concerned with developing relationships with museums in Philadelphia and nearby towns.

Next semester she will teach a capstone course in fashion. "I designed the course for students from all disciplines to take this course. We will explore how they can integrate their discipline with fashion," she said. "I have one student who is a bio-chemistry major and they are going to explore fabrics made from petroleum," Davis-Larson said. "It is already one of the most popular classes on campus," Kokie noted.

Davis-Larson became interested in costume design in high school, but didn't realize that she could make a career of it. After her first year in college, she began to recognize the possibilities design held. As a member of Aman Folk Ensemble, she toured the country dancing in EPCOT center and even traveling to Pennsylvania. She attended CalArts as an undergraduate student and went on to work in the fashion industry as an assistant designer for various swimsuit designers. "This was perfect training for me because I learned to work with stretch fabrics," she said.

Though Davis-Larson specializes in Eastern European costume, she claims no favorite type or period of costume. Rinker, however, is excited to design for theatre. "I would like to design something wild and crazy and not necessarily functional," Rinker stated.

With Davis-Larson's experience and talent, Rinker's eagerness to learn and Kokie's dedication, the costumes featured in the theatre and dance productions will be an extraordinary sight.

Sam Feeney '00 and Miriam Sand '01 in "Red Cross," directed by Karen Forgione '99. Company! is a student run theatre group.

Company! makes debut on campus

by Allison Bagby

Every Sunday afternoon, 14 individuals make their way over to the Tustin Studio Theatre. The group hails from all corners of campus—their majors range from theatre to economics and they come from different parts of the country, but they all share a common love of theatre.

Company! was founded in 1994 by a couple of students who wanted to gain theatre experience outside of what the Theatre Department offered. "Company! provides students with a variety of experiences both on and off stage," David Carpenter '00 said. "But these experiences are unique because students are taught by other students about their production responsibilities," he continued.

Members of Company! rotate positions for each semester's production. First semester's light board operator may be second semester's costume designer or even act. During a production, students who are in a position unfamiliar to them will be supported by those who have more experience.

Company! will announce its newest members next week and they will begin staging a children's show based on Shel Silverstein's *The Giving Tree* and poems from *Where the Sidewalk Ends* and *A Light in the Attic*. This show was collaborated by Kate McDevitt '01 and Sandie Pisieczko '00.

"The rehearsal process will be based on creating this show together. We will not have specific roles, but rather, we will work together through improv-type workshops to bring Silverstein's works to life through movement, voice and storytelling," Pisieczko said.

"This show focuses on the ensemble and the people involved, rather than focusing on details like when the set is going up. This should be a very holistic experience," continued Pisieczko.

The show will debut on campus and then Company! will tour various youth centers, schools and possibly other college campuses. "This is unlike anything we've done before. It's a great group effort," Sharon Savage '01 said.

Company! is enthused that interest has been so great and encouraged those interested in any aspect of production to get involved with the Theatre Department's upcoming shows. Two Mainstages, Showcases and auditions for the Cocktail theatres will be held this year.

Returning members of Company! from the class of 2000 include Liz Asti, David Carpenter, Sam Feeney, Amy Gilday, Sandie Pisieczko and Jen Schmermund. Members from the class of 2001 are Kate McDevitt, Trevor Rutledge-Levernz, Miriam Sand, Sharon Savage and Amy Wilson. Dave Halpern, Mary Kokie, Liz McCarty and Kate Reusch are the sophomore members. Ian McNaugher '01 and Meg Somerfield '01 are abroad this semester.

Counting Crows to perform at the University this semester

by Carolyn Hyman

With their 1998 release of *Across a Live Wire: Live in New York*, Counting Crows proved their talents outside the studio. The double concert CD, consisting of one acoustic disk recorded for VH1's *Storytellers* and the other from MTV's *Live at the 10 Spot*, is testament to the band's incredible live performances. Students will experience Counting Crows live when they come to the University on Nov. 12.

Labeled by *Rolling Stone* as "the biggest new band in America," Counting Crows released their debut album, *August and Everything After* in 1993. It went on to sell over six million copies. Featuring frontman Adam Duritz's melancholy and tortured croons, the album encouraged listeners to ponder his confessional and woeful lyrics. The acoustic edge of songs like "Round Here" and the infectious "Mr. Jones" propelled Counting Crows to stardom.

After an almost three-year hiatus, Counting Crows returned in 1996 with *Recovering the Satellites*, an experimental album with an aggressive tone. A diverse album, *Recovering the Satellites* included several acoustic, anguish-filled songs similar to the hits of their debut album. "Goodnight Elizabeth" and "A Long December" were among fans' favorites.

Yet songs like "Catapult," "Have You Seen Me Lately?" and "Daylight Fading" introduced stronger guitar riffs and heavier drums beats. Critics compared "I'm Not Sleeping" to the music of The Beatles' "Sgt. Pepper" era.

The event is sponsored by the Bucknell Activities Council's Concert Committee. Students participated in a survey last spring to determine which artists the campus would like to see perform.

From this survey and in compliance with guidelines set by the Committee, as well as other factors such as tour dates, Counting Crows was chosen to perform.

The Concert Committee has an annual budget of $40,000 provided by the Bucknell Student Government and will bring another big-name band to campus next semester. Other bands hosted by the University in the past few years were Rusted Root, Run DMC, Cherry Poppin' Daddies and Dave Matthews featuring Tim Reynolds.

Tickets will go on sale Oct. 4 for $15 with a student I.D. and may be purchased in the Bookstore or the Langone Center Box Office with a student I.D., cash or credit card. On Oct. 11, tickets will be made available to the general public for $20. The show will be held on Nov. 12 in the fieldhouse.

Courtesy of www.countingcrows.com

Adam Duritz, lead singer of Counting Crows delivers a heart-felt performance. The concert on Nov. 12 is sponsored by the Concert Committee.

Emmy Awards are a major disappointment

By Andrew Kohn

The Emmys have become boring. They are predictable—eight actors and shows that won last year received the same awards this year. The presenters, many of whom star in television comedies, are not funny. And for people who have an unlimited budget and selection of designer clothes, it was an extremely unfashionable event.

Now don't get me wrong, I love to watch the Emmys. I'm thrilled to see who wins, what they're wearing and who actually shows up. There is, however, a small fire burning within me. The Emmys overlook some important shows and actors, while throwing kudos upon people who really don't deserve such prestigious awards. The winners and the years that they have won their respective awards are listed.

There are three people in this list who have never won before and there are some that have won for the past four years. Thank God that "Mad About You" has ended so that Helen Hunt cannot win again. Let's hope that some new faces will show up in the nomination list next year. This year seemed to be the year for "Everybody Loves Raymond" (which had an actor in every comedy category). Maybe next year will be the year of "Will and Grace" or "The Drew Carey Show." We can only wait and see.

There were some unusual faces at the Emmys this year—namely Hollywood movie actors. Among the crowd were Brad Pitt (with Jennifer Aniston), Julia Roberts (with Benjamin Bratt), Matthew Broderick (with Sarah Jessica Parker) and Michelle Pfeiffer (with David E. Kelly).

There were also some unusual nominations this year. "The Sopranos," an HBO show, was nominated for 16 awards. "Will and Grace" was nominated for best director, it's only nomination, which it lost to "Sports Night"—a show I have never even heard of!

William Shatner lost to Mel Brooks for best special guest appearance in a comedy. Obviously, nobody saw William Shatner's fabulous performance on "3rd Rock from the Sun"!

The politics of Hollywood were evident when the kids from "South Park" introduced a clip about those who died in entertainment over the past year. The members of this list included Charlie Sheen, God, and, of course, Kenny. It took me a minute to realize that it was a joke!

The real list included Ellen Corby of "The Walton's," Norman Fell of "Three's Company," Dana Plato of "Diff'rent Strokes" and DeForest Kelly of "Star Trek." Even the "death list" has turned political with different people receiving various levels of applause from the crowd. Popularity contests still continue, even after a Hollywood star has passed away.

There was a new segment this year where people on the internet rated the top five TV moments of the year. The number five event was Roberto Benini winning one of his Oscars. The number one moment was Ross and Rachel from "Friends" getting married. It sure doesn't rank as the number one event in my mind.

I would rank the last show of "Mad About You" as the number one event because it's finally over! There were a few strange new segments that included the casts of "Felicity" and "Dawson's Creek." These small clips were actually funny as Felicity parodied roles on "ER," "The X-Files" and "NYPD Blue."

Courtesy of www.helenhunt.com

Helen Hunt won her fourth consecutive Emmy for "Best Actress in a Comedy." Many of the awards were received by previous winners.

Nothing exciting happened this year at the Emmys. Everything seemed to run as scheduled, with the same lame hosts, lame jokes and lame winners. Hopefully next year some newcomers will be able to break through and win some of the awards. It was an interesting fact that the Tony Awards won all of the awards for best variety show (of which the Emmys were also nominated). Perhaps, the Emmys should take some advice from the Tonys and break the mold of the common awards show.

And the winners are...

Best Comedy: "Ally McBeal" ('98, '99)
Best Drama: "The Practice" ('98, '99)

Best Actor (Comedy): Jon Lithgow, "3rd Rock from the Sun" ('97, '98, '99)
Best Actress (Comedy): Helen Hunt, "Mad About You" ('96, '97, '98, '99)

Best Actor (Drama): Dennis Franz, "NYPD Blue" ('97, '98, '99)
Best Actress (Drama): Edie Falco, "Sopranos" ('99)

Best Supporting Actor (Comedy): David Hyde Pierce, "Frasier" ('97, '98, '99)
Best Supporting Actress (Comedy): Kristen Johnston, "3rd Rock from the Sun" ('98, '99)

Best Supporting Actor (Drama): Michael Badalucco, "The Practice" ('99)
Best Supporting Actress (Drama): Holland Taylor, "The Practice" ('99)

Exciting semester planned for Hoodwink and Hooey

by Eric Hart

If you were at the Activities Fair this year, you might have noticed a small booth for the Hoodwink and Hooey film club. Out in front was a tall enthusiastic student asking passers-by "Are you interested in filmmaking!" Some students would answer, "Sure, but I don't have any idea how."

"Well that's ok," Craig Laskowski '02 said. "No experience is necessary. You just have to love film."

It is this kind of overflowing enthusiasm and love of film which defines Hoodwink and Hooey, the University's largest (and only) film club. Members of the club write, direct, shoot, act and edit their own films and videos using state-of-the-art technology and equipment.

Now in its sixth semester, the club is going strong and ready to tackle another year. However, it wasn't always like this.

"When I first arrived, I found very few opportunities to explore filmmaking," Jeremy Walker '00 said. He was so distraught that he recruited fellow classmate Theodore Avgerinos '00 to aid him in founding a film club.

"We had no idea what we wanted to do, and even less of an idea how to do it," Avgerinos said. With the help of several interested faculty members and after many sleepless nights, they managed to hold an interest meeting, buy some equipment, and get things rolling.

"I think it was their unstoppable enthusiasm and diehard attitudes that kept the whole thing from falling apart," former treasurer Michael Potts '00 said.

Two years later, their dreams and hard work paid off with Hoodwink and Hooey's second annual film festival. Well received by students and faculty, it represented the hard work of many people.

"The festival last spring was our best ever, in terms of quality, talent and diversity," Walker said. However, these tenacious filmmakers are not known for resting on their laurels; plans to make the third annual spring film festival the best yet are already underway.

In addition to the spring festival, a more casual screening is planned for the fall where several short films will be shown and discussed.

"This will give us a chance to view films which are shorter, less-mainstream or more controversial, which we might not have a chance to show at our regular festival," Jon Woodworth '01, vice-president of social affairs, said. Older films from the early days of Hoodwink and Hooey will also be shown.

While watching their own films on the big screen is satisfying, most of the current members agree that what they really love is seeing what other people can do. "We are trying to find as many new members as possible," Craig Laskowski '02 said. "The more, the merrier," he added.

At an open house last Sunday, Hoodwink and Hooey showed a few of their favorite films to get interest flowing. "A lot of people come to our interest meetings thinking that they'll never be able to make a film, that it's too hard," Chaz Crosby '01 said.

"It's not until they see other student's films on the big screen that they realize, 'Hey, I can do that too,'" Crosby continued. Any student interested in any aspect of filmmaking, such as writing, filming, editing or acting, is welcome to contact any of the current members or attend a meeting. The club also has a web site which can be found at http://www.orgs.bucknell.edu/hoho.

This year also marks a major turning point in the leadership of Hoodwink and Hooey. A new generation of officers is taking over the roles which have been carried out by the founding members since day one.

"Though it was started to satisfy our own desire for filmmaking, our whole idea for the club has been for it to continue on after we graduate," Avgerinos said.

"It would be a shame for all this hard work and potential to fall apart just because we weren't here," Walker added. However, they have every confidence in the new president, C.J. Swenson '02, as well as the other new officers, some of whom have been with the club for several years.

Creative workshops held at Craft Center

by Stacey Gawronski

The 7th Street Craft Center is a place where both the curious amateur and the experienced artist can go to create, design and learn. Gavin O'Grady is in charge of the Craft Center, located directly behind the 7th Street Cafe. The center is free to registered students, faculty, staff and families. There are a number of ways to get involved.

Several different workshops are offered each semester. They each run one night a week, usually from 7-10 p.m. Monday through Thursday, and can be anywhere from two to seven weeks long. Intro to Ceramics, Ceramic/Tile Making, Knitting, Italics, Stain Glass and Basket Making are all workshops offered this semester.

In addition to these classes, visiting artist, Dave Fobes from San Diego, will hold a weekend-intensive workshop, which will include a Friday night lecture open to all of campus. This will entail a slide presentation and discussion of his art involving contemporary woodwork.

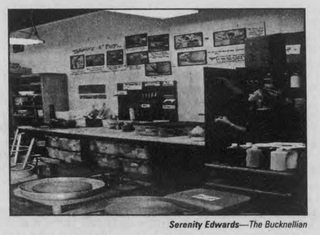
It is ideal that Fobes will be here this semester because the Craft Center's main addition this year is low-level woodworking. Participants will be able to cut wood into shapes and make signs or paddles.

"Ceramics and candlemaking are the biggest areas of student interest," O'Grady said. Students can also paint signs and banners for events or make beaded jewelry. Tie-dye also draws attention. Although many of the fraternities and sororities use the Craft Center for various projects, O'Grady hopes for the Craft Center to "create links to other activities and clubs on campus" in order to get more groups of people involved.

This semester the Craft Center is running an after-school program with the D.L. Heiter Community Center for junior high and high school students on Wednesday afternoons. O'Grady is also trying to work on a project that would involve the Art Gallery.

From O'Grady's experience with the fine arts, he would like to "raise the image of craft on campus to a more intellectual and artistic level."

Craft Center hours are 10 a.m to 11 p.m. Monday-Friday and 12-8 p.m. on Saturday. More specific information on the workshops offered and general use will be available in the Craft Center flier due out late September. Early registration is recommended as the workshops tend to fill up quickly and space is limited.



Serenity Edwards—*The Bucknellian*

The Craft Center offers workshops throughout the semester.

Scott Solomon-*The Bucknellian*

Jazz Poet's Society performed at the University last week for a receptive crowd of students. BAC sponsors various events every weekend.

Pianist Lois Svard kicks off season at Weis Center

by Robin Manning

Lois Svard will kick off the 1999 Weis Center performance season with her astounding talents on the piano. This concert is the first of four in which Svard will play a variety of pieces from Franz Liszt to more recent works. The music is a variety of composition for prepared piano mixed with jazz and rock, micro-tonal music, minimalism and more.

The program will feature Franz Liszt's "Sonata in B Minor," and works by Erik Satie, Igor Stravinski and Alexander Sciabin. Svard plays with enormous sureness and poetry. She has excellent taste, great intellectual and artistic curiosity, and rock-solid technique, said the magazine *Fanfare*.

In addition to Svard's performance, a special highlight is included. Prelude! is an intimate time before the show when audience members may ask questions in an informal setting.

Svard will discuss the inspiration behind the music included in the four concert series which make up "150 Years of the Avant-Garde." Prelude! will be held at 7 p.m. tonight in the backstage area of the Weis Center. Svard will perform "150 years of the Avant-Garde" at the University again in October, February and March. The evening is designed to excite, sooth and amaze individuals tired from a busy week, who want an entertaining evening, who are interested in piano or are wondering what exactly the Weis Center has to offer. Svard will perform at 8 p.m. tomorrow in the Weis Center.

Courtesy of the Weis Center

Svard will perform the first of four recitals in "150 Years of the Avant-Garde" tomorrow at 7 p.m. in the Weis Center

Next Week:

Men's Soccer v. Holy Cross
Football v. Towson

Athlete of the Week

***Don McDowell '00** passed for 211 yards and two touchdowns in Bucknell's 21-16 upset of Patriot League rival Colgate.*

Field hockey sweeps road games

By Jennifer Cruickshank

Playing games on the road is not an easy feat for collegiate athletes, but the Bucknell field hockey team has enjoyed its time away from home.

Winless at home this fall, the Bison crushed Davis and Elkins University in West Virginia by a score of 5-0 a week ago and then swept strong Columbia and Monmouth squads, 4-3, on the road this weekend.

The Bison began their winning streak at Columbia on Saturday as senior co-captain Jenny Zimmerman notched four goals to seal the one goal Bison victory.

Zimmerman, named the Patriot League Defensive Player of the Year last season, demonstrated her offensive prowess with five goals and an assist over the weekend. Zimmerman is Bucknell's leading scorer in the first five games of the season, tallying 16 points and 7 goals

"Jenny is basically a coach's dream," said teammate Maura Higgs '01. "She's an extremely talented player— she can play defense and offense and is a great team leader."

The first two Zimmerman goals came in the first half off of penalty corner feeds from sophomore forward Melissa Maher.

Maher fed the ball to Higgs on the first goal, who stopped the ball for Zimmerman to take a direct shot. The second goal occurred in the same fashion— a feed from Maher to Dena Ebert '02, followed by a Zimmerman direct shot.

Columbia fought back, scoring 3 goals in the second half, but Zimmerman was not through scoring. After an unassisted goal, Zimmerman found the back of the net for the fourth time in the game with a game-winning penalty stroke.

The second Bison victory of the weekend seemed like deja vu, as Zimmerman converted a penalty stroke to lift Bucknell to a 4-3 win over Monmouth.

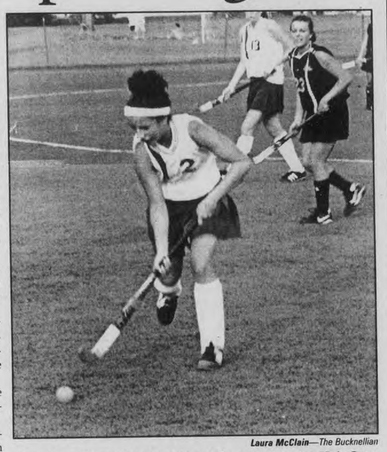
Although Monmouth got on the scoreboard first, Higgs set up forward Larissa Carso '02 to tie the game at one-apiece.

Senior co-captain Katey Twombly scored two goals, assisted by Lauren Campbell '02 and Zimmerman respectively, to close the half with a 3-1 Bison advantage.

The second half mirrored the Columbia game as Monmouth battled back to tie the game at three.

But Zimmerman sealed the victory with her penalty stroke with only 6 minutes remaining in the game.

"The team played really well this weekend," said co-captain Malina Anderson '00. "Those were two really big wins and they will really help our confidence against Holy Cross this weekend."



Laura McClain—The Bucknellian

Dena Ebert '02 and the Bison will look for revenge against Holy Cross on Saturday and pick up their first win at home this season.

The Bison commence Patriot League action on Saturday as they host Holy Cross, the team that knocked them out of the Patriot League Tournament last season. The Bison are hoping to pick up their first home win of the season by getting their revenge on the Crusaders.

Water polo looks for consistency

By Allison Kuhn

Despite an "unfortunate loss" to Navy by a score of 10-9, the Bucknell men's water polo team managed to make comebacks in both of its league games at Slippery Rock University last weekend.

"The loss was unfortunate but will give us more motivation for next time," said captain Kevin Permisohn '01.

In their game against Navy, the Bison weren't able to rebound from an uncharacteristically slow start. "We started off poorly, giving up a 5-2 lead," said head coach Mike Wooster. "Then Permisohn hit what would have been a two pointer, but the referee said that it didn't go in."

Although poor officiating seemed to contribute to the downfall of the Bison, those goals were called back, leaving the Bison behind 7-2 at the half. However, the Bison forged on and pulled themselves to a 9-9 tie, led by the five goals of Tate Greditzer '01.

"The loss was unfortunate but it will give us more motivation for next time,"
—Captain Kevin Permisohn '01

But Navy sealed a narrow 10-9 win by adding another score. "I can blame the officials, but we didn't do our job early in the game," Wooster said. "Defensively it is not out style to give up such a lead."

Bucknell then bounced back to defeat Salem-Teikyo 10-4, overcoming an early deficit. Once they came back, the Bison stayed ahead.

Greditzer and Ryan McCarty '02 each scored a pair of two-pointers for the Bison, leading them to victory. Wooster also attributed the success to goalie Dave Kennedy '02, who has a .500 save percentage.

"Dave Kennedy was great in goal," Wooster said. "He is keeping us in a lot of games."

Looking towards the Bucknell Invitational this weekend, Wooster and his Bison squad expect to win four games. "We would like to end up top three in the Southern Division at the end of the regular season and top two at the Southern Championships," Wooster said.

Bison capture Triangular

Rebound from disappointing loss to St. Francis

Tim Choate—The Bucknellian

Bucknelll recorded two victories on Saturday.

By Justin White

An enthusiastic home crowd watched the Bucknell volleyball team record two victories in last weekend's Bucknell Triangular over Youngstown State and Iona.

The Bison began the day with an early matchup against a talented 3-1 Youngstown State team, which boasted several capable "tall, strong players."

Youngstown represents the best team the Bison have played thus far. It took a well-executed gameplan for the Bison to dismantle their opponents in three games by the scores of 15-11, 15-9, 15-8.

Bucknell was able to overcome Youngstown despite eight service errors that occurred at critical moments throughout the match.

Solid contributions came from Michelle Lesh '00, Brooke Bader '01 and Jennifer Wrigley '03, who registered 10 kills and 8 digs, 11 kills, and 10 kills and 15 digs respectively.

Another major contributor was sophomore Shannon Walker, who assisted in 10 of the team's 20 blocks, providing a solid defensive presence.

Bucknell started slowly against Iona in the afternoon match. But the Bison found their rhythm and defeated Iona handily in straight games, 15-10, 15-5 and 15-9.

Lesh, Bader and Wrigley equaled their output from the previous game with a combined 31 kills. Setter Molly Brown '01 provided 33 assists and eight digs.

The Bucknell Triangular followed closely upon the heels of the Bison's first loss of the season against St. Francis on Tuesday evening. The loss ended Bucknell's early-season winning streak, as the team fell in the fifth game by a 15-8 margin. The disappointing loss helped the team focus as it entered the Bucknell Triangular this past Saturday.

"From every defeat, there is a lesson to be learned," Opalski said. "From this game we found that there are no guarantees when it comes to victories."

However, Opalski was very positive about the improvement shown by her team over the first few weeks of the season. "After the first tourney, you can't really see where the team stands until you face some good competition," Opalski said.

The Bison suffered a setback Tuesday night, losing three sets to one to a powerful Villanova squad.

Bader recorded 15 kills in the match, but her effort wasn't enough as the Wildcats rolled to a 15-7, 15-4, 13-15, 15-10 victory.

The Bison defeated Villanova in the spring season last year, with the Wildcats missing some of their better players due to injury.

The Bison have a ten day layoff before the Bucknell Invitational, where they will have meaningful matchups against Patriot League rivals.

Tim Choate—The Bucknellian

At the Bucknell Triangular, the Bison defeated Youngstown State and Iona.

BEYOND THE BUBBLE

199 NFL Season Kicks Off: Week One of the 1999 NFL season was about as crazy as one could have expected, and then some. Probably the biggest news around the league came from New Jersey, where Jets' quarterback Vinny Testaverde ruptured his Achilles tendon just ten minutes into the game against the New England Patriots. He will miss the remainder of the season, leaving the Jets with a gigantic hole to fill for the next sixteen weeks. Oh, by the way, the Pats won the game, 30-28.

Several teams blow big leads on Sunday. The Washington Redskins took a 21-point lead into the fourth quarter, but ended up losing to the Dallas Cowboys in overtime 41-35. The Philadelphia Eagles held a 21-point lead over the Arizona Cardinals before folding like cheap napkins. Arizona quarterback Jake Plummer guided his team to thirteen fourth-quarter points and a 25-24 victory. The Oakland Raiders were up by three points with less than two minutes remaining, but then watched as Brett Favre and the Green Bay Packers marched 82 yards for a touchdown and a 28-24 win in the final minute and a half of play.

The Denver Broncos looked like anything but Super Bowl champions on Monday night. The offense had all sorts of problems without John Elway against the Miami Dolphins' stifling defense. Miami quarterback Dan Marino, who is still looking for his first Super Bowl ring, threw for 215 yards and two touchdowns to lead the Dolphins to a 38-21 win. The New York Giants managed just 107 yards in total offense and four first downs in the entire game, but still escaped with a 17-13 win over the Tampa Bays Buccaneers thanks to five Tampa Bay turnovers. Lastly, the San Diego Chargers did not play a game this weekend, yet they still find themselves alone in first place atop the AFC West. Every other team in their division played and lost in week one.

Agassi and Williams Claim Open Titles: Andre Agassi won the final two sets over Todd Martin to claim his second career U.S. Open title on Sunday. The win also earned him his second Grand Slam of the year and fifth of his career. Agassi took the first set 6-4 with relative ease, but Martin came back with a vengeance to win tiebreakers in the next two sets, 6-7 (5-7), 6-7 (2-7). Despite serving up 23 aces in the match, Martin could not hold his serve in the final two sets as Agassi claimed them both 6-3, 6-2.

"It was disappointing that somebody had to lose," Agassi said. "He (Martin) played so well, I felt I was hanging by a thread for much of the match. He was executing in ways that were giving me all sorts of problems." Agassi added, "How can you ask for anything more than two Americans in the final of the U.S. Open playing a great five-set match? Win or lose, this is the greatest time of my life. I'll never forget New York right here."

In the women's bracket, 17-year-old Serena Williams defeated Martina Hingis 6-3, 7-6 (7-4) to capture her first Open title. Using an incredible display of athleticism and a blistering serve, Williams kept Hingis on the defensive throughout the entire match. Commening on her victory, Williams said, "I didn't know what to do — laugh or cry or just scream — so I think I did it all."

Hingis defeated Serena's sister, Venus, in the semifinal to prevent the first sibling final in Grand Slam history. The two sisters paired up, however, to take the womens' doubles title on Sunday.

Red Sox Want More Than a Wild Card The Boston Red Sox, who have spent the better part of the summer battling the Oakland A's for a wild card spot in the playoffs, came into New York last Friday for a three-game series with the first-place Yankees. The Yanks have resided atop the American League East every day since late May and haven't had any real threats since mid-July. But Boston took all three games from the Bronx Bombers this weekend and now sit just three and a half games behind them in the standings.

On Friday the Red Sox sent their ace, Pedro Martinez, to the mound and he made the Yankees look plain silly. Martinez pitched a complete game one-hitter while striking out 17 batters. The only hit New York managed was a second-inning home run by Chili Davis. It was the most strikeouts anyone has ever recorded against the Yankees in one game. Mike Stanley's two-run home run in the sixth inning was all the offense the Sox would need, as they won 3-1.

After Martinez's pitching clinic on Friday, both teams staged an offensive display on Saturday. The two ballclubs combined for 21 runs and 22 hits, including seven home runs, in a game that saw the Yankees playing catch-up throughout the afternoon. After jumping out to an early 5-0 lead, the Red Sox surrendered four runs in the bottom of the fourth inning. Boston extended its lead to 9-4 by the sixth, but New York responded with four more runs in the seventh. Butch Huskey launched a two-run home run in the top of the eighth to put the Red Sox on top 11-8. But Tino Martinez answered with his own two-run shot in the bottom of the inning to end the scoring barrage at 11-10.

On Sunday, Boston's Brett Saberhagen and New York's Roger Clemens staged a classic pitching duel for seven innings before the Red Sox tagged Clemens for three runs in the eighth and claimed a 4-1 victory and a series sweep. It is the first time Boston has swept a series in New York since 1986, when they won the AL Pennant. The Yankees now have to worry about their chances of making the playoffs at all, let alone winning the division. As of Sunday, the Yankees' lead over the Oakland A's was just six and a half games.

Compiled by Matt Fraser

Quote of the Week:

"American women are just now starting to make a real step forward. Because they are younger, they're going to get better."
—Andre Agassi, 1999 US Open Champion

Christy Mathewson's legacy still lives on

By Peter Van Emburgh

Of the 26 pitchers that were selected to be on the ballot for the Major League Baseball All-Century Team, Christy Mathewson, Bucknell's most celebrated athlete, is currently ranked 14th. Christy has been recognized as the greatest pitcher of the first quarter of this century and is also credited with bringing respectability to the sport in an era when it was dominated by rough, ill-mannered and hard-drinking country ballplayers.

"He pioneered what we refer to today as the scholar-athlete model, the balance between academics and sports that makes for a well-rounded academic experience," said Gary Sojka, former Bucknell president, at the rededication of the football stadium in 1989.

Now, as Mathewson is once again recognized for his accomplishments in professional baseball, it only seems proper to recognize his successes at the University.

Raised in Factoryville, Pa., Christy Mathewson enrolled at Bucknell in 1898. "On a sunny September morn, in 1898, the massive portals of old Main (Roberts Hall) were swung inward by an energetic freshman class," begins the first class history of the University's class of 1902, written by Mathewson. His class was the biggest the university had ever seen: 75 students.

Mathewson was among the class leaders in his three years at the University. As a class officer, a musician, writer and a scholar, he established himself as a standout in the Class of 1902. He sang in the Glee Club and played in the University band. He was a member of two literary societies and Phi Gamma Delta. He was president of his junior class and was also a member of Theta Delta Tau honorary leadership society. Did I mention he was a sportsman?

Mathewson was among the best athletes ever to play for the University. He was in the starting lineup for three sports teams: center for the basketball team, pitcher for the baseball team and fullback for the football squad.

Here as a New York Giant, Mathewson was one of the first five members inducted into the Baseball Hall of Fame in 1936.

As a freshman, Mathewson scored two touchdowns, a field goal and a point-after-touchdown. The 190-pound Mathewson became a football hero as a sophomore, when his five-point field goal defeated a stunned Lehigh squad in an otherwise scoreless game. His greatest feat as a drop-kicker was a 48-yard boot against Army, from what has been described as a near-impossible angle. Football coaching great Walter Camp recognized Mathewson as "the greatest drop-kicker in intercollegiate competition," and placed Mathewson on the All-American lineup as the 12th position, that of a kicker.

In 1901, Christy Mathewson became the University's most prominent dropout and departed to play for the Cincinatti Reds for $100. However, the New York Giants and the Reds traded Mathewson for a hurler named Amos Rusie, a swap that rates high on the list of "Worst Trades in Baseball History."

Mathewson's opening season was anything but disappointing, with 20 wins and 17 losses. Mathewson continued to turn heads and was becoming a sports icon rapidly. He became known for his abilities, his reputation as a gentleman and his photographic memory. His ability to remember batters and their weaknesses was a skill that many people of the era attribute to his success.

In a career as a pitcher that spanned 17 years, Mathewson recorded 373 victories (baseball's third all-time highest) and a 2.13 earned-run average (baseball's fifth all-time lowest). Mathewson was the starting pitcher in 551 games and completed 435, a .789 average. And his 2,502 strikeouts rank in the top 20 in major-league history. Mathewson's best record, his performance in the 1905 World Series against the Philadelphia Athletics, in which he tossed three shutouts, stands unmatched.

But when sportswriters remember Mathewson, it is normally not in numbers. Mathewson's reputation as a gentleman rivaled his fame as a pitcher. When he left the big leagues, Christy's life was anything but uneventful. He served in World War I as a captain in the Army Gas and Flame Division, as manager of the Cincinatti Reds, as coach for the New York Giants and later as president of the Boston Braves.

Apparently, while serving in the war, Mathewson was exposed to poisonous gas that ultimately led to his early death in 1925. Sportswriter Grantland Rice eulogized by saying, "He was the only man I have ever known who in spirit and inspiration was greater than his game."

Official proof of Matty's greatness came in 1936 when he was named to the first class of Baseball's Hall of Fame. The five men chosen were, in order, Ty Cobb, Babe Ruth, Honus Wagner, Walter Johnson, and Christy Mathewson.

In 1928, given the high esteem in which Matty was held in Lewisburg, professional baseball organizations erected the Christy Mathewson-Memorial Gateway at the University's main entrance off Route 15. This was followed on Sept. 30, 1989, with the rededication of the Christy Mathewson-Memorial Stadium, just down the street from Matty's resting place in the Lewisburg Cemetary. Mathewson lies next to his wife Jane, a Lewisburg native. By rededicating the stadium, the University intended to underline the school's commitment to a balance between academics and sports. Despite the irony of naming the stadium after a university dropout, Mathewson established himself as a role model during his three years at the University.

"As an 'A' student and a superior athlete, Matty's influence as a positive role model for young people and for us all is something not to be forgotten," said Sojka in 1989.

Admired by many for his abilities on the pitcher's mound and achievements at Bucknell, Mathewson is best known for his clean reputation.

A multi-sport athlete, Mathewson was an All-American kicker during his time at Bucknell.

How Can You Get Back Into the Action?

"Staying off it for a while" isn't always the best rehabilitation program following an injury or surgery. The professionals from the Evangelical Sports Medicine Center have teamed up with Bucknell University to provide *on-campus* Physical Therapy Services to the Bucknell Community. So, if you would like more information, or an appointment, call **577-1060**.

Services will be provided in the Field House Monday through Friday from **10 a.m. to 6 p.m.**
(Physician prescription is required. Please check with your insurance policy for restrictions and limitations)

EVANGELICAL SPORTS MEDICINE CENTER

BE LESS PRODUCTIVE AT THE OFFICE.

The office has always been a place to get ahead. Unfortunately, it's also a place where a lot of natural resources start to fall behind. Take a look around the next time you're at work. See how many lights are left on when people leave. See how much paper is being wasted. How much electricity is being used to run computers that are left on. Look at how much water is being wasted in the restrooms. And how much solid waste is being thrown out in the trash cans. We bet it's a lot.

Now, here are some simple ways you can produce less waste at work. When you're at the copier, only make the copies you need. Use both sides of the paper when writing a memo. Turn off your light when you leave. Use a lower watt bulb in your lamps. Drink your coffee or tea out of mugs instead of throwaway cups.

Set up a recycling bin for aluminum cans and one for bottles. And when you're in the bathroom brushing your teeth or washing your face, don't let the faucet run. Remember, if we use fewer resources today, we'll save more for tomorrow.

Which would truly be a job well done.

FOR MORE INFORMATION AND TIPS, CALL 1-800-MY-SHARE.

Use both sides of the paper when writing a memo.

Frisbee's winning spirit remains

By Adam Feldman

The best years of your life are spent in college. Last year's Mudshark players decided to spend those days playing the game they all loved, ultimate frisbee. The 'Sharks, who were ranked as high as 12th in the country last season, graduated nine of their thirteen A-Team players. And so, the dynasty is over.

However, as the tradition of spirit and enthusiasm was passed down to the '99 seniors, they have now presented it to the next generation of Bucknell ultimate. It now lies in the hands of two young co-captains, Matt Fisher '00 and Adam Feldman '01.

Luckily for the captains, some members of last year's Bomb Squad B-Team decided to stick with the team. It was obvious from the first day of practice this season that last year's seniors had made a huge impact. Though the talent level may not have been as high on the first day of practice, the team's spirit hadn't skipped a beat. The practice was spent reminiscing on years gone by and dreaming of days to come. The high-spirited 'Sharks were ready to create their own dynasty.

The 'Sharks were extremely successful at recruiting new athletes this fall, as nearly 50 new players attended the first week of practices. The task of teaching was tough for the returning players, but as the week came to a close, the talent began to blossom. The youthful 'Sharks were ready for their first intercollegiate match.

The team traveled to Lehigh University with a squad of six returning players and seven new players for a tournament specifically designed to teach the new athletes about the game. The 'Sharks went 3-0 against other freshmen-dominated teams and used the experience to propel them into their first intense tournament.

The 'Sharks' new dynasty was to get its real start just outside of Philadelphia at a local park called the Oaks. However, most of the teams at the tournament had individual players with more experience then the combined Mudshark squad. But the young players weren't discouraged and actually enjoyed the challenge.

The 'Sharks eventually lost all four of their games, but not before giving three talented teams a definite scare. In each of these games, the 'Sharks proved that quit was not in their vocabulary. They made scoring runs of three or more consecutive points in each game. They even forced a tiebreaker in one of the games.

The 'Sharks are not even slightly discouraged about their losses, and they plan on utilizing this experience when they travel to Lehigh this weekend for an all-college tournament. They will play other young teams like Susquehanna, Haverford, and Lehigh. This will be the first true test of the new dynasty of Bucknell Ultimate.

Golf tees off in first tourney

Alison Draper—The Bucknellian

Bucknell went 1-1 in the first tournament of the year.

By Mike Brophy

Entering its second year as a varsity team, the Bucknell women's golf squad ventured to St. Francis (PA) for a tournament this past weekend. Competing against St. Francis and Mt. St. Mary's, the Bison went 1-1 to begin their season.

In the dual competition matches, Bucknell fell to St. Francis 350-356. Mt. St. Mary's was no match for the Bison, as the Orange and Blue easily claimed victory by a score of 356-449.

St. Francis' Michele Raymond was the lowest scoring individual for the tournament, shooting 83 for the day.

Bucknell freshman Catherine Crews made her college debut with a team-low round of 86, finishing just three strokes behind the leader. Hilary Mainka '02, shot an impressive 88 to finish in a tie for fourth.

Bucknell head coach Brad Tufts hopes his team can build upon its performance by learning from mistakes.

"I was both pleased and disappointed (with this weekend)," said Tufts. "I was pleased with our tremendous improvement from last year and disappointed with some of our high scoring holes."

Bucknell will be back in action this weekend as it travels to Dartmouth for the Dartmouth Invitational.

Play the **COOL** FROM Nestea® Hot Facts Sweepstakes!

HOT FACT #2

What percentage of students work up a sweat through exercising each week?

A. 50% B. 53% C. 56% D. 59%

Now that you've spotted this week's Hot Fact, log onto **www.coolcore.com** to answer the question. Once you've completed all four Hot Facts you will be automatically entered for a chance to win in the Hot Facts Sweepstakes. If you missed a Hot Fact, don't worry. Just log on this week and you can answer the missed question.

Be sure to look for the third Hot Fact in next week's campus newspaper!

Open to U.S. residents, who, as of 9/6/99, are enrolled in a U.S. college. No purchase necessary to play. Void in Florida and where prohibited. To enter via internet: Access the "COOL FROM Nestea Hot Facts" Web site at www.coolcore.com starting 12:01 AM (ET) on 9/6/99 through 11:59 PM (ET) on 10/3/99 to see that weeks Hot Fact(s) on screen. Every time you log on, you will be instructed to complete the on-screen entry form, including your name, the name of the college you are attending and the letter A, B, C or D, representing the word(s) which complete(s) the Hot Fact(s) for that week. Answer(s) need not be correct to be eligible but you must submit your answer to each of the four Hot Facts (one Hot Fact published each week as described in Rule #1 of the Official Rules) to be entered into the sweepstakes. Starting 12:01am (ET) on 9/27/99 through 11:59pm (ET) on 10/31/99, all four Hot Fact(s) will appear on screen in case an Internet participant misses one or more of the Hot Fact(s) that were featured. While you can, if you wish, log on each day, only one sweepstakes entry per e-mail address that includes all four answers will be entered into the sweepstakes drawing. To enter via mail: On plain 3" x 5" paper, hand-print your complete name, address, zip code, (optional) daytime and evening telephone numbers and the words "COOL FROM Nestea Hot Facts". Mail your entry in a hand-addressed 4-1/8" x 9-1/2" (#10) envelope, with first-class postage affixed, to: COOL FROM Nestea Hot Facts Sweepstakes, P.O. Box 4941, Blair, NE 68009-4941. Limit one entry per envelope. Entries must be received by 11/15/99. IMPORTANT: On the lower left-hand corner of your mailing envelope, you must indicate the name of the college you are attending. For Official Rules, by which entrants are bound, including a list of participating colleges, send a SASE to: Hot Facts Rules Request, P.O. Box 4948, Blair, NE 68009-4948.

Soccer season looking bright

Men's team wins Wofford Classic, defeats Robert Morris

By Katie Yingling

While many Bucknell students were enjoying Bid Day activities this past weekend, the men's soccer team was working hard to overcome the memory of last year's disappointing season.

After an opening loss against Monmouth on September 4th, many of the players and fans feared that the season was starting to resemble previous seasons. However, under the new direction of head coach Brendan Nash, who previously served as assistant coach under Craig Reynolds, things have begun to look a little brighter. Last Wednesday, the Bison opened at home against Robert Morris with a 1-0 shutout victory.

The Bison added to their confidence level this past weekend by capturing the first place title at the Wofford Soccer Classic in South Carolina. On Saturday, the Bison faced Wofford College, the tournament host, and finished with a 2-0 win. Sam Graziano '01 and Erick Davis '01 each claimed a goal. The game was also the second straight shutout for senior goalkeeper Nate Fitzgerald.

On Sunday, Bucknell matched up against Georgia Southern in the championship game. The Bison clinched the championship with a 2-1 win over the Eagles, despite being outshot 11-8. Graziano and fellow junior Sam Chamovitz both found the back of the net. Graziano scored in the first half, and Chamovitz's second-half goal broke a 1-1 tie and sealed the victory. Fitzgerald was named MVP of the tournament, both for his shutout on Saturday and his six recorded saves against Georgia Southern on Sunday.

"This weekend was really big for us," Davis said. "Not only was it a much-needed confidence builder, but the past three games have shown a lot of character about where we are and where we want to be at the end of the season."

With a team of mostly veteran players, all the work from past years is starting to come together. "We are a team and we're playing as a team," Graziano said. "No individual contribution is greater than any other; we're all striving towards the same goal together."

The Bison faced St. Francis this past Tuesday, looking for revenge for last year's heartbreaking loss.

"Victory (over St. Francis) is a must in order to get us where we want to be for the start of our Patriot League season," Davis said.

The team's Patriot League season will open on Saturday against Holy Cross, and the Bison are very optimistic. "We're feeling confident and things are rolling our way," Geza Lendvai-Lintner '01 said. "All we need is support from our fans and things should tilt our way."

Bucknell Invitational a success for men and women's teams

By Rose Sedo

Last weekend's Bucknell Invitational was the Bison's first meet of the cross-country season. And for much of the way, that's exactly the opposite of what it looked like. Timing was close to perfect, enthusiasm ran high and the Bison weren't disappointed.

The meet was decided by the factor that determines the outcome of most cross-country meets—one team capitalized on its core depth and strength, while the others either didn't or couldn't.

This Bison strength and depth played a huge part in the final results. The Bison women secured first place overall, beating out both Manhattan and Syracuse by over 15 point margins. Likewise, the men also seized first place overall, defeating Manhattan, Rutgers and Syracuse by a 35 point margin.

On the women's side, Bison runners finished in second through sixth place. Freshman Andrea Beisser led the Bison with a time of 18:23.11, only 15 seconds behind first place finisher Sarah Schmidt of Syracuse. Team captains Carly Graytock '00 and Jen Hart '00 grabbed third and fourth place, crossing the finish line in 18:23.32 and 18:23.51 respectively.

The men's team sped away from the competition, taking the first nine places. Ron Hess '00 snatched the gold with a time of 25:46.11, followed closely by his teammates Brad Wertz '01 (25:46.32) and Dana Carr '01 (25:46.52).

Judging from these results, the season opener was a huge success. Yet according to head Coach Art Gulden, there is still some room for improvement.

"We ran the way we wanted to run, and we raced the way we wanted to race. But we need to develop a strong second pack to follow behind the first pack, instead of running scattered all across America," Coach Gulden said.

Women's team captain Jen Hart '00 agrees with her coaches thinking. "The biggest advantage for us is our pack. Once we get it together, we'll see even more improvement," said Hart.

This Saturday the team will be at Penn State at the Spiked Shoe Invitational, running against five to seven nationally ranked teams.

"Having such big competition early is a great opportunity," Hess said. "This will prove to be the first big test of the season."

Carmen's Football Picks

After my impressive 7-1 record last week (if you want to call that darn Notre Dame game a loss), many people have warned me not to get overconfident with my picks. But with this week's slate of intriguing college and NFL matchups, no win is certain.

NFL

Indianapolis at New England

The Colts suprised lots of people with their dominating win over the Bills. But I doubt Peyton Manning will catch the Patriot's stingy defense off-guard...

Pick: Patriots 31-24

Washington at New York Giants

The Giant "D" gives new meaning to the saying "good defense is the best offense." They may outscore the offense in this one again...

Pick: Giants 20-10

Green Bay at Detroit

These NFC Central teams are both coming off big week one wins. But Brett Favre will keep his consecutive starting streak and his team's winning streak going...

Pick: Packers 28-17

College

Penn State at Miami

Which Nittany Lion squad will show up at the Orange Bowl? Joe Paterno will make sure his squad shakes off its Pitt scare and brings its best game against the Hurricanes...

Pick: Nittany Lions 27-20

Tennessee at Florida

A game with all kinds of national title implications. Both teams haven't been tested yet this year. Expect fireworks early and often, with Tee Martin having a part in most of them...

Pick: Vols 37-27

Towson at Bucknell

The Bison plan to avoid a letdown after last weekend's huge victory. But will a talented Towson squad have other plans in mind? Expect a close one, with Bucknell's experience being the difference...

Pick: Bison 29-24

"My friends agonized over choosing a company to go with. My strategy was simpler, why join one great company when you can join many?

Sports

A low-down shame

Commentary

Carmen Mauriello
Sports Editor

About 10:40 p.m. last Sunday, I decided to take a study break and go watch some football. I grabbed an orange and a box of crackers and proceeded to the Swartz lounge. I was excited to learn that the football matchup on ESPN pitted the Pittsburgh Steelers against the Cleveland Browns, one of the most heated and competitive rivalries in the history of the NFL.

This game had special significance since it was the first game of the new Browns expansion team. Cleveland had been without an NFL team for three years after the Browns' previous owner, Art Modell, moved the francise to Baltimore.

What I expected Sunday night was a hardfought and emotional classic football rivalry. What I and other fans witnessed Sunday night was a disgrace and an embarrassment to the league. When the scoreboard read Steelers 36, Browns 0 at the start of the fourth period, I thought my eyes were deceiving me. The final statistics revealed one of the most lopsided and uncompetitive victories in NFL history. The Browns were held to an unheard of 40 total yards, two first downs, and zero points, while the Steelers ammassed over 450 yards of offense and 43 points. That outcome doesn't happen in a game played between two professional teams competing on a level playing field.

The reason for the blowout is that the two teams weren't on a level playing field; the Browns will be fighting an uphill battle for the next several seasons due to their void of talented athletes and experienced veterans. The blame for this expansion fiasco falls squarely on the NFL owners. Threatened by the immediate success of the recent expansion teams in Jacksonville and Carolina, the owners decided to limit the rights and privledges granted to the Cleveland francise.

The Jacksonville Jaguars and Carolina Panthers were NFL expansion teams in the 1995 season. The league granted them special priveldges to bolster their roster, since many expansion teams in the previous decades had been NFL doormats in their first several seasons. Carolina and Jacksonville were granted an unlimited salary cap, which the team's utilized to corner the free agent market and compile competitive teams.

Carolina used the extended salary cap to acquire proven veterans through free agency. The Panthers posted an impressive 7-9 inaugeral season record followed by an unprecedented division championship and NFC Championship game appearance in their second season. Carolina has slipped back into mediocrity over the past two seasons, as its veteran squad aged and became injury-prone.

Jacksonville built for the future by drafting talented athletes and acquiring emerging NFL stars. With an inexperienced squad, Jacksonville's inaugural season was much more shaky and typical of the average expansion team. But the Jaguars improved in their second season to 9-7, advancing into the second round of the AFC playoffs with a stunning upset of the Denver Broncos. The Jaguars have continued to improve and are one of the favorites to win this year's Super Bowl.

These upstart expansion teams flourished at the expense of many traditional league powerhouses, to the displeasure of their influential owners. The owners regretted the special rights they had awarded Carolina and Jacksonville, feeling they had gained too much power too soon.

So when the NFL approved the plan to bring the Browns back to Cleveland for the 1999-2000 season, the owners decided to limit the Browns' ability to stockpile talented free agents. Cleveland's salary cap was set at the universal league limit of $64 million, a far cry from the unlimited cap granted to Carolina and Jacksonville just 4 seasons earlier.

The Browns were awarded the first pick in last May's collegiate draft, which they used to select future superstar Tim Couch. But Couch's astronomical salary ate up nearly one-quarter of Cleveland's budget. After the salaries of all the Browns' collegiate and expansion draft picks were factored in, the team didn't have enough funds to pursue many big-name, high-quality free agents.

The Cleveland team that was created lacks the potential of recent expansion teams and is significally inferior to most NFL teams, as seen in last Sunday's embarrassment. The salary cap reduction prevented the Browns from compiling a squad rich in either experienced veterans or talented newcomers. Instead the Browns have a smattering of youth and experience, lacking cohesiveness and compatibility. They drafted a few potential offensive weapons, like Couch and wideout Kevin Johnson, but failed to surround them with any proven performers who could aid in their development. Cleveland acquired some veteran defensemen, but the defense has several weak links and lacks unity and enthusiasm.

The Browns weren't able to attain the number of quality athletes necessary to field a competitive NFL team due to the self-interest of the owners. By preventing the Browns' success, many owners have guaranteed their francises a victory. But at what cost?

Millions of fans anticipated Cleveland's return with enthusiasm, hoping it would strengthen the AFC and benefit the entire NFL. The entire city of Cleveland fought for three years to bring its beloved Browns home. Thousands of insane "Dawg pound" fans showed their loyalty to the new team by buying season tickets. The entry of an inferior Browns team into the NFL lessens the quality of the league, diminishes the interest and passion of the fans, and disheartens the great football city of Cleveland.

Owners must realize that fans love close games, exciting finishes, and heated division races - not blowouts. And I bet the Steelers' Kordell Stewart and Jerome Bettis would rather bang helmets with their hated intrastate rivals than watch their backups dominate the second half from the sidelines.

McDowell '01 leads Bison past Colgate

Defense hold the Red Raiders to three points in the first three quarters Saturday

By Carmen Mauriello

Most analysts predicted the outcome of last Saturday's Bucknell-Colgate game to be a convincing victory led by a talented senior quarterback behind the strong play of a solid defense. But few guessed that Bucknell's Don McDowell '00 would outshine Colgate superstar Ryan Vena and dismantle the Red Raiders' acclaimed defense, while the Bison defense would hold its ground and keep the opposition out of the endzone during the game's first three quarters.

The Bison refused to listen to the hype surrounding the Red Raiders, marching into a hostile stadium and soundly defeating their highly touted opponent, 21-16. With the win, the Bison earned national respect and became a serious contender for the Patriot League championship.

McDowell's poise, determination and perfect execution led Bucknell to the victory. Squaring off against Colgate quarterback Ryan Vena, the 1998 Patriot League MVP, McDowell had a career game. He completed 17 of 28 passes for 211 yards and two touchdowns, while rushing for another score.

Head coach Tom Gadd believes that his veteran quarterback's breakout performance will finally get McDowell the respect he deserves. "A great day for Donny, knowing he's taken a backseat to (Tom) Stambaugh and (Ryan) Vena over the past three years," Gadd said. "He kept our football team moving and gave us a chance to win with a young offensive line."

The Bison came into the game ready to play and focused on their goals. "I think we were pretty confident going in," McDowell said. "We knew Colgate was a good football team but we did what we had to do and beat them."

After neither team could produce in its first two offensive possessions, Bucknell drove 77 yards on 13 plays to capture a 6-0 lead. The key play of the 7:43 long drive was a 28 yard connection from McDowell to Dan Palko '00, which moved the ball to Colgate's two yardline. McDowell plunged into the endzone on the next play to open up the day's scoring.

On the third play of Colgate's ensuing possession, George Cowan '02 intercepted Vena's pass and returned the ball to the Red Raiders' 14 yardline. The Bison offense quickly capitalized as McDowell connected with Palko for a touchdown and a 12-0 Bucknell advantage.

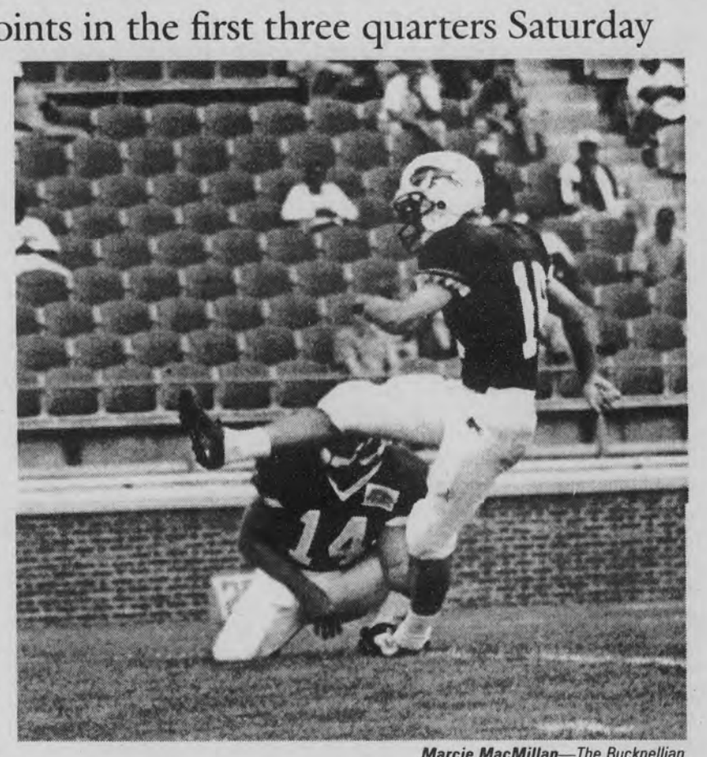
The efficiency of the Bucknell offense was matched by the consistency of its defense. The Bison defense held Colgate in check during the first half, allowing just three points and coming up with turnovers and key defensive stops that sparked the offense.

The defensive unit was led by the remarkable 16-tackle performance of linebacker Vince Ficca '01, who applauded his teammates' "hunger" and "100% effort."

"As a defense, I think we played with great intensity," Ficca said. "We weren't satisfied with anything else but a win."

The Bison went into the locker room comfortably ahead 12-3 after dominating the first half. But Gadd noted that his athletes weren't overconfident, remembering last year's blown 19-7 halftime lead against Cornell.

Gadd was pleased that the Bison were able to "sustain their effort in the second half", with the defense denying Colgate's first four drives. The offense increased the lead to 19-3 with a 61-yard scoring drive capped off by an 11-yard touchdown strike from McDowell to fullback Mark Wyland '00.



Marcie MacMillan—The Bucknellian

Joe Lordeaux '02 and the Bison dominated Colgate 21-16 in Hamilton

The Bison defense came up with one of its biggest plays in the beginning of the fourth period. After senior punter Brian Kramer pinned the Red Raiders deep in their own territory, linebacker Shawn Redd '00 broke through the line and sacked Vena for a safety. Gadd emphasized the importance of the play in "changing the scoring margin", by requiring Colgate to score a minimum of three times to overcome its 18-point deficit.

Redd's safety became even more important after Vena quickly engineered two Colgate scoring drives in the game's closing minutes. Down 21-16 with only one minute remaining, the Red Raiders' attempted an onside kick to try to regain possession. The Bison were well prepared for the onside kick, and they recovered it at the Colgate 44 yardline to seal the upset victory.

The Bison became one of the favorites to capture the 1999 Patriot League title with the win. But with nine games and five league matchups remaining, the Bison know they have a long road ahead of them. An explosive 2-0 Towson team will travel to Christy Matthewson Memorial Stadium for this Saturday's game at 12:30 p.m. McDowell stated the team's focus is to, "avoid a letdown and keep playing our best."

Women's soccer showing signs of improvement

Tim Choate—The Bucknellian

The win against Lehigh boosted Bucknell's confidence.

By Andrew Bevan

After a near victory against Towson was taken away from the Bucknell women's soccer team due to severe lightning, the Bison were anxious to get on the field this past Wednesday against St. Joseph's. In their first home game of the year the Bison came out strong and ready to play.

"We played well in the beginning, which is something we had not done in our first two games," head coach Chrissy Findlay said. Although Bucknell put in a good effort, they were plagued by an inability to finish scoring opportunities.

"We had our chances," Findlay said. "Our play is starting to develop, but we need to work on finishing. That will come."

St. Joseph's took advantage of Bucknell's poor finishing and scored a goal midway through the second half, which proved to be the game winner. Freshman goalkeeper Laurie Purse had a commendable performance with 11 saves in net.

Another positive for the Bison was the continued strong play of Meredith Barnes '02, whom Findlay said is "consistently an offensive threat." Findlay recognized the strong play of Tara Utchel '03, calling her a "nonstop workhorse all over the field."

The Bison looked to get back on track when they traveled to Bethlehem last Saturday to face Patriot League rival Lehigh.

Bucknell made a strong statement in its first league game, netting two goals just before the midway point of the first half. Utchel started things for the Bison just over six minutes into the contest, scoring off an assist from Meredith Gannon '02. Fourteen minutes later, the Bison found the net again when Emily Keber '03 scored an unassisted goal. These two goals ended up being the difference as Bucknell left Bethlehem a 2-1 winner.

"We came out hard," Findlay said. "Everyone played well."

While the win was definitely a positive for the team, Findlay still stresses the need for her team to work on "putting the ball in the back of the net." Findlay believes that her team has a tendency to "look to make the perfect pass". "We need people to step up to the challenge and take some risks," Findlay said.

Findlay has been pleased so far this season with the leadership on her squad and her players' "commitment to battle it out every day." The team has made good progress despite injuries and illnesses to some players. Although these setbacks have weakened the team, Findlay is not as worried because of the great depth of the team. "We have a bench full of good players," Findlay said.

"Our win against Lehigh this weekend was huge. It's always nice to win the first game of the Patriot League, and to show the freshmen how important the league games are," said tri-captain Anna Hall '02. " I think we'll be a great team this year with all the technical ability we have and given how great all of the girls are. We have an experienced core of returning players that will most definitely help lead us to a winning season."

"Everything we have been working on all season came together on Saturday against Lehigh," Utchel '03 said. Sophomore Lindsay Slomer added, "We are off to a better start than we were last year. I am excited for the rest of the season."

The Bison look to continue their winning ways this Tuesday when they play host to Cornell.

Christy's, an annual a cappella concert held during Parent's Weekend in the Rooke Chapel, will feature the university's three a cappella groups: the all-male Bison Chips, the all-female Silhouettes, and the coed Two-Past Midnight (above).

Chairman, terms of Presidential search committee made public

Trustee representation increased on group looking to replace Adams

By Heather Napolitano

The wheels are in motion.

The 16 members which will compose the Presidential Search Committee are in the process of being selected, and the Committee's first steps are beginning to take shape.

The board will consist of eight trustees, two faculty members, one administrator, one alumni and one student.

Trustee Lee Hamilton '57 will serve as the chair of the Search Committee. His recent appointment was determined by Chairman of the Board of Trustees Jim Schubauer '56. Schubauer will also select the remainder of the trustees to serve on this committee. The first of the two faculty slots has also been recently filled by faculty chair and Professor of Political Science John Peeler. The process to determine the second has begun as three candidates were selected at last week's faculty meeting. The final decision will be made based on the number of ballot votes each individual receives from his or her colleagues. The administration will also engage in a process to select its representative. Meanwhile, the alumni will be appointed by the University's Alumni Association.

The student quota is currently in the process of being filled as well. A request has been extended to Bucknell Student Government (BSG) President Yoshi Maisami '01. He may either accept that request or allow BSG to delegate the responsibility to another student.

Hamilton anticipates that the body of the Committee will be complete by next Monday with the determination of the second faculty member as that is the last decision scheduled to be made.

Currently, Hamilton is also working to finalize a search consultant specializing in educational practice. Such firms are engaged by organizations to assist in bringing a selection of individuals to the University who may potentially fill the vacant position. The search consultant will further coach the Committee on the various ways to reach out and give potential candidates the opportunity to identify themselves and their interest in filling the presidential position.

"They will help us with the process of identifying the best possible talent to be the next President of Bucknell," Hamilton said.

The first official meeting of the Presidential Search Committee will be held next Tuesday. Following this meeting, Hamilton anticipates that the group will convene in its entirety on an average of once a month.

Meeting with the sixteen members

Bucknellian File Photo

Trustee Lee Hamilton '57 was named to chair the committee searching to replace President Bro Adams (above). Eight trustees, two faculty members and one student will serve. The body of the committee will likely be announced Monday.

University to unveil new telephone, voice mail system

By Laura Cardinal

As students returned to campus in late August, many were met by an unexpected and unwanted surprise—no telephone service. For most students, this problem was fixed in a matter of days, but others went weeks without a working phone line.

The University decided to throw out its used and outdated telephone system and invest in a highly technical and more flexible new mechanism. The old system was about 13 years in the working and had just, according to Gene Spencer of the Telecommunication office, "outrun its capacity." It was decided that if the University had continued to use the system for another year it would have become unreliable and perhaps even have crashed periodically due to its old age and overuse.

The new system initially seemed to cause more problems than the old had. With over 5,000 phones on campus and a very short window in which to do the actual physical switch, it is easy to see how complications occurred. It was crucial that the switch take place when the least amount of people were living on campus as phone lines were predicted to be down for almost a full day during the actual switch. It was decided that

Second "Bucknell Brigade" set for January

Dave Arnold '00, Joell Molina '01 will serve as student leaders for Nicaragua aid trip

By Peter Van Emburgh

Last spring, a group of enthusiastic Bucknell students and faculty, lead by Jamie Cistoldi '99, traveled to Nicaragua to work in a refugee community that was devastated by Hurricane Mitch. On Monday night, the Bucknell Brigade and the officials that helped to coordinate the activities in Nicaragua returned to the university. This year's student directors of the Bucknell Brigade, David Arnold '00 and Joell Molina '01, arranged a lecture from two members of the Center for Development in Central America (CDCA).

Kathleen Murdock and Mike Woodard, of the CDCA, spoke of the extreme poverty and the efforts made to assist the refugees in Nicaragua, primarily in a community called Nueva Vida (New Life). Hurricane Mitch devastated the Central American nation in October 1998 and has caused severe problems for the nation ever since.

"As many of you know, Hurricane Mitch came and practically sat over Nicaragua for a week, dumping 10 feet of water," Murdock said. "This poverty, and the lack of concern that the government has shown for its people has caused great suffering."

The water rushed from the mountains, sweeping away homes and people in its path of destruction, leaving thousands of people stranded. One volcanic mudslide even buried an estimated 2,000 people in a small town.

"Yet for many of the survivors, the horror has just begun," Murdock commented. "Rampant health problems arose from the unsanitary conditions, such as malaria, rabies, strange infections, and cholera."

Bucknellian File Photo

Dave Arnold '00 (top, second from right) will return to Nicaragua as a student leader for this January's Bucknell Brigade. Last year, the Brigade helped Nicaraguan residents being their recovery from Hurricane Mitch.

Where does the CDCA fit into the crisis and how does it respond?

The CDCA is a small organization that has very limited resources to work with to assist the refugees and survivors. The CDCA's major goals for development are to improve and/or provide health services, appropriate technology, microenterprise, sustainable agriculture, and education.

A mile up the road from the headquarters, Nueva Vida is home to 12,000 people that were displaced from their homes, with more arriving every day. With help

Bell addresses "Race and the millennium"

By Rachel Laskow

Professor Derrick Bell addressed the topic of race and the millennium last Tuesday as part of the 13th Annual Conference on Black Experiences. Bell was brought to the University through the efforts of the Black Studies Concern Committee which was formed in 1985 in order to bring black history to campus.

Bell has firmly established himself in both the academic and literary worlds. In 1971, Bell became Harvard University's first black tenured law professor. Bell has also served as dean of the University of Oregon Law School from 1980 to 1985, but he then returned to Harvard. In 1990, he took a two-year leave of absence from Harvard and was then dismissed from the university. He wrote several books including *Faces at the Bottom of the Well: The Permanence of Racism*, which was made into an HBO movie, and *We are Not Saved: The Elusive Quest for Racial Justice*.

Bell explained that he was given the topic of race and the millennium, which raises a question to which "it is tough to provide an optimistic answer." According to Bell, the real reason for concern in our society is, if the economy falters, there will be a tendency to take it out

Public Safety Log

September 14, 1999

NON-EMERGENCY MEDICAL TRANSPORT–A University student contacted Public Safety for transportation from Smith Hall to Evangelical Community Hospital Emergency

Room for treatment of an illness. Student Health Services driver transported the individual to the hospital and later returned her to campus.

September 15, 1999

INFORMATION–Public Safety responded to Swartz Hall for a fire alarm activation caused by a smoke detector activation and a pull station that was activated. A University student admitted to having activated the pull station for what she believed to be a fire which was false. No charges were filed.

September 16, 1999

INFORMATION/SUSPICIOUS PERSON–Public Safety responded to Kress Hall for the report of a suspicious person outside a University student's window. No one was located in a search of the area. Lewisburg Police was notified.

UNDERAGE CONSUMPTION/ OPEN CONTAINER VIOLATION–While on routine patrol, Public Safety observed an intoxicated University student carrying an open container of beer. University citations for underage consumption and open container were issued.

September 17, 1999

INFORMATION–Public Safety received a call from an off campus company reporting that someone at the University was tampering with a web site. The computer center is assisting in the investigation.

INFORMATION–Public Safety responded to Phi Psi Fraternity for a fire alarm activation. The sprinkler system was activated by tampering with the pipe, causing a flooding situation. University personnel responded to correct the situation.

September 18, 1999

DISORDERLY CONDUCT/UNDERAGE DRINKING/FAILURE TO COMPLY–While on routine patrol, Public Safety observed two intoxicated University students walking near Hulley House. The students attempted to run from the Public Safety Officer. University citations for underage drinking, disorderly conduct, and failure to comply were issued.

INFORMATION/RECKLESS DRIVING/SPEEDING/RUNNING STOP SIGN–While on routine patrol, Public Safety observed a vehicle, operated by a University student, traveling at a high rate of speed on South 7th Street. University citations were issued for reckless driving, speeding, and running a stop sign.

INFORMATION/FALL VICTIM–Public Safety responded to Bucknell West Mods for the report of an intoxicated University student who had fallen. An ambulance and East Buffalo Township Police responded, however the individual signed a release refusing medical treatment.

INFORMATION/DAMAGED UNIVERSITY PROPERTY–Public Safety responded to Swartz Hall for the report of a broken window in a door. No witnesses or suspects were located in a search of the area.

September 19, 1999

POLICE ASSIST/UNDERAGE DRINKING/PUBLIC DRUNKENNESS–Public Safety responded to Brown Street to assist Lewisburg Police with an intoxicated University student who had been slightly injured in a fight. Lewisburg and University citations were issued for underage consumption and public drunkenness.

DRIVING UNDER THE INFLUENCE OF ALCOHOL (2 incidents)–While on routine patrol, Public Safety observed a vehicle driving at a high rate of speed on the wrong side of St. George Street. The vehicle, operated by an intoxicated University student was located in a parking space in the University Ave. House lot. Lewisburg Police responded and the individual was cited for driving while under the influence of alcohol, underage consumption, having alcohol in his system while being a minor, and failure to drive on the right side of the road. A University citations for underage consumption and reckless driving were also issued.

UNDERAGE CONSUMPTION–While on routine patrol, Public Safety observed an intoxicated University student carrying a real estate sign on St. George Street. A University citation for underage consumption was issued. The sign was turned over to Lewisburg Police.

INFORMATION/OFFENSIVE WEAPON–While on routine patrol, Public Safety was stopped by visitors who were looking for an individual who had become separated from their party. Public Safety confiscated a BB gun from the visitors room in Smith Hall. An investigation is being conducted to determine the owner of the weapon.

Helen Hunt—The Bucknellian

Several Sixth Street Houses remained condemned as of this Thursday, more than two weeks after flooding from the Bull Run Creek ravaged the Street. Structural damage to the houses meant that many students had to utilize temporary University-provided accommodations in Swartz "dingles."

Women's Resource Center plans semester of events

By Anne Monoky

The Women's Resource Center has planned several important campus events this semester. Janice Butler, director of the women's resource center, encourages student participation in these interesting and informational events.

The Center will be sponsoring two main speakers on campus this semester. Jackson Katz will perform a multimedia presentation on Sunday, Oct. 3 in the Vaughn Literature Auditorium. Katz is the founder of Real Men and the creator of the Mentors in Violence Prevention Program. His presentation is titled, "Tough Guise: Media images and the crisis in masculinity, offers cutting-edge analysis of masculinity and sexual politics."

Butler commented, "Katz has spoken here on campus several times. He is a very good speaker and has received great reviews."

On Nov. 7, the Women's Resource Center, the Chaplain's Office and the Residential Colleges, will sponsor the presentation, "From Vietnam to Kosovo—The Changing Faces of War." During this presentation, Cambodian refugee Luong Ung and Associate Director of the Vietnam Veterans of America will lead the journey into the killing fields and examine the human and economic consequences of war. "Both speakers will share their personal stories, and in a larger message, they will show the impact that war has on real people's lives," Butler said.

In conjunction with the second speaker, a set of four movies will be shown. The first film, *To Serve My Country, To Serve My Race*, will be shown on Monday, Oct. 18 and will focus on women and war. This documentary concentrates on the contributions and discrimination of black women during World War II and how these experiences prompted calls for integration.

The second film, *Burden of War: Women and Agent Orange*, being shown on Monday, October 25, will address the scientific, psychological and political impact of the chemical Agent Orange on women who served in Vietnam and their children.

On Wednesday, Nov. 3, the film *Maria's Story* will provide a personal portrait of a leader of the guerilla movement in El Salvador. Finally, the fourth movie in the series, *Calling the Ghosts: A Story about Rape, War, and Women*, will be shown on Nov. 8. This Emmy-awarded documentary is the first-person account of two women lawyers in Bosniz-Herzegovinia leading the lives of ordinary modern women until they were disrupted by Serb forces disrupted. The locations of each of these showings will be announced at a later date.

The Center will also be co-sponsoring such events as comedienne Karen William's performance on Tuesday, Oct. 5 in the LC Forum and the lecture/slide presentation by Dr. Jane Goodall in the Weis Center on Friday, Oct. 15.

In addition to these events, the Center is organizing peer education programs in which students give presentations to hall groups and other organizations on the subjects dealing with women's issues. Also, as in years past, the Center will be dealing with the Clothesline Project. This is a national effort which deals with violence against women. They will also be sponsoring the Graffiti Board which is a way for students to voice their opinions on issues on campus.

Recent efforts of President Adams have also been in conjunction with the Women's Resource Center. He recently released a brochure, *The Bucknell Guide about Sexual Assault*, to students. Adams released the brochure earlier this year, and defines what the University constitutes as sexual assault, in the most updated version.

Butler explained that women are able to obtain support and information with the Center's assistance. "Women who have experienced sexual assault, their friends or loved ones, can discuss options here" she said.

PHONES

from page 1

the weekend of Aug. 6-7 would be the best time since it was after summer school had ended and right before the fall athletes arrived for pre-season. Consequently, it was the athletes who endured the bulk of the inconvenience since the majority of the problems occurred immediately following the switch.

Technicians worked diligently to fix any errors made in the process, but some problems remained as the general student body returned to school. The reported problems included lack of a dial tone, instant call forwarding, problems with answering machines and the inability to make long distance phone calls. Most of these problems were predicted to occur to a certain extent. However, the flooding and lighting storms that hit the University in the past month also played a significant role in getting the new system up and running smoothly. Not only did the weather contribute to some of the problems, such as lack of dial tone, but it also slowed the correction process.

As we near the end of September, the lines seem to be working almost without error. Consequently, the focus has shifted from the problems of the new system to the positive attributes it will give to both the administration and the students.

The most talked about aspect of the new system is voice mail. Each student and administrator on campus will receive his or her own personal voice mailbox free of charge under this new system. A stutter dial tone when you pick up the receiver will inform you when you have mail. This feature gives students the capability to check mail from any touch-tone telephone, to forward messages and to reply directly to another's mailbox. Voice mail is scheduled to be activated the week following fall break. E-mails will be sent out to keep students updated as well as to explain how to use the system when it becomes active.

Other features of the new system include the replacement of most administrative and secretarial telephones and the possibility of Caller ID by the beginning of January.

This new system is also more adaptable than the old, meaning that as new technology develops, it has the means to adapt and integrate many new features into the system.

Taiwan is Rocked by Earthquake

Rescue crews dug through mountains of debris Tuesday night after a powerful earthquake struck the island. At least 1,500 people were killed by the magnitude 7.6 quake. Almost 4,000 people were injured and thousands more are believed to be trapped under the tons of rubble. The quake was centered about 90 miles southwest of the capital city, Taipei. In a town a few miles away from the epicenter almost every building had been destroyed or damaged. Similar to last month's devastating earthquake in Turkey, thousands of people planned to spend the night outdoors. They feared further building might collapse from aftershocks. Aftershocks with a magnitude of 6.0 continued to shake the region many hours after the first earthquake. The quake was described as the strongest tremor on the island in more than a decade. In 1986 a magnitude 7.8 quake hit the same region killing 15.

Peacekeepers enter East Timor

The presence of international peacekeepers grows in East Timor as do the hopes of pro-independence East Timorese. The peacekeepers are arriving after weeks of terror and violence. Residents of the capital city of Dili began returning to the burnt-out city when news of the peacekeepers reached them in the hills. The residents fled the rampages of pro-Jakarta militias after a referendum on independence. The multinational peacekeeping force will have a final strength of 7,500 and will provide security for the area. Approximately 140,000 East Timorese have fled the bloodshed to West Timor. Militia members have also fled the area in advance of the peacekeepers. Up to 300,000 Timorese have been made homeless by the chaos. Indonesia's military has been accused on aiding the militias in their attacks on independence supporters. Thousands of people demonstrated in the capital of Indonesia, Jakarta, against letting East Timor separate from the country. The Indonesian President Habibie defended his policy of allowing the independence referendum as a means of repairing the country's tarnished international image.

Colombia asks for Billions to Fight Drug War

The Colombian President Pastrana asked for about $3.6 billion in foreign aid to stop drug production and trafficking in the country. He also denied that the guerrilla offensive seriously threatens his country. Colombia has been reluctant to ask for international aid, but the worsening economy, guerrilla violence and booming illegal drug trade have made the country's situation unstable. The country is seeking assistance from the international community, mainly from the US, European Union and United Nations. The majority of the money would go toward combating the drug production and trafficking. Colombia hopes that the US will increase its anti-drug aid to as much as $2.2 billion in the next three years. The country is currently getting $289 million a year from the US. Pastrana hopes that the international community believes that a Colombia at peace in everyone's interest.

New Sex Survey Finds British Youth Most Active

A top British condom maker conducted a survey on sexual practices around the world. The survey found British youth the most sexually active in the world, while young adults in Singapore had the least sex. Singaporeans enjoyed their first sexual encounters the most said the survey of 16 to 21-year olds. Young males in Singapore were also the most selfish with 44 percent polled in that country putting personal pleasure first. In France only 14 percent of males found self-satisfaction more important. The French also enjoyed their first sexual experience the least, 40 percent said it was more disappointing than expected. The survey said that American youth started sex at the lowest age and had the highest number of sexual partners at an average of 7.5 partners. The young adults in the UK had sex the most frequently in one year at 133 times a year, the American polled said they had sex 128 times a year. Singaporeans had the least amount of sex in one year at 63 times a year. American young adults were also among the most unfaithful while Mexican youth were least likely to cheat on their partners.

News briefs complied by Dave Arnold from the AP interactive website.

Racial attitudes addressed in lecture

BELL

from page 1

on the blacks. Bell said that if he could make an advertisement stating what America needed he would write, "Wanted: A White Leader Able to Free Whites of Racism." Bell further expressed his belief that there are few whites who have fought against racism.

Bell continued to say, however, that the leadership role cannot be served by a black person. He said that Jesse Jackson can talk about poverty and Oprah Winfrey is the "self-help queen of America," but America needs a white person with prestige. According to Bell, the leader needs to be heard and deliver a three-point message: race in America is not a black problem, but a white one; race may be part of social structure; and is value and struggle in losing a cause.

To illustrate his point that race in America is a white problem, Bell used the example of the United States lagging behind less wealthy nations in things such as health care and poverty partly due to racial separation. Another example given was that America utilizes the death penalty often, possibly because of a race factor.

According to Bell, most power is held by whites. Said Bell, whites have a "property right that the law recognizes." He continued to say that "this is a nation built on value of property and protection of property."

Bell believes an additional problem is that there is "so much opposition to affirmative action in college admissions, but none that legacy will admit." Children of alumni do not have better academic achievement than minority students, yet they are more likely to be admitted to college.

In concluding his first major point, Bell said, "This individual will have to keep the spotlight focused where it should have been [focused] on all along–on whites."

In reference to his statement that race is a part of the social structure, Bell said that a nation's leaders will be caused to ask two questions. First, if blackness does not mean subordinate, what does it really mean to be white?

Second, they will ask whether whites in this country have enough love and respect for each other without using blackness as a central glue. "Racism connects all whites in a knowing but accepted alliance," Bell said.

Bell used Ralph Ellison to illustrate his third and final point that there is value and struggle in losing a cause. According to Ellison, because of past fate, blacks have no hiding places and a nation could not survive without black presence. Also, Ellison believed that blacks are nation's conscience, and they put pressure on the nation to live up to an ideal. Bell said, "We need this white leader, but I'm not sure we can wait on him or her ... There is much to be done."

Bell ended the lecture by reminding the audience that "slaves had no choice but to accept our fate" and "racism lies in the center, not in the peripheral." As a final remark, Bell said, "[We] recognize miracles that we didn't plan."

Helen Hunt—The Bucknellian

Professor Derek Bell, the first black tenured law professor at Harvard University, addressed "race and the millennium" at the University last week. The lecture was part of the 13th annual Conference on Black Experiences.

Schedule of Events—Bucknell Fall Parents Weekend

Friday, September 24, 1999

11 a.m. to 5 p.m.–Exhibit: "Videophoto: Laurie Long, Alix Pearlstein, Joe Sola," gallery
11 a.m. to 5 p.m.–Exhibit: "Mel Edwards and Seymour Lipton, Drawing and Sculpture," gallery
4 p.m.–Softball tournament, softball field
4:30 p.m. and 8 p.m.–Film: "The Man in the White Suit," Vaughn Lit Auditorium
6 p.m.–Women's volleyball vs. Niagara, Davis Gym
8 p.m.–Irish band Gaelic Storm, Weis Center, Tickets: $20
9 p.m.–Student a cappella concert: Christy's, Rooke Chapel, Tickets: $5

Saturday, September 25, 1999

9 a.m. to 6 p.m.–Softball tournament, softball field
9:30 a.m.–5K Race: Run for the Children, stadium
10 a.m.–Women's volleyball vs. Canisius, Davis Gym
10 a.m. to noon–Open House: Greenhouse, biology building
11:30 a.m.–Men's water polo vs. Salem-Teykio, Freas-Rooke Pool
12:30 p.m.–Football vs. Delaware State, stadium
1 p.m.–Field hockey vs. Lafayette, west field
1 p.m. to 4 p.m.–Exhibit: "Videophoto: Laurie Long, Alix Pearlstein, Joe Sola," gallery
1 p.m. to 4 p.m.–Exhibit: "Mel Edwards and Seymour Lipton, Drawing and Sculpture," gallery
2:30 p.m.–Men's water polo vs. Washington & Jefferson, Freas-Rooke Pool
3 p.m.–Women's soccer vs. Colgate, east field
4:30 p.m.–Women's volleyball vs. Yale, Davis Gym
7 p.m.–Men's water polo vs. Slippery Rock, Freas-Rooke Pool
8 p.m.–Student a cappella concert: Christy's, Rooke Chapel, Tickets: $5
8:30 p.m. to 11 p.m.–Open House: Observatory

Sunday, September 26, 1999

9 a.m. to 4 p.m.–Softball tournament, softball field
1 p.m. to 4 p.m.–Exhibit: "Videophoto: Laurie Long, Alix Pearlstein, Joe Sola," gallery
1 p.m. to 4 p.m.–Exhibit: "Mel Edwards and Seymour Lipton, Drawing and Sculpture" Art Gallery

BRIGADE

from page 1

from the Red Cross and other US organizations, Nueva Vida is provided with minimal food, supplies, and materials to help build better homes.

Once the aid starts leaving, then what are the communities to do? The CDCA assists the members in establishing a sense of organizational government and a real community, because the national government of Nicaragua is simply not helping.

The Bucknell Brigade, however, helped to set up a health clinic and distribute necessary supplies. Currently, the CDCA is working with the Bucknell Brigade to set up a permanent clinic. The clinic would educate the people about clean water, breast-feeding, sterilization, and other health aspects. The Brigade hopes to raise enough money to establish a small, permanent clinic.

"Nicaragua needs outside help," Murdock said. "They need you to help us ease the suffering and help us bring hope."

Arnold added, "We have the potential to make a huge difference in the lives of the people that we are helping."

In early January, the Bucknell Brigade is planning on returning to Nicaragua for six days, primarily to establish a health clinic. University Chaplain Ian Oliver estimates that approximately $30,000 is needed to accomplish the Brigade's goal.

Arnold, who spent two months this summer working for the CDCA, said that working in a third-world country that is crippled by natural disaster is an experience that is "unforgettable."

"The Bucknell Brigade experience has helped to change my view of the world, in a way that no other class here could possibly do," Arnold said. "My time in Nicaragua makes me wonder if I want to continue in life ignoring these forgotten people or do I want to make a difference."

SEARCH

from page 1

next Tuesday will be the search consultant representative. At that point in time, with the advice of the consultant, "we will lay out the process [of the search] in terms of the various steps that will lead us to the selection."

Hamilton expects that the steps will include gathering a pool of top flight candidates, examining the credentials of these candidates, condensing the list of those who could potentially fill the position, interviewing the remaining individuals and speaking with their references and selecting the finalists. According to Hamilton, it is likely that the committee will whittle the candidates down to a few top choices and will then engage the board of trustees in making the ultimate decision. Hamilton hopes to conclude this lengthy process by the spring of 2000.

At this point, Hamilton insists that the search will not be limited by any factor, be it geography, gender, age or experience. "We're going to be receptive to anyone," he said. "However, the likelihood will be that the individual is from the United States with experience in the academic world."

In short, "our goal is simply to find the best possible person to be our next president," Hamilton said.

A call for diversity on the Presidential Search Committee

Within a period of six months, the committee in charge of finding a new University President will have made its selection. The exhaustive and extensive process of replacing Bro Adams will be over and, perhaps by March of 2000, the appointment of the University's 16th President will be announced.

It is also possible that the spring appointment announcement will be the first time that the vast majority of students or faculty will hear the new President's name.

The terms of the search committee to appoint the next President were announced and discussed last week, terms that do not bode well for student and faculty input on the process to select the person that will lead them.

Trustee Lee Hamilton '57 will serve as chairman for the search committee, will consist of eight trustees, one administrator, one alumnus, two faculty members, and one student. The process of selecting and interviewing candidates, at least in its early stages, will be kept almost completely confidential.

Although in many respects it is necessary to keep the selection process in confidence, the composition of the committee combined with the nature of the committee process raises some concerns as to whether students and faculty concerns will be pertinent—or even welcome during the process.

To be sure, keeping the early stages of the process confidential is necessary, especially in an academic climate such as this one. The committee is rightfully attempting to attract the most qualified candidate possible to lead the University, and it is often difficult to attract the best available candidates—especially candidates that are sitting Presidents at other Universities—if the process is not kept closed.

But the makeup of the committee—or, more accurately, its small number of student and faculty representatives is cause for concern. Chairman of the Faculty John Peeler, BSG President Yoshi Maisami and one elected faculty representative will serve on the committee currently dominated in number by trustees.

The fact that only one student representative will serve on the committee may only add to the apathy and helplessness that many students feel toward administrative matters—even vitally important ones such as this. Bucknell traditionally has an apathetic student body, and perhaps many students simply will choose to ignore the Presidential search process.

But perhaps just as many draw their feelings of apathy from the impression that their voice, even if it were to be heard, wouldn't matter. The appointment of only one student to the search committee serves to intensify this concern—if one doesn't think that he has a say in important matters, his voice is less likely to be heard at all.

But perhaps the most distressing part of the uneven composition of the committee is the diversity of input that will be lost.

Students, trustees and faculty likely have different opinions of what the role of a President should be, and thus would have differing opinions on who the most qualified candidate for Bucknell would be. Is a President supposed to be equal parts administrator, fundraiser and student leader, or is one or two of these characteristics more important that the others? Should his background be purely academic, purely administrative, or a combination of both? These and similar questions are sure to be asked as the search process begins in earnest, and with a search committee comprised mainly of trustees, the answers given may not fully reflect the opinions of the entire University community.

The Bucknellian is confident in Hamilton's ability to lead the committee and create a list of qualified, exceptional candidates. But that list, simply because of the nature of the committee itself, may not paint an accurate picture of what is truly desired by those with arguably the largest stake in the process.

Should prime time television be more strictly regulated for appropriateness?

Yes

By Rebecca Rowland

Nearly every home in America has at least one television. Networks have become the primary source of entertainment and prime-time TV shows the jewel in their crowns. But to what extent should network executives go to make sure that their prime time line-up is the most watched, "must see TV."

Lately, prime time TV has become R-rated. Perhaps in an effort to woo older viewers, those in the demographic that watches prime-time (8-10 p.m.), the shows have recently come to include more sex, more violence, and racier content. Unfortunately, younger and younger viewers are tuning in to the "adult themed" programs.

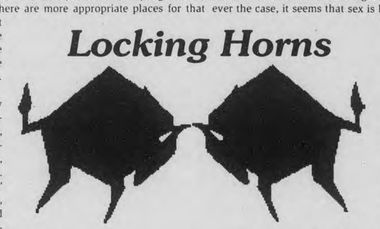
I think it would be in the best interest of society to more strictly regulate the shows on prime-time television. There are more appropriate places for that kind of program: cable, late-night time slots. These options are more viable because people can choose not to get cable, and children are more likely to be asleep at 11 p.m. than 8 p.m..

When a show dealing explicitly with sex is on at 8 p.m on. FOX, regardless of how hard parents try, children will watch these age-inappropriate shows. Take, for instance, HBO's new season of original series. "Sex and the City," "The Soprano's," and "OZ." , These shows deal with, respectively, sex, the Mafia, and maximum security prisons. Not exactly the right kind of show for the Barney crowd.

Luckily, HBO is not only a cable channel, it's a premium channel; if parents want to prevent their children from watching any of these shows, they can simply not subscribe to HBO.

Prime-time television's proponents say that the reason the 8-10 p.m. time slot was chosen was because children are either asleep or simply to young to be watching TV that late. However, what show is on at 7 p.m.? 7:30 p.m.? If it is a youth-oriented show, the probability that they continue watching into the prime-time hours is great.

I am in no way advocating censorship. But Playboy is wrapped in brown paper and in the back of the magazine rack — shows sexual and violent in nature should be wrapped in brown and put in the back of the television rack.



No

By Maren Johnson

For a while, the issue of too much sex and violence on television was an area of heated debate. Surveys were done and changes were made. However, like all "hot issues" in the news it too eventually took a back seat to whatever was to come next.

But unfortunately, sex and violence have slowly crept back into prime time television. These vices are now as prevelant, if not more, as before.

Violence is not as prevalent as it used to be; maybe in the wake of classroom massacres programming execs consider it in bad taste to capitalize on violence. Maybe the days of macho cops and robbers have subsided to the rise of the bubble gum-Backstreet Boys demographic. Whatever the case, it seems that sex is back in a big way and prime time programming is saturated with it.

Apparently the concept of "sex sells" has not been lost on the new crop of shows invading the TV. Even the violence that does linger is sexy. I'll choose as my example "Buffy the Vampire Slayer". Let's face it, teenage girls (and I'm sure the occasional guy) don't tune in to see Sarah Michelle Gellar make a bloody mess out of unearthly creatures, they'd rather know what's going to happen between Buffy and Angel. Again, one can look also at a show like 90210. This show has been on since most of us thought we looked good in neon spandex. However, despite the occasional scuffle, 90210 has always been about sex. Tori Spelling might be stupid, but her father's not. He knows how to keep a show on the air.

In this season especially, a new crop of prime time teen dramas is popping up on every network. They're young, they're fun, and their lives revolve around sex. Herein lies the problem. Not everyone watching these shows is a sexually responsible young adult. There is a chasm between Barney and Buffy that is no longer filled with shows like The Wonder Years or Home Improvement.

Whether the American public likes it or not, sex is selling like mad and no one is about to jump off the bandwagon. It seems that until this trend passes with the rest, prime time is just going to be a little hotter.

Where should the extra money go?

Government attempts to find the best use for the budget surplus

By Josh Guyan

There is this huge debate raging regarding what the U.S. should do with our projected budget surplus. The options are many and all very tempting. They include bailing out Social Security, improving and extending Medicare, money for education, paying down the debt, and good old-fashioned tax cuts.

Both parties have already supported bailing out social security, but I am not sure why. Why bail out a system that continually fails? Doesn't it make more sense have your social security money go to a private retirement fund rather than to a big pot of money in Washington to overpay social security recipients and let politicians dip into for spending programs? Well anyway, both parties have supported it.

The Republicans want a huge tax cut reminiscent of the Reagan administration totaling $800 billion. Democrats want to expand and secure Medicare, have a small tax cut of $300 billion, and maybe pay down the debt. Alan Greenspan, chairman of the Federal Reserve, says pay down the debt. These are all appealing ideas, some more responsible than others, but are we actually going to have the kind of surpluses they are talking about?

The government has already gone over the spending limits they set for the year and is going to have to appropriate more funds to run the government for the rest of the year. Those appropriations come right out of the surplus. The federal relief for the drought we had here on the east coast and now all this flooding comes out of the surplus. The surplus for next year is almost already gone.

There were two articles right next to each other in the New York Times on Wednesday. One detailed the Republican's criticism of President Clinton's travel expenses. They said President Clinton billed the American people for $72.1 million for his trips to Africa, China, and Chile.

The other article highlighted Senate majority leader Trent Lott's pushing of a $1.5 billion appropriation for the LHD-8, a miniature aircraft carrier for helicopters which the Navy says it doesn't even need. But the company that would build the LHD-8 is in Lott's home state of Mississippi and would make his constituents very happy. This is what we call pork. It is extremely wasteful spending often times on things we do not need.

So you say this is horrible, how can we put up with such wasteful spending? If we could just stop this kind of stuff, we could spend within budget restraints and keep our precious surplus.

How wrong you are. If you consider this kind of spending wasteful, it is necessary and all part of the process that is representative democracy.

President Clinton serves not only as the head of government for the U.S. but also as the head of state. Which means that he has to travel around and make symbolic speeches and support democracy and open markets abroad. He has to do it, who else is going to? His trips cost enormous amounts of money largely due to the security needed to send him to potentially dangerous areas of the globe.

The kind of pork described by the article on Trent Lott goes on all the time. Our representatives vote for each other's pork so that when their turn comes up, other Representatives will vote for their pork. They need pork to get reelected. Bringing home a lucrative defense contract wins elections, so do construction projects and many other things that help an incumbent to get reelected.

So what does this all mean? The surplus may go away very quickly when we have disasters in need of federal relief funds and a system of representative democracy that seems to breed wasteful spending. There isn't much we can do about that, but the moral to the story is that we shouldn't get excited and spend money or send it back to the taxpayers when we may have a phantom surplus.

Bid day weekend should not have been an exclusive all-Greek event

TO THE EDITOR:

As a student affiliated with the Greek system, I write to the Bucknell community appalled by the university's actions on Bid Day weekend.

Fraternities and Sororities were originally founded as clubs who reached out to the community in an effort to give back and improve the lives of others. Today, fraternities and sororities continue their philanthropical endeavors and also serve as hosts for social functions throughout our nation's college campuses.

The Greek system at Bucknell is one of the best in the nation and the University has received many awards for its fraternities and sororities. Approximately 53% of eligible students are Greek at Bucknell. This number may seem huge but one must realize that 47% of eligible students, as well as the entire first-year class, are not members of Greek organizations.

Though most Greeks have many friends who are independent, naturally a division lies between Greek and non-Greek students. The University has striven to facilitate interaction between Greeks and non-Greeks and to minimize the exclusiveness of Greek members as felt by independent students. This is demonstrated by the involvement of non-members in community service projects and the presence of invitation lists at Greek registered parties.

Despite its hard work in the past, the University contradicted itself Bid Day weekend, jeopardizing the relationship between Greeks and non-Greek students. Non-Greek members were not allowed to partake in the celebration of Bid Day this year. Non-Greek members could not celebrate the beginning of their friends' entrances into Greek organizations—an event that an individual goes through only once in their lives.

In speaking with many non-Greeks, a consensus was made that all were disappointed in the University's ruling on admissions standards to such events. I realize that the point of Bid Day is for fraternities and sororities to celebrate the arrival of new members into their organizations. Why is it that these new members cannot celebrate their entrance into Greek organizations with their closest friends?

One student I spoke to was not allowed to share his Bid Day experience with his girlfriend of two years because she had decided not to rush. How does the University intend to support the interaction of life between Greeks and non-Greeks when the two cannot come together to celebrate one of the most important events in one's life within the Greek system?

What about those individuals who were not admitted into Greek organizations after going through Rush? Should these students be punished because they did not get into a certain fraternity or sorority? Obviously they should not be, yet the University sure made a lot of these students feel even worse about their Greek experience.

While I cannot change what has happened, I write to prevent such events from happening in the future. We, as members of a nationally renown Greek system, should not exclude non-members from our events based purely on the fact that they have no Greek affiliation.

Greek life may not be for everyone but it should be enjoyed by everyone.

David Cohen '01

Cancelled homecoming parade is a disappointment for town

Bucknell should focus on promoting community support

TO THE EDITOR:

I was quite disappointed to read one of your recent articles about the end of the Bucknell Homecoming Parade through the streets of Lewisburg.

The article implied that too much "community involvement" was one of the main reasons for its demise. And, that more activities should be planned to include your students and alumnae.

While that may be true, I find the reasoning for the parade's termination to be somewhat skewed. As an employee in the Williamsport area, I found it quite ironic that Lycoming College would be including a bonfire in this year's homecoming activities as a means of involving the community in the festivities.

Relations between Bucknell and the surrounding community have been an on-going issue for years. With all the recent tension due to the flooding on Sixth Street, I would think Bucknell would be more concerned about promoting activities that would embrace the community and its residents.

I remember the parade as a young girl and while it was never "big" or "grand" it brought the campus and the community together - at least for one afternoon. The parade is supposed to be about support, right? For the football team and Bucknell. Well then, why do things that only further ostracize your home community?

If community relations is a concern for Bucknell at all, canceling the parade is definitely a step in the wrong direction.

Values and friendships that will last a lifetime

By Allyson Demerath

Remember filling out those wonderful college applications? They always had extremely detailed questions about explaining the meaning of your life in 500 words or less. They wanted to know everything from your GPA in sixth grade to what your mother's maiden name was. Most importantly, they wanted to know that you were a well-rounded individual.

In order to get into college you had to earn high grades, but you also had to be involved at your school: play sports, participate in club activities, and hold leadership positions. And because you demonstrated your ability to balance the books and extra-curricular activities, Bucknell University offered you the chance to demonstrate those attributes in college.

When you were a freshman, you most likely joined a few clubs, sports teams, or even tried out new hobbies. Professors and advisors encouraged you to get involved and make your mark on campus. As a student of a high standing liberal arts school, you were expected to broaden your horizons. By the end of your freshman year, you had established yourself as a good student and an active participant of campus activities.

After returning home from your first year at college, your parents may have asked you what you learned. You could not even begin to explain how mature, scholarly, and enlightened you were after just one year in a college environment. You learned more from your introductory courses than you did from four years in high school, but that was just the tip of the iceberg.

What you discovered was that the things you learned outside of the classroom were just as, if not more, illuminating. In addition, the lessons learned outside the classroom contributed to your ability to learn inside the classroom. The way you interact with peers in club activities, the friendships you formed, the qualities you discover about yourself were all amazing.

By the end of summer, you could not wait to get back to campus and experience more new things. As a sophomore you decide to rush because you want to know what the Greek system was all about. You met new people during rush that you never would have met otherwise.

Finally, you made the decision to choose the fraternity or sorority that best fit your personality. Maybe all of your friends from freshman year did not choose the same one or even pledge, maybe they did, but you felt this would be yet one more new engaging experience for you.

As you went through your pledging process you formed close friendships with your brothers or sisters. You may have bonded while performing community service. Perhaps you worked together on soiving any pertinent issues your fraternity or sorority faced; you developed problem-solving skills.

Because of your pledge class unity, you knew there was always someone to call if you wanted to form a study group. You may have even discovered a potential leadership ability and ran for a position on your executive counsel.

One thing you certainly realized was that being part of the Greek system was one of the best choices you ever made. Suddenly, you were exposed to a whole new dimension of the university's campus. Your fraternity or sorority helped you to perform more community services, meet new people, work in problem solving teams, and discover your own leadership qualities. Because of your fraternity or sorority, you become a more accomplished, erudite, and well-balanced person.

With all of this in mind, how is it possible for the university to say that the Greek system does not contribute anything to academic life? Confining academic learning to the classroom is an extremely conservative way of thinking. Are we not a liberal arts school? Just like clubs, sports, and interest groups on campus, fraternities and sororities create an ideal learning environment.

An active participant has the opportunity to excel in numerous areas. For example, being a member of the executive board promotes leadership ability and problem solving. Community service projects enhance a student's ability to perceive the real world and those less fortunate. In addition, it allows that student to feel as though he or she is making a difference in our surrounding community.

Perhaps most importantly, through the Greek system students learn about relating to one another in a large group environment. The social side of the Greek system is incredibly important. Students develop better interaction skills. Consequently, students are more likely to participate in class, be more self-confident, and even view issues from a different perspective they may not have previously recognized.

These attributes of the Greek system guide students to be more unique, scholarly, and cultured individuals. Abolishing the Greek system will not solve the problems on this campus. Conversely, it may create more.

The Greek system may not be based on a textbook, but the real things in life rarely are.

The evolution debate: Who should make the decision?

By Kevin Mueller

The weeks since the Sept. 8 vote by the Kansas Board of Education to strike virtually any mention of the evolutional theory of life from the recommended Kansas state curriculum have been confusing to say the least. Teachers, principals, and parents of Kansas' public school children have been trying to make sense of this governmental action and how it will affect the way science is taught on a statewide basis.

Although there are many non-supporters of this seemingly unconstitutional act, the minority that embraces this bill could effectively cheat its local children out of one of the most widely accepted scientific theories of modern times.

The decision of what to teach in public schools has long been a topic of much controversy. With opinions galore throughout each state, it is sometimes hard to settle on a set curriculum that everyone can live with.

Yet, although there are many view points, the United States Constitution provides for the separation of church and state as a guaranteed right. That is, children have the right to be educated without religious influences.

It was this principal on which America was formed in the first place; to break away from religious control. By not teaching a theory that rivals religious creationism, Kansas' educational leaders are saying that they do not want their state's students to be able to make a conscious decision about the controversial question of where life came from.

Although Charles Darwin's theory of Natural Selection is just that, a theory, it is widely accepted by scientists around the globe as the best scientific explanation of the origins of life. To purposely not inform students of this important theory is somewhat outrageous. And while the Board's actions do not specifically ban the teachings of Darwin's theory, they do set a precedent for local districts where the final decision of what to teach is made.

One main focus of a public school is to prepare its students to do well on the standardized tests that are created by the state. Kansas has removed any and all questions pertaining to evolutional theory from these heavily weighted tests.

If biology teachers, with the support of their superintendents, do choose to incorporate evolution into their teaching, they might well spend less time and go into less detail on the topic in order to cover other areas that are on the standardized tests.

> *To overlook an obscure scientific conjecture is reasonable, to neglect a world wide scientifically accepted theory is appalling.*

Supporters of creationism as an explanation for the existence of life have called this decision a step forward for creationists everywhere. And Kansas is not the first state to try to implement such restrictions. Alabama, New Mexico, and Nebraska have all made similar changes in recent years, mostly calling for more emphasis on the fact that the theory is "unproven and improbable."

A sticker in Alabama's biology textbooks pertaining to evolution reads, "a controversial theory some scientists present as a scientific explanation for the origin of living things. No one was present when life first appeared on earth. Therefore, any statement about life's origins should be considered as theory, not fact."

Yet, the first sentence of this quote is not true. Most scientists agree with the theory, the conflicting of opinion comes over details. It is true, however, that evolution is not fact, and through this realization, public school children might learn the importance of questioning mainstream beliefs.

Virtually all of science is based on theories and hypotheses about the world we live in. To overlook an obscure scientific conjecture is reasonable, to neglect a world wide scientifically accepted theory is appalling.

By teaching evolution, the students of today might one day grow up to mold new and more correct versions of the origins of life. Decision makers on the Kansas Board of Education say that the theory is not proven and that it should not be taught because of this realization. But virtually all of Science is theory, and therefore other important unproven corner stones of science could also be at risk. The theory that all matter is made up of tiny atoms is one such idea. Will decision makers outlaw this teaching solely because no one has ever seen an atom?

The Kansas Board of Education has set a precedent by not including evolution in its recommended curriculum, and it makes one wonder why this one theory was singled out.

Could it be because evolution contradicts a main religious belief held by some of the members of the Education Board? Board member and creationist Steve Abrams, a former state Republican chairman, tried to input the following sentence into the state recommended curriculum: "The design and complexity of the design of the cosmos requires an intelligent designer." After much protest from scientists, this sentence was stricken, but not before it illuminated the true feelings of one of the decision-makers about the topic.

When the people in control of the educational standards have personal disagreements with what is being taught to their students, it is reasonable to assume that they will use their power to change it. This is exactly what has happened in Kansas and I would hope that biology teachers throughout the state would continue on with their teaching of evolution as one possibility of how life began.

STUDENT PRIZES AND AWARDS
Fall, 1999

THE "MOLES" CIVIL ENGINEERING AWARD-For the civil engineering student whose academic achievement and application for the first three years show outstanding promise for a career in construction engineering and management.
Richard Thomas Kelly II

THE RALPH A. STILL AND ANNE B. STILL PRIZ-For the junior, majoring in English, who has the highest standing in English.
Lisa Ann Molinelli

THE SAMUEL LEWIS ZIEGLER PRIZE-For the junior showing the greatest proficiency in English composition and literature.
Kalsoom Khalid Malik

THE EASTERN COLLEGE ATHLETIC CONFERENCE MEDALLION-For excellence in scholarship and athletics.
Jennifer Lyn Hart
Valter Karavanic
Matthew Charles Potalivo
Jennifer Winhofer

THE UNIVERSITY PRIZE FOR MEN-For the junior man showing the greatest proficiency in English composition and literature.
Carson Leslie Jeffries

THE BUCKNELL PRIZE FOR WOMEN-For the junior woman showing the greatest proficiency in English composition and literature.
Jennifer Ann Buoncontri

THE AMERICAN CHEMICAL SOCIETY UNDERGRADUATE AWARD IN ANALYTICAL CHEMISTRY-For the student who has displayed interest in and aptitude for a career in analytical chemistry.
Carly Elizabeth Graytock

THE STEPHEN A. BAROWSKY PRIZE-For a junior man and woman demonstrating campus leadership.
Michael Louis Fox
Maxine Young

THE SAMUEL LEWIS ZIEGLER PRIZE-For the first-year student whose preliminary examinations in English show the greatest proficiency in the elements of English composition.
Sara Rose Lowman

THE BUCKNELL PRIZE FOR WOMEN-For the sophomore woman showing the greatest proficiency in English composition and literature.
Brandy Marie Scalise

THE UNIVERSITY PRIZE FOR MEN-For the sophomore man showing the greatest proficiency in English composition and literature.
Damon H. McNeil

THE GEORGE R. FAINT PRIZE-For excellent scholarship during the first three years.
Ryan Douglas Acker

THE CHARLES F. WHITE '25 MEMORIAL PRIZE-To students who have completed their sophomore year and exhibit excellence in scholarship and promise and achievement in athletics.
Elizabeth Leavesley Baker
James Anthony Stack

THE PROFESSOR WILLIAM T. GRIER PRIZE-For the first-year students with the highest standing in Latin.
Kanisha De Ann Bond
Scott Anthony Sobolewski

THE PROFESSOR GEORGE MORRIS PHILIPS PRIZE-For the first-year students with the highest standing in mathematics.
Steven Micheal Baldwin
Jeffrey Michael Cohen
Olivier Michael Putzeys

THE BUCKNELL PRIZE FOR WOMEN-For the woman of the first-year class showing the greatest advance in English composition and literature.
Courtenay Brooks Mastain

THE UNIVERSITY PRIZE FOR MEN-For the man of the first-year class showing the greatest advance in English composition and literature.
James Bruce Hepburn

THE JEFFREY JAMES HAROLD PRIZE-For the first-year student with the highest standing in electrical engineering.
Julie Anne Bires

THE JEANNINE C. LIUTKUS '93, MEMORIAL PRIZE-To the Bucknell en France student who, through individual initiative and perseverance, improved his/her proficiency in French, made the most of the opportunity to live in the French culture, and showed significant personal growth.
Micah Bartholomew Schweizer

THE JOHN A. WALLS PRIZE-For the sophomore student from Union County showing outstanding scholarship.
Nicholynn Rae Keefer

THE PRESIDENT'S AWARD FOR DISTINGUISHED ACADEMIC ACHIEVEMENT-established to recognize annually all students who have demonstrated, according to established criteria, a high level of academic excellence.

FORUM

OPINIONS

And that has made all the difference

From the Editor's Desk

Jared Silliker

As many of you may already know, the faculty of the University has recently resurrected the question of whether the Greek system at Bucknell should be eliminated or made co-educational. Some argue that the system does little or nothing to support the academic mission of the institution.

I attended the last faculty meeting where the issue was addressed for only approximately 15 minutes because meetings are stopped promptly at 6:30 p.m. The group introduced new faculty members and discussed faculty representation in the presidential search process for the first hour and fifteen minutes.

As I sat there listening to Bro introduce the subject, and knowing well what was to come—had discussion continued—I couldn't help to think of what I would say if the faculty were to ask me what a student thought of the discussion to remove the Greek system.

So I would like to take this chance to explain some of those thoughts. For some, this may just be an interesting perspective. But if these thoughts could also better educate an under-informed faculty member that sees only the academic side of Bucknell, so that he or she might contribute more effectively at the October faculty meeting, than all the power to these words.

I was always a kid who thought that I didn't need the Greek system.

I knew that Bucknell had a Greek population, but did not come here because of that aspect. Sure, I went to fraternity parties as a freshman, but never thought I would rush and join a Greek organization. I felt as though I didn't have enough time or money to support what little interest I possessed.

This is not how it worked out, however.

No, life at Bucknell turned out much, much different.

I went through rush with my friends to get a taste of the system, but was still considerably unsure about pledging. I received a bid from Phi Gamma Delta and realized that many of my good friends were going to pledge there and decided to give it a chance.

And that, as Robert Frost writes, has made all the difference.

Sure, I would have been a fine independent, but the challenges, responsibility and experiences that I've encountered through Greek life have rounded out my college career in a very unique way. These are the intangibles that I will carry with me beyond Bucknell—lessons that can not be taught in the classroom.

To some, Greek organizations are seen merely as drinking clubs. Yes, there are those types out there, but me and many of my peers, Greek life is so much more.

It is a chance to form life-long friendships through common goals, values and activities. Whether we are organizing events, competing in intramural sports and helping in the general upkeep of the house, we are strengthening the bond that makes us brothers. There are virtually unlimited facets involved in running a fraternity—many of which I was unaware of upon pledging. This experience can only augment my academic career, preparing me for future life after Bucknell.

My association has allowed me to deal with many different types of people, some of whom I would have never met without our fraternal connection.

In the end, Greek life has positively exceeded my expectations by a longshot. Even when deciding to pledge two years ago, I was still worried that I was delving into a problem area. My skepticism was thwarted quickly and completely, though, and has turned into a wholehearted devotion to my fraternity and brothers.

And that, faculty members, would be a shame to deny future Bucknellians.

Persecution against Christians or just another random shooting?

By Rebecca Rowland

Last week, a man walked into Wedgewood Baptist Church in Fort Worth, Texas and began shooting. Armed with two guns, he strode into the church and opened fire on a youth prayer meeting shooting 14 people. Seven of the people shot were killed, including the gunman who shot himself after the spree was over.

Combine this incident with the shooting deaths of several students while they attended a high school prayer meeting in West Paducah, Kentucky and the students killed for their belief in God in the Columbine massacre and some people begin to see a pattern. It is the current belief of the Evangelical community that they are the new victims of hate crimes in America.

Evangelical's hold a strict belief in the Scriptures and are a minority in the Christian community. They are considered the most conservative branch of the Christian faith and have found a leader in the form of, surprise surprise, Jerry Falwell. When questioned about the recent killings, Falwell responded in a typically Falwell-ian manner, saying "Most hate crimes in America today are not directed toward African-American or Jewish people or gays or lesbians, they are directed at evangelical Christians."

Yeah right Jerry, and the Holocaust never happened either. The recent killings are horrifying; in a world that is increasingly becoming more inter-connected, that is sharing new ideas and encountering many that do not gel, it is a tragedy to see yet another incidence of violence over an ideological difference. But to assert that these crimes have not only turned Christians into victims of hate crimes but that they have surpassed those crimes perpetrated against Blacks, Jews, and gays is ridiculous.

Let's consider what other horrible things are happening in the world today; three men are being tried in the dragging death and decapitation of a black man in Texas, people are still memorializing the beating death of Matthew Sheppard, a homosexual student at the University of Wyoming, and last month a man walked into a Jewish Community Center in L.A. and opened fire. Gee Jerry, looks like everyone is getting the shaft lately.

The man responsible for the shooting in the church, Larry Gene Ashbrook, did not explicitly say that the reason he killed these people was because of their religious beliefs. When police searched his home, they found many signs of psychosis: holes punched in the walls, cement in the toilets, journals detailing plots to kill him. Neighbors related stories of his exposing himself and ranting and raving. Normally, hate crimes are categorized as so because the perpetrators intentionally targets their victims because of race, gender or religion. It seems to me that Mr. Ashbrook is, to put it simply, nuts.

He is a deranged loony, mad at the world. What he is not is three rednecks luring a black man into their car so they could torture him later. He is not two self-proclaimed "cowboys" who lured a gay man into their truck so they could kill him. He is not a card-carrying member of the Knights of the Christian Brotherhood killing little Jewish children so they cannot "propagate the teachings of Satan." He was a loony who walked into a crowded place and killed some people before he took his own life.

In a typically moral majority move, the right-wing Christians have decided that even their misery and persecution are more important and wide-spread than that of minorities.

One of the major tenants of the Evangelical sect of Christianity is the worship of martyrs. These recent killings have made martyrs of their victims. Imagine that; real, live, modern martyrs! I in no way want to trivialize the deaths of these, sadly, young people. I merely think that, due to one of the beliefs of their religion, they are over-zealous to call these crimes "hate crimes" perpetrated against them because of what they believe and name the victims martyrs.

Jerry Falwell's comment, at least in my opinion, weakens sympathy for the Christians. Every human feels empathetic when another is killed, but Falwell's comment was an attack on the history of Jews, Blacks, and gays. In one fell swoop it negated an entire lifetime of suffering for them. Would you be sympathetic if someone said that their plight was more important than yours?

The recent killings of Evangelicals are terrible, touching and traumatizing. But let's keep things in perspective. In a typically moral majority move, the right-wing Christians have decided that even their misery and persecution are more important and wide-spread than that of minorities. And if Jerry Falwell wants to win this competition, it's certainly fine with me.

(All specific details were found in the Sept. 27 issue of Time*)*

POWER OF THE PRESS

Eager for entertainment? Join the Concert Committee!

By Jim Leahy

As the many fans of Counting Crows begin to purchase their tickets on October 4th for the November 12th concert in the fieldhouse, many will probably be wondering, "why can't we do this more often? Why can't we, as a major university, attract more comedians, concerts, and other big entertainment?"

Well, don't complain too much. The Concert Committee is doing its best to schedule these events and come on, Lewisburg is a nice area but it is not exactly New York City or Boston. We are stuck with what we can import here.

Last year, the concert series was a huge success. Judging by its legacy, Dave Matthews was the biggest success of all. There was a nice intimate crowd in the Weis Center that was enchanted by the music that Dave and Tim Reynolds played for what was over three hours.

Another factor in the magnitude of that performance was the magnitude of the performers; Dave Matthews is quite possibly one of the biggest names in music today.

This year the first concert is Counting Crows. They are another popular group of today and should be a great performance. Also, this week the hypnotist that was here during orientation week is coming back to do a lecture/encore performance in the Forum. He was great as far as I am concerned. I was laughing till my sides hurt during that show. Bring him back next year! There is also a comedian lined up for a weekend in late October or early November.

Now, I like music and I like the groups that have come to the school in the past, but what I really love is something that will make me laugh. I love it when a good stand up comedian brings me to tears with his constant stream of outlandish remarks and equally silly one-liners. Here at the university, where the work is so intense, a good catharsis for all of the stressed out students would certainly help.

So how do we get more of what we want? Again I call upon you, the student body, to get involved. The Concert Committee is a student organization run by your peers. If you like concerts to ride into town and play within minutes of your residence, join or let them know you care. If you want other events to come to Bucknell for your enjoyment, find someone who is in one of those organizations and tell them what you think. You will be surprised what a little persuasion can do. Lots.

So if you are sitting in your room on the night of November the 12th with nothing to do, remember, there is a concert going on a few blocks away and you are not there because you chose not to be.

Take advantage of the social activities that are presented to you and don't complain about their scarcity of social options if you don't. They are there for your enjoyment and pleasure.

UNIVERSITY NOTICES:

Bucknell in London—Fall 2000 interest meeting

The first meeting for students interested in the Bucknell in London, Fall 2000 semester is next week. We will host an informational meeting on Tuesday, September 28, at 8:00 P.M. in Taylor 113. The theme for the 2000 program is Economic, Technological and Social Change from the Industrial through the Computer Revolutions. If you are interested in the program, but unable to attend, please email or call one of the faculty directors: Jean Shackelford, Economics (jshackel@bucknell.edu or 73441) or Patricia Wenner, Computer Science (wenner@bucknell.edu or 71266).

Faculty-Greek Open Forum set for next week

Greek leaders and faculty members will meet next Thursday, Sept. 30 in the LC Forum to discuss the faculty's recent motion to evaluate the validity of the Greek system. The entire University community is invited to pose questions and concerns.

The Bucknellian *is now hiring for the following paid positions:*

Circulation Manager

Assistant Business Manager

Advertising Designer

Sports Statistician

No experience is necessary—all new employees will be trained.

If interested, please contact Jared at 577-8495 (silliker @) or Chris at x75172 (cellis@).

Christy's is a Parents' Weekend favorite

Celebrated a capella groups the Silhouettes, the Bison Chips and Two Past Midnight will perform a concert in Rooke Chapel

Scott Solomon-The Bucknellian

The Bison Chips rehearse to perfect their performance this weekend in the Chapel.

By Allison Bagby

Returning once again as a favorite University tradition, "Christy's" is a sophisticated and fun showcase of the three a capella groups on campus: the Silhouettes, the Bison Chips and Two Past Midnight.

"Rehearsals have been going wonderfully. We've been putting in long hours getting ready and our three new members are doing a great job learning the old music as we all work on learning some new music," Silhouette member Amber Riley '01 said.

The Silhouettes' set will include five new songs. Arranging the music themselves, they listened to recordings and wrote out the parts that fit each individual member's abilities. Then they edit their parts to polish the song.

"It's been a lot of work to learn all the music and polish it for the performance, but it will be worth it come Friday and Saturday when we sing to full houses in the Chapel," Riley said.

The Bison Chips have been hard at work preparing for their season which opened last Saturday at the half-time show of the football game.

The Chips have spent the majority of their rehearsal time reworking old songs and focusing on sounding good, said Chip member Alex McCausland '02. The members are very secretive about the possibility of a performance of a new song.

In addition to "Christy's," the Chip's new CD will be released as soon as the details are finalized. The Chips are also organizing an alumus event celebrating the 25th anniversary of the group for Homecoming 2000.

Two Past Midnight is excited with the progress of their rehearsals. "The six new members are very talented musicians and learners who have taken to the a capella life well," Matt Griffin '02 said.

Two Past's set will most likely include an Indigo Girls' number, Madonna's "Express Yourself" and an old favorite "In the Still of the Night." The songs can all be previewed from each group's website as well.

The Silhouettes, the Bison Chips and Two Past Midnight will perform "Christy's" at 9 p.m. tomorrow and 8 p.m. Saturday in Rooke Chapel. Tickets are $5 and can be purchased in the CAP center, LC 306. Advance purchase is strongly recommended.

Scott Solomon-The Bucknellian

Members of Two Past Midnight enjoy themselves at a final practice before their appearance at "Christy's."

"The Most Massive Woman Wins" makes campus debut

By Sahana Ravindranath

This Parents' Weekend, a little known play will make its campus debut. "The Most Massive Woman Wins" will be showcased under the direction of Renee Brody '00.

Written by Madeleine George, the show portrays a group of four women dealing with issues about weight, eating disorders and self-respect. "All of the issues covered in the play are extremely common amongst young women, but are rarely addressed publicly" Brody said.

"I wanted to produce this show to raise awareness about disorders women suffer as a result of their warped body images," she said.

The objectives of "The Most Massive Woman Wins" are skillfully executed by four actresses who were selected through open auditions held at the beginning of the month. Ibby Cizmar '03, Mollie Martin '02, Spring Potoczak '01 and Katrina Stavnes '00 will play challenging roles. The actresses blend their own opinions of their character's serious situation with the various emotions and psyches of their respective characters.

With only three weeks to stage the show, everyone involved has been hard at work. The late night practices and dress rehearsals were made possible by the help of theater technicians who will also provide critical support during the performances.

David Carpenter '00 will be the Lighting Director and Karen Johnson '02 will be the Stage Manager. Throughout the performance, they will provide crucial props, sets and lighting to enhance the atmosphere of the play.

As a former student of the directing class, Theatre 240, Brody developed the skills necessary to stage a showcase performance. As a director, Brody selected the show, actresses and technicians while meticulously running each rehersal.

"This is a powerful play that is both entertaining and humorous. It also brings forth an issue that is very important and needs attention," Brody said.

"The Most Massive Woman Wins" will be performed at 8 p.m. Friday and Saturday in the Tustin Studio Theatre, located next to the Gateways.

John Ehlens-The Bucknellian

Katrina Stavnes '00, Spring Potoczak '01 and Ibby Cizmar '03 surround Mollie Martin '02 in a scene from the showcase they will star in this weekend in Tustin Studio Theatre.

"The Sixth Sense" gets rave reviews and stuns audience

courtesy of Touchstine Pictures

Bruce Willis and Haley Joel Osment star in "The Sixth Sense," a chilling thriller now playing in theaters.

Andrew Kohn

I have just seen the best movie ever. If you haven't seen "The Sixth Sense" yet and plan to then what are you waiting for? I have rarely seen a movie that stays with me long after I have left the theater, but this movie's power has a lasting effect.

The questions "The Sixth Sense" addresses are mind-blowing — What would it be like to see dead people? Would it be a curse or a blessing? "The Sixth Sense" does not answer these questions directly, but leaves them open for the viewer to decide.

The three stars are fabulous. Though I am not a Bruce Willis fan, he is both touching and convincing as he plays a psychiatrist who is shot by a disgruntled patient in the first five minutes of the movie. Haley Joel Osment is breath-taking in his role as the boy who can see dead people. He possesses an ability to captivate the audience many actors five times his age will never achieve. His grace and maturity will undoubtedly earn him an Oscar nominee. Toni Collette plays the mother of Cole. You might remember Collette from her role in "Murial's Wedding." She hides her Australian accent brilliantly and delivers an Oscar worthy performance as well.

"The Sixth Sense" is both moving and thought provoking. The story follows Cole and his struggle to cope with his "sixth sense." The story reaches it's most touching moment at a funeral where Cole communicates with a dead little girl. I won't ruin the outcome but it is a tear-jerking event.

Another profound moment in the movie is when Cole finally tells his mother that he sees "ghosts" as he explains his power to relay messages from his deceased grandmother to his mother. In this moment the two actors shine!

"The Sixth Sense" is possibly one of the best movies I have ever seen. The ending is such a surprise that I dare not even hint at it and spoil the suprise. I was so shocked by the ending that days after seeing the movie, it still amazes me.

This is not your typical horror movie. "The Sixth Sense" is a masterpiece that will unquestionably earn countless Oscar nominations and continue to please audiences for years to come.

Late night music series featured at Seventh Street

By Rebecca Wahl

Do not go to the Seventh Street Cafe on Friday nights if you are looking for silence and solitude. This is one night each week when the Cafe becomes host to a wide range of musical talent.

The Seventh Street Late Night Music Series began last semester when Lauren Bond '00 asked CAP if she could head a University music series that showcased lesser known musicians in an intimate setting. Bond was then given the go ahead to run the program through the Bucknell Activities Council. The Seventh Street Cafe was secured as the location for the performances and Bond went about booking various musicians.

Though Bond is currently spending a semester in Brazil, the Seventh Street Late Night Music Series continues to thrive. Ursula Anderson '00 has taken over the program and is working to bring her own edge to the series. Anderson described the music of last semester's series as "very folky" and says she hopes to diversify the talent this semester.

Although the first few bookings remain true to the folk genre, Anderson hopes to include spoken word, native American and other multi-cultural performances in the near future.

Tomorrow night, the Late Night Music Series welcomes acoustic guitarist Dana Eidleman to the Seventh Street Cafe. Future performances already booked include guitarist Rachael Mc Cartney on Oct. 1, Toronto blues band, Undesirables, on Oct. 22 and pianist Magdalen Hsu on Nove. 5. Oct. 29 is booked as an open-mike night for University students wanting to perform spoken word, music or interpretive dance. In addition, five evenings, beginning in early October, have been reserved for students desiring their own performance time.

Anderson said the music series is a great alternative for students because it is the only University sponsored activity which lasts past 11 p.m. Already this semester, the performances have been attended by large crowds and Anderson hopes things will only get better.

"It's a good opportunity to hear up and coming artists that don't necessarily have a record deal but are really good," Anderson said.

The Seventh Street Late Night Music Series takes place every Friday from 11 p.m. to 2 a.m. All performances are free.

To learn more about the open mike night planned for Oct. 29, contact Hilary Mainka. Students interested in the five open bookings should contact Daniel Morel. Those wanting to get involved with the series planning committee contact Ursula Anderson.

Impress your Parents, write for A&E...call Courtenay x4070 or email: mastain@

Gaelic Storm takes over Weis Center Saturday night

Courtesy of www.gaelicstorm.com

The sounds of Gaelic Storm flood campus on Saturday night.

By Robin Manning

As if the University has not already had its share of storms this past month, get ready for another one even stronger and livelier than the others. This storm promises to be loud, rowdy and uncontrollable. The time has come to batten down the hatches and take cover in the Weis Center because a Gaelic Storm is on its way.

Five people met in a seaside pub in Santa Monica one night and discovered their similar interest in music. They stem from all over the globe and came together to play Celtic music the way it used to be played in pubs in the Old World.

Patrick Murphy from Cork City, Steve Wehmeyer from New York, Steve Twigger from Coventry, Samantha Hunt from Zambia and Shep Lonsdale from London all comprise the band Gaelic Storm.

Famous for their steerage party scene in the hit film "Titanic," Gaelic Storm's upbeat music sets toes tapping and bring a smile to faces with creative lyrics and festive dancing.

"Their music is the heartbeat of this film," said James Cameron, director of "Titanic."

"We have one hell of a good time playing this stuff," Gaelic Storm said. "Our goal is to make sure more and more people have a chance to share in the good times, and to make sure the music never stops," Gaelic Storm said.

Gaelic Storm will hit at 8 p.m. Saturday in the Weis Center.

Boland, contemporary poet and essayist visits university

By Jolene Hart

As the central event in the University's fall Irish Focus Semester, contemporary poet and essayist Eavan Boland will share her knowledge of poetry and Irish tradition with the campus community.

Apart from the Irish Focus program, Boland is also the featured writer in the fifth annual Sandra and Gary Sojka Visiting Poet Series, which hosts a distinguished poet at the University each fall.

A professor of English at Stanford University, Boland is internationally recognized for her works, specifically her poetry and essays. She had previously been writer in residence at such notable institutions as Trinity College and University College, Dublin. As the recipient of numerous awards, including the O'Shaughnessy Award for Poetry, the Irish Prize in Poetry and the Lannan Literary Award, Boland brings a wealth of knowledge and talent to share during her appearances in the coming week.

According to John Rickard, associate professor of English and chair of the department, Boland's works have long been admired and favored by students and professors alike, rendering her an appropriate choice for the focus semester.

Boland has published a total of 12 volumes of poetry, her most recent publication is *The Lost Land* (1998). She has also published a book of essays, *Object Lessons: The Life of the Woman and the Poet in Our Time* (1995). Her writings have been characterized by experimentation in areas such as form, language and theme.

"Boland's writings are very conscious of women with a strong focus on everyday life. She works to represent those who were not able to tell their stories," Rickard said.

Much of Boland's writing examines issues of Irish identity, sectarian violence, history and the place of women in Irish tradition.

Boland will present her works at a poetry reading, at 8 p.m. Tuesday, Sept. 28, in Bucknell Hall. Following the reading, there will be a reception and book signing. In addition, Boland will hold a lecture at 8 p.m. Wednesday in Bucknell Hall. The lecture, "Reimagining Ireland," will cover myths and images surrounding Irish nationalism, including the roles of women in the struggle for independence. The events, made possible by the University's Association for the Arts, are open to all.

courtesy of the Stadler Center for Poetry

Eavan Boland is featured as the central participant in the university's Irish focus semester and also part of the Gary Soika visiting poet series. Boland will hold a poetry reading and a lecture this week in Bucknell Hall.

Irish drama to be performed this fall

By Krista McCabe

Stephanie Metz-The Bucknellian

Students practice using an Irish accent for their upcoming performance in "Tea in a China Cup." The mainstage will be performed this October in the Powers Theatre.

During the past few weeks, the Department of Theatre and Dance has been working on the fall mainstage, "Tea in a China Cup." A contemporary Irish drama by Christina Reid, the show will be directed by Bob Gainer, associate professor of theatre. The production is in conjunction with the University's fall focus semester—"Imagining Ireland."

In order for the actors to accurately portraytheir characters with authentic Irish dialect, the department received support from the Bucknell Association for the Arts to invite a professional voice and dialect specialist to work with the student actors.

Barry Kur, a theatre voice/speech specialist from Penn State University's graduate acting program, ran both a public Irish dialect workshop as well as a special afternoon coaching session for the actors.

The workshop began with the participants becoming aware of the resonance of the Irish dialect and the general posture of the mouth. The participants were made aware of the vowel and consonant changes from American English to English with an Irish Dialect. Kur said the participants did very well as he listened and coached the actors as they read through their scenes.

"Intelligibility should not be sacrificed for accuracy," Kur said. "My years of stage experience have taught me that in my theatre coaching I will never please the audience member who is a native speaker. I must serve the play, its theme and the general audience," he said. The actors felt very secure with the dialect after the workshop.

"We studied parts of his text that went over the Irish pronunciation of vowels and certain letter combinations. Since his visit, the actors have been sworn to speak only with their Irish accents in rehearsal because, as they say, practice makes perfect. In order to further perfect our accents, we watched Lucky Charms(yes, the cereal) commercials dating from 1971 all the way to present day," Jay Klaitz '00 said.

Set in Belfast, "Tea in a China Cup," spans more than three decades in the life of a Protestant family. The story focuses on the differing experiences of three generations of mothers, daughters and sons in a working-class family. The play's main focus deals with ethnic, religious and family differences.

The play mixes realism, poetry and humor to portray the main character in her search for her own individuality in a tradition-bound, violent and prejudice-laden environment.

"Tea in a China Cup" will be performed at 8 p.m. on Oct. 22, 23, 24 and 25 in the Harvey Powers Theatre in Coleman Hall. Tickets are $5 and can be bought either at the Langone Center box office or at the door on the night of the performance.

FEATURES

Allegheny activists spread the word

By Elizabeth Fiedler

With so many forests in Pennsylvania, an obvious question is, what is so special about the Allegheny Forest? First, it is the only national forest in the state and is constantly under the desirous glances of the logging companies. Second, the national forest is home to various species of wildlife and flora. Most notable perhaps is the Indiana bat, whose presence has been cited by the Forest Service as a key in the logging halt. Third, Minister Valley, one of the last remaining areas of old growth forest, exists in the Allegheny.

With the Allegheny Forest's importance clear, the connection between last week's Allegheny Forest Defenders Workshop (AFDW) and its University sponsors, Student Environmental Action Coalition (SEAC) and the Environmental Residential College, is not difficult to understand. However, the intricacies of the AFDW's mission are perhaps not what one would expect. The workshop was composed of three separate presentations, which were presented by two members of the Allegheny Defense Project, Jim Kleisser and Gina Giazzoni. The 45-minute workshops included "The History of the AFDW," "The Zero-Cut Campaign" and "Getting Involved in Forest Activism."

Courtesy of Jim Kleissler

Trees marked for the chainsaw at Minister Creek.

The history of the Forest Defenders is not complicated, yet there are a few notable points about the AFDW's goals. The organization has been in existence since 1992 and has devoted itself to protecting the Allegheny Forest by increasing public knowledge on the controversial topic and by lobbying for legislative support.

According to senior Andrew Taylor, the president of the SEAC, the activists have made themselves heard in numerous ways. "The activists camp-out in the forest where they lead hikes through the forest to show visitors the clear-cut areas. At the end of these camp-outs they usually have a protest. They also have workshops at the camp-outs where information is presented on their goals," Taylor stated. He also added that the activists are against clear-cutting the Allegheny National Forest because this process kills all of the trees while the logging companies replant only the valuable cherry trees. These cherry trees only naturally account for 4% of the forest, leading to a disruption of the healthy ecosystem.

In an effort to end the practice of "clear-cutting," the Forest Defenders promote the implementation of the "Zero-Cut Campaign" across the United States. "This [the campaign] would mean that no trees can be cut down in national forests because these lands are owned by the public," clarified Taylor. "They [the Defender's] are not opposed to all logging, they are only against logging in the national forests ... companies buy these forests at a low price and then sell the lumber for a very high price; as a result they make a large profit," he added.

According to Taylor and to the Hellbender Journal, the Activist Journal of the Allegheny Defense Project, logging on national forest land only accounts for 4 percent of total U.S. logging. Therefore, the Zero-Cut Campaign would not noticeably decrease the profits made by the logging companies. The activists have been traveling throughout Pennsylvania, New York, and Indiana for the past two weeks. This tour is an attempt by the organization to increase awareness about the Forest Defenders' mission and to increase the public's knowledge about the happenings in the Allegheny Forest.

"On March 30 the United States Forest Service agreed to a moratorium, that is to stop all logging in the Allegheny National Forest. This is definitely a step in the right direction for them [the Forest Defender's], but now the Forest Service is trying to start logging again in the fall," said Taylor. With the history of the AFDW clear and the organization's support of the "Zero-Cut Campaign" explained, the necessity for public support and involvement is evident.

Along with the previously explained AFDW workshops and protests, the more common letter-writing and e-mail campaigns to government representatives are other options. These actions, in addition to the circulation of the Hellbender Journal and the AFDW's touring, have helped to spread the word about the precarious state of Pennsylvania's only national forest. It is this uncertain future of the Allegheny National Forest that motivated the SEAC president to bring the Forest Defenders to campus. "I think it is important here at Bucknell because the Allegheny is in the area and I don't think that most people know that the national forests are used not only for preservation, but also for logging. I think that if more people knew this, then they would speak out against it," said Taylor.

Wink Thinks

Jacqueline Flicker—The Bucknellian

Dear Wink,

This year I am living with a guy whom my girlfriend thought I would get along with.

Although I had never met the guy until the end of last year, I had faith in the fact that my girlfriend was a good judge of character and therefore I trusted that I would get along with him. After all, I didn't have a roommate yet, and I thought doing this would make my girlfriend happy. However, after living with the kid for the last month or so I discovered that he is a totally different person than I remember.

The kid is basically just weird. It turns out that he is an aspiring poet, but, in my opinion, he is no good at it. He sits for hours upon end thinking of things to write about, and then when he does finally come up with something I am forced to listen to it over and over again. He is not a bad person; he's just not the same type of person that I am.

You see, I am the kind of guy who likes to watch Monday Night Football and wears Nikes, while he, on the other hand, likes to save trees and does not wear shoes. Not exactly my perfect match, wouldn't you say? The thing is that I am afraid that I will hurt his feelings if I move out, or at the very least ask him not recite his poetry to me. In addition, I am worried that my girlfriend will feel as though I am betraying her by not liking the kid. After all, I did in some ways do it for her.

Therefore, I ask you, how do I tell these people that things are not working out? Should I just live life not totally satisfied (but not miserable), or should I say something to both my roommate and girlfriend about the situation?

Sincerely,
Pissed at Poetry

Dear Pissed at Poetry,

There are clearly two issues here. The first is the differences between you and your roommate and the fear of letting him know how you feel towards him though you fear that it may hurt his feelings. The second is the apprehension you are feeling in anticipation of informing your girlfriend about the cold reality of your situation: that you dislike your roommate.

The question at hand here is whether or not you feel you can live with this kid on a daily basis or if in fact he will drive you crazy with his sub par poetry. To tell the truth, I am sure that there are tons of people who may not get along with their roommates as well as they would like to. However, this does not mean that they move simply based on a few personality differences.

On the other hand, if you feel as though you cannot live with this person and that he is making it difficult to spend time in your room, you may think about bailing on the kid. Before making any decisions I think that it would be wise to tell him that his poetry does not especially interest you. It may hurt his feelings a bit, but I think that he will understand. After all, you are simply stating your feelings and there is nothing wrong with that. I don't know about the lack of shoes issue, but you can handle that however you want to. The main issue here is that you let him know how you feel in a direct but polite fashion.

The second issue here, your apprehension about telling your girlfriend how you feel, may not be a very big deal. Theoretically, your girlfriend should have no problem respecting your feelings. She should be there for you more so than for your roommate, and if she cares about his feelings more than yours, you have a problem. I do not think that she will be offended. You need to tell her that you feel that you and your roommate have some differences that you did not anticipate. It could be that your girlfriend is an awful judge of character. For your sake I hope that is not the case. However, in the future I think that you should make decisions for yourself, rather than doing something to make your girlfriend happy. I am not saying that you should not make your girlfriend happy, but I don't think that rooming with someone she knows is the best way to go about it. Who knows, maybe she wanted you to room with him so she could use you as a means of getting closer to him. Maybe she likes guys who don't wear shoes.

The main point here is to choose your battles and don't be afraid to talk to your girlfriend. In any relationship communication and the truth make things so much easier, believe me I know.

In any situation the truth is better than living with pain or unhappiness. You should never be afraid to say how you feel. Though your feelings may hurt someone else in the long run it is for the better. Until next time relax, have fun, and let Wink's wisdom be your guide.

If you are interested in writing to Wink there is no need to worry—all questions are confidential and answers are always thorough. Health Center offers alternatives

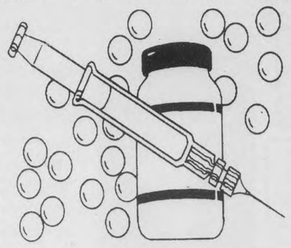
By Jennifer Leyton

Are you tired or stressed? Are you feeling run down? Does your neck hurt from those endless hours in front of the computer screen? Have you tried every medicine on the market and nothing helps? Fear not, there still may be an answer. The Student Health Center here at the University may soon offer alternative medicine to assist in cases where modern medicine has failed or where students are looking for new options in health care.

"Alternative medicines are a reality now," University physician Dr. D.W. Stechschulte said. As a result, he has become very interested in incorporating these new methods into his practice on campus. Stechschulte explained that these methods include Chinese therapies, massages and herbs. His only opposition is that he is not trained in these methods, but he is open to learning if students express interest.



Stechschulte and University Chaplain Ian Oliver have begun to teach a foundation seminar, "Lust to Dust: Creating the Balanced Life," on the subject. *Health and Healing* by Andrew Weil is used as the course textbook, and Weil's methods have become a starting point for incorporating these ideas into Stechschulte's practice.

The principle problem that many licensed doctors have with alternative medicines is that they are not regulated and so unfortunate accidents may occur. Stechschulte said that he has seen successes with these new techniques, but that he has also seen failures. Accordingly, the Health Center is not stocking any alternative medicines for regular disbursement but is willing to investigate the possibility of obtaining some for individual students who express interest. The Health Center also has a book available to students, *Integrative Medicine Access*, which explains all the alternative treatments for various diseases or illnesses.

The new techniques that the Health Center is interested in offering are those recommended by Weil in his book. These methods include organic diets, herbal medicines, mind therapies and massage therapies.

The Health Center wants to stress that this is something that they are open to learning more about, but they also have concerns because they do not know everything about alternative methodology. There is an on-campus organization called the Student Health Action Group that could vote for the availability of these medicines in the Health Center. However, there was not much interest expressed at the first meeting.

The Health Center is currently negotiating with an outside provider to come in and give therapeutic massages. There are a few legal arrangements that need to be finalized, but these massages should be available by the end of the semester. These massages would be available at an additional cost and student interest would need to remain high to continue them throughout the year.

There does currently appear to be some interest in these new methods. "Massages sound great—I wouldn't mind paying for one," Jenny Elkins '03 said.

As alternative medicine continues to become more popular, it is encouraging to see that the University is considering these new methods. In addition, it is also promising to note that this issue has been placed in the hands of the students. If the student body decides to pursue the alternative medicine practices, their needs will be met.

Brothers and sisters nurture children

By Meredith Shreiner

Big Brothers/Big Sisters is an excellent way for students to become involved with the community, to help and interact with children, and to have a profound effect on children's lives.

Big Brothers/Big Sisters is traditionally a program which matches an adult with a local child from a broken or nontraditional home, or with a child who needs a dependable relationship that offers unconditional support and attention. Since it is support and attention that the child needs, a match is usually required to spend four to five hours a week with him or her.

The children are generally referred to Big Brothers/Big Sisters by their own family, their school or by a friend. Some of the kids have recently lost a father or mother, or are isolated from one parent due to a divorce. The program allows a child to get positive reinforcement from an adult of the same gender.

Courtney Kasperski '00, the current president of the University's Big Brothers/Big Sisters program, was a Big Sister last year. "Overall my experience was enjoyable ... instead of it feeling like a huge time commitment, I looked forward to the time I spent with her every week," says Kasperski of her time with Megan, her little sister. She and Megan enjoyed their time together by going to the library, carving pumpkins at Halloween, cooking together, and just hanging out. At the time, Kasperski lived on a suite in Hunt Hall and Megan loved spending time with the girls. Their match ended when Megan began a new school several hours away. Megan and Kasperski are still close to one another and will always remember their time together. Before Megan left, Kasperski planned a special sleepover.

Kasperski, an education major, enjoys spending time with children and finds her time as a volunteer rewarding. If a student does not have the time to spend with a little brother or sister, there are always opportunities to help out with the Big Brothers/Big Sisters' events. This year some of the events that will be organized are a "girls only" field hockey or soccer game, a Halloween party with Alpha Chi Omega and a Bucknell football game with a picnic afterwards. In the spring both the volunteers and the children can look forward to roller-skating and a trip to Knoebels Amusement Park.

The time that you volunteer for Big Brothers/Big Sisters is not spent raising money. The University's program is sponsored by the Union County Big Brothers/Big Sisters, by the Bucknell Student Government and by the money raised during the Sigma Chi Derby Days. The time that a student volunteers is all spent with the community children. It is important that one acts as a strong role model and good friend to these children.

Students will be notified about the events approximately a week before they occur. And it is never too late! Big Brothers/Big Sisters is always in need of volunteers. Drivers are needed for each event as well. If any students are interested volunteering for Big Brothers/Big Sisters, they can attend a meeting or can contact Courtney at kasperski@bucknell.edu.

Stress on the job proves deadly

By Brienne Terril

Researchers have linked job strain with higher rates of heart disease and are investigating the effects of job-related stress on emotional health. Scientists in both Europe and Japan are looking at the influence of job strain on immune system function, oack and joint pain and depression as well as at ways to improve the workplace and reduce stress.

Workaholics, reported Cynthia A. Bonebright, a researcher at the University of Iowa, usually have more problems with work and family and show less satisfaction with their lives. Professor Kenneth B. Matheny of Georgia State University likewise reported that those who suffer the most from job-related strain are usually less confident and show indifference to their jobs.

"One-quarter of the American working population feels that their job is a highly stressful force in their life," Dr. Linda Rosenstock, director of the National Institute for Occupational Safety and Health stated. "We see it as a major issue," she said. Sources state that the current American workweek is the longest in generations, averaging approximately 47 hours.

According to *The New York Times*, the International Labor Organization has estimated that work stress costs employers more than $200 billion a year worldwide, and the World Health Organization has reported that about three-quarters of people who seek psychiatric help have symptoms that relate either to lack of job satisfaction or the inability to relax, said Matheny.

Although the United States is just beginning to recognize and acknowledge the harmful effects of stressful job situations, other countries such as Norway, Japan and Germany have long been aware of the problems. In Norway, government officials can investigate claims of employees being forced to work an overly repetitive job, or work too quickly, according to Robert A. Karasek, professor in the department of work environment at the University of Massachusetts, Lowell. In Japan, officials have acknowledged work stress as an occupational cause of death, or *karoshi*, for more than 20 years. Some workplaces in Germany offer "health circles" where employees gather to discuss sources of job stress and devise solutions, according to Karasek, who also said that a level of trust needs to exist before such communication can ever occur.

"The United States is significantly behind in focusing on the issue," Karasek said.

He remains disappointed in the U.S. response as compared to that of Europe and Japan. "What I think the problem in the United States is, is the lack of social dialogue or the willingness of employers, workers, family members, politicians and the general public to talk about stress at work," he said. "It's not that the problem is more severe. Itis that the solution is less likely to be applied."

Tipping our hats to an amazing Cold War relic

By Matt Markl

High, powerful, fast and efficient: words that hold true when applied to the latest military aircrafts, pumped out by the Boeing Corporation, Lockheed Martin's Skunk Works and various other aerospace manufacturers. But, by looking back in time, we discover many incredible aircraft. One of the most impressive was the XB-70 Valkyrie.

In the late 1950s during the height of the Cold War, both the Soviet Union and the United States attempted to develop new weapon systems which could deliver a nuclear payload to any target in the world. Before the advent of advanced intercontinental ballistic missiles and other long-range guided munitions, both the Soviet Union and the United States had to rely on aircraft to do this job. The aircraft that was created by the United States was called the XB-70 Valkyrie.

Courtesy of NASA

The performance of the XB-70 was impressive, even by today's standards.

The Valkyrie was an aircraft that was ahead of its time. Built to fulfill the role of strategic nuclear bomber, the XB-70 had to meet stringent requirements. Among the most important abilities which it was required to posses was the capability to fly exceedingly high and fast for long durations of time while carrying an extremely large payload. The Valkyrie met and surpassed all of these requirements.

The plane itself had a cruising altitude of 75-80,000 feet and a cruising speed of over mach 3. However, the plane was capable of achieving speed far higher than that for short bursts over enemy territory. The amazing velocity of the plane was provided by six jet engines. Each power plant was capable of producing over 30,000 pounds of thrust. The speeds that the Valkyrie traveled at were so high that the friction of the air flowing over the plane's airframe would heat the aircraft's skin to a blazing 1000 degrees Fahrenheit. The XB-70 could sustain a pace of mach 3 for over 3,500 miles.

To maximize its speed and its air time, the Valkyrie's wings were adjustable. This was achieved by hinging the wings. As the speed of the aircraft changed, an internal system adjusted the wings' angle in respect to the fuselage. This would allow the XB-70 to cruise at high speed while maximizing fuel efficiency.

The physical feats accomplished by the Valkyrie were made even more amazing when one examines the sheer size of the plane. With a fuselage length of 186 feet, a wingspan of over 100 feet, and a takeoff weight of over half a million pounds, it is hard to believe that this goliath could take to the air.

However, the XB-70 program was cancelled in 1961 due to a shift in weapons technology. With the creation of more effective missiles, the idea of building expensive manned aircraft took a back seat, despite the arguments of many for its continuation. The two surviving planes were used as test beds for NASA research projects involving high altitudes and high speeds.

Though the Valkyrie never saw service, the plane itself was an amazing leap in aerospace technology. Few planes have ever approached its cruising speed, let alone its top speed. Some of the plane's technology was even used in the U.S. space program. We should look backwards and tip our hats to a plane no one has ever heard of, a plane called the Valkyrie.

Pigeon Massacre Cancelled

Since 1934, Hegins tradition has killed or wounded thousands of birds.

By Alex Piel and Katherine Nowak

Animal Rights advocates across the world were celebrating last month at the announcement of the cancellation of what some have called the "world's cruelest event." Held at Hegins, Pennsylvania, the annual Labor Day Pigeon Shoot attracts shooters from across the globe who compete for prizes and money as they gun down an estimated 5,000 birds specifically raised for the event, some of which have never flown.

"It has been more than a decade in the making, but we have finally seen a victory for Pennsylvania's pigeons. For the first Labor Day in 66 years, birds will not be cruelly wounded and killed at Hegins Park," said Heidi Prescott, National Director of The Fund for Animals.

Last year activists created a human road block by linking their arms within 10-gallon containers of concrete, closing the main road , Route 24 from Interstate 81, 30 miles northeast of Harrisburg. The activists could not be moved for ten hours. Nevertheless, the shoot took place and the protesters dashed after wounded birds, hurrying them to veterinary attention in the parking lot.

Organizers of the event claim that it is a philanthropy, raising up to $40,000 for the park and for local charities. The shoot began in 1934 and ever since has been attracting over 10,000 participants. This year, it came to an end.

The cancellation of the event by the shoot organizers was brought forth by last month's unanimous Pennsylvania Supreme Court decision, granting Clayton Hulsizer, a humane officer for the Pennsylvania Society for the Prevention of Cruelty to Animals, jurisdiction to enforce Pennsylvania's cruelty to animals law at the Hegins pigeon shoot. To obtain the right, Hulsizer had to present testimony from multiple veterinarians, which pointed at evidence that only 25 percent of the shot birds were killed upon impact. Documentation of the wounded animals was presented. The remaining 75 percent of the birds were killed by "trapper boys," young boys hired to collect wounded birds and kill them by stomping, decapitating or suffocating them.

The Fund for Animals also contributed to the protest, compiling about 27 certificates signed by producers, screenwriters and actors, including Alec Baldwin, Alicia Silverstone and Dennis Leary. They urged Governer Tom Ridge to stop the event.

"The Hegins pigeon shoot has often been called the world's cruelest event. It is a hallmark for the humane movement to put an end to this annual atrocity and save thousands of animals from suffering," said Michael Markarian, Executive Vice President of The Fund for Animals. Although the event is scheduled again for next year, animal rights activists insist that we have seen our last pigeon shoot.

Courtesy of Satya Magazine

This pigeon, like thousands of others at the pigeon shoot, was wounded and rescued. Here, a veterinarian mends its wing.

Courtesy of Satya Magazine

Wounded pigeons were rushed into medical camps outside the shoot field by dedicated animal rights activists to undergo lengthy veterinary attention.

Bacterial and viral attacks lead to development of mental disorders

Infection has emerged as prime suspect in psychological illnesses

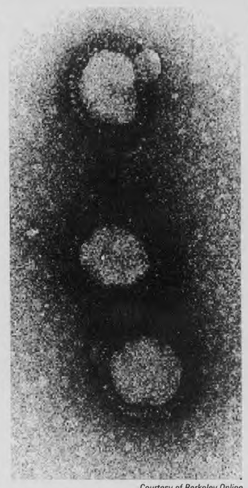
By Katherine Nowak

Experiences, genes and now infection point at mental illness. The bacteria and viruses responsible for minor ailments are now theorized to be major contributors to mental and emotional ailments such as anorexia, schizophrenia and obsessive-compulsive disorder, reports *Psychology Today*.

While Freud's claims and geneticists' data may appear at odds with this theory, Susan Swedo, M.D., chief of pediatrics and developmental neuropsychiatry at the National Institutes of Mental Health, stresses that emotional trouble cannot be fully explained by poor parenting or faulty DNA.

Genetics, *Psychology Today* elaborates, does not fully account for the development of psychiatric illnesses. Identical twins would develop schizophrenia with a higher degree of concordance than is presently observed, 40 percent, if heredity was the sole determinant. Autism, observed to run in families, arbitrarily strikes five of 10,000 children. Depression and other emotional disorders do not stem wholly from damaged DNA.

Historical examination does provide indication of the roles bacteria and viruses have played. Schizophrenia waves in England, Wales, Denmark and Finland have followed flu epidemics. The *New England Journal of Medicine* has reported unusually high rates of schizophrenia symptoms in children born during conditions of harsh weather and crowded areas- likely causes of respiratory ailments.



Courtesy of Berkeley Online

Influenza microbes, above, have been linked to outbreaks of schizophrenic symptoms in England, Wales, Denmark and Finland.

In the mid- 1990's, England was struck by prion, an infectious protein, resulting in an outbreak of Creutzfeldt-Jakob disease or "mad cow disease." 35 meat-eaters died after ingesting infectious beef, suffering from continual screaming, irrelevant laughter, improper hygiene and compulsive walking.

Syphilis, transmitted sexually or genetically through a mother's placenta to her fetus, is caused by the bacterium *Treponema pallidum*. In its final stage the disease prompts dementia, mania, depression, delusions and Tourette-like symptoms. *T. pallidum* attacks and kills brain cells, inflaming neurons and stripping some of myelin, the insulating sheath covering neurons.

The HIV virus leads to anxiety, delirium, psychosis and suicidal impulses by infecting macrophages, the immune-systems enforcers in the bloodstream. After hitching onto a macrophage, the virus invades the brain, releasing cytokines, protein peptides that destroy neurons. *Chlamydia pneumonia* may use this same strategy, ultimately leading to Alzheimer's disease.

Streptococcal bacteria, which causes strep throat, induces the immune system to release antibodies, after which the it camouflages, cloaking itself in proteins that imitate the body's natural proteins. The antibodies of some people the turn against their body's own tissues, killing off neurons in the basal ganglia.

Streptococci is very dangerous to young children whose immune systems are more vulnerable. Their bodies respond forcefully to streptococci, causing some children to develop obsessive-compulsive disorder (OCD).

Streptococcus isn't exclusively associated with OCD, but may be tied to anorexia nervosa. Eating disorders have been reported to worsen after strep throat infections. Tourette's syndrome and Sydenham's chorea are also linked to streptococcus.

Those with weaker immune systems and genetic susceptibility are less equipped to ward off viruses and bacteria, increasing their probability of suffering mental impairment, reports Psychology Today.

"We can start treating the mentally ill without shame or blame. We can treat them medically, Swedo comments, recalling the grief of parents who are impacted by their child's "socially unacceptable" illness.

Because many psychological afflictions can now be traced to a microbe, doctors will be more able to fight the onset of mental disorders by treating pathogens successfully.

Paying for it online: new technology enables e-commerce

By Scott Hagadorn

As more shoppers move to the web to make purchases, internet companies are finding new ways to collect payments. Currently, online retailers only accept credit cards for purchases. However, as newer forms of electronic content appear, like digital music, streaming video, books, and other downloadable information, forms of traditional payment become very unattractive to weary purchasers. These new forms of content are exactly what propelled an internet e-commerce company, iPIN, to produce a form of micropayment that would render small credit card transactions obsolete.

From the beginning of e-commerce, online businesses have yearned for the ability to charge a few cents for an old newspaper article or a new bill-board hit, tempted to problem cards and e-ago, but tract the use shoppers. At there simply you could pocket internet. iPIN plans on remedying that problem. iPIN has positioned itself to create a series of partnerships with some of the fastest growing retailers — digital music sites. Companies such as ArtistDirect, Cductive and Liquid Audio need an easy way to charge customers a dollar or less per song and see iPIN as the answer. As controversy over the MP3 format settles and copyrights begin to be recognized, this new form of payment will may just set the standard.

QPass absolve this with smartwallets a year failed to atof internet the time, was not much buy with change on the iPIN

The iPIN logo will be posted next to all items or services on the web that support it. When a consumer desires a transaction, they simply click on the logo and provide their iPIN password. The purchases are totalled over the course of a month and added to the Internet Service Provider bill, much like long-distance charges on your phone bill. iPIN's strategy also avoids credit card commissions, which add to the total cost of transactions for the online seller.

With the level of competition currently in the e-commerce world, it is not surprising that other e-content companies, such as Intertrust and Reciprocal, have also developed microcharge capabilities. Reciprocal currently has a partnership with Microsoft and its Window's Media Technology audio format. However, the simplicity of iPIN's system is what attracts e-content companies. Consumers may soon agree.

Part I of opinion survey on Kansas evolution decision

The following are replies of students enrolled in the University's Animal Behavior/Biology 370 Primatology course taught by Dr. Michael Pereira. Some replies have chosen to discuss the merits of evolutionary theory and creationism, whether religion and science can live harmoniously side by side, and if Kansas' decision is justifiable.

"It is ridiculous for a state in our current era to believe that Darwinism can be dismissed. With the ever-growing fossil record and common links made between man and ape becoming ever more common, evolution cannot be simply dismissed. No one can simply state whether Creationism or Darwinism is the "right" explanantion, but it is wrong for one to be held higher than the other."

-Andrew Kohn '01

"It's this simple: Our Declaration of Independence restricts the mixture of church and state. Yes it is true we see it everywhere: our pledge of the allegiance, our monetary system, our president's oath. However, if we continue to blend those two central issues, we will continue to encounter these types of problems. I can't believe students haven't boycotted school. I heard teachers fighting, but didn't see much about what the students thought. Can anyone help?"

-Alex Piel '01

"I think it is very hard to achieve a medium in which religion and science can live hand in hand considering the strong viewpoints that are held by members of these two fields. By the simple notion of freedom of speech and choice, people should have the right to learn about both evolution and creationism and decide for themselves what to believe. Knowledge should never be limited."

-Jessica Petermann '01

"Without question, religion and science can harmoniously live side by side. But, then again, "religion" is a big concept. Certainly, inflexibly literal interpretation of the bible is impossible to reconcile with much knowledge that has accumulated over the past two to three hundred years of science. Evolutionary theory is the conceptual framework for all of biology; so, it certainly has merit. The modes of Creationism that I understand appear to have no merit. There is an excellent book in our library on these matters by Futuyma, entitled "Science on Trial." I strongly advise everyone disturbed by their own or others' apparent impotence to respond effectively to Creationist arguments to read that book. Futuyma also cites much other literature helpful in countering fundamentalist opposition to evolutionary thought. Another interesting read that touches on this topic is Carl Sagan's post-humously published book "Billions and Billions."

The Kansas decision is a frightening blow against freedom of thought, speech, and education. In our society, no religion is supposed to be allowed to curtail or otherwise regulate the activities of "the state," and our society, wisely, hires persons with training in biology to teach biology. For our 21st century adult citizens (currently children) to have their educational opportunities so badly mismanaged and truncated is appalling."

Michael Pereira, Primatology Class Professor.

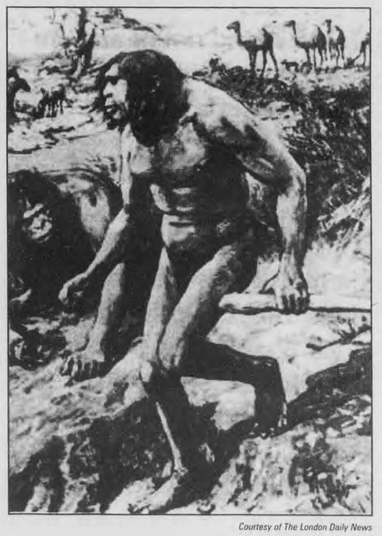
"I think religion and science can live side by side when people realize that both are religion. Evolution is a definitive fact, whether all animals were in the beginning produced by it, or whether species are formed as a result of it [natural selection], is debatable. If you take two white lab rats, that had parents that were white lab rats, and you breed them together, you get baby white lab rats. That's all evolution is.

I feel that there is no way to repeal the Kansas decision. You cannot force someone to test something on a national level. I hope that educators will be strong enough to keep teaching evolution now that their jobs do not depend on it."

-Eric Charles '00

"Religion has yet to make peace within it's own branches, and science has no intentions of appeasing the religious authorities. I think they are two separate issues. There is merit in all theories, because a variety of ideas are necessary for an impartial evaluation of life. Creationism is no less of a theory than Evolution, and objectivity is lost by clinging to either of these theories too tightly. Imposing laws on the process of thinking is not as unjust as it is pointless. Thinking is the one aspect of humans that remains untouched by imprisonment."

-Lori Oliver GR



Courtesy of The London Daily News

"I'm not outraged- just a little surprised that it actually happened.

Although evolution may be challenged over and over, it is an overiding theory of science, a discipline many leading politicians know very little. Considering most of these older men are die hard conservatives (both democrats and republicans), it's really not that surprising that the law was passed. The ruling really doesn't say much about evolution (anyone with scientific experience knows the magnitude of the "theory"); it really is more of a reflection upon how much money creationists can put towards lobbying."

-Tracy Morrison '00

"I feel that religion is a tool for teaching moral behavior in humans. Science is the unbiased study of reality. It doesn't matter what reasons enforce us to be moral but rather that we learn to behave in a socially acceptable way, which is the goal of religion. Science will always be the way to understanding our universe while religion will always be one of our mechanisms for learning right and wrong. Therefore these two can live side by side as long as we distinguish the value of each. I do hope in the future these two merge and by understanding evolution we can better evaluate what is truly right and wrong, rather than the basing our morality on the anthropocentric views of the present.

I find much merit in the theory of evolution. Many people have gone through painstaking efforts to provide us with accurate evidence that supports the idea that of life forms change over time. I find no merit in creationism because their arguments are based on fantastical believes and cynical views of scientific evidence. All of the work that has been done to scientifically prove religious stories has proven these stories inaccurate. If we rely on religion to give us the answer of our universe, we will always live in ignorance.

I radically oppose the Kansas decision. The church and the state are separated—end of story. Schools are state governed and therefore cannot be linked to any church beliefs, at all. To allow the Kansas decision to remain is to guarantee ignorance of one of the most important mechanisms used for understanding our world. Leave religions to preaching right and wrong, not to decipher where we came from. Religions might benefit from incorporating evolutionary thought processes into their thought, as it has lead to views such as Christian Stewardship which incorporates the proper use of our environment as a moral obligation. We could never think this way if we thought that a god has given the earth to us to use as we please and that he will protect us when things go wrong."

-Michael Gumert GR

"I don't feel it is fair to outlaw one view while still teaching the other regarless of the topic. In this case, I find it especially disturbing because so much of the scientific community supports the evolutionary theory. Students who have never even heard of it may be at a disadvantage following graduation. Personally, I had a Catholic education, and we were taught that there is no reason that you could not believe in evolutionary theory and still auhere to Catholic doctrines. I think allowing this ban is giving too much power to one group with certain views, and not giving students the opportunity to think and make desicions for themselves.

-Adam D. Haas '01

Job # 48516 Bucknell 9-22ad 12.83x21.5

Next Week:

Football vs. Colgate
Field Hockey vs. Lafayette
Men's Soccer vs. Niagra
Volleyball vs. Yale

THE BUCKNELLIAN Sports

Athlete of the Week
Men's soccer player Nick Taylor, whose first career goal gave the Bison a 5-4 victory over St. Francis.

Men's soccer win streak stopped at four

Freshman scores game-winner vs. St Francis, but Holy Cross proves downfall

By Katie Yingling

Scoring a goal is always exciting for a player; multiply that excitement about ten times to imagine scoring a game-winning goal. Now, imagine if that goal was your first ever goal in a collegiate game.

Just ask freshman Nick Taylor how that type of excitement feels. Taylor's goal broke a 4-4 tie last Wednesday, allowing the Bucknell men's soccer team to claim a 5-4 victory over St. Francis.

Although the Bison outshot St. Francis 25-16 in the game, they were unable to convert that dominance to the scoreboard. The game remained close throughout, with neither team taking more than a one-goal lead.

Junior Sam Chamovitz opened the scoring for the Bison, but the Red Flash answered only one minute later. Sam Graziano '01 pushed the Bison ahead 2-1, but that goal was also countered. St. Francis' next two goals didn't discourage the Bison, as senior Brian Carr scored two goals to carry the game into overtime.

Thanks to Taylor's tie-breaker, Bucknell walked off the field with a fourth victim to add to their winning streak. "I think this win really shows our persevering attitude as a team," said Carr. "We're not going to give up easily."

Unfortunately, the streak was broken this past Saturday when Bucknell came up against Holy Cross. The Bison seemed to have everything on their side; the sun was shining, the hill was packed with energetic fans, and the Bison outshot their opponent. But Bucknell couldn't find an answer for the two goals Holy Cross sent in the net during the first half and lost the game 2-0.

Mitchell Evans-The Bucknellian

The men's soccer team is playing well despite predictions of a poor season. They look for another victory this Saturday against Colgate.

Mitchell Evans-The Bucknellian

The Bison outshot St. Francis 25-16 in their 5-4 overtime victory. This win kept their win streak alive at 4.

Despite the loss on Saturday and the preseason rankings, which placed Bucknell at the bottom of the Patriot League, the team's record and enthusiasm remain high. "We have nowhere to go but up," said Graziano. That will hopefully be the case this week as the Bison fate their next Patriot League rival, Colgate, on Saturday. The next home game will be against Niagara this Tuesday.

Bison X-C faces national powers

By Rose Sedo

How do you compete against speed?

The Bucknell cross-country team had to ask itself that very same question at the Penn State Spiked Shoe Invitational this past Saturday.

Although some might applaud aggressiveness during a race, that technique backfired for the Bison men in the invitational. Overall, they placed fourth with 126 points, well behind winning team James Madison, who had just 46 points.

The Bison women finished in second place, beating Penn State by 44 points. Although Michigan won the invitational with 30 points, the Bison ran closely behind until the last half-mile.

"The Michigan women just kicked harder in the last bit of the race, and we didn't," head coach Art Gulden said. "But when you consider that they are nationally ranked in the top 10, it puts our performance in a new perspective. Our ladies ran extremely well."

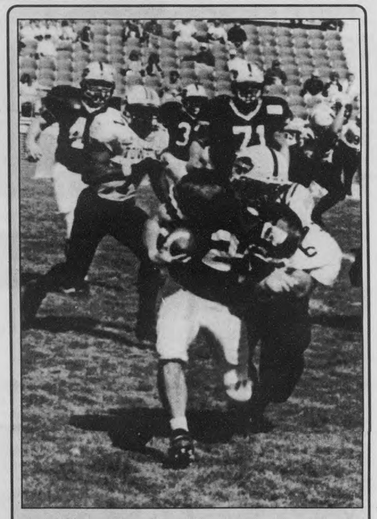
Individually, the Bison ladies also improved, on average running 20-30 seconds faster per person than last year on the same course. Freshman Andrea Beisser led the pack with a time of 18:21.83, closely followed by teammates Jen Hart '00 (18:26.58) and Carly Graytock '00 (18:34.09).

"We just reacted well to the pressure and speed of this meet by running relaxed. Our depth is our greatest strength this year, and once we get our second pack together, we'll be set by the end of the season," captain Jen Hart said.

Individual times for the Bison men were impressive, although the overall results may have been somewhat disappointing. Chris Nowakowski '01 led the pack, finishing in a time of 26:40.92, while Ron Hess '00 crossed the finish line four seconds later, in a time of 26:44.83.

"We kind of falsely assumed that the other teams wouldn't go out so fast, and we got too caught up with the speed," captain Ron Hess said. "It felt good, but it started to haunt us in the end when we started to breakdown. After this meet, we'll make sure it doesn't happen again."

The Bison have this weekend off to regroup and prepare for the long haul, which begins with a home meet against Mt. St. Mary's, Shippensburg, Rider and West Virginia on Saturday, October 2.



One week after posting a win against league rival Colgate, the Bison fell to 1-1 in Patriot League play after losing to Towson at home. For a game report, see page 20.

Spotlight on Club Sports: Women's Rugby

By Megan Atanasio

What do you get when you combine guts, strength, insanity, and a group of good-looking girls?

The answer to that question is most definitely the Bucknell women's rugby team. Though an unfamiliar sport to the masses at Bucknell, these girls learned and continually worked to perfect the game of Rugby through tough offense, skilled defense and a great deal of determination and sacrifice.

With a group of talented

see RUGBY, page 18

Beyond the Bubble

Falcons' Anderson Out for Season

Falcons' Anderson Out for Season: Atlanta Falcons' running back Jamal Anderson tore the anterior cruciate ligament in his right knee Monday night against the Dallas Cowboys and will be forced to watch the remainder of the 1999 season from the sidelines. He crumpled to the ground without being touched on his third carry of the game. At first, the injury was diagnosed as merely a sprain, but a more extensive examination revealed that Anderson had indeed torn his ACL.

"It is one of those deals that you could not do anything and he possibly could play two or three of the last games of the season," Falcons' coach Dan Reeves said. "But that would jeopardize his career, and we don't want to do that. We will get the thing fixed and hopefully have it so that in the future it will be a good, sound knee. It happens, and you hate it, but you can't dwell on it. We have got to move forward and try to get the job done."

Anderson, 26, rushed for a franchise-record 1,846 yards and set an NFL mark with 410 carries last season. He is already the seventh player in the league to suffer a season-ending injury this year.

Teacher Makes Major League Debut at 35: Jim Morris, a 35-year-old lefthander who was a high school baseball coach and science teacher four months ago, made his major league debut for the Tampa Bay Devil Rays on Saturday. With two outs in the bottom of the eighth, Devil Rays manager Larry Rothschild brought in Morris to face Texas Rangers shortstop Royce Clayton. The 6-foot-3, 215-pound pitcher struck out Clayton on four fastballs, the first two clocked at 95 mph and the last two at 96.

Said an excited Morris afterwards, "It was fantastic. What an experience! The whole game, I was sitting in the bullpen, going, 'Oh, I'm tired, I'm tired.' But then I was like, 'You know, it would be better to go in and get it over with and get the nervousness out of me,' because my heart was pounding."

For the last two years, Morris was the baseball coach and assistant football coach at Reagan County High School in Big Lake, Texas. Knowing that he could throw as hard as any major leaguer, his players made him promise earlier this year that, if they won the district title, he would attend a major league baseball tryout camp. His team did its part, so Morris showed up June 19 at a Devil Rays tryout in Brownwood, Texas. His first pitch hit the catcher's mitt at 94 mph. Devil Rays' scout Doug Gassaway didn't believe his radar gun, so another coach used a gun for the second pitch, which came in at 96 mph. The next pitch registered 95 mph. Then he reeled off 12 in a row at 98 mph. The team asked Morris to come back in two days. In pouring rain, he again smoked the radar guns, and Tampa Bay signed him to a minor league contract.

NHL to Allow Gambling on Canadian Teams: The National Hockey League, departing from the anti-gambling stances of other sports leagues, announced that it is willing to join forces with Canadian lottery corporations to help keep the six Canadian-based teams where they are. The league said it is even willing to allow the lottery corporations to use its logos and trademarks to help increase the estimated $171 million Canadians bet legally on hockey games each year.

"There's no arguing that there's money being bet on sports lotteries," Calgary Flames vice president Ron Bremner said. "Doesn't it make sense that we receive some of the benefits since it's our games they're using as a basis for betting?"

The Canadian teams — Ottawa Senators, Vancouver Canucks, Edmonton Oilers, Calgary Flames, Toronto Maple Leafs and Montreal Canadiens — pay substantially higher taxes than the 22 U.S.-based clubs. Their ability to pay star players has been further eroded by the weak Canadian dollar. The NHL has already taken steps to boost local television revenue for these teams and the league pointed out that the Canadian clubs have tried to control player payrolls in recent years. In return, the six organizations have asked for some tax relief, but it was suggested that taxes need not be modified if teams get a share of lottery revenue.

Knee Injury Costs Running Back His Leg: UC Davis running back Sam Paneno's lower right leg had to be amputated 10 days after he dislocated his knee in a game against Western Oregon. Paneno, 22, had played one of the best games of his college career before suffering the injury during the first play of overtime in the Aggie's victory on September 11. The dislocation cut off the blood flow to his lower leg and foot. Despite surgery to repair the injury, the lack of blood and oxygen caused irreversible damage, according to team physician Dr. David Cosca.

After the injury, coach Bob Biggs said it was the worst he'd seen in more than 20 years at UC Davis. "It just puts everything in perspective," Biggs said. "You talk about college football being such a great game — about people being fortunate to play this game — and then something like this happens. In football, we take every precaution you can take, but you can't prepare for something like this. It's hard. There's no good answer to these things."

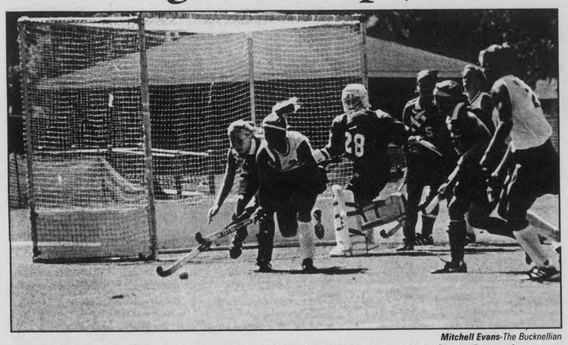
Field Hockey defeats two time league champs, 1-0



Mitchell Evans-The Bucknellian

The field hockey team looks for another win this Saturday at home against the Lafayette Leopards.

By Jennifer Cruickshank

The Bison field hockey team shocked two-time defending Patriot League champion Holy Cross with a nailbiting 1-0 home victory last weekend.

Despite losing some of last year's key players to graduation, the Patriot League preseason poll predicted Holy Cross to three-peat this season.

But the fifth ranked Bison had different plans, surprising the league and improving their standing with the upset.

After being knocked out of the Patriot League Tournament by Holy Cross last season, the Bison were out for revenge. "We played hard the whole game and both teams had plenty of chances," said forward Brett Russo '01. "But in the end, we just wanted it more."

The first half was full of end-to-end suspense with both teams having numerous scoring opportunities. The biggest scare for the Bison came late in the first half when defender Monica McCorry '02 was forced to bat down a lifted Crusader penalty corner with her hand, resulting in a Holy Cross penalty stroke on freshman goalkeeper Sonja Wettergreen. But the rookie made a seemingly effortless save for the Bison to keep the game scoreless.

Coming out of halftime, both teams looked to take the lead in hopes of sealing their first Patriot League win of the season. But the Bison struck first and the Crusaders couldn't counter. At 31:20 in the second, sophomore forward Larissa Carso converted a scramble in front of the Holy Cross net to put the Bison up 1-0.

Holy Cross fought back, threatening with a three-shot flurry late in the game, but Wettergreen could not be beaten, ensuring her first collegiate shutout. The Crusaders were simply unable to penetrate the Bison defense.

Head Coach Heather Lewis singled out Katie Yingling '01 for her tremendous defensive play. Tallying four interceptions, seven tackles and one goal-line save against Holy Cross, Yingling continued to be a solid force for the Bison.

"Katie was outstanding today," Lewis said. "And against the two-time defending Patriot League champions, you must play the whole game — and our whole team really put the pressure on them for all 70 minutes."

The Bison resumed action this past Tuesday, when they traveled to LaSalle in hopes of picking up their fourth consecutive win before hosting Patriot League opponent Lafayette on Saturday.

Zimmerman '00; a true team player

Senior goal scorer earns scholastic and athletic honors

By Erin Plasteras

Simply put, Jenny Zimmerman '00 is the cream of the crop.

She epitomizes the most commendable aspects of a student-athlete. Her talent and natural athletic ability are complemented by her determination to succeed both on and off the field.

Hailing from Middleburg, Pa., Zimmerman, a tri-captain, is the center midfielder for the Bucknell field hockey team.

Her talents as a field hockey player have earned her an innumerable amount of honors. Jenny was named to the Regional All-American and All-Patriot League field hockey teams following the 1998 season. She was named the 1998 Patriot League Defensive Player of the Year and currently holds the record for both single-season best and career best assists in the league.

> *"Jenny contributes a tremendous amount to the team. It goes far beyond her talent and skill."*
> *—Lauren Campbell '02*

Jenny is a standout in the classroom as well as on the field. A Biology major, she was a member of the Patriot League Academic Honor Roll and was named to the National Academic Squad for the 1997 and 1998 seasons.

While this is just a sampling of her achievements, the most respectable of her attributes extend beyond the awards that she has received.

As a sophomore member of the field hockey team, I have the privilege of playing with Jenny on a daily basis and the opportunity to learn from her. She has achieved more than many people ever dream of; yet her feet have never left the ground.

"Jenny is an easily approachable team leader. She is kind of like a big sister to all of us," said Annie Hunsicker '02. "I truly admire her humbleness."

Her sheer personality and humble demeanor are the reasons why she deserves the utmost respect. Jenny's tireless work ethic, desire to compete and ability to lead through both words and actions has set an excellant example for the underclassmen on the team.

"Jenny contributes a tremendous amount to the team. It goes far beyond her talent and skill," said Lauren Campbell '02. "She constantly exemplifies the ability to work her teammates through frustration, make them smile when things seem difficult, and pump them up when we need to work harder."

Although this is Jenny's final collegiate season, she continues to lead the Bison juggernaut to victory. She was voted Subway Athlete-of-the-Month as well as Patriot League Offensive Player of the Week already this 1999 season.

She has established herself as an offensive threat this season for the Bison. In a recent 4-3 victory over Columbia, Zimmerman netted all four Bison goals.

"Every once in a while as a coach, you have an opportunity to work with that special player, the one whose singular focus is her team," said Bucknell coach Heather Lewis. "For me, that player has been Jenny."

Lsst year's Patriot League Defensive Player of the Year, Zimmerman has become a key scoring threat in '99.

Water Polo sweeps through home tournament

By Allison Kuhn

The Bucknell men's water polo team played its first home tournament last weekend before an amazingly energetic and supportive crowd. The team played four games on Saturday, defeating its most challenging opponent, Salem-Teikyo, by a score of18-10.

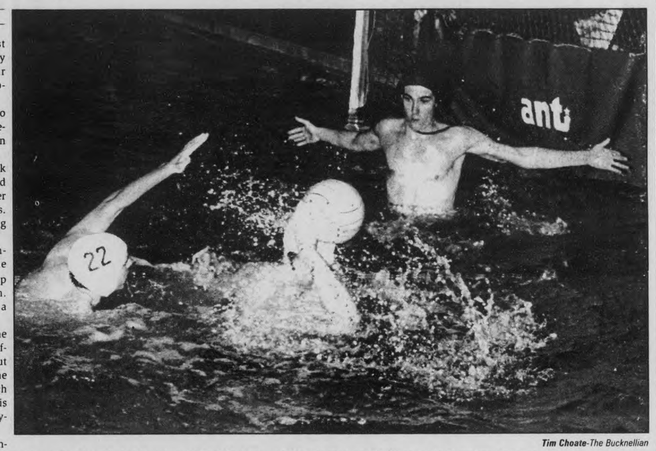
Michael Knudtsen '00 felt that the crowd contributed to the squad's success. "We put Salem-Teikyo away early because everyone played off the crowds energy, " Knudtsen said.

The Bison showed superior passing skills and teamwork in that victory. Team captain Kevin Permisohn '01 ignited the team Saturday night with seven assists. Tate Greditzer '01 lead the team in scoring against Salem with three goals. "Our offense was good because people were recognizing open opportunities," Greditzer said.

The strong Bison defense contributed to an improved offense against Salem and helped to keep the squad in the lead throughout the game. The team's top scorer, Josh Watts '00, netted five goals against Salem. "By stepping up our defense, we were able to have a better offense," Watts said.

The Bison dominated their other three games in the tournament, defeating Lehman 14-7, Washington and Jefferson 21-11 and Grove City 16-0. Knudtsen's shutout against Grove City displayed Bucknell's superiority in the league. "We were able to substitute frequently, which gave everyone a lot of playing time," Knudtsen said. "This helps strengthen our bench by giving everyone more playing experience."

The Bison need to work on improving some of their fundamentals for this coming weekend's matches. "We did a nice job this weekend, but we had some chances to really make the crowd say 'wow' and instead they were saying, 'that would have been great,'" head coach Mike Wooster said. "We need to make that a point for this coming weekend."



Tim Choate-The Bucknellian

Water Polo plsys rivals Princeton, Johns Hopkins and Washington and Jefferson this Saturday at home.

Bucknell will once again face its rivals Princeton, Johns Hopkins and Washington and Jefferson in its home pool this Saturday. "Princeton is good at stopping shots from the two meters," said Coach Mike Wooster. "We need to be ready to put those shots away hard and quick." Despite the fact that the Bison have some challenging games this weekend, they hope to continue their winning ways and improve their record to 11-2.

WOMEN'S RUGBY from page 15

(though a little nutty) veterans and new-blooded (and on-their way-to-becoming-nuts) freshmen, the team faced its first opponent of the Fall '99 season, East Stroudsburg, last Saturday. Although suffering a 17-15 defeat, the women played a hard-fought, emotional game.

After a bit of a slow start and an injury to team leader Kellem Agnew, who insisted upon playing despite being carried off the field, the team dug its heels in the muddy ground and picked up the intensity to rally back. Captain Emily Twiss '01, playing the wing position, ran the ball in twice to score, while junior forward Diana Walleigh kicked for points.

Twiss was assisted on both tries by the spectacular play of forward Cate Cornell '02. Cornell emerged out of the pack and passed the ball to senior scrumhalf Suzie Yates, who deftly handed off to Twiss. On a solo kick after the team marched the ball into position, Walleigh expertly booted the ball from the outside to score for the team. The team came up just short, but there was no shortage of effort from the Bucknell squad.

These accomplished team members played among a nimble back line protected by a no-guts no-glory forward pack. Playing for the A side backs were seniors "Mademoiselle" Suzie Yates and Megan "Epler" Epler, juniors Beth Campbell "Soup" and backs captain Emily "Wild Dog" Twiss and sophomores Caryn "The Best Day in My Life..." Weydemeyer, "Little" Megan Atanasio and Emily "Legs" Schoenhofen.

The pack consisted of seniors "Sister" Kellem Agnew, Jen "Freedy" Freedman, Chrissy "Tink" Hnetinka and Christine "Franko" Frankovitch, junior forwards captain Christina "Virgilio" Virgilio and team president Diana "Social Gatherings" Walleigh and sophomores "Crazy" Cate Cornell, Katie "Band-Aids" O'Connell, Katie "Jersey Girl" Peters and Sarah "Quiet Killer" Tiffin.

The Bucknell women's rugby team can be seen in action this Saturday at 11:00 a.m. on the Mods Fields against Princeton.

A Ski Trip to Vail, Colorado

Or a Casio® CASSIOPEIA™ E-100 Color Palm-size PC

Play the COOL FROM Nestea® Hot Facts Sweepstakes!

HOT FACT #3

Students consider using the Internet to be one of the top ten "hottest" things to do on campus, along with _____.

A. using a cell phone B. listening to music C. going to the movies D. going to fraternity parties

Now that you've spotted this week's Hot Fact, log onto **www.coolcore.com** to answer the question. Once you've completed all four Hot Facts you will be automatically entered for a chance to win in the Hot Facts Sweepstakes. If you missed one of the previous Hot Facts, don't worry. Just log on this week and you can answer the question you missed.

Be sure to look in next week's paper for the FINAL Hot Fact!

Open to U.S. residents, who, as of 9/6/99, are enrolled in a U.S. college. No purchase necessary to play. Void in Florida and where prohibited. To enter via internet: Access the "COOL FROM Nestea Hot Facts" Web site at www.coolcore.com starting 12:01 AM (ET) on 9/6/99 through 11:59 PM (ET) on 10/3/99 to see that week's Hot Fact(s) on screen. Every time you log on, you will be instructed to complete the on-screen entry form, including your name, the name of the college you are attending and the letter A, B, C or D, representing the word(s) which complete(s) the Hot Fact(s) for that week. Answer(s) need not be correct to be eligible but you must submit your answer to each of the four Hot Facts (one Hot Fact published each week as described in Rule #1 of the Official Rules) to be entered into the sweepstakes. Starting 12:01am (ET) on 9/27/99 through 11:59pm (ET) on 10/31/99, all four Hot Fact(s) will appear on screen in case an Internet participant misses one or more of the Hot Fact(s) that were featured. While you can, if you wish, log on each day, only one sweepstakes entry per e-mail address that includes all four answers will be entered into the sweepstakes drawing. To enter via mail: On plain 3" x 5" paper, hand-print your complete name, address, zip code, (optional) daytime and evening telephone numbers and the words "COOL FROM Nestea Hot Facts". Mail your entry in a hand-addressed 4-1/8" x 9-1/2" (#10) envelope, with first-class postage affixed, to: COOL FROM Nestea Hot Facts Sweepstakes, P.O. Box 4941, Blair, NE 68009-4941. Limit one entry per envelope. Entries must be received by 11/15/99. IMPORTANT: On the lower left-hand corner of your mailing envelope, you must indicate the name of the college you are attending. For Official Rules, by which entrants are bound, including a list of participating colleges, send a SASE to: Hot Facts Rules Request, P.O. Box 4948, Blair, NE 68009-4948.

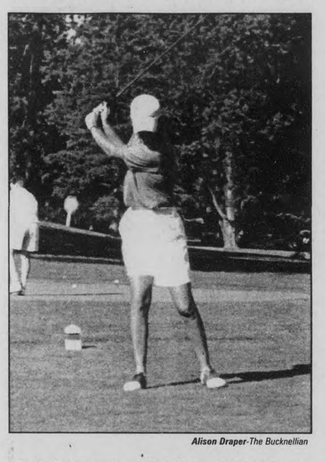
Golf team performs solidly

Team lowers last year's score against Dartmouth by 73 stokes



Alison Draper-The Bucknellian

The golf team travels to Easton Sunday to play Lafayette.

By Mike Brophy

In its second weekend of competition, the Women's Golf team headed north to compete in the Dartmouth Invitational Tournament. During the two days of competition the Bison played solidly and ultimately finished sixth out of a field of eighteen teams.

Coach Brad Tufts thought his young squad made a strong statement in the tournament. "Overall, I was generally pleased with the weekend," said Tufts. "We had a lot of young players who have not seen the course before and we did very well." Coach Tufts was excited to report that this year's team had improved by 73 strokes from last year's performance at Dartmouth.

Bucknell ended the day on Saturday in sixth position, after shooting a combined team total of 340. Freshmen Amy Jones and Molly Campbell both led the Bucknell squad with team-low scores of 81 for the round.

In the final day of competition the Bison played consistently and managed to maintain their sixth place position for the weekend, finishing only five strokes behind host team Dartmouth. Molly Campbell had yet another impressive day as she bettered her score from Saturday by two strokes. Shooting a combined 164, Campbell finished 14th overall in the individual standings.

The Bison will travel to Lafayette for a match this Sunday. They then will host Dickinson, Franklin and Marshall, Gettysburg and Mount St. Mary's this coming Tuesday.

Carmen's Football Picks

NFL

Minnesota at Green Bay
A battle of NFC Central powers who are both coming off of disappointing week two losses. Minnesota's high-powered offense can't be bottled up for much longer...
Pick: Vikings 31-17

Tennessee at Jacksonville
An interesting matchup if McNair was playing. Brunell will brutalize the Titans' defense, making a strong statement to the AFC and the entire league.
Pick: Jags 40-21

San Francisco at Arizona
The 49ers have looked weak all season, but they have much more offensive potential that the Cards. Steve Young will rally the troops and stop the aging process.
Pick: 49ers 28-14

College

Michigan at Wisconsin
The Badgers' loss to lowly Cincinnati last Saturday started them on the downward spiral, and Michigan will deliver the knockout blow. Anthony Thomas and the Wolverines have got Pasadena on their minds.
Pick: Michigan 27-13

UCLA at Stanford
The upset special of the week. Stanford embarrassed Arizona last week, and a win against the Bruins would vault them up the Pac-10 standings. UCLA is still reeling from its Ohio State thumping.
Pick: Cardinal 24-23

Delaware State at Bucknell
Delaware State had a taste of victory last weekend, but they better savor the taste while it lasts. Their inexperienced squad is no matched for the balance and explosiveness of the Bison, who are hungry for a win after last week's disappointment.
Pick: Bison 36-18

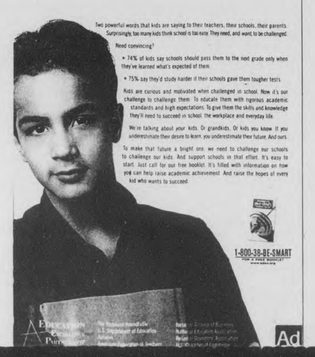
Challenge me.



Two powerful words that kids are saying to their teachers, their schools, their parents. Surprisingly, too many kids think school is too easy. They need, and want, to be challenged.
Need convincing?
• 74% of kids say schools should pass them to the next grade only when they've learned what's expected of them.
• 75% say they'd study harder if their schools gave them tougher tests.
Kids are curious and motivated when challenged at school. Now it's our challenge to challenge them. To educate them with rigorous academic standards and high expectations. To give them the skills and knowledge they'll need to succeed in school, the workplace and everyday life.
We're talking about your kids. Or grandkids. Or kids you know. If you underestimate their desire to learn, you underestimate their future. And ours.
To make that future a bright one, we need to challenge our schools to challenge our kids. And support schools in that effort. It's easy to start. Just call for our free booklet. It's filled with information on how you can help raise academic achievement. And raise the hopes of every kid who wants to succeed.

A year's difference

The 1998-99 Denver Broncos opened their season with 13 straight wins, finished the regular season 14-2, and capped off the year with their second consecutive Super Bowl victory. In the off-season, their 16-year superstar quarterback John Elway retired.

The '98-'99 Detroit Lions finished the season 5-11, failing to make the playoffs for a third consecutive year. In the off-season, their ten-year superstar running back Barry Sanders retired.

Commentary

Carmen Mauriello
Sports Editor

In this past summer's training camp, the Broncos returned a solid nucleus from their championship teams and gained confidence in the signal-calling of veteran quarterback Bubby Brister.

In Lions' training camp, a dejected and disheartened mood arose as the team dealt with the shock of Sanders' unexpected loss and realized the void it created. Detroit was unable to acquire any experienced and proven running backs.

Just prior to the start of the 1999-2000 season, Denver coach Mike Shanahan became dissatisfied with Brister's poor preseason performance and decided to name exciting second-year player Brian Griese as the Broncos' starting quarterback. Analysts were unshaken by Denver's quarterback controversy, as most experts picked the Broncos to challenge for an unprecedented third consecutive Super Bowl title behind the strength of its defense and the talent of league MVP Terrell Davis.

Prior to their season opener, the Lions' '99-'00 season was already getting written off. Questions and concerns about the running back position multiplied, with unproven career backup Ron Rivers being named the starter. To make matters worse, Detroit's offensive line failed to show consistency in the preseason and two of its top draft picks suffered severe injuries. The universal consensus among analysts and most fans was that the Lions' 99-00 season was at best going to be a rebuilding year without any chance of advancing to the playoffs, at worst a disintegration.

The Broncos took the field two weeks ago looking to triumphantly mark the beginning of the new football era in Denver, retiring the number and their reliance on one of the game's all-time greatest players. But the Broncos left Mile High Stadium doubting themselves and their ability to win without Elway, after a 38-21 Miami pummeling.

The scary part was that the turbulent quarterback position produced and was efficient under Griese's leadership, but the Broncos still were humiliated. Terrell Davis was unable to sustain the offense's drives or break loose for a big play, while the Denver defense had more holes than an old pair of gym socks. But most observers noted that it was just the first game and Shanahan would quickly iron the kinks out of his system.

The Lions took the field that same week with "nothing to lose." And nothing is exactly what they lost. They actually won the game against a favored Seattle squad, 28-21, and turned a lot of heads with an aggressive, emotional and exciting performance.

The game's most shocking statistic was the final rushing totals. Detroit ran for 167 yards, behind Rivers' impressive 16 carry, 96 yard performance, while the Lions' defense limited Ricky Watters and the high-powered Seahawks ground game to a measly 31 total yards. But many Detroit naysayers defended their earlier predictions by saying that the team wouldn't be able to maintain consistency in its play.

And then week two of the NFL season came. Denver lost, and Detroit won. The Chiefs thoroughly dominated every aspect of the game in their 23-10 victory over the Broncos. The Denver offense was ineffective, prompting Shanahan to replace Griese with Brister, who quickly threw an interception to seal the Chiefs' win.

And contrary to what many experts predicted, Terrell Davis and the Denver defense didn't come around and play up to their potential. So after two unproductive losses to open the season, the Broncos are back to the chalkboard; unfortunately, it may be blank as the Broncos have exhausted many of their strategies and options.

The Lions, on the other hand, are all smiles. They beat perennial division bully Green Bay, 23-15. Detroit's "bend but don't break defense" allowed the Packers 437 total yards but only one touchdown. Batch added a big-play dimension to the Detroit offense, hurling 74- and 45-yard touchdown strikes while running for another score. The Lions demonstrated a great deal of maturity and teamwork, avoiding the big mistakes and doing all the intangibles a team needs to win.

It was a great "team" victory for the Lions; everyone contributed and played their role perfectly. After the victory, Lions' tight end David Sloan commented on the differences between the '99 Lions and last year's squad. He stated that the 98'-99' Lions played as a bunch of individuals, while this year's squad plays as a cohesive and unified team.

But besides Sanders, the majority of last year's Detroit team returned. So how can this year's Lions have a totally different attitude from last year's squad, after only one key change?

In no way am I implying that Barry Sanders was a selfish player or that his departure strengthened the Lions, but I do believe that the void created by his retirement forced other players to step up and gave them an opportunity to display their talent.

While Barry Sanders was in Detroit, the offense revolved around him and a great deal of the plays were designed for him, but now those plays are being distributed among various athletes. Thus, the new emphasis is on the team, not the individual.

What affect has Elway's departure had on the attitude and performance of the Broncos? Obviously, Elway wasn't the sole reason for Denver's back to back Super Bowl crowns and his departure isn't the only reason why the team is struggling this season.

But it comes down to one main thing. Denver lacks the confidence of a championship team without Elway at the helm. The team's faith in his leadership and ability to make plays when the game depended on it was endless. The Broncos believed that somehow and someway, the NFL's all-time winningest quarterback would find a way to win.

The other players knew that if they did their job right, the team would win. I don't see that faith and confidence in this year's Denver squad. Many players are trying to do too much, feeling they must tackle more responsibility in order to off-set the quarterback confusion. And in looking to make the big game-breaking play, many Broncos are making too many mistakes and giving their opposition too many opportunities. This individualism has resulted in a lack of teamwork and success, and a shocking 0-2 start.

The retirements of John Elway and Barry Sanders have resulted in drastic and completely opposite changes in their respective team's success. Although a team's ability to effectively replace its departed stars is of great importance, the players' responses to new challenges are much more critical.

It comes down to one critical issue — confidence. The Lions have it in their teammates, while the Broncos don't. Maybe that's why Detroit is winning, and Denver isn't.

Bison get taste of their own medicine

Football team loses to Towson 27-20

By Carmen Mauriello

The only thing harder than getting to the top is staying on top.

Only one week after knocking Patriot League favorite Colgate off of its perch, the Bucknell football team suffered a letdown against Towson. The Tigers marched into Christy Mathewson Memorial Stadium last Saturday and defeated the favored Bison 27-20 behind the aerial fireworks of quarterback Joe Lee.

Lee lit up the veteran Bison defense all day, completing 27 of 43 passes for an amazing 407 yards and two touchdowns. Bucknell head coach Tom Gadd was unhappy with the defense's pass coverage, citing the ineffectiveness of both the man and zone coverage schemes. "We broke down in some of our fundamentals," Gadd said.

The Bison started the game in impressive fashion, mounting an 11 play, 75 yard touchdown drive on the their opening possession. The drive was powered by the strong running of Dan Palko '00 and Jason Marrow '01. The key play in the drive was senior quarterback Don McDowell's 29-yard completion to Jim Horan '03 on third down and nine from midfield. Five plays later, Marrow burst into the endzone to give the Bison a 6-0 lead.

After Towson returned the ensuing kickoff to near midfield, Lee took over. After his third completion moved the Tigers deep into Bison territory, Lee found Jason Corle for a 22-yard scoring strike to give Towson a 7-6 lead.

Gadd recognized the importance of Towson's quick response to Bucknell's scoring drive. "Their first score gave them confidence, and they realized that they had a chance to win," Gadd said.

Neither team was able to move the ball in its next two possessions, but Bucknell began an impressive drive in the closing seconds of the first quarter. That drive would last until the middle of the second period, eating up 7:41 of the clock. It spanned 58 yards on 16 plays, with Marrow plunging in from the one for his second touchdown of the day. But Joe Lourdeaux '02 missed his second extra-point of the day, moving the lead to just 12-7.

The Bison carried that lead into the locker room, but the Towson offense quickly stole it away in the third quarter. On the half's third play, Lee launched a 58-yard bomb to Adam Overbey to put the Tigers ahead 13-12.

Bucknell was unable to mount any offense on its next two possessions, and a short punt gave Towson excellent field position late in the third quarter. The Tigers once again used the big-play to capitalize on an opportunity and dishearten the Bison, as Lee hit Corle on a 51-yard strike to the Bison 1 yard-line. Towson quickly found the endzone to claim a 20-12 lead.

After Bucknell failed to convert on its next four possessions, the outcome seemed certain. But with less than six minutes remaining in the game, McDowell led the Bison offense on a 9 play, 80 yard drive that personified the squad's gutsy and "never-say-die" attitude.

Senior Matt Weaver's four-yard touchdown reception closed the gap to 20-18. The Bison needed a two-point conversion to tie the game, and McDowell took matters into his own hands and plunged into the endzone.

"We started to take control," Gadd said. "But we let up the big play and that switched the momentum."

The "big play" that Gadd referred to was Lee's 58- yard strike to Jamal White on Towson's ensuing possession, which led to a Tiger touchdown and sealed their 27-20 victory.

Don McDowell passed for a Bison touchdown.

This Lee dagger finally found the heart of the Bison, who were repeatedly victimized by Towson's big-play capabilities throughout the game. The Tigers completed three pass plays of over 50 yards, all of which led to touchdowns.

"Towson was as ready to play us as we were to play Colgate," Gadd said. "The sad part is that I don't think we played at as high of an emotional level as Towson. Football comes down to wanting to play. The team who plays harder wins; we have to raise our level of play."

The Bison look to bounce back with a convincing victory this Saturday against a talented Delaware State squad at 12:30 p.m. at Christy Matthewson Memorial Stadium.

Women's soccer keeps rolling

Jason Aines-The Bucknellian

The women's soccer team finished the week with a win and a tie against tough opposition.

By Andrew Bevan

Last year, the Bucknell women's soccer team traveled north to Cornell University and was shutout 6-0. This year the women were out for revenge against the Big Red in their second home game of the season, but the game ended in a 1-1 tie.

Meredith Barnes '02 got things rolling for the Bison when she netted her first goal of the season about six minutes into the contest. The Bison defense then held off a tough Cornell offense for the rest of the first half.

But Cornell kept up the attack and netted the game-tying goal two minutes into the second half. After this goal, both teams fought hard for the rest of the game and in two 15-minute extra ses sions, but the game ended in a draw.

"It was the biggest battle I have ever seen since I have been here," head coach Chrissy Findlay said. "I was really happy with the all-out work ethic of the team and their willingness to not be beaten," Findlay said.

The Bison received continued strong play from Meredith Gannon '02, Barnes and as sophomore tri-captain Anna Hall. Findlay said Hall "consistently shuts down players" and has been a "great man-marker for us." Freshman goalkeeper Laurie Purse added a superb performance in goal with 13 saves.

"I thought we played really well in the Cornell game," Barnes said. "Although we would have liked to beat them, holding them to a one-one tie was much better than our 6-0 loss to them last year."

The Bison continued their homestand on Friday with a match against St.Francis. Bucknell had a strong offensive performance, outshooting its opponent 29-3. However, a lack of finishing still plagued the Bison, as they were unable to take the lead until St.Francis scored an own goal with just under 14 minutes left in the game.

"We outplayed them and it should not have taken us more than 65 minutes to score," Findlay said. "Finishing has been our problem, but we are working hard at getting that solved."

St.Francis decided to employ a conservative defensive strategy after it scored first just over 20 minutes into the contest. It kept the majority of its players around its goal to make Bucknell's offensive execution harder. Bucknell trudged through the defense and tied the game midway through the second half on a goal from Lauren Schwarz '03. Schwarz took a cross from fellow freshman Tara Utchel and beat the St. Francis goalkeeper in her college debut.

Findlay was pleased by the way her squad adjusted to St.Francis' defensive strategy. "I was proud of the effort by my team in the second half," Findlay said.

Findlay is excited about the progress her team has made this season. Already the Bison have defeated three teams and tied one that they lost to last year. Findlay is pleased with the improved team chemistry and the increased physical play of her squad this year.

While its finishing must be improved upon, the team is taking more shots than it did in previous years and putting more teams under pressure. "It is just a matter of repetition. The shots will go in," Findlay said. Bucknell has outshot all of its opponents except St.Joseph's this year.

While winning on the road has not been a problem for the Bison this year, their success at home has been a different story. Bucknell hopes to obtain an important home victory this Saturday when it hosts five-time defending Patriot League champion Colgate at 3 p.m. on the Davis Gym fields.

Faculty requests additional search committee representation

By Chris Ellis

Concerned by an underrepresentation of students and faculty on the Presidential Search Committee assigned to find a successor to President Adams, the University faculty has passed a motion expressing its concern with the proceedings and requesting additional faculty representation on the committee.

Stephanie Metz—The Bucknellian

Professor of economics Teresa Amott introduced a motion to increase faculty representation on the Presidential search committee.

The Presidential Search committee, whose members were announced last week, includes eight trustees, two faculty members, one student representative, one University administrator and one at-large alumni representative. The previous Presidential search included only five trustees, and the increased representation caused concern among University faculty members.

According to Professor of Economics Teresa Amott, who introduced the original motion to the faculty, the spirit of the motion derived from a desire to ensure that the voices and philosophies of "on-campus" University members—students and faculty—were heard.

"It is the responsibility and authority of the trustees to select the president," Amott said. "With that said, I had hoped that the trustees would have designed a search process which placed a high value on the on-campus constituencies."

"When you design a search process such as this one, you send a message about the relative importance of the on- and of—campus constituencies. In this case, I feel that the on-campus constituencies have

AIDS walk moves students

Over 100 University students participate in Washington, D.C. AIDS benefit

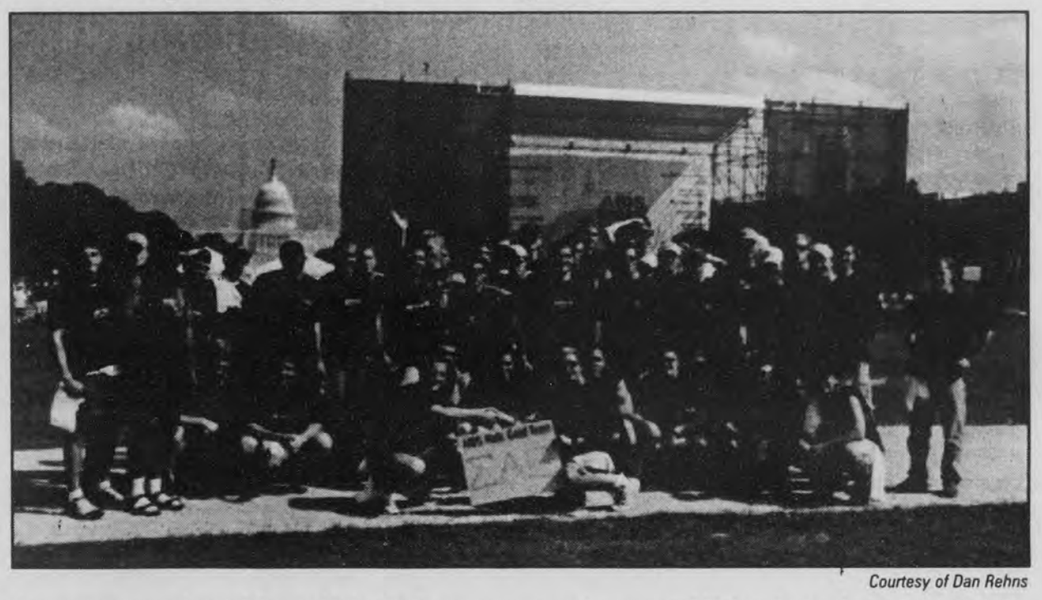
By Peter Van Emburgh

Approximately 112 university students braved a wilting sun as they marched in the Whitman-Walker Clinic's 13th annual AIDS Walk, held in Washington, D.C., on Sunday, Sept. 26. Approximately 35,000 people participated in the walk, raising somewhere between $1.2 million and $1.5 million for the area's largest provider of services to those suffering from AIDS and HIV infection.

For the third year, Sue Ellen Henry, assistant professor of english and director of the writing center, organized the event. The university was one of 500 teams and organizations that registered for the event. Various student groups and organizations also attended, including Alpha Phi Omega, Essential (African-American and Latino women students) and Sigma Alpha Epsilon. Faculty members from the political science and education departments, the writing center and the Residential Colleges were also in attendance for the walk.

"My goal for the walk for the past three years has been to offer students an opportunity to be activists," Henry said. "We have achieved that goal every year as attendance grows."

According to Henry, last year Bucknellians raised $2,400 and brought 88 people to the walk. This year, Sigma Alpha Epsilon alone raised over $3,500 this year and brought 72 members of the fraternity to Washington to participate. In several weeks, the walk officials will provide Henry with the total amount raised by the University.



Courtesy of Dan Rehns

Seventy-two members of Sigma Alpha Epsilon were among the group of University students that traveled to Washington to participate in the AIDS Walk, raising over $3,500 for the Whitman-Walker Clinic.

"It would have been enough for our house to raise some money and have it donated to the AIDS cause," said Chuck Williams '00, philanthropy chair of Sigma Alpha Epsilon. "But we saw it necessary to drive to D.C. to show our support to those in need."

"Philanthropy events like the AIDS walk serve as a testament to the uniquely positive power of Greek organizations," said Scott Pugh '00, president of Sigma Alpha Epsilon.

The AIDS Walk has raised over $20 million to support the activities of the Whitman-Walker Clinic and other organizations in their efforts to fight the spread of the virus and to care for those who have been affected by the disease. Guest speakers at the start of the event were U.S. Health and Human Services Secretary Donna E. Shalala and Del. Eleanor Holmes Norton (D-DC).

"The AIDS Walk was an exciting experience to take part in," Alan Gray '02 said. "I feel proud to have taken part in a tremendous cause."

The Whitman-Walker Clinic is the premier AIDS service organization in the nation, with four facilities in the Washington, D.C. area. The clinic provides services to people living with AIDS, extensive AIDS/HIV education and prevention efforts and coordinates programs for the gay/lesbian community in the District of Columbia.

The national death toll from this modern-day plague now stands at 410,000 while the worldwide death toll stands at 14 million and is rising rapidly. In the United States alone, 40,000 new infections were reported in 1998. The District of Columbia has the highest rate of AIDS cases per capita in the nation and the number is increasing rapidly.

Phi Beta Kappa brings renowned lecturist to campus

Thomas Schelling, University of Maryland professor, spoke of the present role of nuclear weapons

By Jen LaBracio

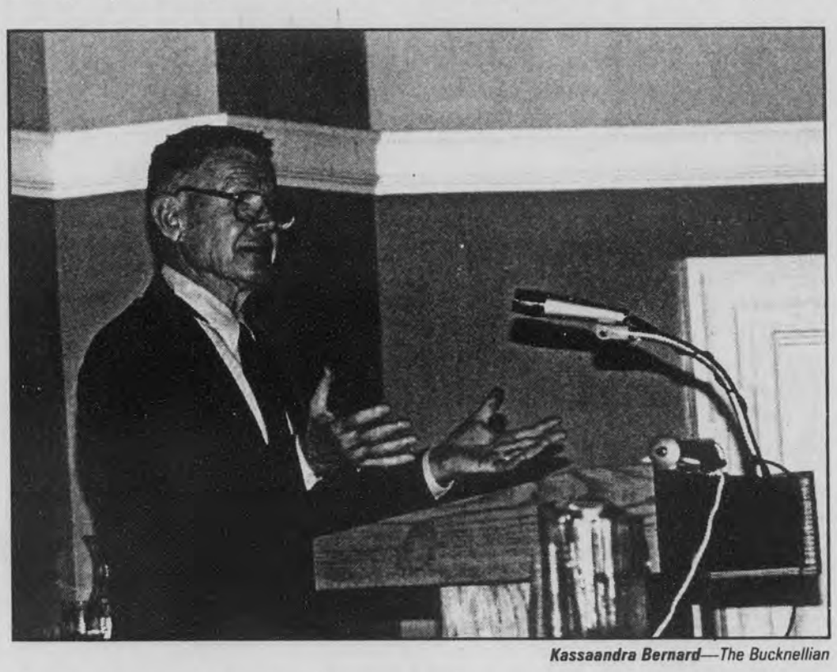
Surveying the 54 years since the dropping of the atomic bomb on Hiroshima and Nagasaki during World War II, Thomas C. Schelling praised the world of international politics for its continued abstinence in the use of nuclear weapons last Monday in the Vaughn Literature Auditorium.

Schelling, a distinguished professor in economics at the University of Maryland at College Park and Phi Beta Kappa scholar, stressed that because of the power and effectiveness surrounding nuclear weapons, the fact that they have not been used for over half a century is a remarkable feat.

"There has never been any doubt about the effectiveness of nuclear weapons— they have possibly been the greatest increment in weapon-effectiveness in history," he said. "And I will consider my mission half-fulfilled if I can just get you to comprehend the fact that they have not been used since World War II."

Schelling, brought to the University through the support of the Phi Beta Kappa chapter and the department of political science, received his bachelor's degree in economics from the University of California at Berkley and his master's degree from Harvard University. Schelling then went on to teach at Harvard for a number of years before obtaining his current position at the University of Maryland at College Park.

Schelling is the author of various books addressing conflict in the international political scene, including *The Strategy of Conflict* and *Strategy and Arms Control*. Nuclear weapons, said Schelling, have played an enormous role in international politics, not only because of their destructive power but also because of the uncommon aura they inspire.



Kassaandra Bernard—The Bucknellian

Thomas Schelling, University of Maryland professor and Phi Beta Kappa lecturist, spoke to the campus community on the role of nuclear weapons in modern society.

"Nuclear weapons are unique," he said, "not only in their explosiveness but in their perception."

According to Schelling, this perception is caused by the taboo that was placed on nuclear weapons after their use in World War II. This taboo classified nuclear weapons not as traditional, conventional means of defense, but instead as unconventional implements of war.

It is exactly this classification, said Schelling, which accounts for the extreme wariness in the use of nuclear weapons throughout the years since World War II.

"This convention is an asset to be treasured," he said.

Schelling examined the effectiveness of this taboo during the past 50 years, from the Korean War during the Truman presidency throughout Bush's involvement in the conflict in the Persian Gulf. In most situations, the same question was asked:

"What would happen to the status of nuclear weapons once they were used in warfare?"

According to Schelling, most nations were not up to challenging this status. They resisted nuclear temptation, he said, and regarded the use of nuclear weapons to be what President Johnson described as a "political decision of the highest order."

The taboo even influenced a possible positive use for nuclear weapons, Schelling said. During the 1950s and 1960s "peaceful nuclear explosives" (PNEs) were available to clear land or to generate electric power. However, the taboo stood in the way of this use.

"Nuclear weapons were perceived as different. The genetic character of everything nuclear was not good," said Schelling.

Even PNEs could not be accepted, Schelling said, because they "would undermine the belief that nuclear weapons were inherently evil."

Nations in the international political world had to incorporate this taboo in their policy decisions. Schelling also cit-

Program educates parents of Greeks

By Jared Silliker

Bob Dineen '00, president of Sigma Phi Epsilon fraternity, gave a presentation entitled the "Thousandth Man Campaign" this past Saturday emphasizing the positives of Greek life. The program, which especially concentrated on Sig Ep's efforts, was attended by many Sig Ep members and their parents, Interfraternity Council board members and Dean of Greek Life Roy Baker.

The title, "The Thousandth Man", was derived from a Rudyard Kipling poem of the same title. The poem stresses brotherhood, friendship and helping each other.

The background of the campaign is that "it has become increasingly apparent that the reputation of Greeks both on this campus and nationwide has been diminishing ... and with good reason," Dineen said.

Dineen added that times have changed and the negative image of Greek life in the past does not have to continue as such. He emphasized education and communication as keys to closing the gap between skeptical perceptions and the good in

Faculty requests additional search committee representation

By Chris Ellis

Concerned by an underrepresentation of students and faculty on the Presidential Search Committee assigned to find a successor to President Adams, the University faculty has passed a motion expressing its concern with the proceedings and requesting additional faculty representation on the committee.

Stephanie Metz—The Bucknellian

Professor of economics Teresa Amott introduced a motion to increase faculty representation on the Presidential search committee.

The Presidential Search committee, whose members were announced last week, includes eight trustees, two faculty members, one student representative, one University administrator and one at-large alumni representative. The previous Presidential search included only five trustees, and the increased representation caused concern among University faculty members.

According to Professor of Economics Teresa Amott, who introduced the original motion to the faculty, the spirit of the motion derived from a desire to ensure that the voices and philosophies of "on-campus" University members—students and faculty—were heard.

"It is the responsibility and authority of the trustees to select the president," Amott said. "With that said, I had hoped that the trustees would have designed a search process which placed a high value on the on-campus constituencies."

"When you design a search process such as this one, you send a message about the relative importance of the on- and of—campus constituencies. In this case, I feel that the on-campus constituencies have

AIDS walk moves students

Over 100 University students participate in Washington, D.C. AIDS benefit

By Peter Van Emburgh

Approximately 112 university students braved a wilting sun as they marched in the Whitman-Walker Clinic's 13th annual AIDS Walk, held in Washington, D.C., on Sunday, Sept. 26. Approximately 35,000 people participated in the walk, raising somewhere between $1.2 million and $1.5 million for the area's largest provider of services to those suffering from AIDS and HIV infection.

For the third year, Sue Ellen Henry, assistant professor of english and director of the writing center, organized the event. The university was one of 500 teams and organizations that registered for the event. Various student groups and organizations also attended, including Alpha Phi Omega, Essential (African-American and Latino women students) and Sigma Alpha Epsilon. Faculty members from the political science and education departments, the writing center and the Residential Colleges were also in attendance for the walk.

"My goal for the walk for the past three years has been to offer students an opportunity to be activists," Henry said. "We have achieved that goal every year as attendance grows."

According to Henry, last year Bucknellians raised $2,400 and brought 88 people to the walk. This year, Sigma Alpha Epsilon alone raised over $3,500 this year and brought 72 members of the fraternity to Washington to participate. In several weeks, the walk officials will provide Henry with the total amount raised by the University.

Courtesy of Dan Rehns

Seventy-two members of Sigma Alpha Epsilon were among the group of University students that traveled to Washington to participate in the AIDS Walk, raising over $3,500 for the Whitman-Walker Clinic.

"It would have been enough for our house to raise some money and have it donated to the AIDS cause," said Chuck Williams '00, philanthropy chair of Sigma Alpha Epsilon. "But we saw it necessary to drive to D.C. to show our support to those in need."

"Philanthropy events like the AIDS walk serve as a testament to the uniquely positive power of Greek organizations," said Scott Pugh '00, president of Sigma Alpha Epsilon.

The AIDS Walk has raised over $20 million to support the activities of the Whitman-Walker Clinic and other organizations in their efforts to fight the spread of the virus and to care for those who have been affected by the disease. Guest speakers at the start of the event were U.S. Health and Human Services Secretary Donna E. Shalala and Del. Eleanor Holmes Norton (D-DC).

"The AIDS Walk was an exciting experience to take part in," Alan Gray '02 said. "I feel proud to have taken part in a tremendous cause."

The Whitman-Walker Clinic is the premier AIDS service organization in the nation, with four facilities in the Washington, D.C. area. The clinic provides services to people living with AIDS, extensive AIDS/HIV education and prevention efforts and coordinates programs for the gay/lesbian community in the District of Columbia.

The national death toll from this modern-day plague now stands at 410,000 while the worldwide death toll stands at 14 million and is rising rapidly. In the United States alone, 40,000 new infections were reported in 1998. The District of Columbia has the highest rate of AIDS cases per capita in the nation and the number is increasing rapidly.

Phi Beta Kappa brings renowned lecturist to campus

Thomas Schelling, University of Maryland professor, spoke of the present role of nuclear weapons

By Jen LaBracio

Surveying the 54 years since the dropping of the atomic bomb on Hiroshima and Nagasaki during World War II, Thomas C. Schelling praised the world of international politics for its continued abstinence in the use of nuclear weapons last Monday in the Vaughn Literature Auditorium.

Schelling, a distinguished professor in economics at the University of Maryland at College Park and Phi Beta Kappa scholar, stressed that because of the power and effectiveness surrounding nuclear weapons, the fact that they have not been used for over half a century is a remarkable feat.

"There has never been any doubt about the effectiveness of nuclear weapons— they have possibly been the greatest increment in weapon-effectiveness in history," he said. "And I will consider my mission half-fulfilled if I can just get you to comprehend the fact that they have not been used since World War II."

Schelling, brought to the University through the support of the Phi Beta Kappa chapter and the department of political science, received his bachelor's degree in economics from the University of California at Berkley and his master's degree from Harvard University. Schelling then went on to teach at Harvard for a number of years before obtaining his current position at the University of Maryland at College Park.

Schelling is the author of various books addressing conflict in the international political scene, including *The Strategy of Conflict* and *Strategy and Arms Control*. Nuclear weapons, said Schelling, have played an enormous role in international politics, not only because of their destructive power but also because of the uncommon aura they inspire.

Kassaandra Bernard—The Bucknellian

Thomas Schelling, University of Maryland professor and Phi Beta Kappa lecturist, spoke to the campus community on the role of nuclear weapons in modern society.

"Nuclear weapons are unique," he said, "not only in their explosiveness but in their perception."

According to Schelling, this perception is caused by the taboo that was placed on nuclear weapons after their use in World War II. This taboo classified nuclear weapons not as traditional, conventional means of defense, but instead as unconventional implements of war.

It is exactly this classification, said Schelling, which accounts for the extreme wariness in the use of nuclear weapons throughout the years since World War II.

"This convention is an asset to be treasured," he said.

Schelling examined the effectiveness of this taboo during the past 50 years, from the Korean War during the Truman presidency throughout Bush's involvement in the conflict in the Persian Gulf. In most situations, the same question was asked:

"What would happen to the status of nuclear weapons once they were used in warfare?"

According to Schelling, most nations were not up to challenging this status. They resisted nuclear temptation, he said, and regarded the use of nuclear weapons to be what President Johnson described as a "political decision of the highest order."

The taboo even influenced a possible positive use for nuclear weapons, Schelling said. During the 1950s and 1960s "peaceful nuclear explosives" (PNEs) were available to clear land or to generate electric power. However, the taboo stood in the way of this use.

"Nuclear weapons were perceived as different. The genetic character of everything nuclear was not good," said Schelling.

Even PNEs could not be accepted, Schelling said, because they "would undermine the belief that nuclear weapons were inherently evil."

Nations in the international political world had to incorporate this taboo in their policy decisions. Schelling also cit-

Public Safety Log

September 22, 1999

INFORMATION/MEDICAL ASSIST–Public Safety responded to Smith Hall for the report of a student with a minor head injury. The individual was transported to Evangelical Community Hospital Emergency Room by the Student Health Services driver and later returned to campus.

INFORMATION/MEDICAL ASSIST–Public Safety responded to Seventh Street House for the report of an ill student. The individual was transported by ambulance to Evangelical Community Hospital Emergency Room and later released.

September 23, 1999

CRIMINAL MISCHIEF AND DISORDERLY CONDUCT–A University student reported to Public Safety that he observed a pickup truck drive over a bush and a light located at a fraternity. East Buffalo Township Police were also advised of this incident and damage estimates are to be forwarded to this department. Charges are pending.

UNIVERSITY PROPERTY DAMAGE–Public Safety responded to Gateway Vidinghoff for the report of a broken window. A repair order was submitted.

UNDERAGE DRINKING–Public Safety responded to Larison Hall for the report of the odor of marijuana and encountered a student who was speaking with slurred speech and had a strong odor of an alcoholic beverage. The individual was under the age of 21 and admitted that he had been drinking. A University citation for underage drinking was issued.

September 24, 1999

MEDICAL ASSIST–Public Safety responded to the Seventh Street tennis courts for the report of a student with a minor facial injury. The individual was transported to Evangelical Community Hospital Emergency room by Student Health Services and later returned to campus.

NON-EMERGENCY MEDICAL TRANSPORT–Psychological Services requested a Student Health Services driver to transport a University student to Evangelical Community Hospital Emergency room for treatment.

MEDICAL ASSIST–Public Safety responded to Swartz Hall for the report of a University student with a hand laceration. The individual was transported to Evangelical Community Hospital Emergency Room for treatment and later returned to campus.

September 25, 1999

UNDERAGE CONSUMPTION/DISORDERLY CONDUCT–While on foot patrol outside the rear of Phi Kappa Psi Fraternity, Public Safety observed a student urinating in public. The student also smelled strongly of alcohol. The individual was under the age of 21 and admitted to having consumed alcohol. The student was turned over to a peer advisor and university citations were issued.

VANDALISM–A University student reported to a Public Safety Officer that a urinal pipe in the men's room, Smith Hall was broken by unknown person(s) which caused water to spill out on to the bathroom floor. A repair order was submitted.

INFORMATION/OFF CAMPUS PARKING COMPLAINT–Public Safety responded to Theta Chi Fraternity for the report of a verbal altercation in reference a parking issue. East Buffalo Township Police responded and requested a garage to tow the vehicles from the private lot.

September 26, 1999

INFORMATION/MEDICAL ASSIST/NON-UNIVERSITY RELATED–Public Safety responded to Trax Hall for the report of a visitor who had struck her head. The visitor's coach was contacted to monitor the situation.

INFORMATION–Public Safety responded to Moore Avenue for the report of two bicycles and a traffic sign hanging in a tree. No witnesses or suspects were located in a check of the area. The items were returned to Public Safety

INFORMATION/POSSIBLE HARASSMENT BY COMMUNICATION–Public Safety responded to Hunt Hall for the report of a University student who received a harassing phone call. Public Safety spoke with the individual who initiated the call and written statements were provided.

September 27, 1999

INFORMATION/RECOVERED PROPERTY–Public Safety responded to the library for the report of a laptop computer, wallet, briefcase, and books found in there. The owner of the property was located and came to Public Safety to claim them.

University philanthropy "makes it happen" for community

By Anne Monoky

Over the past several months, a variety of student organizations on campus have been busy planning philanthropy events for this year. These events all strive to better the community on either a local or national level.

As the Community Service Program posits, "There is no limit to the opportunities for involvement through the Community Service Program—if you don't see what you want, just ask. Chances are you can make it happen."

"Making it happen" is a common theme throughout the campus community service organizations as they work towards a shared goal. However, philanthropy events occur beyond the Community Service Program as well. Greek organizations, for example, participate in a number of charitable events each year.

"Community service and philanthropy are basic components of which social Greek-letter organizations were founded," Dean of Greek Life Roy Baker said. "I fully support our fraternities and sororities in their efforts in these areas."

Several Greek organizations have already begun in their quest to contribute to charity this semester. Kappa Alpha Theta sponsored a Parents' Weekend Pancake Brunch for both students and their parents. The event was held in Larison Dining Hall and proceeds supported Court Appointed Special Advocates (CASA). The group helps abused children in the court systems. CASA believes "anything that we can do is appreciated because every child deserves a fair chance in life and may need your voice in court."

In addition, the Delta Upsilon fraternity had a car wash this past weekend and Delta Delta Delta held its annual "Mums for Moms" sale. The proceeds from this project went to Haven Ministries, a support for abused women.

The brothers of Lambda Chi Alpha sponsored its 12th annual 5K Run for the Children Road Race. The fraternity encouraged students to bring their family and friends out for the event. The proceeds benefit the Ronald McDonald House of Danville.

In the upcoming months, the sisters of Alpha Chi Omega, in conjunction with the Residential Colleges, will try to open a thrift shop for the women of the Northumberland Housing Authority. The project hopes to allow these women to obtain clothes by a barter method. They will be collecting clothes in the Carey House, Smith Hall, Swartz Hall, Roberts Hall and the Langone Center all this week.

Greek Service Day is currently being planned for this Sunday. All Greek organizations will participate in this event, as philanthropy events prove to be a major part of Greek life.

"Critics of Greek systems across the country usually do not look at community service hours and philanthropy dollars when being critical. If one thinks a particular Greek system is not making a contribution, look at the community service hours and philanthropy dollars being generated by that system. A system in trouble is usually negligent in these areas," Baker said. "That's not the case here at Bucknell."

Last year, fraternities and sororities at Bucknell performed 8,388 hours of community service and raised $59,535 for philanthropy.

There are a number of organizations on campus who serve solely to do charitable work, such as the BISON Volunteers. BISON Volunteers are the part of the Community Service Program that recruits and places student volunteers in the community. They are planning several major philanthropy events this semester such as the "Adopt-a-Grandparent" program with the Riverwood Old Age Community. The student can spend a couple of hours a week with his or her adopted grandparent doing activities such as talking, playing games, or making cookies. There is an interest meeting planned at 9:30 p.m. in room 217 in the Langone Center on Tuesday.

BISON Volunteers will also sponsor such programs as the Apple Butter Festival in New Berlin on Oct. 15 and 16 which will give students a chance to stir apple butter. Toys-for-Tots will have a face-painting booth for University students at Stacy's Walk—an event that will benefit a young girl from Lewisburg who has Lou Gehrig's disease. The group is also doing a window washing for a senior center and a haunted house for a youth service. The group is looking for student leaders for programs at the community center, Haven Ministries, and the Milton YMCA. Inquiries can be directed to the office on campus at extention 73573.

SEARCH From page 1

After Amott introduced the motion, which explicitly called for more faculty representation on the Presidential search committee, the motion was amended by professor Jean Shackelford and passed a faculty voice-vote by a near-unanimous margin.

"While recognizing the importance of confidentiality in the presidential search, the Faculty hopes and expects that opportunities will be provided for members of the campus community to meet the finalists and provide their responses to the search committee," the motion read. "The Faculty respectfully requests additional representation on the Search Committee."

> *"It is the responsibility and authority of the trustees to select the president. With that said, I had hoped that the trustees would have designed a search process which placed a high value on the on-campus constituencies."*
> *—Professor of economics*
> *Teresa Arnott*

The current search board consists of eight trustees, four of which are members of the Classes of 1956 or 1957. D. Lee Hamilton '57 chairs the committee and serves as its spokesman. Professor of Political Science and Chair of the Faculty John Peeler and Professor of Chemistry Dee Casteel serve as the faculty representatives, while BSG President Yoshi Maisami '01 will be the student representatives.

Because of the confidentiality of the process of selecting and narrowing the pool of candidates, the elected representatives will serve as simple representatives of the faculty and students—the process dictates that they cannot share specific information of the details of the search until the process nears its end.

"We can ask people what their priorities are or what they think are the main problems and goals of the institution," Peeler said. We serve as representatives of the faculty's interests without doing any specific consultation."

The motion was introduced at the September meeting of the faculty, long after the original terms of the committee were announced. The search committee, which met for the first time on Tuesday, added no new members as a result of the motion.

I knew at the time that I introduced the motion that plans for the committee's composition were very advanced," Arnott said. "However, I hoped that nearly unanimous consent (to the motion) from faculty would signify to the trustees the depth of the campus's desire to participate in this process."

Dineen leads discussion on Greek goals, principles

PROGRAM FROM PAGE 1

Greek life today.

"Simply educating [skeptics] as to what your habits are as a Chapter, inviting them to come see for themselves firsthand, and allowing them to decide for themselves whether or not you are sincere [is the key]," Dineen said.

Dominating Dineen's presentation was an outline of Sig Ep's goals and activities since its recolonization two years ago. Dineen is the second president to lead Bucknell's Pennsylvania Kappa Chapter, taking the reigns in January of 1999 from John Littzi '00 who led the fraternity's return to campus beginning in the Fall 1997. One of the key elements of Sig Ep's organization is its Balanced Man Project, wherein members strive to embody four major attributes—the leader, the scholar, the athlete and the gentleman.

The Project is a new addition to the national fraternity, and differs significantly from the traditional chapter. Chapters that recolonize must do so as a Balanced Man Chapter. The Project includes such aspects as not having a traditional "pledge" program in that new members, after sophomore rush, have the same rights as initiated brothers upon joining the fraternity. Another facet is that of a mentor program. In this, an older brother is paired with a new member and helps him through the fraternity education process. Each SPE member must complete three challenges during his college career—entitled the Sigma, Phi and Epsilon challenges—wherein specific fraternity values are instilled.

Jared Silliker—The Bucknellian

Bob Dineen '00, president of Sigma Phi Epsilon fraternity, presented the "Thousandth Man Campaign this past Saturday.

Dineen also spoke significantly about Sig Ep's philanthropy efforts. Under the Balanced Man Project, the organization is required to fulfill certain philanthropy and community service goals. Over the past two years, SPE has worked with a number of groups including the Lewisburg Community Center, Red Cross, Haven Ministries, T&D's Animal Sanctuary, Riverwood Retirement Center, and Linn Conservancy.

The fraternity's recent involvement with the local Red Cross was especially intriguing. During the recent flood, the Red Cross's building was badly flooded. On very short notice, 54 Sig Ep members volunteered their help in moving supplies and equipment to a temporary facility.

This semester, the fraternity's primary philanthropy event will be a haunted house in conjunction with Kappa Kappa Gamma sorority to be held on Oct. 29 at the Sig Ep house. Donations, canned goods and nonperishables will be collected at the door.

Dineen will give the presentation twice more—to alumni and faculty focus groups—on Oct. 16 at 10:45 a.m. and on Nov. 18 at 6 p.m., respectively.

WALK From page 1

The walk organizers are worried. The number of participants was down about 21 percent this year, a sign of growing complacency about the deadly disease. Funds donated to the Walk have also declined; last year the walk raised $1.8 million.

"I worry that people think AIDS is under control and I want students to know that now, more than ever, their actions in preventing this disease is key," Henry said.

Henry looks forward to increased campus awareness and involvement with the event. She hopes that a group of interested students will establish a new organization that spends the year preparing for this event.

"It's an event that now has some momentum and it would be a great opportunity for a student group to combine philanthropy with activism," Henry said.

"I think the turnout was very exciting," said Francis Fritz, writing and teaching consultant at the Writing Center.

"The students were visibly inspired by the value of being involved with this extraordinary event."

NEWS BRIEFS

Peacekeepers in East Timor Capture Suspected Elite Forces

Suspected members of a crack Indonesian special forces team have been captured by international peacekeepers looking for militiamen in East Timor, according to Australian military sources.

About 10 men, some carrying cards identifying them as members of the Kopassus forces, have been picked up, and hundreds more may still be operating in the bloodied territory, Australian soldiers said.

"It's quite interesting," one Australian officer said. "We'll hang on to them and, when we know for sure they're Kopassus, we'll offer to send them back to Indonesia. But how can they accept them back without admitting that they sent them here in the first place?"

Kopassus were former President Suharto's elite commando troops, carrying out a number of covert operations during his 32-year reign.

The peacekeeper's role in East Timor has been unclear. But some Indonesian experts believe non-commissioned officers, some recently retired, were recruited to train the pro-Jakarta militias responsible for the wave of terror that prompted the deployment of international peacekeepers.

Peacekeepers have been sweeping the capital of Dili since their arrival September 20, detaining dozens of armed militia suspects. Two forays in Bacau, East Timor's second largest city, netted 15 suspected militiamen and a cache of weapons on Monday

Ecuador's Capital Placed on Alert as Volcano Rumbles

Residents of Ecuador's capital Quito are under a fresh warning that the nearby Guagua Pichincha volcano could erupt in a matter of days.

The volcano, located seven miles from Quito has been billowing immense clouds of water vapor more than two miles high since Aug. 24. However, institute scientists said if and when the volcano bursts, devastation for Quito and its 1.4 million is highly unlikely.

The city would be shielded from a lava eruption by the taller, inactive Pichincha volcano, which overlooks the city. Guagua Pichincha is 1,320 feet shorter than Pichincha and its crater faces away from Quito.

Fundamental Christians worry some Israelis

While the approach of the year 2000 is drawing Christian pilgrims from across the world to visit Biblical holy lands in Israel and the West Bank, bringing much-anticipated tourism revenue to the region, it has also drawn visitors the Israeli hosts prefer would stay home— those who hope to witness the end of the world.

Among the crowds of Christians traveling to the Middle East ahead of the new year, a minority of fundamentalist followers are bringing with them visions of a second coming of Jesus— an event that, according to New Testament prophesy, signifies the apocalypse.

"We're waiting daily for the Messiah to return," says one Christian woman. "There will be an apocalypse somewhere in the Middle East. There will be an Armageddon," says another.

That kind of talk alarms some Israelis, who as Jews don't share a hope for the return of the Christian savior and are concerned that radical Christians might destroy religious sites holy to Jews and Muslims in Jerusalem, setting off bloodshed in the disputed city.

Israel's Tourism Ministry predicts more than 3 million tourists will visit Israel and the West Bank during 2000 and 2001 to mark the start of Christianity's third millennium.

Police have set up a special task force to deal with members of messianic sects they fear may try to use violence to realize their apocalyptic visions of the end of the world.

Groundbreaking to Begin on Nation Museum of the American Indian

With honoring songs and offerings of water, tobacco and earth, tribal leaders from across the Americas joined Smithsonian Institution officials Tuesday in a long-delayed groundbreaking for the National Museum of the American Indian.

Construction of the $110 million-plus museum, first proposed in the 1980s, had been stalled by squabbles over what should be in it, how much it should cost and what it should look like. Current plans call for the five-story limestone structure to be opened on the summer solstice in 2002, taking its place as the last Smithsonian museum on the National Mall, which stretches from the Capitol to the Lincoln Memorial.

Indians attending Tuesday's ceremony said they were glad to have an Indian museum as part of the Smithsonian and even more heartened that Indians are to be heavily involved in crafting exhibits and programs.

Compiled by David Arnold from CNN Interactive

eRecruiting.com fights through growing pains

By Katie Marston

It is the wave of the future. The University's Career Development Center (CDC) is embracing unbelievable new innovations in technology. Students can now enjoy the sophisticated and efficient programming of eRecruiting.com, a resume submission process done via the Internet.

In the past, seniors were required to attend a four-day session of events held in the Cave. On Monday and Tuesday, they would visit the tables alphabetically organized by employer, investigating the positions offered at each and inquiring into the nature of the jobs in the industries present. After having a day to determine their preferences, the students would return to the cave on Thursday and present their resumes in envelopes at each of the stations of interest to them.

However, this process left room for improvement. As a result, the CDC is following in the footsteps of the Ivys and other competitive institutions around the country, adapting a computerized resume transfer. Along with 80 other academic institutions, the University has obtained its site through Crimson Solutions, located in Boston, Massachusetts.

eRecruiting.com contains a file on each employer with contact information, job descriptions, positions available and other extensive information. After entering a password, the student can access these files at his or her leisure through a personal computer. Likewise, employers are able to view the student's resume off the system from an off-campus site. This eliminates the need for hard copy submissions or initial on-campus interviews.

The CDC selected this particular system for its use of Adobe Acrobat Reader. This added bonus to eRecruiting.com allows Microsoft Word documents, typed by students, to easily convert directly to PDF format for accurate transmission of student resumes to employers. The system also allows for sensitivity on behalf of the student, as well as the employer, through the CDC's staff. The employer is unable to view such personal facts as the student's gender, ethnicity and Grade Point Average. Similarly, the student is blocked from obtaining such employer information as telephone numbers.

As an ongoing file, the student can keep a profile of his personal interests, skills and abilities, which he or she can update every year.

Another feature of eRecruiting.com available for the students' organization is the calendar of resume deadlines, career center events, and information sessions. In addition, the student is able to perform a job search by categories, such as location, company and industry.

eRecruiting.com, newly introduced to the senior class through a series of successful orientation sessions, will be open to the entire student body in early November. The system will be used for internship selections as well.

Last week, Crimson Solutions experienced a hardware failure which presented a technical glitch in the system for University students and had many worried about their files on the system. However, the problem was quickly resolved and the CDC extended the deadline for students' information to be submitted, informing employers of the situation.

According to Pam Keiser of the CDC, "We are accommodating and flexible in extending help to students, as is needed with the introduction of any form of new technology." She explains that the University is "confident in the system," and acknowledges that it is "a work in progress." She feels that the installation of eRecruiting.com is a large step in the right direction for Bucknellians to more effectively compete with other quality institutions for employer attention.

CDC expands, moves "employer expo"

By Beth Slaby

For the most part, students attend a 4-year university with the hope of acquiring a fulfilling job after graduation, or to be accepted to the graduate school of their choice. The University's Career Development Center is here to help facilitate this post-graduation process. Whether it's the weekly CDC Scoop sent via e-mail or the erecruiting.com they worked hard to implement this summer, they are always willing to help students with post-university decisions.

A monumental event in the career search, however, is the annual job fair sponsored by the CDC. This year, the job fair was held on Tuesday September 21 in the fieldhouse. This was the first year the fair was held in this location, and according to Laura Denbow, Director of the Career Development Center, "we think it worked out well." In the past the fair has been held from 3-6 p.m. in the Terrace Room. Due to a spacing problem, however, the fair was moved to the fieldhouse to give students and employers adequate space to interact. The time was also extended to 11 -4 p.m. to give all students an opportunity to participate. Over 80 organizations were represented this year, and according to Denbow, "close to 600 students participated."

The Job Fair is over 10 years old. It began in the fall of 1986, and has continued to gain momentum ever since. According to Pam Keiser, Associate Director of the Career Development Center, "[the fair] is always one of our biggest events of the year, and kicks off the recruiting activity on campus." The University coordinates calendars with Lehigh and Lafayette as well, to allow employers to visit Pennsylvania and attend all three.

The CDC was pleased with the eclectic array of organizations that visited campus, and is eager to hear the students' reactions to this year's fair.

Some students did concur that they were a bit disappointed that liberal arts majors were not more highly represented, but Meredith Alan '01, who works for the CDC admits the benefits of the job fair. "Even if you don't meet the perfect employer [at the job fair], that person can connect you to the best job. You should never cut yourself short because you don't believe what you're looking for isn't represented here."

The job fair commences the on-campus recruiting process. The official recruiting program opens on October 1. This is the program where employers travel to Bucknell to interview members of the senior class for employment opportunities. Each year approximately 25% of the class is hired through this program.

University computers attacked by viruses

Information Services and Resources offers help with prevention and recovery

By Scott Hagadorn

Many people sound confident when they talk about computer viruses, yet very few have adequate knowledge of this technically obscure subject. Their cunning nature and unpredictable behavior contribute significantly to the spread of fear and myths of their existence in the digital world of computers.

Some people tend to use the word "virus" to refer to any unexpected computer glitch, but this falls far short of being accurate. Viruses are short programs that are actually coded with malicious content by someone looking to wreak havoc on computers. They can be written to multiply, to damage programs or to alter computer data.

Using the resources of your computer, the coded virus simply copies itself and spreads to other files on a computer without the user's knowledge. A virus cannot move without the assistance of a host file, meaning it must actually attach itself to another program to multiply. The virus is executed when the host program is executed, hence the reason that the code continually spreads and the term "virus" is used.

Viruses come in a wide variety of forms, from the benign type to the most malicious data erasers. Some of the least complicated viruses are Concept Viruses which are a type of macro virus. One distinct example is the Word Concept Virus that replicates when a user opens an infected Microsoft Word document.

A much more malignant virus present on the University's campus is a form of the win.cih virus—also referred to as Cherynobl—that occurred last April. Win.chi viruses attach to executable files and libraries of information on your computer. They then do their damage on a specific day each month. The Cherynobl virus was coded with a BIOS destructor and master boot record overwriter that would execute on a certain day. In other words, this malicious virus can do extreme damage to one's hard drive and render computers useless forever. This rather advanced virus can be prevented with the appropriate antivirus software package.

Preventing viruses on your own computer is relatively easy if you take the proper steps. For both Macintosh and PC users, numerous antivirus programs such as Norton Antivirus or McAffee will provide protection against viruses and other destructive programs. Information Services Resources (ISR) offers Norton Antivirus updates for download on the web. Scanning your computer regularly will provide the best protection against destructive viruses and other harmful programs.

Sometimes other programs can get confused with viruses. These programs can be just as detrimental as viruses, however. Some of programs in which this occurs the most often include Trojan Horses, Worms and Logic or Time Bombs. A Trojan Horse is simply a program that performs a an unexpected execution that is damaging to a user's computer. Similar to worms, this is not a virus because it does not reproduce itself. They hide in programs that appear uncorrupted, yet once this program is loaded they will cause damage to occur. Logic or Time bombs also damage data by running at a certain specified time. All of these programs can be found and deleted with a good scanning program such as Norton Antivirus.

The University offers free consulting on virus problems via the ISR Techdesk. They can help guide you through the appropriate process of removing infected files or programs with your antivirus software. For even more detailed information on viruses and virus protection, visit http://www.symnatec.com or search for computer virus information on the world wide web.

Chris Pizzo—The Bucknellian

University computers have been a target of several computer viruses, and have infected students through disks and other resources.

LECTURE from page 1

ed President Nixon's decision not to use nuclear weapons in Vietnam.

"I think Nixon felt that if he used nuclear weapons, he would never again be held in respect in the rest of the world," said Schelling.

Schelling stressed that this taboo must be preserved in the years to come in order for this phenomenon to persist. It is astounding that this "nuclear silence" has endured for 54 years and continues to be practiced today.

"I think if 25 years ago, if you would have asked experts how many nations would have used nuclear weapons by the year 1999, three or four times more nations would have been listed. It is astonishing," he said.

Schelling recommended the world of international politics keep its eye on the ongoing situation between India and Pakistan, and hope these nations share in the abhorrence of nuclear weapons that has been demonstrated throughout the past 50 years of history.

Create power income while building your own buisiness. Great for business management projects and papers. Ideal compliment to health and fitness. Call 966-2743 for more information.

COUNTING CROW TICKETS GO ON SALE MONDAY

Counting Crows tickets will go on sale this **Monday, Oct. 4** at 11 a.m. in the Bookstore and the LC box office. Giglo Aunt and Joe 90 will be the opening acts for the show. Local radio 94.1 WQKX will be broadcasting live from Bucknell–in the LC Mall, 11 a.m.-1 p.m. They will be giving away free stuff to promote the concert.

Ticket information is as follows:

Bucknell students: *$15 with BUID*
General Public (Oct. 11): *$20.00*

Tickets can be purchased with ID, major credit card (Visa, MC, or Discover). No limit on tickets purchased.

WANT TO GET A SNEAK PREVIEW OF WHAT'S HAPPENING AT THE UNIVERSITY BEFORE THE REST OF THE CAMPUS? IF YOU ARE AVAILABLE ON WEDNESDAY MORNINGS FROM 8:30-11:00, YOU CAN WORK AS A PAID COPY EDITOR. NO EXPERIENCE IS NECESSARY, AND ALL COPY EDITORS WILL BE TRAINED. IF YOU ARE INTERESTED, PLEASE CONTACT DEBBIE AT X74917 OR RUGGIERI@BUCKNELL.EDU.

EDITORIAL

Homecoming parade—what has been lost?

When students return from Fall Break in a few weeks, Homecoming Weekend will be upon the University. Missing, however, will be the traditional parade Saturday morning before the football game.

The decorated floats will no longer drive the streets of Lewisburg and campus. Has an important tradition been lost or had this become a community event on a campus with little student involvement?

In support of the former, it seems as though the University made yet another executive decision without much outside input. It does not appear that any focus groups—especially students and community members—were appfoached for comments. Were there any attempts to improve the parade or was it merely removed from the schedule of events?

In doing so, the University may have discarded an important Bucknell-Lewisburg connection. Although Homecoming is a University event, the parade was one of the best chances for community involvement. There are often criticisms that positive and meaningful interactions with Lewisburg residents are minimal, but yet the University is canceling events that seem to provide such an opportunity.

Still, the view that the Homecoming parade had become an underattended event, from a student perspective, is also easily seen. In this the University may have not been so malicious in eliminating the parade. In recent years, and maybe in the past as well, the student portion of the parade had become a lowly "pledge" event for Greek organizations. An extremely large portion of the student participation was comprised of new sophomore Greeks that were often "forced", as part of pledging, to construct a float and ride on their creation in the parade.

Sure, this may have been a fun project for some, but for many it was an early morning to get up and do your duty. Plus, there were very few other students involved—either actively on a float or as spectators—in the parade. This virtually made the parade a Lewisburg community event on the Bucknell campus with a bunch of Greeks who didn't really want to be there anyway.

This probably isn't what the University was looking for in a festive Homecoming parade. Hence, the event gets the ax.

Now the question arises, will this traditional event be replaced? Will there be other events that can aim to integrate University students and Lewisburg residents?

One can revert back to this past spring to find another Bucknell-Lewisburg event that failed to materialize. Traditionally, the University's Spring Parents' Weekend coincides with Lewisburg's Annual Craft Fair which lines Market Street. Certainly there could be a reasonable explanation for this miscue, but the key is that these two events took place on different weekends this year.

In years past, parents and students held a formidable population at the Craft Fair, but for some scheduling problem many families were disappointed to hear of the change. Although the Craft Fair—like the homecoming Parade—is not an event expolicity designed to bring the campus and community together, it served, for a day at least, as a way of bridging the gap.

The Coalition of Lewisburg and Bucknell Residents, formed with the goal of bridging this gap in mind, obviously must take a leading role in attempting to find an event that does work to replace the Parade. But the Coalition can't work alone. It is the job of University faculty and administration—most of which are closer with the town than students, to assume some of the responsibilty. But the crux of the responsibility falls in the hands of University students, who must first understand that a good faith effort to improve town-gown relations is necessary, and then must be supportive of the University efforts to improve this relationship.

The cancellation of the Homecoming Parade wasn't necessarily a bad thing—its effects on students and returning alumni are likely to be negligable. But the parade did represent an effort—on of the only full-scale efforts—to improve the University's relationship with the Lewisburg community. An event can replace, or likely even better, the parade as a public relations vehicle. But if the parade isn't replaced, and arguably the University's best opportunity to bolster its relationship is gone, more than a simple parade will be lost.

Will the University's alcohol policy be effective in reducing underage drinking?

Yes

By Rebecca Rowland

I've said it before and I've said it again, underage drinking is illegal. The administration is not at the crux of a conspiracy to destroy Bucknellians carefree college days, it is merely following the law of the land.

So go ahead, say that no matter what the university does, underage drinking will prevail. Say that nothing the University does will work, what exactly do you hope to achieve by that kind of rhetoric? Let me let you in on a little secret; the University will not give up.

And rightly so. Whether you think so or not, students at this school need protecting from underage drinking. Sure nothing bad has happened yet, and I stress yet, but what about other schools? Is the student body here really that different from Cornell where a young man fell in a creek and drowned while intoxicated? Last time I looked we had an abundance of creeks, and lakes, and bridges, and huge stairways, and rivers...

A drunk person is not necessarily a stupid one; yet, it is generally regarded that someone who has consumed alcohol is no longer in possession of their best judgment. In a closed, relatively sheltered campus society, it is in everyone's best interest that there be restrictions on drunken activity. What kind of institution would we be at if the administration did not set these rules?

Our parents sent us here to obtain a good education and become adults. They did not, presumably, send us here to get drunk and die. They are counting on the administration to safeguard us from danger—even if that danger is ourselves.

Bucknell's goal is to raise the quality of its students and its standing in the academic world. If we want to compete with schools like MIT, Harvard and Williams, it only makes sense that we enforce a strict alcohol policy. As long as our reputation is that of a "party school" where students "work hard and party harder," it will be virtually impossible for us to be taken seriously.

It is glaringly obvious that the administration and the student body will never agree on an alcohol policy. As long as underage drinking is forbidden, the students will be unhappy. As long as underage drinking continues the administration will be unhappy. Does the University's current alcohol policy work? Not completely, but doing nothing is not an option.

No

By Maren Johnson

Bucknell students and drinking—it is the perpetual problem on this campus. It seems that we cannot separate the two no matter how much the university dislikes them together.

The students and the administration, as well as public safety, have been butting heads over the issue since well into the beginning of last year. In his attempt to make our school a "better place", Bro Adams implemented stricter sanctions for drinking violations and went public with the news that the university has a "drinking problem."

With Bro on his way out, the university is cracking down even harder this year to make sure that his efforts won't be lost. This is all well and good, but is the administration, in all of their efforts to control the problem, really thinking about the side effects?

In order to cure a disease, the treatment must be one that prevents the spread of the disease to other areas of the body. The plain and simple truth is that the university can only prevent what they can see.

By coming down harder on the underage drinking problem, there is more emphasis put on what happens before the party.

"Pre-gaming" or "pre-partying" has become just as popular as fraternity parties now that we can't get a beer to save our lives at the fraternities. The less chance we have of getting a beer at a party, the more chance there is of us drinking too much before we go out.

The way it looks now, our binge drinking problem isn't getting better, its just not as visible. As much as we may not want to admit it, alcohol is our forbidden fruit: dangle it in front of us and tell us we can't touch it and that's the first thing we will want to do.

This is not a Bucknell problem, it is an American problem. The more taboo we make underage drinking, the more appealing it becomes.

Obviously there is no chance of Bucknell letting up on the drinking rules, but there's no harm in pointing out that the more forbidden the university makes the fruit, the more tempted we are to taste it. Make that fruit just an apple in the caf and maybe we won't want it so badly anymore.

Parking problems frustrating to students

By Lindsay Gash

When is the last time you received a parking ticket here on campus? I am sure that large amounts of student have received one, if not more, in the month or so since we have been back on campus. This has led me to the conclusion that there is a huge parking problem at the university, and if some type of action is not taken in the near future many of us will be going broke.

It is understandable that there would be a shortage of parking due to the construction taking place at the University, but who ever thought that things would be taken this far? When the University took away the Swartz parking lot, they eliminated a large area of student parking. In return, it seems as if only staff/visitor spaces were added.

I am a senior, who has had a car on campus since sophomore year, and this is not the first time I have encountered parking problems. However, they were never quite of this caliber. Last year while living in Hunt Hall, there were shortages of parking, but I was always able to resort to student parking a block or so away from my dorm. This year student parking is just scarce in general.

How many times do each of us with cars circle the campus and see signs that designate Staff parking only? I know that, for me at least, it is a frequent occurrence. This seems absurd, especially since the number of students exceeds the number of faculty by great lengths. I am not saying that it should all be student parking, but some type of compromise seems in order.

I find it quite disturbing that my housemate and I received parking tickets for the same violation with the exception that my ticket was $25 and hers was $5. This can be explained by who issued the tickets: my ticket was complements of Public Safety, while hers was from the Lewisburg Police. It seems unfair that I should pay more money for the same violation. In the future, one can hope that the parking violation sanctions will become a bit more uniform.

Another problem that seems to arise is staff parking in student areas. A good example of this is Moore Avenue. The first row of parking is designated for all campus, while the second row is staff and visitors. There are never any spots in the student area and in staff/visitor parking, there are always plenty of spaces. The reason for this being that many of the decals in the all student parking are staff. All our lives could be a lot easier if everyone helped out one another by parking in a considerate manner.

This parking problem is also hitting home at the fraternity houses on campus. When a student needs to park uphill and there is no parking they tend to park in the lots owned by each fraternity. A fraternity brother cannot be happy when he comes home to find no open spots at his own house.

At the end of each summer, we receive a letter in the mail allowing us to send money for a student parking decal. Why should we have to pay money in order to have nowhere to park?

I feel that this payment should at least be some type of assurance that we will have a parking space. In reality, we end up paying a lot more money to have a car here on campus than we realize.

The university has discussed the idea of "a walking campus" where cars will be parked on the outskirts of the campus. This idea sounds fine to me, but how is that going to help the shortage of parking? Are there really going to be enough spaces for everyone or will students continue to encounter the same type of parking conflicts we are dealing with at the present time?

This brings up the question whether or not the university really wants students to bring their cars to school. I know that my parents were tired of driving back and forth to Lewisburg after freshman year, and there is no way they would be pleased with the idea of me not having a car on campus.

Another alternative is limiting the number of cars on campus. Maybe seniority or some other type of system could do it. Whatever be the case, some type of plan needs to be implemented very soon.

Although my frustrations with parking continue to grow, I try to maintain a positive outlook on the situation with hopes that the university will try to find a solution to this serious problem. At a reputable university that prides itself on accessibility and organization, this does not seem too much to ask.

Choosing our country's leader

Distinguishing between presidential candidates' individual qualities

By Josh Guyan

Every day I read the stories about the candidates for the presidency and I wonder, is there an electable candidate out there that would actually be a good president? I think there are quite a few candidates who are electable and I think there are a few who would make good presidents, but is there one who is both?

We have to start of course with the current front-runner, Mr. George W. Bush. He is electable because his poll numbers are through the roof and he has over $50 million to spend on the election. He had that "little problem" with the cocaine question, but that blew over pretty quickly. So far nothing has come along to take wind out of his sails. Since George W. has set out hardly any policy and has taken a stance on very few issues, he has not offended anyone yet, and therefore, his polls are up in the clouds.

There is the small problem that many, if not most, Americans think he is his father running for re-election, but do you think people actually care? They would not know the difference between him and his father anyway. It is the name that is really pushing him ahead of the pack.

So we know Bush is electable, but would he actually make a good president? Well he has certainly got the lineage, and the advisors, but does he have it upstairs? You know what I am getting at; there have been widespread rumors of George W.'s lack of Presidential intelligence. I am sure he is a very smart guy, but is he smart enough to be president? Is he smart enough to juggle all the issues that a president must deal with?

Perhaps his apparent lack of understanding of the issues is just inexperience. He only has five years of political service, and that is not just five years experience as an elected official, that is five years experience *total*. He worked on his father's campaign, but other than that he had nothing to do with politics whatsoever until he ran for governor of Texas. It is hard to grasp a lot of issues when you have not been dealing with them for very long. But inexperience is certainly another characteristic that would not make for a very good president.

I think there are quite a few candidates who are electable and I think there are a few who would make good presidents, but is there one who is both?

What about Vice-President Al Gore? He certainly has the experience, 15 years of elected office. He has just as much politics in his lineage as George W; his father was a long time Senator from Tennessee. Unlike George W. there is no question that he has the intelligence to be a good President—he is an excellent debater, not to mention he authored a very intelligent book on the environment while serving in the Senate. He destroyed Ross Perot in their debate on NAFTA years ago and would, I believe, "out-debate" any candidate out there. He knows the issues and has been systematically laying out policy prescriptions on every almost every issue in the nation. He certainly has the capabilities of being an excellent President.

But, wait a minute, is he electable? It seems more and more that he is losing ground in the polls. He is already faltering against George W. Bush and Bill Bradley is almost even with him in the Democratic primary. People tie him to the scandals of the Clinton Presidency, and they are sick of it. Who can blame them?

Gore has had his own problems with campaign finance infractions, nothing too serious, but certainly something to make people wary of another four years of scandal. He is spending money faster than he can bring it in trying to hold his head above water, but will he be able to turn things around?

Bill Bradley is certainly electable. People love him, he is a former basketball player, and he may even get Michael Jordan to campaign for him. That would be huge. He, like Bush, has not set out much for policy and has only taken a stand on a few issues, so he has not offended anyone. His poll numbers are pretty good and steadily rising.

But would he be a good President? He just might. He is a Rhodes Scholar just like Clinton so he certainly has it upstairs, no one can dare call him a dumb jock. He gives us a feeling of morality and no one really thinks he would be plagued with scandal. My only fear is that he may be a bit too liberal for America right now. America is moving to the center, and he gave us a glimpse of his ideology with his pretty liberal policy proposal for Medicare. When people find out a little more about him they may realize they are looking for a more centrist candidate.

Steve Forbes is far too conservative to be electable and he will never lose that "rich guy trying to buy the office" stigma. John McCain would make an excellent President, but it does not look like he will be able to raise enough money to get ahead of Bush. Elizabeth Dole has campaigned very well, but she has never held elected office, which could make her unelectable, and a bad President. The others are all too far off to consider now.

So, do we have a candidate out there that is electable and would make a good President of the United States? You tell me.

Is old-fashioned dating possible during college?

By Laura Day

The other day I was looking through my mother's memory box, when I came across my father's fraternity. I saw the corners of my mother's mouth creep up as she told me how she met my father at Bucknell and about the pin he gave her when they began to "go steady."

My mother also told me about the candle-lighting tradition at her sorority; when a girl was "pinned," the sorority got together and sat in a circle in a dark room. They would light a candle, pass it around, and when it got to the girl who had been pinned, she blew it out. Then, her sisters would all congratulate her and celebrate.

In today's society, "going steady" is an archaic term, referring to the era of "Bye Bye Birdie" and our parents' generation. Instead, we have hook-ups, "hallcest," sex, and relatively little innocent and frivolous dating. When I ask my friends what they think of dating at Bucknell, I receive answers such as "non-existent," "rare," or "Where would we go?"

Of course times change, and it is not expected that the traditions of the 1960's and 70's would still be carried out today. However, it is unfortunate that dating has become more-or-less non-existent on campus. It is much easier to stay in the dorms, watch a movie, or go to a campus party, than to find a place to take a girl on a date. As a result, couples tend to spend more time inside, and consistently less time experiencing traditional dating.

So boys, it is time to get your creativity flowing. Although dating is difficult on campus, it is not impossible. A nice walk at sunset, a talk at the coffee house, a night OUT to the movies, a picnic lunch, a nice dinner in town, or an exercise day together can all be fun activities and a good break from the mundane routine of campus life.

It is very easy to get caught up in the ease and conveniences of dorm life. But, if we remember that we are not bound to the confines of our room, and that there is a world beyond the grounds of Bucknell, we will open our eyes to all sorts of new possibilities.

George Bernard Shaw wrote, "The people that get on in the world are the people who get up and look for the circumstances they want, and if they can't find them, they make them."

Relationships blossom and grow when the people in them challenge each other to be better people and to explore the world around them. Identities form as a result of the environment in which people live; and people grow together, or apart, partially because of the circumstances they are thrown into.

However, we can control the extent to which our environment affects us. Dating is just one example of the effect campus life can have on students. The routine of "work hard, party harder" becomes difficult to break, and Friday nights begin to blend together. Campus life can be spiced up, and dating is the perfect way to start.

If, like Shaw says, the Bucknell Bubble is seemingly holding us back, we should resist the temptation to let it control us. We should take that walk at sunset. We should make the circumstances we want.

Homecoming traditions lost

By Allyson Demerath

Picture it—it is a bright Saturday morning, and you are actually out of bed before noon. The sun is shinning, the leaves are just starting to turn fiery red, and the day is off to a great start. Surrounded by all of your closest friends, you chat about the previous night while munching on some quality Dunkin' Donut bagels. You may be on your front porch swing, on the grass under some trees outside your dorm, or even at a low key breakfast party downtown. It's Homecoming weekend.

In years past, Homecoming weekend has always been a huge success at the University. Whether fresh out of grad school or grandparents, a large number of alumni make their way back to the campus they once called home. Your friends that graduated last year come to stay with you, and you get to hear about their lives in the real world.

Younger alumni bring their new spouses to campus to reminisce about their college days. Older alumni stroll about the campus noting the changes made since they were here, or the lack thereof. During Homecoming weekend, hundreds of truly different people are all united by one common bond: their loyalty to Bucknell University. Although most of our football games show a lack of school spirit, Homecoming weekend seems to be the one time Bucknell shows its pride.

One of, if not the biggest, highlight of the weekend is the Homecoming parade. The parade promotes excellent town-gown relations, as both Bucknellians and the Lewisburg community line the streets. Young children, some whose parents went to Bucknell, wait in anticipation for the arrival of Greek floats and candy to fill the streets. It is Bucknell's version of the Macys's Day Parade with its own quaint and personalized touch.

This year, however, will be different. There will be no Homecoming parade. There will be no opportunity for students, alumni, and the surrounding community to join together. There will be a significant piece of school spirit missing. Homecoming weekend will have a completely different atmosphere, one that does not carry the same tradition and honor as years past.

The parade was beneficial for a number of reasons. The most obvious being that it promoted school spirit, even if community members and Bucknellians alike generate that spirit. Who ever said that school spirit could only be fostered by students? Because the parade brought both the community and Bucknellians together, it cultivated the town-gown relations as well.

The parade represented one of the few events supported by all. How many alumni will want to return now that one of the honored traditions is missing? The purpose of Homecoming weekend is to show pride for our school and unity within it. How can this be accomplished when we are losing our traditions?

Chance and persistence: An invaluable combination in future career planning

As a senior, career-oriented activities have become plentiful in my life. Workshops with the Career Development Center's staff, company information sessions and the brand new "e-recruiting" have inundated daily schedules for many Bucknell students.

From the Editor's Desk

Jared Silliker

So as I've been immersed in all of this advice, I thought it might be appropriate to discuss some of the lessons and frustrations I learned through my internship this past summer.

Although it often surprises people, I am a BA Chemistry major. I don't know how much chemistry I will utilize after graduation, but sometime last fall I began to develop an interest in Pfizer, Inc., one of the largest pharmaceutical companies in the world. They make Viagra, among other top drugs, for those of you that need some more association. I now have two Viagra t-shirts that have made for interesting conversation pieces.

My first step was to contact Bucknell alumni who are currently working for Pfizer. My initial calls and contacts were somewhat discouraging, however. There was a common theme that summer internships were reserved for sons and daughters of employees. Some of my letters did not even garner a response.

Back to the drawing board.

What happened next falls under what some call "planned happenstance"—my dad sent me an article once that discussed this theory. A simplified version of its principle is that if you consistently put yourself in a position to be lucky, luck will knock on your door more often.

This past spring I happened to mention Pfizer to a professor over lunch one day. As chance would have it, he keeps in touch with a former student of his, a early '90s grad, who works at Pfizer.

My magic contact had just fallen into my lap in a matter of seconds. Who would have guessed?

In the following months, I emailed frequently with my newfound connection, discussing interests and internship ideas. He began to look around for opportunities, but did not come up with much at first. Another roadblock, I thought.

Not quite—just when I began to feel that Pfizer was impenetrable, my email brought good news. He had found an opportunity in the Environmental Health and Safety office. I was soon talking with my future supervisor about details and confirmed the internship.

And if all his inside work wasn't enough, he also helped me find temporary housing with one of his colleagues. I was also without a vehicle in the middle of Connecticut, eight hours from my home in Western New York. If he wasn't giving me a ride, he was finding me one.

In the end, aside from the great experience gained from the internship itself, my personal contact and persistence paid huge dividends. As you plan your careeer, remember these items. Do not be dissuaded by initial setbacks and tell people what you're interested in doing.

You never know when that someone will look up and present you with an invaluable contact.

LETTER TO THE EDITOR

Switchboard operators gracefully dealt with complaints about phone system

TO THE EDITOR:

I read the article on the new telephone system with relish since I am a student employed as a switchboard operator. I was trained to operate the new switchboard consoles and the new phones over the summer, along with the full-time and part-time switchboard operators, and was party to the extreme challenges these women faced, not just during the transition of the phone system, but also before and after.

Secretaries called with questions about how to use the new features available; professors called with inquiries about voice mail options; and the few students who were on campus called with issues about answering machines being unusable. And then the semester began...

Some students did not have dial tones. Some students did not have the ability to use their PAC numbers. Some students experienced difficulty when calling off-campus locally. Whatever the problem, the students called the switchboard, which makes sense and is proper procedure.

However, I would still like to take this opportunity to encourage the students to thank their switchboard operators for a job well done during the phone system problems and beyond. It is very easy to call "O" and find out all sorts of information; its also very easy to take this for granted. The women who work as operators, however, are very dependable, friendly, and genuinely willing to help, so next time you call them, remember to say 'thanks.' It means a lot to know about the appreciation you have.

Review of fall season premieres reveals all

Three of this season's hottest shows *Beverly Hills, 90210, Friends* and *The West Wing* lack substance, but contiune traditions

By Sahana Ravindranath

What is the night that all TV fanatics crave for months called? Season Premieres. As a TV junkie, I jumped at the opportunity to review the season premiere of my favorite TV shows. Yet I never realized all the obstacles I would have to overcome to get this seemingly perfect assignment accomplished.

I had no idea when these season premieres were starting or where I was going to watch them. I tried one night to catch the premiere of some new show, but was rudely turned away from the TV lounge by a group of testosterone driven males who had settled in for some Monday Night Football. Finally, however, after serious begging and surfing the net, I miraculously found a couple of shows that I could sit down and watch.

Hitting the airwaves on Wednesday nights for almost a decade, *Beverly Hills 90210* has become a staple in the lives of teenagers (and some adults) across the globe. While the original group of beautiful young people who have it all and live in one of the world's wealthiest neighborhoods has been replaced by new characters, the main plot has miraculously managed to stay together for nine years. While I was not able to catch *90210*'s season premiere, I caught on quickly to the rape, pregnancy and infidelity dominating the storylines.

Courtesy of www.geocites.com/televisioncity/29927/

Aaron Spelling's *Beverly Hills 90210* begins its tenth season this fall.

After being raped last season, Kelly is still trying to cope with the aftershock of this horrible event while re-introducing romance into her relationship with a cute young lawyer named Matt. They try to strengthen their relationship and recover from this traumatic event by playing everyone's favorite pass-the-orange-under-your-neck game.

The ever-childish Steve Sanders finally discovers that the newest of his girlfriends, Janet, has been pregnant for four months. He convincingly plays the role of a shocked boyfriend who is angered that he did not have a say in the decision concerning the baby. Meanwhile, a love triangle was brewing between young David, brooding Dylan and snotty Gina. David is infatuated with Gina, who claims to be in love with Dylan but finds herself happiest with David. This classic triangle will probably end up with Gina and David together leaving Dylan alone on the sidelines, where he always seems to end up.

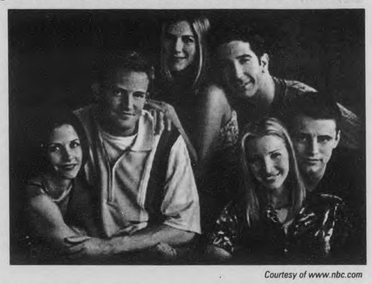
Finally, innocent and annoyingly sweet Donna Martin has totally changed gears. Once a vestil virgin, Donna has just cheated on her present boyfriend, Noah.

Now, I used to love *90210*, but this show has taken a dive for the worse. I find many things rather peculiar, like why Kelly even has a boyfriend after breaking up with the love-of-her-life Brandon only last season and how innocent Donna has suddenly turned into the adultress of the group. I wonder if any of these characters will ever find happiness in their Beverly Hills paradise or will they remain forever caught in the web of torn romances and wickedly screwed up lives?

The next evening I tuned into "Must-See TV" on NBC to catch the season premiere of *Friends*. As I found my seat amongst the masses of students packed into the TV lounge, I was briefed about last season's finale.

The show opened with the six friends from New York transported to Las Vegas where Joey, a struggling actor, had been working. Monica and Chandler went earlier to celebrate the one-year anniversary of their romance. As the show progressed, the two love-birds contemplate marriage during a game of dice. Faced with signs of weddings, such as catching a boquet, they both realize they are not ready for "the big commitment."

To the delight of many viewers, Ross and Rachel found their way back together in this episode. After getting smashed one night, they get married in a chapel, but the shock comes in the morning when they cannot recall a thing the next morning. Ross, who has been through two divorces already, does not want to be deemed "the divorce guy," so he secretly decides to get the marriage annulled.



Courtesy of www.nbc.com

TV watchers look forward to an interesting season with these friends. Unexpected plot twists and rekindled romances might make this season of *Friends* the best yet.

Joey and Phoebe, the off-the-wall eccentrics, decide to drive home in Phoebe's cab and pick up a hitchhiker on the way.

This group of "friends" are usually a little wacky and extremely funny, but it was refreshing to see Monica and Chandler come to a mutual and mature agreement about their relationship, the most sensible one on the show. Since all *Friends* fans have been pining over a Ross and Rachel reunion, this storyline should inevitably bring them back together.

While the show provides some good old-fashioned laughter, the reality of Ross and Rachel's situation seems unlikely and some might wonder if all these "friends" are going to hook up at some time or another, if they haven't already.

I thought it would be good to watch one of the new shows on TV this fall and *West Wing* caught my attention. This show's premise—the inner-workings of the White House staff— seemed interesting.

West Wing started out with the staffers scurrying around trying to cover issues about POTUS (President of the United States) breaking his leg while riding a bike and a pressing matter about Cuban refugees entering the waters off Florida. This same group off people muddled their way through issues concerning religious fanatics, loss of jobs and some other unclear issues.

All the staff members are beautiful, young people, dressed in Armani-style suits who drive around D.C. in speedy new BMWs. They are faced with problems concerning womanizing and freedom of speech and throughout the course of the show they try to sort out their problems while trying to mend problems within the country.

West Wing has the makings of a popular series—romance, drama and political intrigue, but it was a little slow-paced and confusing. This show reminded me more of a political and historical documentary than a show that I could watch week after week.

I was personally disappointed with the fall season premieres. None of the stories were that exciting or shocking, or really grabbed my attention, inviting me to watch the next episode. Perhaps some of the other shows this season will have better storylines to intrigue viewing audiences, but I won't be of the them.

Lacking substance, *West Wing* begins its first season this fall on NBC.

Extraordinary talent featured in unique play, "The Maids"

By Jennie Scheerer

"The Maids" will add excitment to everyone's weekend. Directed by Andrew Baldwin '00, the play spins a complex tale that analyzes its characters on three different levels: psychological, sexual and criminal.

Written by French playwright, Jean Genet, "The Maids" features three characters, Claire and Solange, the two maids and sisters, and their mistress, Madame.

Throughout the play, the sisters engage in a ritualistic murder-suicide plot against their mistress as the story chronicles the last hour of the relationship between the three characters. The plot centers around Claire and Solange's near-sexual obsession with their Madame; this obsession is played out in a fantasy world in which Claire takes on the role of Madame and Solange becomes Claire.

Baldwin is directing this play as a part of his senior thesis. "I chose 'The Maids' because it is a play that is rarely performed and I knew that it would present me with a challenge. I have been given the opportunity to oversee every intricate detail of the production by selecting the costumes and designing both the set and lighting myself. I look forward to seeing how each of my decisions is reflected back in the final production," he said.

The roles of Solange and Claire are being played by seniors, Liz Asti and Angela Kahn, respectively. Sophomore Courtenay Mastain will take on the role of Madame. Baldwin said that he is absolutely thrilled with this cast of talented women who will portray these complex characters, and he anticipates two incredible performances this weekend.

"Playing Madame has proved a spectacular challenge, but the most rewarding aspect of theater comes from being a part of a team. In three short weeks of rehearsal, I've gained extraordinary experience from observing and working with some of the finest theater students I've ever known," Mastain said.

Stage manager Allison Bagby '00 agrees with Baldwin and has thoroughly enjoyed working with him and the three cast members. "This has been another wonderful experience that has enabled me to work with students and friends in a more professional environment," she said.

The cast members are eager to enjoy the results of the final product. They commented that the process of creating this production has been extremely rewarding. "Bucknell provides us with so many opportunities as far as the theater is concerned. In a year, I have been able to participate in both a musical and an absurdist play like 'The Maids,'" Asti said.

Kahn gained something different from the experience. "Considering the fact that I have the least amount of theater experience of the group, I have been challenged by this and it has enabled me to see the many possibilities that the theater has to offer," she said.

"The Maids" will be performed at 8 p.m. Fri. night and Sat. night in Tusting Studio Theater next to the Gateways. Tickets are $1.

The director, stage manager, actresses and technical crew have all put an incredible amount of time and effort into the production, and they anticipate a performance sure to thrill any audience.

Tim Choate—The Bucknellian

Angela Kahn '00 and Liz Asti '00 star in Andrew Baldwin's '00 senior thesis production.

Comedienne Karen Williams brings laughter to campus

By Amy Gilday

Karen Williams' stand-up comedy performance will certainly be a good time. A professional comic of national acclaim, Williams is heralded as one of the most popular feminist comics on the college circuit today.

With her warm, sexy and irreverent style, Williams delivers a performance that is ferociously funny with perfect pace, timing and structure. However, her career as a stand-up comedienne is only a fraction of her success.

A single mother of three, Williams worked as a freelance script ghostwriter in the '70s. Relatively unsuccessful in her work, she soon found herself broke. Described in *Cleveland Life* as filled with anger at a political system that seemed to be crushing her and her community, she began performing as a standup comedienne in small clubs and found her niche in the gay and lesbian comedy scene. After this revelation, her career took off.

In the late '80s, Williams founded the International Institute of Humor and Healing Arts (HaHA). "Laughing is healing, healing is power and power is empowerment," she said.

HaHA offers support groups, workshops, and laughing circles, gatherings which emphasize laughter as stress release. Williams works with terminal cancer patients, sufferers of depression, people affected by the death of a loved one, and the HIV community.

In addition, Williams has held humor-based motivational workshops for companies and has taught humor and healing workshops for state departments of health in Mont., Ill., Ind., Vt. and N.Y..

Courtesy of FLAGBB

Williams comes to the University for one show, Tues., October 5, in the L.C. Forum.

A Buddhist for 26 years, she truly appreciates what she considers the God given gift of laughter. "You won't find a dour enlightened person, giggling is fun," Williams said.

Williams will appeal to your laughing inner child at 7:30 p.m., Tues., Oct. 5, in the Langone Center Forum. Admission is free and all members of the community are encouraged to attend.

CHOOSING THE RIGHT RETIREMENT COMPANY MAKES ALL THE DIFFERENCE.

For over 80 years, TIAA-CREF has been the leading retirement company on America's campuses. But experience is just one reason why so many smart investors trust us with their financial future. Here are a few more:

Superior strength
With over $250 billion in assets under management, TIAA-CREF is the world's largest retirement organization – and among the most solid. It's one of the reasons why Morningstar says, "TIAA-CREF sets the standard in the financial services industry."[1]

Solid, long-term performance
We seek out long-term opportunities that other companies, in pursuit of quick gains, often miss. Though past performance can't guarantee future results, this patient philosophy has proven extremely rewarding.

Surprisingly low expenses
TIAA-CREF's operating costs are among the lowest in the insurance and mutual fund industries.[2] So more of your money goes where it should – toward ensuring your future.

Easy diversification
We offer a wide variety of expertly managed investment options to help build your assets. We make it simple, too, with stock, bond, money market, real estate, and guaranteed options.

Unrivaled service
We believe that our service distinguishes us from every other retirement company. In the most recent Dalbar survey, TIAA-CREF ranks tops in participation satisfaction.[3]

Call today to find out how TIAA-CREF can help you build the financial future you want and deserve.

TIAA CREF
Ensuring the future for those who shape it.®

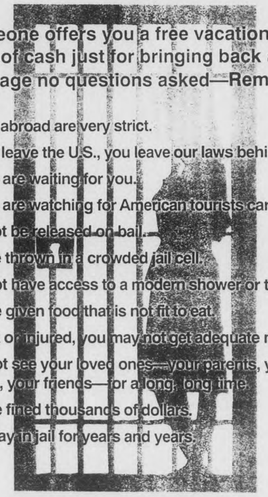
Going Abroad?

Thinking about making some quick money?
Think again!

If someone offers you a free vacation and a big chunk of cash just for bringing back a suitcase or package no questions asked—Remember:

- Drug laws abroad are very strict.
- When you leave the U.S., you leave our laws behind.
- The police are waiting for you.
- The police are watching for American tourists carrying drugs.
- You will not be released on bail.
- You will be thrown in a crowded jail cell.
- You will not have access to a modern shower or toilet.
- You will be given food that is not fit to eat.
- When sick or injured, you may not get adequate medical care.
- You will not see your loved ones—your parents, your children, your friends—for a long, long time.
- You will be fined thousands of dollars.
- You will stay in jail for years and years.



You will be blamed for anything in your suitcase, no matter who puts it there. Ignorance is no excuse. If it's in your suitcase, it's your crime, and you will do the time.

This message is brought to you by the U.S. Department of State

Superior strength
With over $250 billion in assets under management, TIAA-CREF is the world's largest retirement organization – and among the most solid. It's one of the reasons why Morningstar says, "TIAA-CREF sets the standard in the financial services industry."[1]

Solid, long-term performance
We seek out long-term opportunities that other companies, in pursuit of quick gains, often miss. Though past performance can't guarantee future results, this patient philosophy has proven extremely rewarding.

Surprisingly low expenses
TIAA-CREF's operating costs are among the lowest in the insurance and mutual fund industries.[2] So more of your money goes where it should – toward ensuring your future.

Easy diversification
We offer a wide variety of expertly managed investment options to help build your assets. We make it simple, too, with stock, bond, money market, real estate, and guaranteed options.

Unrivaled service
We believe that our service distinguishes us from every other retirement company. In the most recent Dalbar survey, TIAA-CREF ranks tops in participation satisfaction.[3]

Call today to find out how TIAA-CREF can help you build the financial future you want and deserve.

TIAA CREF
Ensuring the future for those who shape it.℠

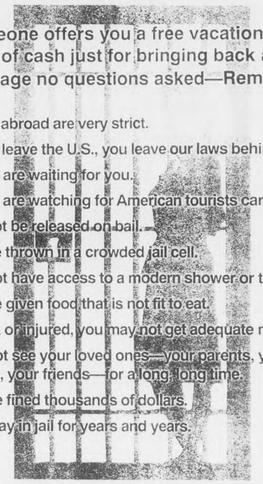
Going Abroad?

Thinking about making some quick money?
Think again!

If someone offers you a free vacation and a big chunk of cash just for bringing back a suitcase or package no questions asked—Remember:

- Drug laws abroad are very strict.
- When you leave the U.S., you leave our laws behind.
- The police are waiting for you.
- The police are watching for American tourists carrying drugs.
- You will not be released on bail.
- You will be thrown in a crowded jail cell.
- You will not have access to a modern shower or toilet.
- You will be given food that is not fit to eat.
- When sick or injured, you may not get adequate medical care.
- You will not see your loved ones—your parents, your children, your friends—for a long, long time.
- You will be fined thousands of dollars.
- You will stay in jail for years and years.



You will be blamed for anything in your suitcase, no matter who puts it there. Ignorance is no excuse. If it's in your suitcase, it's your crime, and you will do the time.

This message is brought to you by the U.S. Department of State

Bucknell Buddies make friends

By Kim Spigelmire

Most Americans have little or no contact with people who are mentally retarded. Of the 7.5 million U.S. citizens who are mentally retarded, fewer than 15 percent are employed and a little over half do not have any friends. Best Buddies was founded in 1989 by Anthony K. Shriver to remedy this situation and to help integrate the mentally retarded into their communities.

Since its founding Best Buddies has impacted the lives of over 80,000 volunteers and people with mental retardation. Chapters have been founded in colleges and high schools all over the U.S., Canada and Greece. Just last year a chapter was founded here at the University.

Although it has only been in existence for two years, the campus chapter of Best Buddies is already the second largest in Penn. This year 40 students are participating and most of those have been paired with a Best Buddy.

The volunteers are paired with their Best Buddies through personality match questionnaires. Each mentally handicapped person in Penn has his or her own case worker who will work with the Best Buddies program. Any mentally retarded person is permitted to participate in the program, no matter how severely he or she is impaired.

The student volunteers and Best Buddies stay in weekly contact through phone calls and letters. Twice a month they meet to spend time together. Although their activities vary from person to person, a few common ones are eating in the cafeteria, attending sports events, going to movies, bowling, and even having sleepovers.

Courtesy Best Buddies

Emily Granville, '02 and her Best Buddy last Halloween.

Twice per semester all of the Best Buddies and student volunteers comes together for an outing. Last year the entire group participated in Pumpkin Carving, a Christmas Party, T-Shirt Making and Arts and Crafts Day. This year Best Buddies hopes to sponsor a dance, bowling parties and pizza parties.

Best Buddies is also developing a community service program for the mentally retarded in Lewisburg. The aim of this program is to further integrate the Best Buddies into their communities and allow them to interact with its members.

Regina Epperhart '02, the College Buddy Director for the University's chapter, stresses that the mentally retarded enjoy doing the same kinds of activities as normal people. "Although we may not realize it, the mentally retarded are more like normal people than they are different from them. We could all learn a lot from each other."

Epperhart believes that volunteering impacts the volunteers just as much as it impacts the Best Buddies themselves. "By participating in the Best Buddies program students are able to get off campus, get involved in the community and experience a little bit of the world beyond the Bucknell bubble."

The Best Buddies program also makes a difference in the community as a whole by educating the community members about the mentally retarded.

In reference to the impact that Best Buddies has had on her life, Epperhart says, "It made me realize that a small group of motivated students can make a difference in the lives of people with disabilities as we educate the community about the necessity of integrating individuals with mental retardation into mainstream society."

If anyone would like more information about participating in Best Buddies please contact Regina Epperhart at epperhar@bucknell.edu. Meetings will continue throughout the semester and it is not too late to be paired with a Best Buddy of your own.

Wink Thinks

Jacqueline Flicker—The Bucknellian

Dear Wink,

Over the course of my life I have always had my own room at home. I never had to share my room with any of my brothers, and my room was always far away from my dad so that I couldn't hear him snoring in the middle of the night. Even though I have always had my own room, when I came to Bucknell this year I was somewhat excited to be able to share my room with someone else. Of course I was a little apprehensive about what my roommate would be like, who isn't? However, it turns out that my roommate and I get along great, we are like each other in a variety of ways, except for one big difference. I noticed it the first night that we spent in our room, and it has occurred almost every night since then. You see, my roommate has this problem where he likes to talk and even yell in his sleep, and believe me, he says some weird things. One time I woke up to him screaming my name, I thought that something might be wrong, but it turned out that he was just dreaming. I am not really sure that I want to know what he was dreaming about. In addition to his verbal sleeping, he also likes to sleepwalk. Yes, he likes to get up in the middle of the night and walk around. I have seen him leave our room a few times, heading out into the hall in his tighty whities and then coming back after some time, all the while asleep. It is not that I really mind that he does this, except for the fact that some of it is kind of weird to me, but hey what can you do. I might have a problem if he tried to get into my bed in the middle of the night during one of his sleep walking episodes. However, for the most part he is harmless. The problem is that I don't know if he is aware that he does all of this crazy stuff. I would like to tell him just so that he knows, but I am afraid that it may hurt his feelings. I don't know if he is really sensitive about it or what. Therefore I ask you, should I just ask him one day about it to make sure that he is aware of it? On the other hand should I just let it go since he is really not hurting anyone, most of all me

Sincerely,

Sleepless in Bucknell

Dear Sleepless in Bucknell,

First, I really think that you need to tell you roommate one thing other than his night time problems, and that is to please switch to boxer shorts. If not for himself, for the people who may encounter him on one of his sleepwalking episodes, it's just not fair to them.

Regarding your question, I think that your roommate probably knows that he sleepwalks; if he does it here, chances are he has done it in the past. That means that a family member has probably seen it before and told him, thus making him aware of it. It is probably more likely that he is not aware that he talks in his sleep. However, the thing that you have to remember is that everyone talks in their sleep at some point, people just do. I don't think that you should be afraid to say something to your roommate about his activities. You should just talk to him one morning and say, "Hey you were saying some funny things in your sleep last night." Start up a conversation with him to try to learn more about his night-time activities, he may tell you that he does it all of the time. I don't think that you should just tell him that he is weird and he does some crazy stuff at night and you are afraid for yourself, but just start up a conversation in a harmless manner.

In spite of how harmless this all seems, except for what may be going on in your roommate's head when he screams your name, there is one factor that I think you and your roommate need to be aware of. If your roommate is aware of his sleepwalking, you and he should be aware of the possibility that some night if he does in fact start walking into the hall in his underwear some girl or guy may see him walking towards them and get a little scared. They may think that he is either coming after them, or is exposing himself. Whatever the case I think that both of you should be aware of the possibility that something like that could happen. Therefore, you may want to lock your door at night, or put some bell on your door so that it rings when it opens, basically just something that could prevent him from going into the hall or wakes you up if he does.

I really think that you shouldn't be afraid of saying something to your roommate, I don't believe that something as simple as sleepwalking or talking in sleep is cause to get offended. Tell him that you are just trying to learn more about him, say that you are worried about him. Just make it so that you are not making it sound like what he does is odd; be compassionate. If you find out by talking to him that he does in fact know, the two of you should use it as a means of building your relationship as roommates. Put a sign on your door that says, "I sleepwalk," or buy him a nice little Barbie nightlight, something that makes it into something that the both of you can laugh about.

There is always the chance that he has no idea that he does this stuff. If that is in fact the case, you may want to suggest to him that he get some help and possibly learn something about sleepwalking. The truth of the matter is that he could hurt himself if he is not aware of his activities. If he doesn't know, definitely tell him to notify his parents about the situation, and try to help him out in any way possible. You really don't have to worry, I don't think that he is going to climb into bed with you, and if by some odd chance he does, don't be afraid to kick him out in a second, because no means no.

I would just like to leave you with the idea of talking to him about the situation. I am sure that he will be happy that you are looking out for him. I think that the lesson to get out of this whole ordeal is to understand what your roommate or friends are going through and try to help them out in any way you can, it may prevent a sea of trouble. Until next time relax, have fun, and let Wink's wisdom be your guide.

If you are interested in writing to Wink there is no need to worry—all questions are confidential and answers are always thorough. However, please write questions that are decent because we can't include material that is libelous or an invasion of privacy. Questions or comments can be sent to Eli Winkler at box C2815, attn: Wink Thinks.

Stressed?

Chi Kung offers help

By Kristen Jancuk

As the new semester gets into full swing, exams and papers can make even the most organized students feel stressed out and many may have trouble finding a way to deal with stress. Psychological Services may have a solution: Chi Kung.

Chi Kung is the practice of deep breathing exercises that promote relaxation and improve health. Beginning as a series of exercises practiced by ancient Taoist monks to strengthen the "chi," or life energy, it gradually incorporated breathing elements of Indian yoga as well. While today Chi Kung is used to fight stress, the Taoist monks believed that it would combat disease and lengthen their lives.

Chi Kung is based on the Chinese principal of yin and yang: the balancing of the universal life forces in the body. When these forces are unbalanced, diseases may result, as well as stress and other unhealthy conditions. Through breathing exercises, the healthy internal balance can be restored.

Breath control increases the flow of "chi" throughout the body. As breathing becomes deeper, muscles become less tense, the heart rate slows and the mind becomes more relaxed. More oxygen reaches the vital organs and cells as well, further promoting a state of well-being.

Today Chi Kung is defined as the mastery of life energy. Its list of benefits includes improving stress, increasing life span, preventing illness and especially curing disease, to be "incurable," such as asthma and some cancers. In China, it is used in clinics and hospitals as a form of theurapuctic medicine. In addition, Chi Kung can help with psychological problems.

On campus, the Chi Kung group has many of the same purposes. "This group will focus on working with our life energy, learning how to control its flow to improve health and harmony of the mind and body," Arylene Hoyt, Psychological Services, said.

The group will focus on meditation as well as self-healing and breathing exercises. Hoyt wants to help students learn to build, balance and disperse life energy throughout the body. "My intent is to provide an atmosphere in which we can learn the principles and practices of Chi Kung together and then go independently during the week and practice on our own."

Hoyt, who also practices a form of Japanese massage called Shiatsu, began her study of Chi Kung during her Shiatsu training in 1994. She is particularly interested in the connection between the mind and body as a whole, rather than as separate parts.

"Stress has become such an overwhelming phenomenon for many of us. In stress the mind, body, and emotions affect each other. So, if one can calm the mind, the body and emotions will be influenced."

The Chi Kung session, lasting 50 minutes, will be offered twice a week: 12 p.m. Mon. and 8 a.m. Thurs. in the LC Forum.

Bucknell harvests new help

By Katie Councilor

The Bucknell Harvest, a relatively new program on campus, has undergone two major changes since its birth a few years ago. They have enlisted the help of the Greek system in running the organization and have also involved the Bucknell Seniors.

Bucknell Harvest is the program that takes extra food from the cafeteria to Haven Ministries, a shelter in Sunbury three days a week. It was begun about three years ago by management professor William Gruver. Gruver, who only a few years ago was an investment banker on Wall Street, fashioned the program after City Harvest, which he helped to implement among corporations in New York City.

The Asian Students Awareness organization was instrumental in getting the approval of the administration for the Bucknell Harvest program. After gaining approval, the program became a general student organization.

Volunteers deliver food from the cafeteria about three times a week, food that would otherwise be thrown away. Haven Ministries was a perfect candidate to receive the food because of their flexibility. Bucknell Harvest did not want to work with an organization that would depend on them as the sole supplier of food, because as a developing program, it was not always guaranteed that there would be food to deliver.

Last year, the program began to lose momentum. Gruver, as the faculty advisor, said that "it was difficult to keep a continuing student enthusiasm." Bucknell Harvest went to the Inter-Fraternity Council (IFC) asking if they would be willing to run the program. The IFC immediately accepted the offer. The Greek system provided Bucknell Harvest a stable, coordinated agency that would provide continuity.

Robert Reiss ('00) is the treasurer of the IFC executive board and also the student representative that coordinates Bucknell Harvest. He works directly with Peter Stark, the Dining Services Manager, Professor Gruver, the faculty advisor, Matt Hopkins, the IFC Philanthropy Chair and the fraternities themselves. Reiss sets up the schedule determining which fraternity house will pick up the food and deliver it each day.

Last year's involvement with the IFC gave Bucknell Harvest the boost it needed. Reiss explains that "the success of this program is due particularly to the fraternities. Greeks in general deserve the credit for the success of the Bucknell Harvest."

The other major addition to the program was the help of the Bucknell Seniors, which began last summer. For the first time, the program was carried on when students were not on campus.

"The involvement of the Bucknell Seniors was a handoff from the students and really unified the Bucknell community," Gruver said.

Bucknell Harvest is a growing program that continues to develop and improve, serving the Haven Ministries shelter as well as making better use for food that would otherwise be wasted. It is becoming an important part of the connection between the University and the surrounding communities.

SCIENCE & TECHNOLOGY

As NASA technology advances, will humans eventually inhabit Mars?

By Matt Markl

A manned mission to Mars has been a dream of man ever since Armstrong set foot on the moon. However, a mission to Mars has not materialized due to a very basic problem. Although Mars is closer to Earth than any other solar body (excluding the moon) it is nevertheless still very distant. NASA is still trying to chip away at the many roadblocks that lay before it.

Since 1997, NASA has executed an exhaustive assault on the Red Planet. On July 4, 1997, the Mars Pathfinder touched down on the Martian surface, carrying with it a small rover called "Sojourner." It was the first time in 20 years that a probe from Earth landed on Mars. The mission, lasting three months, provided NASA with numerous photos of the Martian surface and landscape which enabled scientists to conduct chemical analyses of Martian soils.

Pathfinder was soon followed by the Mars Global Surveyor. Currently in orbit over Mars, its mission is to map the entire surface of the planet. This mapping is achieved by a Mars Orbiter Laser Altimeter (MOLA) instrument that bounces lasers off the Martian surface and records their return. This mapping process will allow the creation of 3-D models of the Martian surface.

Courtesy of NASA

Two years ago, the 25-lb. Sojourner became the first robotic roving vehicle to land on Mars. Besides proof-of-concept, its mission was to analyze soil mechanics and composition.

Pathfinder and Global Surveyor are just the tip of the iceberg. By the end of 1999, the Mars Surveyor Program will begin collecting data from the planet. The three probes which make up the program are "The Climate Orbiter," "The Polar Lander," and "The Deep Space Two Microprobes."

The new mission sounds promising, but a major setback has already been experienced by the Surveyor Program. The Climate Orbiter, which carried a radiometer, was declared missing by NASA on Sept. 24. NASA scientists claim that its trajectory set it in orbit around Mars far too low. As a consequence, the $200 million spacecraft burned up in the atmosphere. Both the Polar Lander and the Deep Space Two Microprobes still remain on their track towards Mars.

The Polar Lander will carry out a 90-day primary mission followed by an extended journey lasting as long as it can avoid terminal hardware failure. The theme of its mission is "Volatiles and Climate History" on Mars. The lander will search for surface ice and possible signs of regular climate change. It will also look for physical evidence of the seasonal cycles of water, carbon dioxide and dust on Mars.

As the Polar Lander enters the Martian atmosphere on Dec. 3, the two probes will detach and impact the ground at over 500 mph, sending the body of the probes into the ground one to two meters. They will then drill deeper into the ground in search for water. They will communicate back to Earth via the Mars Global Surveyor satellite orbiting overhead.

These missions are the initial step. NASA has more in mind beside soil samples and atmospheric studies. On Mar. 15, 1999, NASA announced that it was giving the go ahead for a series of experiments which would enable a prototype chemical reactor to be sent to Mars in 2001. The reactor would convert carbon dioxide on the surface of Mars into oxygen. If this technology would succeed, it would eventually allow NASA to provide both air and fuel for human settlers on the Martian surface.

Courtesy of NASA

The Climate Orbiter, seen here nearing completion in a "clean room," lost contact with mission control last week. It is assumed that the Orbiter lost altitude and burned on re-entry.

Another bold announcement made by NASA regards a plan to fly an unmanned lightweight airplane over the Valles Marineris Canyon System in 2003. Equipped with a camera, the plane would provide scientists with very detailed topographical information. This would be quite an achievement considering powered flight on Earth will have just celebrated its 100th anniversary.

The landing of a human being on the surface of Mars is still in progress. There are numerous technical aspects which need to be resolved before man can actually venture deep enough into space to reach Mars. However, as we discover more about Mars and as technology continues to advance, we will close the gap between Earth and the elusive Red Planet.

Animal slaughter deemed irrelevant in soldier's training

As many as 10,000 animals- most of them tame rabbits and chickens, as well as goats, snakes and turtles-are killed every year at U.S. military bases

By Katherine Nowak

People for the Ethical Treatment of Animals (PETA) has rebelled against the military use of animals in survival skills courses and appealed to Congress for help. Numerous complaints have recently arisen, the first coming from a military base in Utah called the Dugway Proving Ground. A telephone call made to PETA reported the hunting, killing, cooking and eating of tame rabbits and chickens as part of a survival training course. Forty soldiers were instructed to obtain animals from a local farmer, drive them onto military grounds, release them, chase them down and proceed to kill them. PETA succeeded in terminating the program at this particular base by pleading with the commanding officer, only to find that the course is required all over the country.

Documents were soon obtained by PETA from Fairchild Air Force Base, Wash., which is currently sacrificing 20 rabbits a week, while the U.S. Air Force Academy, Colo., uses 18 rabbits a week. The U.S. Army, Air Force and Marines have confirmed that there are at least six of these sinister courses in which soldiers are required to engage.

Loring Air Force, Maine, has sent reports of soldiers carrying live rabbits in bags for two or three days before killing them! At the Massachusetts National Guard, pulling off the heads of chickens is a part of survival training. It is hard to believe that such cruelty to animals has been deemed acceptable and labeled as "survival training" to allow the rite of passage.

How can animal slaughter prepare a soldier for improved combat skills in battle?

There have been reports of animals being killed with soldiers' bare hands. "Few would have difficulty killing domesticated animals," said PETA advocates. "Yet what practical purpose does this serve?"

The *Animals' Agenda* 1999 edition reports eyewitness accounts describing how soldiers are required to stroke rabbits to calm them down before breaking their skulls. "There is no need to utilize these live animals for survival skill training," PETA reiterated.

"At the taxpayer's expense, these soldiers are learning animal cruelty," said PETA's *Animal Times*.

"Soldiers stranded in wartime are not likely to find tame bunnies and hens sitting on the battlefields."

At costs of more than $10,000 a year, the military purchases these docile animals. According to the 1997 Department of Defense (DoD) report, the Air Force kills more rabbits in its survival skills courses than does the DoD in all its research facilities combined!

Two Air Force bases alone use more than 1,500 rabbits.

"You can club small mammals or step on them," says the U.S. Army survival training course manual. Killing animals by a slow agonizing death as a necessary part of troop preparation is questionable. The relevance of this slaughter to miltary skills is obscure.

Classes utilizing live animals in military training began in 1947, reports *Animals' Agenda*. They were initiated in Alaska to expose air force members to harsh Arctic conditions. Since then, the courses have been controversial even within the military, yet thousands of animals continue to be sacrificed every year on military grounds.

What you can do:
Ask the Secretary of Defense to put a stop to the use of live animals in survival skill training.
Write:
The Honorable William S. Cohen
Secretary of Defense
1000 Defense Pentagon
Washington, D.C. 20301-1000

Demand your federal legislators to discontinue their support of these military courses by terminating budget funding that provides for the costs.

(Images coutesy of PETA)

Kate McDevitt, '01, benefits from a high-end desktop publishing work station located in the courtyard.

Technology Courtyard celebrates open house

ISR integrates technology and media services

By Matthew Trunnell

"There is no other place in the country which has centralized such technologies in a library locale," Ray Metz said at the Technology Courtyard open House on Wed. Sept. 18. From flat-screen monitors, to digital resources for research, to Tech Desk experts, the revolutionary new setting has resulted in a better experience for all.

"Students and faculty can work in collaboration in the courtyard," Metz said. Each workstation cubicle is designed for group work, with more than enough room to spread out project materials.

The high-end workstations are set up for five different specializations: desktop publishing, multimedia development, presentation authoring and digital input/output. There are four machines set up in each category.

In addition to the workstations, new for this year is a "laptop courtyard" where laptop users can plug into the University's computer network for access to the Internet and network file spaces. This area is located in the back of the first floor next to the Technology Courtyard.

The Tech Desk used to by located on the second floor of the Computing Center, in the Dana Engineering building. By combining Media Services with the Tech Desk, and moving to a more central location in the Library, the operation has become much more efficient. Uniting the electronic resources in the Bertrand Library with Computer and Communication Services' (CCS) technical expertise has been a long standing goal. This year's renovations make a near-final step to having CCS and Media services under a single administration—Information Services and Resources (ISR).

ISR also hopes to provide a higher quality of service to faculty and students. Every year before the fall semester begins, ISR student emplyees graduate an extensive training program centering on combining technical knowledge with customer service.

Being user-friendly is a high priority for ISR's leadership. "We're looking for more connections with students—from BSG input on technology to *Bucknellian* coverage," Metz said.

Broadband: Closer than you think

Fast Internet connections soon to be available off-campus

By Matthew Trunnell

Do you live off-campus? Are you suffering from Resnet withdrawal? If all goes as planned, you may soon be tossing your modem out the window—for good.

As some students have experienced, Resnet can be difficult to give up. After all, the University's computer network is always on, is fast (especially after the recent upgrade—see last week's *Bucknellian*), and is now free. Moving off-campus means giving up these computing conveniences. But Buffalo Valley Telephone Company (BVTC), in conjunction with Bucknell Computer & Communication Services, is planning to offer a new broadband Internet service to the Lewisburg community.

Broadband, in technological terms, signifies an extremely fast connection to the Internet. The most popular broadband technologies on the market today are cable Internet access, made possible by providers like RoadRunner and @Home, and ADSL

(Asynchronous Digital Subscriber Line) access, from various telephone companies. Both enable a connection to the Internet at several hundred times the speed of a regular modem.

When will these options be available in Lewisburg? According to Perry Koot, network switching supervisor at Buffalo Valley Telephone, formal testing is scheduled for the end of October. Pricing has not yet been set, but comparable offers in other parts of the country are selling for between $30 and $50 per month.

ADSL is the method that BVTC plans to implement. ADSL works on the copper telephone line already available in homes, so there is no additional wiring to install. And with ADSL, customers may talk on the phone while using the Internet at the same time. Each subscriber needs a special type of DSL modem, which is usually rented from the telephone company.

The specific version of ADSL that will be offered in Lewisburg is based on the international G.Lite standard, which is a version of ADSL running at 960 kbps down to your computer, and 120 kbps up to the service provider (hence the A in ADSL). The speed which results is significantly better than your typical 56K modem.

With any luck, BVTC will expedite its plans and offer ADSL service to the community soon. The University, students, faculty and staff will all be anticipating having a fast Internet connection at home.

An equal opportunity, affirmative action institution.

My dad showed me the difference between collecting coins and saving money.

When I was a kid, I thought he'd been collecting U.S. Savings Bonds. Until he said that his "collection" was for my college education and his retirement. Then I realized that he wasn't just "collecting" but "saving" to help insure our future. He told me that Savings Bonds are

backed by the full faith and credit of the United States, so they're secure. They earn interest for up to 30 years. And their value is guaranteed to grow at market-based rates. That's insuring the future.

So I guess that's why I started "collecting" U.S. Savings Bonds, too.

Ask your employer or banker about saving with U.S. Savings Bonds. For all the right reasons.

Alumna wins world title

Sara Den Besten '96 captured gold at the 1999 Crew World Championships

Courtesy of Steve Kish
Den Besten '96 celebrates with her teammates after the gold medal presentations

By Rose Sedo

In 1996, she graduated from Bucknell University. Just two years later, she secured herself a spot on the U.S. National Rowing Team. And last month with her gold medal performance at the 1999 World Championships, Bucknell Crew alumna Sara Den Besten became the first Bucknell graduate to ever win a world championship in any sport.

Rowing in the Women's Lightweight Quadruple Sculls, this is actually Den Besten's second World Championship medal in two years. The Bucknell alumna also won a silver medal at the 1998 World Championships in Cologne, Germany.

With their prior success, optimism ran high for Den Besten and her teammates going into the 1999 World Championships.

"The American field of lightweight women is much deeper this year," said Den Besten. "We definitely have a chance against the two-time defending World Champion German Quad."

During the race, the U.S. gained control early and never lost their grip. "The Germans had us on the first twenty strokes, but we took control after that and never lost our lead," said Den Besten.

Although Den Besten is now a World Champion, she began her climb to the top by first attaining numerous honors during her collegiate years.

"The result of the 1999 World Championships began building years ago, and many of those years were at Bucknell," Den Besten said.

Bucknell head crew coach Steve Kish described Den Besten as determined and competitive when she arrived in Lewisburg as a freshman.

"She was usually one of the top finishers in all of our workouts and contests, but you wouldn't have immediately thought 'this woman is going to be one of the best rowers in the country,'" Kish said.

Over the next three years at Bucknell, Den Besten consistently raised her level of training, and so did her teammates. During her junior and senior years, she was a key member in what proved to be the most successful women's crew teams in Bucknell history.

Her major collegiate highlights included winning a bronze medal in the Women's Four at the 1995 Cham-

Field hockey win streak snapped by Lafayette

By Jennifer Cruickshank

Coming off of a three-game winning streak, including a recent victory over two-time defending Patriot League champion Holy Cross, the Bucknell field hockey team was faced with a challenging test against Lafayette this past weekend.

The Bison looked to hand Lafayette (7-0) its first loss of the season, but they instead suffered their first Patriot League defeat, falling to the Leopards, 2-1, in sudden death overtime.

Lafayette pestered Bucknell early with repeated penalty corners, but the Bison defense was solid and unable to be penetrated. The Bison offense matched the prowess of its defensive counterparts, as junior Maura Higgs found the back of the net off of a Dena Ebert '02 cross.

As the Lafayette goalkeeper expected a shot from Ebert, she slid the ball across to Higgs for a virtually open-net shot, giving the Bison a one-goal lead entering halftime.

Bison freshman goalkeeper Sonja Wettergreen recorded five saves in net in the game and heading the defensive shutout in the first half.

"Sonja's really been playing great," said senior tri-captain Katey Twombly. "It's tough for a freshman to come in and play such a key position. She's really stepped it up."

The Orange and Blue held the lead and matched Lafayette's

Bison lose to rival Princeton, 14-13

By Allison Kuhn

Sophomore goalie Dave Kennedy's 19-save performance wasn't enough for the Bucknell men's water polo team to overcome rival Princeton last Saturday. The Bison gave the Tigers a run for their money, but lost 14-13 in overtime.

"Dave's performance was outstanding," Coach Mike Wooster said. "Nineteen saves is only two off the team record." Kennedy's saves kept the Bison in the game, along with Tate Greditzer '01, who had six goals, including a pair of two-pointers.

The Bison were ahead 12-6 at the end of the third quarter, when Princeton scored three unanswered to send the game into overtime.

"The Princeton game was a letdown. It takes a lot of falling apart to lose a game like that," Wooster said. "I take the blame for that because I left the starters in and asked them to hold on even though they were tired. The team played exceptionally for three quarters and then fell apart due to fatigue."

Bucknell also faced Johns Hopkins and Washington and Jefferson last weekend. The Bison victories in these games allowed some of the inexperienced players to get valuable playing time. The Bison defeated Johns Hopkins 16-7 and dominated Washington and Jefferson 20-8.

The Bison look forward to this upcoming weekend, where they will travel to Princeton for a North-South Tournament to face teams from the North for the first time this season. The Bison have shown that they are definite contenders in the East.

"UMass is supposed to be the top team in the East, and Princeton beat them two weeks ago," Wooster said. "We should be 5-0 in the league, but we will find out about UMass and Queens this weekend."

U.S. Wins Ryder Cup Despite Poor Behavior: Justin Leonard drained a 45-foot birdie putt on the 17th hole Sunday to cap the greatest comeback in Ryder Cup history.

The American team, trailing by four points entering Sunday's singles matches, won eight and a half out of a possible 12 points to capture a 14 1/2 - 13 1/2 win. It was the United States' first Ryder Cup victory since 1993.

Said team captain Ben Crenshaw, "I've felt it all week. I know how these guys can play. I know how determined they are. Darned if we didn't pull it off. What transpired is a moving experience."

The win did not come without some controversy, however. After Leonard made his putt on 17, the entire U.S. team, as well as several spectators from the gallery, ran onto the green and began celebrating. Leonard's counterpart, Spaniard Jose-Maria Olazabal, still had a 25-foot birdie putt that could have kept the Europeans' chances alive.

The chaos created by the Americans obviously broke Olazabal's concentration as he missed the putt by several inches. The European squad was outraged by the lack of control demonstrated by their opponents.

"It's about the most disgusting thing I've ever seen," said European assistant captain Sam Torrance. "This is not sour grapes. The whole American team and spectators ran right across the green over Olly's line. He still has a putt to tie the hole. We could still take the Ryder Cup home. It was disgusting."

Despite the unfortunate controversy on Sunday, the tournament as a whole was possibly one of the greatest ever. It was the seventh consecutive Ryder Cup that was decided by no more than two points, dating back to 1985. Also, no team match ended before the 17th hole — the first time that has happened since 1969.

Mets Fall Out of Wild-Card Spot: The New York Mets, who led the N.L. wild-card race by four games on September 19th, have since dropped seven consecutive games and now sit one and a half games behind the Houston Astros with just five games remaining.

The Mets' catastrophic collapse began last week when they lost all three games in Atlanta to the Braves. They then spent the weekend in Philadelphia, where they proceeded to lose three more games.

The team returned home to face the Braves three more times and dropped the first game of the series 9-3 Tuesday night. Starting pitcher Orel Hershiser was removed with just one out in the first inning after surrendering four runs and five hits.

"I can't believe it's going that bad. I don't believe it's happened," manager Bobby Valentine said Tuesday night. Added catcher Mike Piazza, "It's really taken over right now. I've run out of things to say. You just have to go out there, bust your butt and hope you get some breaks."

After two more games against Atlanta this week, the Mets will close out the regular season with a three-game series at home against the Pittsburgh Pirates.

Las Vegas Looking to Land NBA & NHL Teams: Las Vegas mayor Oscar Goodman is currently launching a campaign to have NBA and NHL teams play in his city.

Goodman met Tuesday with commissioners David Stern of the NBA and Gary Bettman of the NHL but received the same response from both men: neither league has any plans to expand, and neither league has any team seeking a new home.

Further complicating the matter is the gambling industry that flourishes in Las Vegas. Basketball betting accounts for 23 percent of the total sports handle there, according to Vegas Sports Consultants.

"Our historic position is documented for all to see," Stern said. "We couldn't grant two expansion franchises until they eliminated NBA games from their sports lotteries." He also added that there is no reason to believe that the owners have changed their minds, although they haven't been asked about it for five years.

"We have our work cut out for us," Goodman responded. "We have to see if the casinos are interested in changing present procedures. If not, it's up to the owners to accept us the way we are. It means a major change in the way we do business or changing the way the NBA does business. They're in the driver's seat — we're not."

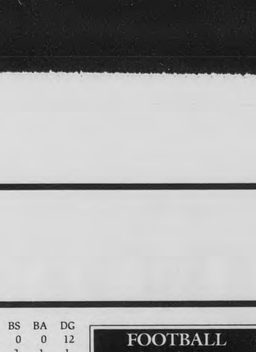
Hot Situations Deserve COOL Solutions



You could WIN A Ski Trip to Vail, Colorado

Or a Casio® CASSIOPEIA™ E-100 Color Palm-size PC

Play the COOL FROM Nestea® Hot Facts Sweepstakes!

HOT FACT #4

Bennett, Colorado, located in close proximity to the University of Colorado at Denver, holds the longest standing, record high temperature in the nation. This temperature, registering XXX degrees Fahrenheit, spans an 111 year period.

A. 115° B. 118° C. 121° D. 124°

This is the FINAL Hot Fact in the COOL FROM Nestea Hot Facts Sweepstakes. If you missed one of the previous Hot Facts, don't worry. Just log onto www.coolcore.com this week and you can answer the questions you missed. Once you've completed all FOUR Hot Facts you will be automatically entered for a chance to win in the Hot Facts Sweepstakes.

Winners will be notified after November 30, 1999.

Open to U.S. residents, who, as of 9/6/99, are enrolled in a U.S. college. No purchase necessary to play. Void in Florida and where prohibited. To enter via internet: Access the "COOL FROM Nestea Hot Facts" Web site at www.coolcore.com starting 12:01 AM (ET) on 9/6/99 through 11:59 PM (ET) on 10/3/99 to see that weeks Hot Fact(s) on screen. Every time you log on, you will be instructed to complete the on-screen entry form, including your name, the name of the college you are attending and the letter A, B, C or D, representing the word(s) which complete(s) the Hot Fact(s) for that week. Answer(s) need not be correct to be eligible but you must submit your answer to each of the four Hot Facts (one Hot Fact published each week as described in Rule #1 of the Official Rules) to be entered into the sweepstakes. Starting 12:01am (ET) on 9/27/99 through 11:59pm (ET) on 10/31/99, all four Hot Fact(s) will appear on screen in case an internet participant misses one or more of the Hot Fact(s) that were featured. While you can, if you wish, log on each day, only one sweepstakes entry per e-mail address that includes all four answers will be entered into the sweepstakes drawing. To enter via mail: On plain 3" x 5" paper, hand-print your complete name, address, zip code, (optional) daytime and evening telephone numbers and the words "COOL FROM Nestea Hot Facts". Mail your entry in a hand-addressed 4-1/8" x 9-1/2" (#10) envelope, with first-class postage affixed, to: COOL FROM Nestea Hot Facts Sweepstakes, P.O. Box 4941, Blair, NE 68009-4941. Limit one entry per envelope. Entries must be received by 11/15/99. IMPORTANT: On the lower left-hand corner of your mailing envelope, you must indicate the name of the college you are attending. For Official Rules, by which entrants are bound, including a list of participating colleges, send a SASE to: Hot Facts Rules Request, P.O. Box 4948, Blair, NE 68009-4948.

The American women's lightweight boat unseated the Germans.

pion International Collegiate Regatta and being a member of the first women's crew from Bucknell to compete at the San Diego Crew Classic.

"What lies ahead for me is the 2000 Olympics in Sydney, if all goes well. — Sara Den Besten '96

At the conclusion of her senior year, Den Besten was awarded the prestigious Christy Mathewson Memorial Award, honoring her as one of the outstanding senior athletes at Bucknell. Obviously, this was just the beginning of her bright future.

Today, while training is still her primary focus, she continues to work towards her professional future. Den Besten is currently taking classes at UCSD, where she teaches English as a second language and tutors at a local elementary school. The courses she is taking now are the first step towards one of her long-term goals — a Ph. D in psychology.

However, it is Den Besten's other long term ambition that gives former coach and longtime friend Steve Kish goose bumps.

"What lies ahead for me is the 2000 Olympics in Sydney, if all goes well," said Den Besten. And for Sara Den Besten, things seem to be going a lot better than well.

The Bucknell crew team, the alumni, and the rest of the Bucknell community would like to congratulate Sara and wish her the best of luck. The Bison crew team will be thinking of her when they shoot for the stars this coming season.

FOOTBALL

from page 16

pass) was thrown 45 to 50 yards in the air and it came right down on target and pinned in the corner."

The quick Delaware State strikes served as a wake-up call for the Bison, who then went on to score 24 consecutive points during the second and third quarters.

The running and passing of McDowell keyed the first two scores. He connected with fullback Mark Wyland '02 on a 15-yard scoring strike, and a similar play between the duo on the two-point conversion tied the game at 14 apiece. McDowell ran the ball in from the six on Bucknell's next possession to give the Bison a 21-14 lead.

The momentum was with the Bison as the teams went into their locker rooms, and Dan Palko '00 kept the ball rolling with a 62-yard return on the opening kickoff of the second half. After a seven yard run by junior Jason Marrow and yet another Delaware State personal foul, LeMario Bradwell '01 rushed 13 yards for the score.

"It's good that we took advantage of (Palko's kickoff return), because there were times in the game when we didn't," McDowell said. "The line did a great job of blocking and gave the guys room to run and they hit it up in there."

A 38-yard field goal from Chris Lundberg '03 gave the Bison a 31-14 lead with just over six minutes remaining in the third period.

But just when it appeared that the Bison had the victory sealed, Delaware State struck back. On the fourth play of the Hornets' next drive, Matthews again found his favorite target, Horsey, for a 46-yard touchdown pass.

In the early stages of the fourth quarter, Delaware State recovered a McDowell fumble deep in Bison territory. Grayland King scored from four yards out to cut the Bison lead to 31-28.

On Bucknell's next possession, Marrow's powerful running moved the team down the field, and he capped off the day's scoring with a one-yard touchdown plunge. Marrow was named Player of the Game for his 17-carry, 85-yard performance.

"Delaware State made some big plays and we turned the ball over to give them the short field," Gadd said. "We responded, but unfortunately we don't seem to have the killer instinct to put teams awav."

Bucknell's defensive and special teams play against Delaware State left many questions unanswered. The Hornets ran up 495 yards of total offense, and they also managed 152 yards in kickoff returns. Over the past two weeks, the Bison defense has allowed six pass plays of over 45 yards, four of which were for touchdowns.

"Last week (Towson) passed for 407 yards, and we knew that we had to get better coverage from the linebackers and the secondary," linebacker Shawn Redd '01 said. "This week I think we did do some good things in coverage, but we just didn't play the ball."

Women's soccer comes up just short against five-time champs

By Andrew Bevan

In what head coach Chrissy Findlay called a "great game to watch", the Bucknell women's soccer team lost 2-1 to five-time defending Patriot League tournament champion Colgate in overtime this past Saturday.

The Bison came out strong, applying heavy offensive pressure from the first whistle. However, Colgate managed to make a few charges of its own and capitalized by netting a goal in the 16th minute of the first half. This setback did not deter the Bison, as they continued their relentless attack.

"We still played well after the goal," Findlay said.

Bucknell's constant offensive pressure finally paid off when senior Katie McElligott headed home the equalizer 19 minutes into the second half.

"It was a big relief for (McElligott) to score. She has been struggling with a foot injury that she sustained last year," Findlay said.

Bucknell's joy in tying the game was short-lived. After neither team managed to find the net during the remainder of the second half, the game went into overtime. Colgate notched the game-winner just about halfway through the first overtime period.

"Although we were disappointed after the game on Saturday, it was really exciting to see us play that well and compete with and dominate a team like Colgate, who is consistently at the top of the Patriot League," McElligott said. "Now we just have to concentrate on our upcoming Patriot League games so we can make it back to the tournament and get another chance at Colgate."

Findlay continues to rave about the "tenacious play" of Tara Utchel '03 in the midfield and the defensive work of sophomore tri-captain Anna Hall.

"(Hall) marked one of Colgate's top players out of the game," Findlay said.

Findlay also recognized the excellent play of Sarah Klang-Glienna '02 on the outside midfield. Klang-Glienna was moved to this position after playing forward last season, and she has developed into another offensive threat for the Bison.

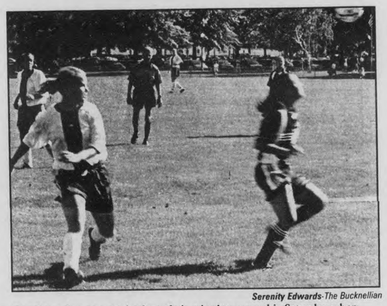
Findlay says that her team now has six players on offensive attack (forwards and midfielders) as opposed to just two forwards last year.

While the Bison turned in another dominating offensive performance, outshooting their opponents 24-12, their inability to finish still plagued them.

"Awesome things are happening on the field, we are just not finishing," Findlay said. "It is tough for a team to go through, but it is also very normal at the beginning of the season. We have the technical and tactical skills to win games, it is just a matter of believing 100% that we can win games."

After only one game this past week, things are about to get interesting for the Bison, as they play six games in the next ten days. Their first test in this busy span is on Wednesday at Princeton, which Findlay sees as a tough game but a, "good team for us to match up against."

"The season could change greatly in the next two weeks. It could go up or down," Findlay said.



Serenity Edwards-The Bucknellian

The Bison hope to get back to their winning ways this Saturday when they travel to Holy Cross for an important Patriot League match.

Brian Carr '00 and the Bison look to improve their record when they travel to Army

Men's soccer wins seventh straight; improves season record to 7-2

By Katie Yingling

It's never too late to shine.

That could be the men's soccer team's motto as they come off of a week full of firsts. It was the first goals of the season for senior Steve DeLuca and junior Wilson Pyle. It was the first Patriot League win for Bucknell since 1997. It was the Bison's first win over Colgate since 1973, and it is most certainly the first time any of these players have seen a winning record at Bucknell, much less anything close to 7-2; the Bison have not recorded seven victories in a *season* since 1996.

The streak began after the Bison faced St. Peter's in Jersey City last Wednesday. Sam Chamovitz '01 placed the ball in the net in the first eight minutes of the game to set the Bison up for a 1-0 win. Bucknell's defense held strong for the remainder of the game, not allowing for retaliation by St. Peters, who outshot the Bison 22-7.

The win against St. Peter's seemed to give the Bison the confidence they had earlier in the season, priming them for a record-breaking overtime win against Colgate last Saturday. Bucknell was again outshot, but the strength of its defense accompanied by the two goals of senior Brian Carr carried the Bison into overtime.

Carr was also credited with the assist, which he shared with captain Bill Epley '01, to Pyle's game-winning goal in the overtime period. For his performance against Colgate, Carr was named Offensive Player of the Week in the Patriot League.

When the Bison faced Niagara on Tuesday, nothing could stop their momentum. The Purple Eagles were no match for Bucknell's onslaught, after defeating the Bison 1-0 last year. After the first eight minutes of play, Bucknell was ahead by two, with goals from Epley and DeLuca. Chamovitz sealed the victory with a third goal late in the game to bring the Bison a 3-0 victory.

The Bison are hoping that their streak will continue as they face their third Patriot League opponent, Army, this Saturday and Philadelphia Textile next Tuesday.

"We've just found our rhythm," said Greg Stunzenas '02. "Our hard work is finally starting to pay off."

FIELD HOCKEY

from page 11

offensive pressure for the majority or the first half. But as soon as the game appeared to be in Bison control, Lafayette capitalized on a scoring opportunity to tie the game 1-1, with only 7:30 remaining in regulation.

The two teams battled back and forth until the game-ending whistle blew, and they headed into overtime knotted at 1-1. The overtime consisted of seven-on-seven action, lasting a maximum 15 minutes.

The Bison offensive force, lead by Higgs, Ebert, senior tri-captain Jenny Zimmerman and Melissa Maher '02, immediately produced a number of scoring opportunities in the first three minutes of sudden death.

But after a scramble in front of the Lafayette net, the Leopards counter-attacked and eventually gained a penalty corner. The penalty corner was successful, as the Leopards scored just 3:20 into overtime to sealing the victory.

Lafayette outshot Bucknell, 13-5, for the match and held a 20-11 edge in penalty corners.

"Lafayette has a strong team, but we played hard today," added Twombly. "I'd like to see them again come tournament time."

Bucknell (4-3, 1-1 Patriot League) hosts league rival Ursinus on Wednesday.

why say it twice
when once will suffice?

Bucknell grad heads to majors

By Joshua Gish

Of no surprise to anyone who has witnessed his skill, Bucknell graduate Eric Junge '99 was drafted to play baseball for the Los Angeles Dodgers last spring.

Junge, who set a Bucknell record for career saves with 12, was drafted in the 11th round to play on the Yakima (Washington) Bears, the single A farm team of the Los Angeles Dodgers.

Bison baseball coach Gene Depew said that he was, "expecting Eric to be drafted. However, I was both pleased and surprised that he was drafted in the 11th round rather than the high teens."

Throughout his career as a Bison, Junge always maintained his health and his commitment to the team. He received playing time on the diamond from the beginning of his freshman year, when he w as instrumental in Bucknell's advancement to the 1996 College World Series.

Junge played the role of closer for the team during his first three years, and he then received a starting slot during his senior season. During the '99 season with the Bison, Junge was one of three seniors and one of the two co-captains on the team.

"At 6'5" and with a 90+ fastball, Eric had what the scouts were looking for," Depew said. "The scouts had their eyes on Eric from his freshman year; they continued to be impressed when they witnessed his outstanding performance when the team traveled to Homestead, Florida last season. Most teams had Junge on their draft list, and as the rounds of drafting proceeded, he became very attractive.

Junge's first season with the Bears has proven to be fruitful, as he was jettisoned past the rookie stages to play in the more advanced league. His feats with the Bears include leading the team in games started, ranking second in strikeouts with 55 and ranking second in innings pitched

Junge was invited to participate in a six-week instructional league reserved for a selected group of the Dodgers' top prospects.

"It is a long, hard road to the majors," Depew said. But the coach recognized that Junge is getting good playing time and is staying healthy, which is the key to survival in baseball.

Depew looks positively towards this year's team even with the loss of Junge and the other seniors. He added that Junge's accomplishments, "will have a positive affect on the team," since they will, "set standards on the team for players to strive to fulfill."

Junge '99 was selected in last April's MLB Draft

Carmen's Football Picks

NFL

Jacksonville at Pittsburgh

Divisional match-up of two 2-1 teams coming off disappointing week three losses. Look for Brunell and company to continue to have the Steelers' number...

Pick: Jaguars 32-20

Buffalo at Miami

You gotta love Flutie and Marino. Look for them to put on a classic quarterback dual. In the end, Miami's defense will be the difference...

Pick: Dolphins 34-24

Oakland at Seattle

Battle of upstart '99 teams that rely on their punishing defenses. Seattle's offense appears to be moving in the right direction, and that spells trouble for the rest of the league...

Pick: Seahawks 21-17

College

Purdue at Michigan

One of the best Big 10 matchups of the year. Both teams are 4-0 behind potent offenses. Purdue's Drew Brees is hands-down the best quarterback in the nation, while Michigan's Anthony Thomas has been running over opponents. But which team's defense will hold up? I'm betting on Michigan...

Pick: Wolverines 24-14

Virginia Tech at Virginia

Expect this classic, gritty intrastate rivalry to live up to its name. Tech looks strong and has cracked into the top ten, but the Cavaliers are home so anything's possible...

Pick: Tech 30-21

Bucknell at Penn

After only scoring 23 points in its first two games, Penn needs an offensive surge to defeat the Bison. Look for the veteran Bucknell defense, which has been banged up and roughed up of late, to start living up to its potential...

Pick: Bison 17-10

Spotlight on club sports: Women's Ultimate Frisbee

By Sara Gifford and Katy Cagle

The Bucknell Women's ultimate team trucked back to school with rusty forehands, neglected and smelly cleats and dreams for the upcoming season.

The Peace Frogs could not wait to get back into their rhythm and total ultimate connection. Recruiting freshman and getting back into shape would be a difficult task.

But so far things are looking up! The Frogs started off the season with a strong appearance at the Outer Loop Collegiate Challenge at Bull Run Park in Virginia. The season for the freshmen began in style; Bucknell played well in pool competition on Saturday and then proceeded to defeat the tournament champion, Cornell, on Sunday morning, 13-7. The Peace Frogs did not have a problem getting right back into their ultimate groove, starting this season just as they left off at the end of last semester.

Last weekend the Peace Frogs traveled to Lehigh University to compete in the fall Sectionals. "We were out there having fun and loving every minute of the game," Betsy Anderson '02 said. "The team spirit that we had at Sectionals is what ultimate is all about."

Seeded eighth for the tournament, the Peace Frogs surprised their competitors by finishing second in their pool and fourth overall.

The most notable game of the weekend was against Sol, a competitive Philadelphia club team. The Frogs mastered Sol's zone defense with spirited intensity. Bucknell's own impenetrable zone frustrated Sol, resulting in a 10-5 Peace Frog victory.

On Sunday the Frogs came out strong, although they were short on players. Swarthmore was sent home with a 13-1 loss to Bucknell, but the Philly Peppers were able to see the spirited side of the Frogs. Penn State was then able to defeat Bucknell's exhausted team in a fun yet intense game, closing out the tournament.

The women's ultimate team will travel to Fredricksburg, Virginia for the Regionals competition on October 9-10.

"We had an incredible weekend," co-captain Kelly Reiners '01 said. "We kept up the intensity and put our hearts into every game we played. There's so much potential on the team and we're looking forward to an awesome year. I love playing with the Frogs!"

The Frogs are very hopeful this year, bringing back a strong team from last year and adding some enthusiastic freshmen. Although two talented seniors left the team and another valuable contributor went abroad this semester, the team is holding up well and showing the collegiate ultimate scene that the Frogs will bring passion and spirit to every game that they participate in.

...For love of country

The headlines from London's notorious tabloids said it all.

"The United Slobs of America," bellowed the *London Mirror*.

"Ugly Americans disgrace themselves," said the city's *Times-Express*.

"Americans show appalling lack of dignity—again," read the *London Evening Standard*.

Was the subject war? Economic Imperialism? Free trade disputes? Nope. Golf.

The reactions from the British tabloids typified the collective reaction of all of Europe's golf community after the United States' come-from-behind win in last week's Ryder Cup. The European faithful weren't necessarily upset at the U.S. comeback, or the United States victory on home turf, but rather the reactions of the American team and its fans after the cup was clinched.

Commentary

Chris Ellis
Co-Editor-in-Chief

For those who didn't watch, I'll set the scene. The United States, down by a seemingly insurmountable four points (each match is worth one point) heading into the final day of play, had won the day's first six matches at the Country Club in Brookline, Mass., and were on the verge of achieving by far the largest comeback in Ryder Cup history—and winning the cup for the first time in six years. Some late gaffes by U.S. golfers, though, meant that the victory wasn't assured.

At least not until Justin Leonard, arguably America's most inconsistent golfer at the tournament, came back to win five straight holes against European opponent Jose Maria Olazabal, seemingly capping his comeback by holing a 70-foot put on the 17th hole. Olazabal needed to make a long, tricky putt if Europe was to retain hopes of staying alive in the match.

The American side, blasted all week for its shoddy play, reacted to Leonard's improbable putt as American golfers might be expected to—emotionally, exuberantly, perhaps a bit obnoxiously—pilling onto the putting surface, crossing Olazabal's putting line screaming and high-fiving, and temporary disrupting play. The American crowd, also charged by the emotion of the week, was louder for even longer. Olazabal had no choice but to wait until the green was cleared and the party quieted before attempting his last-chance putt.

The result: Olazabal had to wait more than two minutes — an eternity on the putting green—before the bedlam had quelled, and by the time he putted, his concentration was lost and the putt never had a chance.

The European reaction to the disruption of Olazabal was, predictably, one of outrage. European golfers fueled the flames, implying that American golfers deliberately incited the crowd and disrupted Olazabal (European golfer Sam Torrance said that American golfer Tom Lehman could not "in good faith call himself a man of God" after he refused to apologize for the spontaneous celebration), and the European media and golf faithful took it from there. Newspapers in England, Ireland, Spain, and elsewhere blasted the American's sportsmanship, European internet golf boards were loaded with postings crucifying the Americans, and talk of a European boycott at future U.S. Ryder Cup events was even discussed. Even British Prime Minister Tony Blair joined the fray, decrying Americans for a lack of respect to their guests and implying that English hosts may not be so hospitable in the future.

The reaction in the American press was, suffice it to say, considerably different.

The *Boston Globe* referred to the complaints as 'The Great European Whine.' The *Washington Post* said that Europe simply had a case of "sour grapes" and was "looking for excuses." *The Dallas Morning News* implied that the London press was hypocritical for criticizing U.S. actions, suggesting that England was the country that 'practically invented sports hooliganism.' The *San Francisco Examiner* had a one-word response to those Europeans blasting the U.S. for a purported lack of sportsmanship: *Tough*.

The war of words following the match was simply a manifestation of the tensions that had been brewing throughout the three-day Ryder Cup, which turned passive observers into golf addicts and golf addicts into nationalistic zealots.

Golf has had a hard time building a United States fan base in part because team play is virtually non-existent. Fans can watch their favorite players or favorite tournaments, but American sports fans are diehards, and watching without a heavy rooting interest, in most cases, simply doesn't happen. But the Ryder Cup, which pits the best of the U.S. against the best from Europe, provides Americans fans what they want: a clear case of *us* against *them*. And just like fans that passionately root for their favorite major sports team, common sense and moderation goes out the window and the simple passion of 'us beating them' becomes overriding.

The possibility of beating America in anything reigns supreme in Europe. I am still convinced that this is one of the reasons that soccer remains so fervently popular worldwide—it may not be the most exciting or fast-paced sport, but there are still (despite recent advances in U.S. soccer) at least half a dozen nations that can give the Americans a good beating at pretty much any time, and in the world, that is perceived as good. Throw in the drama of a sport which many feel was invented by Europeans and stolen by Americans, and throw in just a touch of that American cocky exuberance, and the conditions are prime for a battle.

And a battle it was. European golfers and American fans traded barbs all week. Colin Montgomerie, Europe's notorious crowd-baiter who had asked the American media "how could you live here?" and responded to a heckling fan on the tournament's second day by suggesting that Europe "had already won" the match, took it so bad that his 70-year old father couldn't bear listening to the abuse directed at his son and had to leave the course. Even European golfer Jesper Parnevik, who is a fan favorite in regular tournaments played in the United States, has several American endorsement deals, and makes his year-round home in Tampa, Florida, had his round disrupted and bad shots cheered.

The examples of taunting, heckling, and disruption of European shots are numerous, so numerous that one important fact was lost in the shuffle. The spectators and players were taking part in golf. Golf. The sport that values patience and persistence over emotion. The sport with the longest—and certainly most adhered to—tradition of etiquette and fairness among both players and fans. The sport in which even a camera click during a player's swing is considered the ultimate offense.

The tension surrounding the Ryder Cup showed just how zealous and just how territorial fans of a sport—any sport—can be when his local or national pride is on the line. With very few exceptions, professional golfers are rarely harassed while playing in regular tournaments. Golf fans are rarely rabid supporters of one individual player. And never—never—would the 17th-hole putt of a nondescript golfer send thousands into a night-long celebration and drive approximately half of the world's golfing population to outrage. But that's what the Ryder Cup does.

For Europe, it was the ugly American side that prevailed in a tainted victory. For the United States, it was one of the greatest sports stories of the year and one of the biggest sports comebacks of the decade. But for both sides, golf was simply a vehicle in which nationalist sentiment could be expressed again. Golf was the game, but it was not the thing. Territorialism—the kind that can be brought out most intensely by sports—was the thing.

It affected even the most passive of sports fans. Even I, one who virtually never watches golf on TV, watched all of the final day's matches, screaming as I would at a hockey game when an American made a crucial putt or a European missed his.

And when the matches were over and the comeback complete, I felt a little more satisfied. A little happier. And just as I would have after hearing the star-spangled banner at an Olympic Event, I felt a little more proud to be an American.

Despite what the London press would say.

Bison top DSU, move to 3-1

BY Carmen Mauriello

The Bucknell football team snapped Delaware State's one-game winning streak with a 38-28 victory last Saturday in front of a parents' weekend crowd of 4,865 at Christy Mathewson-Memorial Stadium. A one-game winning streak usually doesn't mean much to a team, but the Hornets' 26-6 win two weeks ago over Norfolk State was their first win in 20 games.

With the victory in the initial meeting between the schools, the Bison moved their record to 3-1 and began a one-game winning streak of their own. The Bison hope to continue their winning ways this Saturday in a tough road game at Penn, where they haven't won since 1967.

On Bucknell's opening possession, Delaware State's Dante Jones intercepted a Don McDowell '00 pass and returned it 68 yards into the Bison endzone, giving the Hornets an apparent 6-0 advantage.

But a clipping penalty was called on the Hornets during the runback, negating the touchdown and bringing the ball back to the Hornets 41.

The barrage of yellow flags that was to follow eliminated all hopes of a Hornets' score on the drive. After a 21-yard pass play once again brought Delaware State into Bucknell territory, three consecutive penalties put the Hornets in first and 30 from their own 42.

The Bison defense held, giving the offense good field position at its own 38. The Hornets again shot themselves in the foot, committing a 15-yard personal foul.

Bucknell took advantage, using a punishing ground game to march down the field. McDowell found the endzone on a 15-yard option play, but the Bison led just 6-0 after missing their third consecutive extra point attempt.

Courtney Yohe-The Bucknellian
Bucknell is away against Pennsylvania this Saturday, where it hasn't won since 1967

Delaware State got on track early in the second quarter when DaShane Dennis intercepted a McDowell pass, giving the Hornets the ball at their own 5. Quarterback Rahsaan Matthews quickly demonstrated his big-play ability, silencing the crowd with a 79-yard touchdown strike to Darnerian McCants.

Delaware State then ambushed the Bison with an onside kick, gaining possession at the Bucknell 47. Matthews immediately went back to the air with brilliant results, finding Albert Horsey for a 47-yard bomb on the drive's first play to expand the Hornets' lead to 14-6.

Bucknell coach Tom Gadd was frustrated with the touchdown because he expected the Hornets to look for a big play after the onside kick and designed a defensive package to prevent it.

"If (the receiver) is five yards behind our coverage, then that's one thing — but he's not on both catches. (Terrence Joyner '00) is right there. He's 5 ft., 7 in., and the other guy is six ft., one or two in., and we get mismatched in size a little bit," Gadd said. "That ball (on the second touchdown

See FOOTBALL page 13

Volleyball goes 2-1 at invitational

By Justin White

The Bucknell volleyball team hosted the Bucknell Invitational this past weekend, and the Bison fought hard to win two of their three games.

Both victories pushed the players to their limits, as it took good execution and determination down the stretch to seal each victory. Named to the All-Tournament team were Michelle Lesh '00 and Shannon Walker '02.

The team opened up the two-day tournament Friday night against Niagara. Bucknell started the game slowly, possibly overlooking a weaker, yet more prepared opponent. In the fifth game, the Bison found themselves down 10-14 in rally scoring, which is a typical time-conserving aspect of fifth games where there are no side-outs but instead points are awarded for every play.

However, the team forged a comeback and took the next six points, winning the long and competitive match with a 16-14 triumph in the decisive fifth game.

Bucknell's inconsistent play early in the match revealed one of the weaknesses that has plagued the team during the early part of the 1999 fall season.

Marcy MacMillen-The Bucknellian
The team travels to Colgate this Friday

Coach Opalski's displeasure at the lack of consistency was offset by her pleasure with the team's "ability to perform under pressure" at critical moments in the game, especially when the team was faced with defeat.

The Bison were led by the outstanding performances of Lesh, who registered a season-high 21 kills, and Jennifer Wrigley '03, who recorded 15 kills and 18 digs.

The Bison came off their victory Friday night to play their first match of the day on Saturday against Canisius. Bucknell again fell behind early, losing the first two games. But the team came on strong, winning the next two games and pulling out the fifth game 15-11.

"When a team can pull out the fifth game, it says a lot about the team's strength of character," said Opalski. This character was evident in both of the team's first two games of the tournament.

Lesh again led the Bison with 20 kills and 26 digs, along with Walker's 19 kills and junior Brooke Bader's 12 kills and 13 digs. The team registered 101 digs in the Canisius game, the most accumulated by either the Bison or any of their opponents so far this season.

The final game of the tournament featured the two remaining undefeated teams: Bucknell and Yale. The Bulldogs methodically ousted the Bison in straight games (15-11, 15-6 and 15-3). The Bulldogs' most impressive statistic was their .336 hitting percentage for the game, compared to .079 for the Bison.

The Bison are now 6-4 overall, and they began their Patriot League schedule this past Wednesday at Lafayette. The Bison will remain on the road this week with games against Colgate and Army. They are entering the bulk of their schedule, with five games in a one and a half week period.

Lesh called this upcoming stretch, "the defining period of our schedule — in which we finally find out how we size up against the rest of the league."

The weekly campus newspaper of Bucknell University

Special Homecoming Edition

Homecoming '99 hosts, hostesses selected

By Pete Van Emburgh and Heather Napolitano

The ballots are in.

The University has selected a talented and enthusiastic group of eight seniors—four hosts and four hostesses—to represent the class of '00 and the student body in its entirety at this year's homecoming celebration.

Mike Bolduc, Ted Burnes, Valter Karavanic, Odu Onyeberechi, Roxane Adler, Kellem Agnew, Dana Cunningham and Nicole Zergebel have been named the hosts and hostesses to reign at the '99 homecoming.

Selecting these eight students has been a lengthy process. All organizations registered with the University were invited to nominate seniors who they thought were qualified to fulfill the duties of this role. Faculty and staff were also given the opportunity to make nominations.

Once this process was complete, all nominated students were presented to a panel of faculty and staff. This panel then narrowed the potential hosts and hostesses to 12 males and 12 females.

These 24 individuals then appeared on a ballot which was distributed to the student body, allowing them to vote for four males and four females and ultimately select their representatives.

The hosts and hostesses now face a range of

See HOMECOMING, page 3

Football readies to battle Dukes

By Carmen Mauriello

The homecoming crowd at Christy Mathewson-Memorial Stadium should be in for an exciting matchup this Saturday when 4-1 Duquesne challenges 4-2 Bucknell.

Duquesne has won three straight behind quarterback Tony Zimmerman and a defense that has allowed fewer than ten points a game in '99. The Bison are coming off a disappointing 10-7 loss to non-conference foe Columbia, and they need to get back on track before resuming their Patriot League schedule.

The performance of the suspect Bison secondary against the Dukes' potent passing attack will be key in determining the outcome. Zimmerman has already thrown for nine touchdowns and almost 1,000 yards in '99, and wideout Gerald Foster has registered 500 yards and five touchdowns this season.

Bucknell hopes its outstanding rushing defense, which ranks 14th nationally in I-AA in allowing just 95 rushing yards a game, can trip up speedy Duquesne runner Donte Small.

Quarterback Don McDowell '00 leads a powerful Bison offense. He is

Fraternities invited to see *'Late Show'*

By Peter Van Emburgh

Roy Baker, Assistant Dean of Students for Greek Life, received a surprising phone call three weeks ago from a representative of 'The Late Show with David Letterman'. Seven fraternities were invited to join the audience for selected October tapings.

"I was surprised that the show representative called," Baker said. "But he stated that he wanted to develop a relationship with Bucknell because our Greeks have a good reputation."

Baker noted that the Late Show only invited the fraternities because many of the people that request tickets for the show are women. Therefore, they try to fill the seats each night with equal numbers of men and women.

Now why was the University contacted?

Baker is not sure but "the producers wanted a good group of Greek men that would be dependable and good audience members." Ironically, the producers contacted

Naturalist Jane Goodall to speak

By Katherine Nowak

Pioneering chimpanzee researcher Jane Goodall will speak at the University Friday, Oct. 15 in the Weis Center for Performing Arts. Where many scientists saw "primitive" apes, Goodall found highly emotional and capable social creatures in humans' closely related relatives, the chimpanzees. Her intimate familiarity with their behavior brought chimpanzee life from mystery into documentary. Goodall's 37 years of research and her wildlife conservation efforts make her one of the most distinguished scientists today.

Jane Goodall's voyage begun in 1957, when Jane was only 23 years

LETTERMAN From page 1

the University when they could have easily contacted a school in the New York city area.

Alum Steve Brown '88 provided the University with it's first taste of publicity provided by The Late Show on the Feb. 4 episode. When Brown couldn't answer one of Letterman's questions about the origin of the name "Bucknell," the producers immediately reached Bertrand Library. Following a commercial break, Letterman answered the question of the evening—Bucknell was renamed in honor of the major benefactor William Bucknell in 1886.

Apparently, the producers are pleased with the University's performance as audience members. "They have indicated that our students have been excellent—well-behaved, cooperative and punctual," Baker said.

"I was surprised that the show representative called. But he stated that he wanted to develop a relationship with Bucknell because our Greeks have a good reputation."
—Assistant Dean of Students Roy Baker

"Preparing everyone to get ready for the show was a great experience," said Will Briones '00, President of Kappa Sigma, who attended Wednesday's taping. "The entire day was a blast."

Despite continual encouragement from Baker, Letterman has not yet mentioned the University or the Greek community in attendance.

The fraternities that have been in the audience at the Ed Sullivan Theater are, in order of appearance, Theta Chi, Sigma Phi Epsilon, Lambda Chi Alpha, Phi Kappa Psi, Kappa Sigma, Delta Upsilon and tonight possibly marks the last University fraternity appearance with 20 members from Sigma Alpha Epsilon. Sigma Chi may make an appearance at the end of October. Letterman is a brother of the Ball State Chapter of Sigma Chi.

Public Safety Log

October 7, 1999

INFORMATION/INTOXICATED PERSON—Public Safety responded to Kress Hall for the report of an intoxicated student who was ill. The individual refused medical treatment and signed a waiver. University citations were issued.

INFORMATION/UNREGISTERED PARTY–Public Safety responded to Phi Psi Fraternity for a fire alarm activation and found an unregistered party in progress. University charges were filed.

PROPERTY DAMAGE–Public Safety responded to Roberts Hall for the report of vandalism to custodial equipment. No suspects were located in a search of the area. The incident is under investigation.

LARCENY/OFF CAMPUS–Public Safety received the report of a missing University owned motorboat taken from a boat dock in Northumberland. Pennsylvania State Police were notified and the incident is under investigation.

AIDED/SHS TRANSPORT–Public Safety contacted an Student Health Services driver to transport a University student to Evangelical Community Hospital Emergency Room for treatment of a facial laceration. The student later returned to campus.

October 8, 1999

INFORMATION– While on routine patrol, Public Safety located a vehicle with a parking decal that was previously reported stolen from another vehicle. Traffic/parking citations were issued and University charges are pending.

INFORMATION–Public Safety responded to Christy Mathewson Stadium for the report of a female who had tripped at the high school football game. The visitor was transported by ambulance to Evangelical Community Hospital Emergency Room for treatment and later released.

October 10, 1999

CRIMINAL MISCHIEF–A University employee notified Public Safety that three parking signs were missing from Bucknell West. East Buffalo Township Police was notified.

INFORMATION /MEDICAL–Public Safety responded to Vedder Hall for the report of an ambulance transport to Evangelical Community Hospital Emergency Room for a student experiencing a seizure. The individual later returned to campus.

October 11, 1999

TAMPERING WITH FIRE EQUIPMENT/UNAUTHORIZED ENTRY–Public Safety responded to Delta Upsilon Fraternity for a fire alarm activation and learned that a person had gained entry to the house and illegally discharged a fire extinguisher.

October 12, 1999

INFORMATION–Public Safety responded to Roberts Hall for the report of University owned furniture discovered in a student's room. Following an investigation, the matter was turned over to the Office of Housing and Residential Life for disposition.

UNIVERSITY PROPERTY DAMAGE/ACCIDENTAL–Public Safety responded to the Fieldhouse for the report of a broken wall mirror accidentally caused by a student attempting to remove a bird from the building. No charges will be filed.

INFORMATION–Public Safety responded to Smith Hall for the report of an ill student. The individual signed a waiver refusing medical treatment.

MARCH From page 1

of Reconciliation and the Interfaith Alliance. It was designed to honor those killed and wounded because of their religion, ethnicity, culture, race or sexuality in America in the past year.

"Any time one of us tells a gay-bashing joke, snaps to an assumption about race, ignores the huge economic inequities that cause suffering every day, everywhere, or simply acts with unkindness, we perpetuate the environment that makes hate crimes happen," said Saundra Morris, associate professor of English, senior fellow for the Social Justice College and Community Alliance for Respect and Equality (CARE) steering committee member. This was one of the main points of the march.

The aim of the march was emphasized by the large number who attended. "I was tremendously moved and heartened by the large crowd of Bucknell students who participated in the march, and felt very proud to be associated with them," Morris said.

"By being there, they demonstrated their awareness of the importance of these issues and their determination to make Bucknell a place where violence and m[illegible] whatever level, will be overcome by the powers of understanding and love."

"The coming together of Bucknell and the Lewisburg community was wonderful to witness, especially for the purpose of encouraging diversity, a topic which hasn't always been a strong point," said Karen Langhauser '01.

"The coming together of Bucknell and the Lewisburg community was wonderful to witness, especially for the purpose of encouraging diversity."
—Karen Langhauser '01

"The march had a great, positive feeling. This was not about hating people who hate, but about what kind of community we want to live in. It was about acceptance and neighborliness, about becoming a community where everyone feels safe," University Chaplain Ian Oliver said.

The march was organized through collaborative efforts from CARE, co-chaired by Morris, Oliver, Professor of Religion Douglas Sturm and Professor of Religion Carol Wayne White.

Although it was planned to be a one time event, the intensive interest from the campus and community may lead to others in the future.

An open letter from the Board of Trustees regarding Greek system

Bucknell Students, Faculty and Staff,

I am writing to you with regard to sororities and fraternities at Bucknell. Over the past year or so, I and many of my trustee colleagues have observed a seemingly increased number of inquiries about the Board of Trustees' policy on sororities and fraternities. Although the number of inquiries is relatively small and there has been no change for many years, I thought it well that I write to you on this matter.

The Board supports the presence of sororities and fraternities at Bucknell. Giving students the option to be members of the Greek system is an important element of Bucknell's campus living experience. There are many positive attributes of sorority and fraternity life for those who choose to join, attributes that have been and remain one of the essential qualities that help make Bucknell such a special place. That has been the Board's position since the early days, and there is no current thought or discussion among board members to change that.

I should go on to say, however, that the Board has been disappointed on occasion when there have been incidents of erosion of responsibility by some members of sororities or fraternities, erosion particularly related proper behavior, respect and consideration for others, and adherence to university policies and Pennsylvania law. Students within these organizations, as well as those in the independent student community, who do not demonstrate the high level of good citizenship required of Bucknell students must either change their way s or be denied the privilege of being part of the Bucknell community.

In concert with the Board's ongoing long range planning, this past spring I charged our Chairman of the Greek Affairs Committee, Trustee Norman Garrity, Bucknell '63, to initiate the development of a strategic plan on the role of sororities and fraternities in the living experience of Bucknell students, long term. The objective is to define the responsibilities, guidelines, policies and expectations of the sororities and fraternities of Bucknell in this contemporary society. Trustee Garrity will look to students, faculty, the administration and alumni to join in a cooperative effort ion this important task.

In the meantime, the Board will be encouraging sorority and fraternity leaders, in coordination with the administration and other campus leaders and constituencies, to implement immediately a positive, proactive interim program to assure that sorority and fraternity members meet or exceed those high standards expected—indeed, required—of all members of the Bucknell community.

This should clarify the Board's position and perspective on this matter.

James W. Schubauer, chairman of the Board of Trustees

Editor's Note: The above letter, dated Sept. 29, was distributed on campus to all University members.

Grammy Award-winning Kathy Mattea to perform

Courtesy of Public Relations

Kathy Mattea, winner of two consecutive Female Vocalist of the Year awards from the Country Music Association will perform Saturday at 8 p.m.

Singer Kathy Mattea will perform at Bucknell University on Saturday, October 16, at 8 p.m. in the Weis Center for the Performing Arts.

Tickets for the concert, part of the university's Homecoming Weekend, are $25. For ticket availability, call the Weis Center box office at 577-1000.

"Mattea is much more than a country singer," said Bill Boswell, director of cultural events at Bucknell.

"Her music incorporates influences as widely varied as bluegrass and gospel, Scottish folk songs and Caribbean dance music."

"She is sophisticated and has impeccable musical instincts. This concert will be a wonderful way to celebrate Homecoming," he said.

Born in West Virginia, Mattea moved to Nashville at age 19; five years later, in 1983, she was signed by Mercury/Polygram. By 1987, she had established her distinctive vocal style, released four albums and had six Number One hits.

Mattea is the winner of two consecutive Female Vocalist of the Year awards from the Country Music Association as well as a Grammy Award in the female country performance category with her greatest hit album in 1990. She is one of America's most recognized singers with the crossover sensation, "Where've You Been."

This week in BUCKNELLIAN headline history

October 17, 1899

Bucknell 5, Lehigh 0

"Once again, the Brown and White went down before the Orange and Blue and this time in a very closely contested foot ball game on Lehigh's gridiron. The game was called at 3:30 Saturday afternoon and was carried on under the direction of Godcharles, Lafayette, as referee, and Barr, Princeton, as umpire."

October 2, 1922

Full Speed Ahead—Order on Stadium

Work on the new stadium grounds will be resumed this week according to a decision of the stadium committee which met last week in the Lewisburg Club. The construction will be rushed so that when Bucknell meets Pitt next year in their annual football game the scene of their encounter will be on an athletic field surpassed by few in the country.

October 16, 1947

Bookworm's Paradise: New Dream Library

All current day students cannot imagine life without the Bertrand Library high on the hill. But for some, it was a dream of the future. The library was planned to stand in its future location, facing Davis Gym, next door to the Delta Sigma house with the present Literature building off to its right and the future social sciences building [currently Coleman Hall] to its left. It was also planned that the entire building will probably be air conditioned.

The estimated cost of constructing the library before the war was about $375,000. Because of inflationary costs, the estimate has risen to well over $750,000. About $499,000 is said to be set aside for the purpose of building the new library at the present time.

Oct. 8, 1971

Zeller: tuition rise

Vice-president of administration and finance says the University has no choice but to raise tuition by $200 to cover growing costs in the budget. The surplus in the budget this fiscal year was only $16.70.

October 17, 1972

Officials 2, Bisons 1

"It was a heart breaker," was the only way men's socer coach Craig Reynolds could describe his team's 2-1 overtime loss to Colgate at Hamilton, NY, on Saturday. Controversial officiating led directly to both Red Raider scores.

Colgate scored first in the opening period on the first of the bad calls. The official awarded a penalty kick to Colgate on a call that was poor at best. The kick was converted and the Raiders had a 1-0 halftime lead.

In overtime, Colgate crossed the ball in front of the BU net to have it headed in by a Raider who was standing all by himself in front of the goal. It was the consensus of players and fans as well that the player was offsides but the official did not call the play back and the Bisons were pinned with an undeserved 2-1 loss.

Oct. 3, 1975

Co-ed halls: a good experience

A "guinea-pig' in the new co-ed residence halls experiment says that students are ready to live in male-female halls all over campus. So far, the experiment is only taking place in 3 halls of New Swartz.

Oct. 15, 1976

IFC works on party formats

Dean Commerford, assistant director of Residential Life, works with Bucknell's IFC president on ideas to control Wednesday night parties. These parties are reported to cause more damage and be more out of control than weekend parties. One thought is to put a time ceiling on Wednesday parties.

Oct. 14, 1977

Foreigner performs to sold out crowd in Davis Gym

One of rock's current leading bands plays for a full capacity audience in Davis Gym.

Greek System Reviewed

Greek life at Bucknell is under review by the University's Greek Review Committee. A year long review will determine the future of the Greek system at Bucknell. (sound familiar?)

Compiled by Jim Leahy '03 and Maren Johnson '02

Chimpanzee researcher to visit Weis Center

GOODALL from page 1

old. Arriving in Kenya from Britain to visit a friend, Goodall made contact with Dr. Louis Leakey, a prominent academic of anthropology and paleontology. Leakey saw promise and patience in the young girl, who had no collegiate training at the time. Leakey believed that a mind uncluttered by academia would render fresh perspectives and eventually demonstrate the link between humans and chimpanzees. In 1960, determined Goodall began her research at Gombe Stream National Park in the East African nation of what was then Tanganika and today is Tanzania.

Courtesy of Public Relations

Goodall, a winner of National Geographic's esteemed Hubbard Award for her effort in preserving the enviroment, will speak to the University on Friday.

Two previously unrecorded activities: the fashioning of simple tools to pluck termites from a mound and the hunting and eating of small game by chimpanzees were observed in the years Goodall spent at Go- [illegible] witness to the chimpan[illegible]tender hugs, mother-infant [illegible] and rivalry, dominance displays and sexual behavior—each individually elaborate and unique, and each paralleling the complexity of human personality.

Goodall's unorthodox methods included the assignment of names instead of numbers to her subjects—Flo, Flint, Fifi, Pom and Passion, names as familiar to many animal behaviorists today as the names of their family members and relatives.

In 1965, Goodall was granted an honorary doctorate in Ethology from Cambridge University; Jane is one of only a handful of people to earn that distinction. Until 1975, Goodall lived at Gombe. Accumulating a wealth of data, Goodall founded her institute which today abides in nine countries including the United Kingdom, Tanzania, Canada, Germany, Taiwan and the United States. The mission of its programs is to promote the conservation of primate habitat and to foster secure relations among people, the environment and animals. Current projects include Roots and Shoots, an environmental and humanitarian education for young people; Chimpanzoo, a program dedicated to the study of captive chimpanzees; and TACARE, a reforestation project stationed in Western Tanzania.

Respected in both the lay and the scientific communities, Jane is the recipient of National Geographic Society's prestigious Hubbard Medal for her tireless defense of the natural world and is the only non-Tanzanian to have received the Medal of Tanzania. Most recently, Cornell University has appointed Goodall as a distinguished Andrew D. White Professor-at-Large. Her work with the chimpanzees has been featured in documentaries produced by National Geographic, HBO and BBC. She has authored *Wild Chimpanzees, In the Shadow of Man* and her most recent book *A Reason for Hope: A Spiritual Journey*.

"Hers has been a scientific mission coupled with a humane one. She has helped all of us to understand our world and its connecting links among living beings in new ways. She has done so with grace, respect for the opinions of others and a genuine concern that human beings honor life, wherever it may be," said Dr. Douglas Candland, director of the University's animal behavior program and professor of psychology. Goodall will dedicate part of her time on campus to University students enrolled in the animal behavior or environmental studies programs.

Today, Jane guides half a dozen chimpanzee sanctuaries for illegally captured chimps in Uganda, Congo, Kenya and Tanzania. She again faces challenges- this time of poorly enforced laws against illegal hunting in countries where demand for bushmeat is widespread. With the destruction of forested habitats by the lumber industry, the population of chimps has been reduced to an estimated 250,000 remaining in five countries. Biomedical research and international/local pet trade have also contributed to the animals' population decline which, at the turn of the century, was 2 million. Goodall's counter-strategies include the rehabilitation of domesticated chimps at the National Zoological Gardens in Pretoria.

Most recently, Goodall has pondered female transfer from natal groups. In the August issue of *Science*, Goodall with Anne Pusey and Jennifer Williams of the University of Minnesota, documented the role of rank hierarchy in female reproductive success, concluding that offspring of high-ranking females have higher survival rates and that their daughters reach sexual maturity earlier. Gombe Stream Research Centre continues its research efforts into chimpanzee behavior and social relations.

Courtesy of Public Relations

Goodall has devoted 37 years of her life to environmental research and preservation studies.

Jane Goodall's insight and persistence has revolutionized human perception of our closest relatives. Childhood, adolescence, grief, attachment, rage and play are as intense and vivid in the lives of the chimpanzees as they are in the lives of humans. Goodall has had a tremendous effect as a role model, speaking out for animal rights and rectifying the misapprehension that science must be a dispassionate undertaking.

Goodall's visit to the University is sponsored by Ron Marsilio, a 1971 alumnus from Westport, Conn., and the University Office of Alumni, Parents and Volunteers. Marsilio is treasurer of the committee of the Jane Goodall Institute.

Hosts and hostesses look to represent student body

HOMECOMING From page 1

responsibilities. The most immediate will be representing the student body this weekend, participating in the Bison Club breakfast and the Athletic Hall of Fame inductions, attending the post-football game reception and meeting with the Alumni Association Board of Directors.

David Flinchbaugh, class of '82 and director of the Office of Alumni, Parents and Volunteers, said that their office "will also look to these students throughout the year to represent the Bucknell student body to alumni and parent groups."

Following graduation, these students will serve as the key contact for their class and will work with the Office of Alumni, Parents and Volunteers to organize such events as the five year reunion for the class of '00.

Homecoming '99 hosts and hostesses (from left to right): Mike Bolduc, Dana Cunningham, Kellem Agnew, Roxanne Adler, Valter Karavanic, Nicole Zergebel, Ted Burnes. Not pictured: Odu Onyeberechi.

Mike Bolduc
Major: Civil Engineering

Bolduc is an instrumental member of the Catholic Campus Ministry (CCM), and has witnessed tremendous growth in participation over the years. Besides being co-president of CCM for the past two years, Bolduc is secretary for Tau Beta Pi, a teaching assistant and has been a Resident Assistant/Head Resident since last year. Bolduc also finds time to be an active member of Alpha Phi Omega as well as work as a web intern for the Alumni Parents and Volunteers Office.

Bolduc recognizes the challenge of juggling time between engineering and his vast array of activities instrumental to becoming a visible student and leader on campus.

In the future, he plans to pursue graduate studies in the field of Structural Engineering, with the hopes of working in a design firm soon afterwards.

Bolduc has enjoyed his years at the University saying, "It is the collaboration of all students which make this University so wonderful."

Nicole Zergebel
Major: Political Science
Minor: Legal Studies

Zergebel has played a key role in University athletics as the captain of the women's softball team. Her talent has caused her to be named as the All-Patriot-League second team second baseman, and her ability to balance her commitment to athletics and her studies has earned her the University's Student/Athletic Excellence award. Zergebel is also a member of the Student Athletic Advisory Committee, Kappa Kappa Gamma and Phi Sigma Pi. She has given her time to admissions office programs as well through her role as a tour guide, an Orientation Assistant and a hostess for prospective students. Amidst her activities, she also finds time to participate in service activities both on and off campus.

Once she graduates, Zergebel plans to spend her time studying for the LSAT, taking a year off to do so. She would like to devote some of her time to travel during that year as well. In years to follow, she hopes that she will be able to potentially gain experience in sports law, work for a firm and then continue to law school to study in this field.

When reflecting on her years at the University, Zergebel said, "My four years here have been the best experience of my life to this point and I can sincerely accredit this to my parents for making it all happen and being supportive, and then to my friends, professors, coaches and teammates for giving me the memories that will last forever."

Valter Karavanic
Major: Electrical Engineering
Minor: Mathematics

Karavanic, a native of Croatia, was informed last spring that he earned first-team Academic All-American honors, becoming the first men's basketball player to earn the distinction. The electrical engineering major with a mathematics minor and a GPA of 3.8 was the lone Patriot League player voted to the prestigious team. In addition to being a forward for the basketball team, Karavanic has dedicated himself to Bucknell Athletes Against Drugs (BAAD) and the Student Advisory Committee.

Karavanic is extremely proud to be selected by students and the faculty to serve on this year's Host/Hostess Committee.

Odu Onyeberechi
Major: Electrical Engineering

Onyeberechi has been a very visible leader on campus, serving as president of Kappa Alpha Psi, a minority recruitment intern and as a part of the Admission Greeter's Program. Odu is also a member of National Society of Black Engineers (NSBE), Brothers and Sisters Empowered (BASE) and the junior varsity basketball team.

In future years, Onyeberechi hopes to pursue an interest in technical consulting, using his technical foundation to solve business solutions.

As for being selected as a Host this year, "I was very excited and thrilled at the fact that my peers felt as though I am a wonderful role model for Bucknellians—that's the greatest honor your peers can say about you" Onyeberechi said.

Roxane Adler
Major: English, Elementary & Secondary Education

Adler has been very active in a variety of forums during her years at the University. She has served as a counselor, assistant coordinator and coordinator for the Building on Foundations Program created for incoming first year students. Adler also works in as an intern in the admissions office interviewing prospective students and representing the University at college fairs. She has contributed her time to a number of service activities and organizations including Peer Nutrition Educators, Susquehanna Valley Women in Transition and Alpha Phi Omega. Other activities have included membership in Kappa Delta Phi, Delta Delta Delta, LEAD Team and PSEA.

Following her graduation, Adler will decide between several career options. She anticipates either pursuing a position as a high school English teacher–which is in keeping with her current work as a student teacher at Warrior Run High School–or working in a college student activities office.

In reference to her selection as a Hostess for the class of '00, Adler said, "I feel really honored to have been selected by both faculty and students ... Bucknell is my home and my family ... it will be really hard to leave."

Kellem Agnew
Major: Environmental Studies and Spanish

Leadership roles and activities have attracted Agnew's time and attention during the past several years. A member of the Women's Club Rugby team since her first year, Agnew went on to serve as the fundraising chairperson from '97 to '98 and as the captain from '98 to '99. She has served as a Resident Advisor for the environmental residential college, as a student tutor, and as a member of the Student Environmental Action Committee. In addition, she is involved Cumbre and in the production of the University's environmental newsletter, *The Bubble*.

For Agnew, life after the University will bring graduate school. Although she is currently unsure of which program she would like to attend, she said would like to go "wherever they have the best program for helping to save the world."

Dana Cunningham
Major: Management and Spanish

Cunningham has contributed a vast amount of time to involving herself in both extra-curricular and educational organizations at the University. She has worked to better the University environment for her fellow students by participating as a Peer Consultant at the Career Development Center, as an Orientation Assistant, as a member of the Residence Hall Association and as a member of the Bucknell Activities Council. Cunningham has been a member of the Delta Gamma sorority for the past two years and has taken on leadership. She has also worked on the yearbook staff. In terms of activities related to academics, she is a member of the Alpha Lambda Delta National Honor Society, and she served on the Student Committee for Management MIS Professor search and selection process.

Cunningham plans to work in the field of sales and marketing following her graduation. She would also like to go on to eventually earn her MBA.

Cunningham was very pleased to be selected as a hostess. "It's amazing to know that your peers respect the hard work and time you put into your activities and into the Bucknell community," she said.

Ted Burnes
Major: Psychology and Spanish

Burnes has spent his four years at the University "motivating people to celebrate diversity and not just tolerate it." As an active member of FLAG&B, Cap&Dagger and various dramatic productions on campus, Burnes loves to express his energetic and outgoing personality in various activities. Burnes also finds time to work at the 7th Street Cafe and serve as a Resident Assistant for the Residential Colleges in Smith. Burnes hopes to make an impact on the community by combating stereotypes and educating people about diversity on campus.

After his May 2000 graduation, Burnes plans to enroll in doctoral programs in Counseling Psychology. He hopes to attend Columbia Teacher's College for Multicultural counseling.

RI College grad to show DUI video Tuesday

Mark Sterner and four of his Tau Kappa Epsilon fraternity brothers spent spring break in Florida, but only two of the five returned alive.

With their video camera running, an intoxicated Sterner took the wheel on the last night of the break. A fatal accident ensued, killing three of Sterner's friends.

Sterner will present his tragic story to the University community on Tuesday, Oct. 19 in the Weis Center at 7 p.m. He will show the powerful video that captures the most terrible night of his life.

Sterner's program, entitled "DUI: A Powerful Lesson", is being sponsored by the Interfraternity and Panhellenic Councils as well as the Deans of Students office.

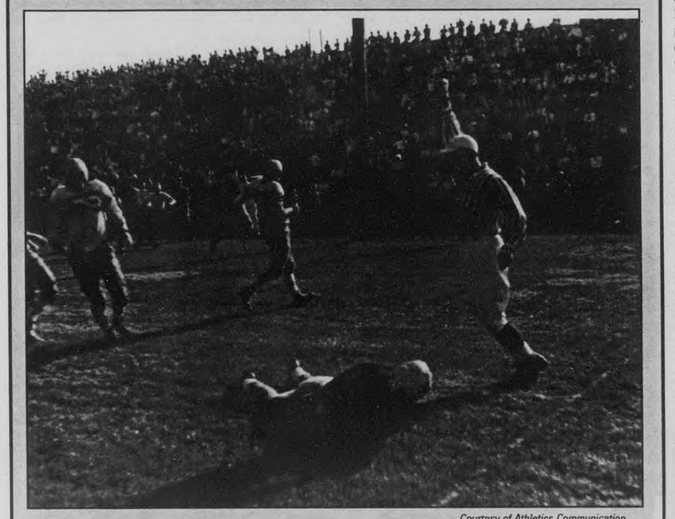
Remember When...



Courtesy of Athletics Communication

The 1949 Bucknell football team is being honored this weekend on its 50th anniversary. The squad finished the year 6-2, with its two losses each coming by a single point. The '49 Bison never received the recognition of the undefeated '51 Bison team, but they marked the re-emergence of Bucknell football after World War II and planted the seeds for future accomplishment. More than 20 members of the '49 team will be on campus this weekend, and they will be honored at a reception and dinner in the Terrace Room on Friday night and a halftime ceremony during the Homecoming game.

DUKES from page 1

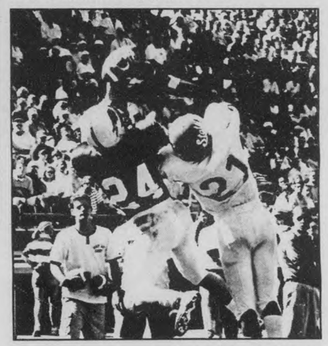
currently ranked sixth in career attempts, completions, yardage and total offense on the Bucknell record charts. Jabulani Powell '02 has rejuvenated the Bison rushing attack with two consecutive 100-yard games since he was moved to the position from wide receiver against Penn.

But the Bison must overcome the Dukes' strong defense, which ranks fifth in I-AA, allowing just 227 total yards a game. Last week, Duquesne only allowed a late field goal in a 10-3 win over St. John's.

Bucknell rolled 38-10 last year in its season opener against Duquesne. The Bison scored 24 points off of Duquesne turnovers and held a 41:51 to 18:09 advantage in time of possession in their dominating victory.

Head coach Tom Gadd recognized that his team has beaten two of the highly-acclaimed teams it lost to in '98, Colgate and Penn, while losing to two teams it defeated last season, Towson and Columbia. He emphasized that his team needs to be well-prepared to play Duquense, who will be seeking revenge after last year's drubbing.

"We don't play real well in games where we don't feel we have something to prove," Gadd said. "It's a big game for (Duquesne); our kids need to make it a big game for us."



Courtney Yohe—*The Bucknellian*

Bucknell looks for its third win over in as many seasons over Duquesne when it hosts the Dukes on Homecoming Saturday.

"Midnight Madness" returns

The University Athletic Department, office of Campus Activities and Programs and T.O.K.E.N.S. are sponsoring the University's second "Midnight Madness" event tonight at Davis Gym. The event will serve to kick off the men's and women's basketball season (Midnight on Friday is the first official time that basketball teams are permitted to practice according to NCAA rules) and also offers students the opportunity to win prizes and compete in various skill events.

Preliminary events, including a 3-on-3 basketball tournament and a wiffleball homerun derby, as well as raffles, will determine the winners of dozens of prizes. Prizes associated with "Midnight-Madness" include an all-expense-paid trip to Cancun, a round-trip airline ticket to anywhere in the U.S., tickets to the Late Show with David Letterman, and credits from Dining Services and the University Bookstore. $10,000 in cash is also available to an eligible person who makes a three-quarter-court basketball shot.

'99 Bison see ups and downs

Marcy MacMilan-The Bucknellian

Jim Horan '03 and the Bison opened their '99 season in impressive form with a 37-10 rout of Morgan State.

By Carmen Mauriello

When both its offense and defense are clicking, the 1999 Bucknell football team is an imposing force. But in most games this season, the Bison have been led by a strong defensive or offensive performance; rarely have both units played well as a team.

The experienced and talented squad has recorded four victories in its first six games of '99, with a defensive breakdown against Towson and a defensive struggle against Columbia accounting for the only losses.

The Bison opened their 1999 campaign at home against the Morgan State Bears. The Bison dominated the contest from the start behind strong special teams' play and an efficient offensive performance. Bobby Young '02 blocked an MSU punt to give the offense excellent field position, and the Bison capitalized in taking a 7-0 advantage on junior Jason Marrow's one-yard scoring plunge.

A 42-yard touchdown run by LaMario Bradwell '01, an 11-yard scoring toss from Don McDowell '00 to sophomore fullback Mark Wyland and a 33-yard Joe Lourdeaux '02 field goal gave the Bison a convincing 24-3 lead at the half. The Bison cruised in the second half behind a strong defensive performance to secure a 37-10 win in their opening game.

The Bison running game tallied 160 yards and three touchdowns, powered by a strong performance from the young offensive line, a preseason "concern position."

"We've got so many guys at so many different positions that can hurt you," Bradwell said, "that it's even that much better when the offensive line is able to do that much damage."

Bucknell knew its next test wouldn't be quite so easy as it traveled to Hamilton, NY to challenge Patriot League enhouse Colgate. But the Bison weren't intimidated, as they secured a 12-3 halftime advantage behind a McDowell scoring run and his 11-yard touchdown pass to Dan Palko '00.

The Bucknell defense dominated, keeping Colgate and All-League quarterback Ryan Vena out of the endzone until the game's closing minutes. The Bison extended their lead to 21-3 with junior Shawn Redd's safety with just 9:44 remaining in the game. Vena gave the Bison a scare, engineering two long touchdown drives in the game's final four minutes, but a Bucknell onside kick recovery ended the threat and gave the Bison a 21-16 upset victory.

"Hopefully (the win over Colgate) was a beginning to some of the goals we set—certainly not an end," Gadd said after the game.

The Bison aimed to avoid a letdown when 2-0 Towson came to town on September 18, but the Tigers and quarterback Joe Lee had other plans. Lee shredded the Bison secondary for 407 yards, including three pass plays of over 50 yards, to pace Towson for a 27-20 win.

Evans Mitchell-The Bucknellian

LaMario Bradwell '01 rushed for a game-high 94 yards against MSU.

Despite two costly turnovers and poor special teams' play, the Bison still had a chance to win after a McDowell touchdown pass and two-point conversion run tied the game at 20-20 late in the fourth. But the Bison were again victimized by the big play, as Lee hit Jamal White on a 52-yard bomb that led to the game-winning score.

"Towson was as ready to play us as we were to play Colgate," Gadd said following the loss. "The sad part is that I don't think we played at as high of an emotional level as Towson. Football comes down to wanting to play; the team who plays harder wins."

The disappointed Bison next hosted the Delaware State Hornets, whose victory in their previous contest had been their first in 20 games. Bucknell set the pace early with a long scoring drive in the latter stages of the first quarter, capped by a 15-yard McDowell touchdown run.

But the Hornets showed their resiliency, quickly answering Bucknell's score with a 79-yard touchdown strike from Rashaan Matthews to Darnerian McCants. Delaware State then successfully attempted an onside kick. On the ensuing play, Matthews again victimized the Bison secondary for a 47-yard scoring strike that silenced the Bucknell crowd and gave the Hornets a 14-6 lead.

Football season-to-date recap

Against Towson and Delaware State, the porous Bison secondary was exploited for 758 passing yards and six pass plays of over 45 yards, all of which led to touchdowns for their opponents.

The Bison responded to the Bears' scores with an offensive explosion of their own. Bucknell scored 25 consecutive points behind the solid play of McDowell, who both ran and passed for a score during the streak.

The Hornets fought back with two quick touchdowns

Tim Choate—The Bucknellian

Don McDowell '00 looks for a receiver against Towson. The Tigers battered the Bison secondary in a 27-20 upset victory.

to close the gap to 31-28, but a 50-yard kickoff return by Jabulani Powell '02 jumpstarted the Bison for a touchdown drive that sealed a 38-28 victory.

After the game, All-Patriot League linebacker Shawn Redd '01 recognized the need for improvement in the team's defensive fundamentals.

"Last week (Towson) passed for 407 yards, and we knew that we had to get better coverage from the linebackers and the secondary," Redd said. "This week I think we did do some good things in coverage, but we just didn't play the ball."

The 3-1 Bison next set out on a two game road trip, challenging Ivy League competitor Penn at Philadelphia, where Bucknell hadn't won at since 1967.

Down 7-3 late in the second quarter, Bucknell's Eric Higgins '01 intercepted a Penn pass and returned it to the Quakers' four-yard line. McDowell called his own number for a two-yard score that put the Bison up 10-7 going into the half.

Defense dominated the third period, as both teams combined for just 50 yards, but Bobby Young '02 blocked a Penn punt to ignite the Bison offense in the fourth. McDowell hit Jim Horan '03 for a six-yard scoring strike and then scampered for another touchdown run later in the period to give the Bison a 23-7 lead.

The outstanding performance of the Bison defense was nearly marred by a late breakdown. Penn quarterback Gavin Matthews hurled a 49-yard scoring strike and the Quakers added a field goal to cut Bucknell's lead to 23-16. Freshman linebacker Juan Morales ended the threat by forcing Matthews to fumble on Penn's final scoring opportunity, giving the Bison an important 23-16

McDowell '00 leading by example

Three-year starter at quarterback excels in the classroom and in leading Bison offense

By Sean Houston

In his four years at Bucknell, senior quarterback Don McDowell has achieved both as an athlete and as a student. Why? Because he has excelled at being a leader.

Coaches and teammates agree that his greatest contribution and signature characteristic is his demonstrated leadership. This leadership has manifested itself in his performance on the field, the Bison's success, and his success off the field.

Talent by itself is never enough to achieve success as an athlete. While Bucknell quarterbacks' coach Greg Willig described McDowell as being both "athletic and smart," he also stressed that Don is "always eager to learn, easy to work with and willing to make sacrifices."

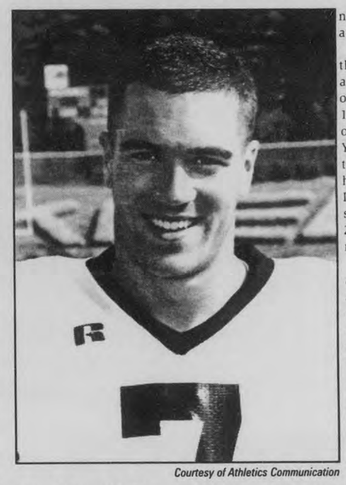
One such sacrifice was Don's willingness to forgo playing baseball for the Bison last spring—and serving as a battery-mate with his brother Kevin—in order to focus on football.

This winning attitude has helped Don to steadily improve his performance. His current pass-efficiency rating of 104.7 is fourth in the conference, and he currently ranks sixth all-time among Bison players with 3885 yards of total offense.

McDowell's versatility as both a rusher and passer allows the Bison offense to successfully execute a greater number of plays. The Bison are running the option more frequently and with greater effectiveness this year than in seasons past.

"Don has always been a good rusher," Willig said. "This season he has improved markedly in his throwing and in keeping turnovers down to a minimum."

One hallmark of all good leaders is their ability to lead by example. McDowell has displayed his excellent work ethic in practice and in keeping in shape during the off-season.



Courtesy of Athletics Communication

Don McDowell '00 has served for three years as the starting quarterback for the Bison. He ranks sixth in school history in career attempts, completions, yardage, and total offense.

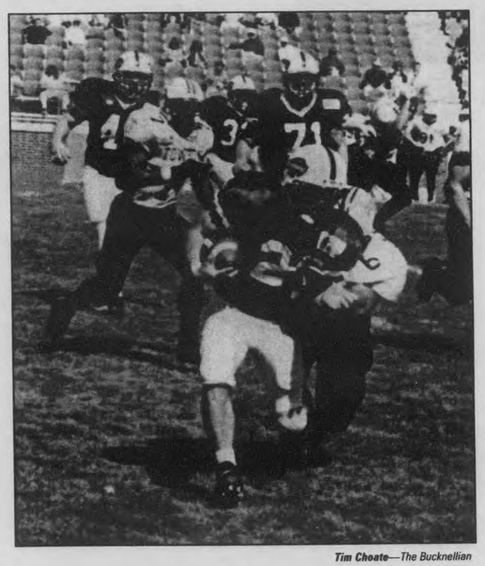
He listens to the coaches and works very well with them, which is essential since the quarterback is responsible for leading and coordinating the offense on the field. McDowell's winning attitude and hard work have earned the respect of his teammates, and it has helped toward a winning record thus far for the Bison and a chance at a conference championship.

What legacy will McDowell leave behind after this season is over? Perhaps his most memorable achievement was realized during the second week of the '99 season, when he led the Bison to a 21-16 victory on the road against archrival Colgate, outdueling former Patriot League Player of the Year Ryan Vena. This victory ended a string of two consecutive losses to the conference powerhouse, whom many picked to win the Patriot League championship at the beginning of the season. During that game, McDowell was 17-28 for 211 yards, threw two touchdown passes and rushed for another score.

As impressive as his achievements are as an athlete, McDowell is also committed to excelling as a student. He is a Dean's List student in Business Administration. When asked how he balances athletics and academics, McDowell admitted that, "it's not easy. You just have to work hard and not expect very much free time during the season."

McDowell feels that quarterbacking has helped prepare him for life after football. "Being in stressful situations and the time commitment are akin to what I'll have to face in the real world," McDowell said. "It's possible that being an athlete can help some people with their academic life, because one is forced to learn time-management and other essential skills that they might not otherwise pick up."

A Patriot League title would be a fitting way for McDowell to finish his career. Whether that happens or not, he will leave behind many great memories and will rank among the all-time Bison leaders in many offensive categories after only three full seasons as a starter. McDowell has helped carry on Bucknell's tradition of excellence in student-athletes, and he will serve as an inspiration for those who follow.



Tim Choate—The Bucknellian

Bucknell senior running back and kick returner Dan Palko is approaching the career milestones of 1,000 rushing yards and 2,000 all-purpose yards.

FOOTBALL

from page 8

win.

Gadd recognized that late defensive breakdowns have been a re-occurring problem for the Bison throughout the '99 season. "In those situations at the end, we need someone to step up and make a big play," Gadd said.

Powell was a bright spot for the Bison, moving from wide receiver to running back after Palko and Bradwell sustained first quarter injuries and rushing for a season-high 102 yards.

The Bison looked for a sweep of their Ivy League foes when they challenged Columbia last Saturday.

The game looked to be a shootout early, after Bucknell marched 72 yards for a touchdown on its opening possession and Columbia drove for a score on its ensuing possession to tie the game at 7-7. McDowell's 22-yard strike to Horan and 31-yard completion to Corey Hurley '00 fueled the Bison drive, and Marrow ran it in from the one for his sixth touchdown of the year.

The Bison had another scoring chance later in the half, but a dropped pass stopped the drive, and a 41-yard field-goal attempt sailed wide right, wasting the opportunity and ending Bucknell's chances.

Powell, who rushed for a career-high 128 yards on 23 carries, marched the Bucknell offense down the field on its next possession. But the Bison drive stalled at the Cougar 20, and Chris Lundberg '03 missed a 37-yard field goal attempt to keep the score tied at 7-7 going into the half.

The Bison offense again threatened on its first possession of the second half, but failed to reach the endzone after a key incompletion. Bucknell was again hounded by its sub-par kicking game, as Lundberg's 23-yard attempt hit the left upright and bounced back.

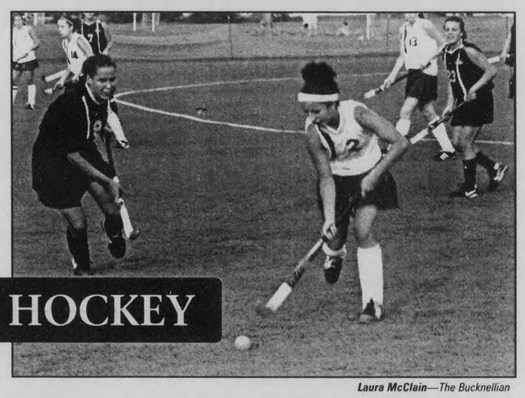
Bucknell's defense became very stingy after Columbia's early score, keeping the Cougars off the board until Neal Kravitz booted a 46-yard field goal with 4:10 remaining in the contest.

But that score proved to be the game-winner, when McDowell was intercepted on the Cougars' goaline in the game's closing minutes to give Columbia a 10-7 victory.

The Bison now stand at 4-2 with five games remaining, including Patriot League clashes against Lafayette, Holy Cross and nationally ranked Lehigh.

Powell identified that in order for the Bison to fulfill their goal of a Patriot League title, they must, "win the rest of (their) games. We'll have to go through Lehigh to do that."

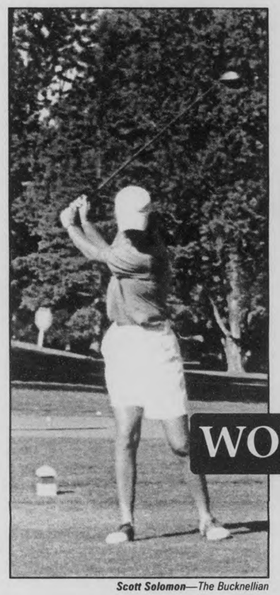
Sports



Laura McClain—The Bucknellian

FIELD HOCKEY

With two one-goal victories over Lock Haven and Southwest Missouri State, the Bucknell field hockey team moved its overall record to 8-3 (3-1 in the Patriot League. After playing at St. Louis last Monday and hosting Siena last Thursday, the Bison will stay busy with a road game at Penn this Sunday. An important Patriot League match at Holy Cross follows next Saturday, October 23.



Scott Solomon—The Bucknellian

WOMEN'S GOLF

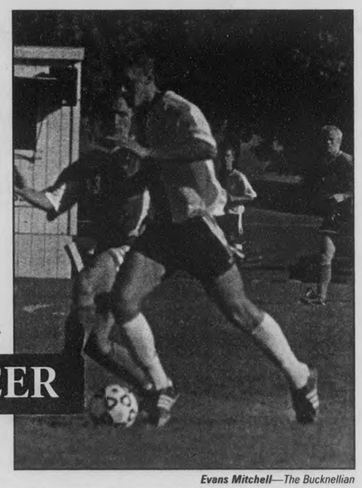
The Bucknell women's golf team continued its marked improvement from its inaugural '98 season, finishing fourth out of 13 teams at last weekend's Rutgers' Invitational. The Bison will next be in action when they host the ECAC Open next Saturday and Sunday, October23-24.

Homecoming

Tim Choate—The Bucknellian

VOLLEYBALL

The Bucknell volleyball team defeated Holy Cross 3-2 last Friday in an important Patriot League match, moving its overall record to 8-6. After traveling to Lehigh last Wednesday, the Bison will have some time to rest before challenging Holy Cross next Saturday, October 23.



Evans Mitchell—The Bucknellian

MEN'S SOCCER

The men's soccer team went on a tough two-game stretch on the road last week, tying Philadelphia University 1-1 and falling to Bowling Green 5-1. The Bison stand at 8-3-1 overall and 2-1 in the Patriot League. They will return home this Saturday to host FDU at 4:00 p.m. at the Davis Gym Fields.

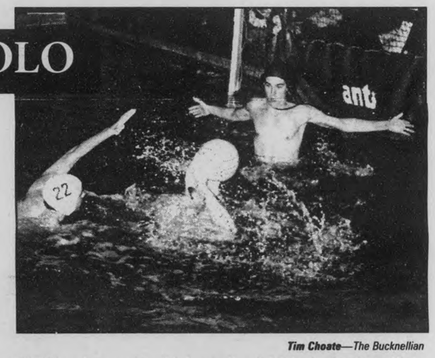
Sports

Serenity Edwards—The Bucknellian

WOMEN'S SOCCER

The women's soccer team defeated Howard 5-2 on Wednesday, October 8, but it suffered two one-goal losses during last weekend's west coast trip to drop its record to 4-8-1 (1-2 in the Patriot League). The Bison will host Patriot League foe Army this Friday at 7:00 p.m. on the Davis Gym Field.

MEN'S WATER POLO



Tim Choate—The Bucknellian

The Bison improved to 14-6 overall and 6-2 in the Southern Division with three wins at last weekend's Southern Division League Games at Salem-Teikyo. They will travel to Claremont, CA this Friday through Sunday to compete at the Claremont Convergence.

1999 Fall Sports Calendar

Bucknellian File Photos

The Bucknell men's and women's cross country teams are both on excellent pace to defend their '98 Patriot League titles, posting 7-0 and 6-0 records respectively. They travel to Bloomington, Indiana this Saturday for the Pre-NCAA Meet.

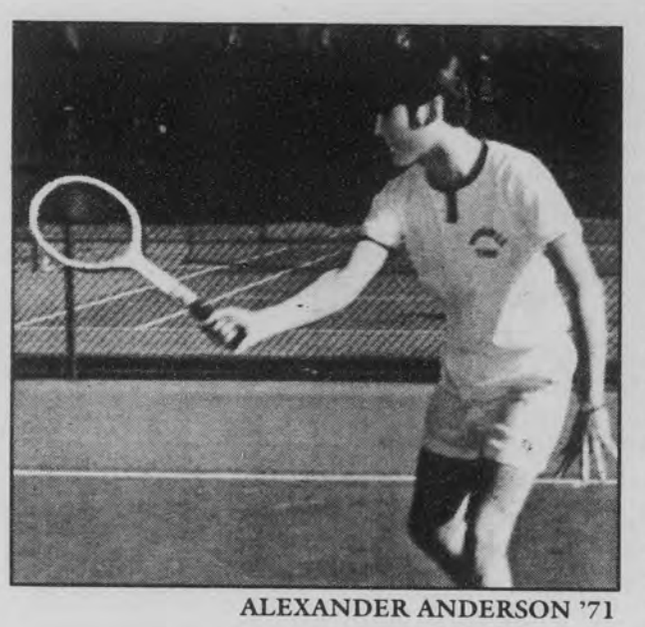
Athletic Hall of Fame inductees announced

Eight athletes to be honored at halftime ceremony during Homecoming football game

By Justin White

There are eight inductees entering the Bucknell Athletic Hall of Fame this Saturday during a halftime ceremony of the Bucknell versus Duquesne football game. This honor is bestowed annually at the homecoming football game to deserving athletes, coaches and others who have served the Bucknell sports program in an outstanding fashion.

This year's inductees include runner Glenn McLaughlin '74, basketball player Jennifer Walz Lapioli '89, lacrosse player Jim McKee '69, sprinter Susan Rowland Miller '89, soccer player Dave Dohmson '89, swimmer Jim Harvey '88, tennis player Alexander Anderson '71 and field hockey and softball player Dianne Czarnecki '87.



ALEXANDER ANDERSON '71

Glenn McLaughlin '74 was a consistent standout in cross country, indoor and outdoor track and field. He was an integral part of the three teams for four years. In indoor track and field, he finished 12th in the 600-yard dash and 11th in the distance medley at the NCAA championships in 1973.

As a senior, he finished third in the 440 two years straight at the MAC championships. In 1974 he earned All-East recognition, placing fifth in the same event at the IC4A meet.

McLaughlin placed 18th, ninth, tenth and fourth in his four IC4A cross country championships. Then he proceeded to cap off his cross country career by finishing 14th in the United States Track and Field Federation cross country championships.

SUSAN ROWLAND-MILLER '89

Basketball player Jennifer Walz Lapioli '89 was the first player in Bucknell history to score more than 2,000 points in a career. She is also the only Bucknell athlete to be selected to the Academic All-American First Team three consecutive years.

Walz was chosen as the East Conference Player-of-the-Year in 1988-89, along with her three selections to the all-conference team. She still holds the school records for most points scored in a career and career average. She set the ECC career scoring record during her tenure at Bucknell.

Jim McKee '69 was one of the founding members of the varsity Bucknell lacrosse team, joining teammate Ed Farver in the Hall of Fame. He led the team in scoring his junior year, being honored as a second team College Division All-American and an All-Mid-Atlantic Conference First Team selection.

In his two-year career, McKee scored 49 goals, a record when he graduated. More importantly, head coach Sid Jamieson said that McKee was always an unselfish, team-oriented player who could control a game when the team needed him to.

Susan Rowland Miller '89 wasted no time starting her track career, placing second, third and fourth in the 55-meter dash, 1600-meter relay and 300-meter dash respectively at the East Coast Conference indoor championships as a freshman.

Her complete resume includes 14 first place and seven second place finishes in individual and relay events at the East Coast Conference championship meets. She culminated her indoor career by earning Outstanding Performer of the Meet honors at the ECC championships with first place finishes in the 200, 400, and 1600 relays, along with a second place showing in the 55-meter dash.

Dave Dohmson '89 is one of the most accomplished soccer players ever to have worn a Bison uniform. He led the team in scoring in each of his four years and set school records for career goals, assists and points. He earned regional All-American first team honors in 1987 and 1988 and was the ECC Player-of-the-Year as a senior He also scored the game-winning goal in more than 55% of Bucknell's games during his career.

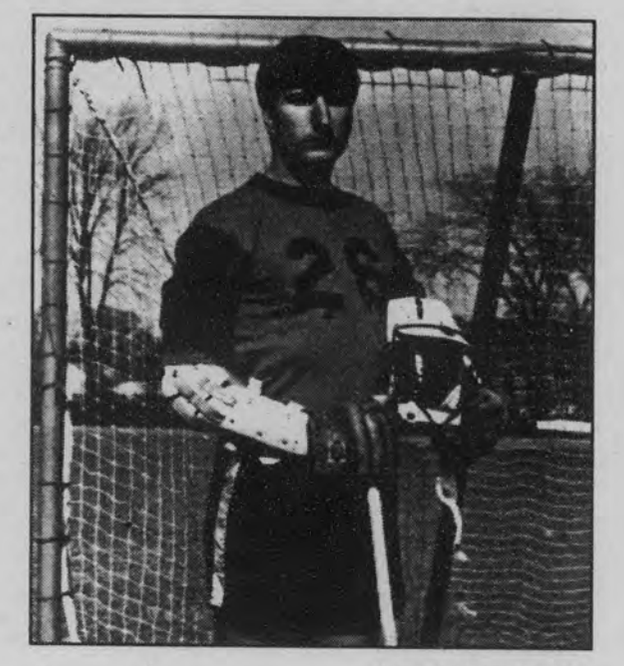
Jim Harvey '88 graduated as the owner of eight individual school records for the Bison. More than a decade later, all eight of his performances remain on the board at the Freas-Rooke Pool.

Harvey won ECC championship titles in seven different events, twice qualifying for the NCAA Championships. He won 11-0f-12 individual races while swimming as a member of eight winning Bucknell relay teams in ECC championships, and he was named Outstanding Swimmer of the Meet in each of his four years.

Harvey also competed on the Bucknell water polo team in 1987 and 1988 when he won the Christy Mathewson Award for the Outstanding Senior Athlete. He also became assistant water polo coach in 1989-90, taking on head coaching responsibilities in 1991.

Alexander Anderson '71 was a big part of one of the most successful three-year stretches enjoyed by any team in any sport at Bucknell. He won three Mid-Atlantic Conference titles as a member of the Bucknell tennis team and compiled a 38-2 career singles record, losing

GLENN MCLAUGHLIN '74



JIM MCKEE '69

only once in his sophomore and senior years.

Anderson also excelled in doubles where he teamed up with fellow hall of famer Steve Baird for two seasons. The doubles team went 23-1 and won two MAC championships.

Anderson went on to win numerous tournaments in the New York metropolitan area and the east—including a victory over John McEnroe in a tournament at the Port Washington Tennis Academy.

Dianne Czarnecki '87 was an all-conference selection in both field hockey and softball. She was a two-time All-ECC selection as a member of the softball team. Czarnecki recorded a then-school record 214 assists from the hot corner.

In field hockey, Czarnecki became the first Bison to receive All-ECC honors three straight years and was named to the regional All-America second team.

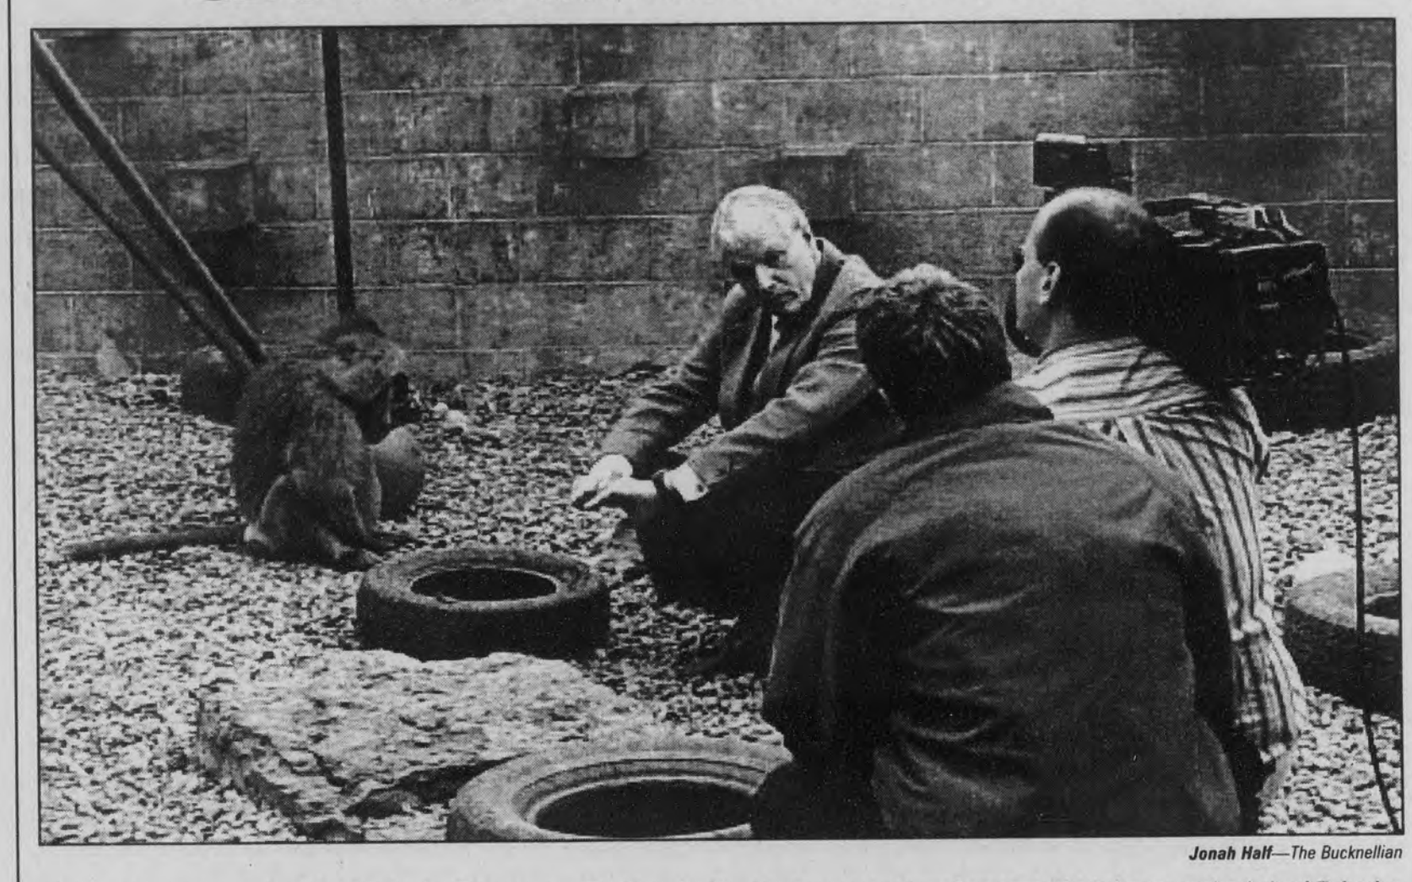
CBS visits animal behavior lab



Jonah Half—The Bucknellian

Head of the University's Animal Behavior Department, Dr. Douglas Candland was interviewed amongst the baboons at the Animal Behavior facilities on Wed. Oct. 20 by a CBS crew interested in his outlook on the findings of a feral child in Uganda, Africa. CBS will air Candland's account on the six o'clock CBS news on Thurs. Oct. 21. See next week's issue for a feature on the interview.

Sterner shares tragic DUI story

By Anne Monoky

The speech was short. The story was painful. The message was clear.

On Tuesday evening in the Weis Center, Mark Sterner, a member of the Tau Kappa Epsilon fraternity, gave a presentation entitled, "DUI: A Powerful Lesson." Sterner gave a detailed account of the fatal drunk driving accident on March 3, 1994 that resulted in the deaths of his three best friends.

As the driver, Sterner was charged with three accounts of DUI manslaughter.

On their last night of Spring Break of their senior year of college, Sterner and his four friends decided to go out and "get out of hand" on Sanibel Island, Florida. Sterner gave a short overview of the situation and then showed the videotape that documented their last night. "We made the tape so in 10 years, we'd laugh at ourselves having so much fun together." This was not the case.

The video began as each of the boys was introduced. They all commented on how crazy their last night together would be. The video then showed the boys taking shots of hard alcohol and passing the bottle around from one person to the next.

In the next segment, the boys were shown inside the full size Lincoln Town Car driving recklessly, at speeds up to 100 miles per hour in a 35 mile per hour zone. The next scene showed them crazily dancing in a bar while consuming more alcohol. The final scene showed the boys telling how they were going to another bar.

But they never made it to their next destination.

The last scenes of the video showed images of the demolished car. The silence in the room was interrupted by Sterner's voice, "You don't die when you are twenty-one. You don't die when you are having fun," he said.

Sterner explained that he had awoken in a hospital room with

Goodall expresses prospects for hope

Chimpanzee authority speaks of ape emotion, conservation and human influence

By Katherine Nowak

The chimpanzee distance call, used to maintain contact, rang throughout the Weis Center as Jane Goodall, renowned naturalist and educator, made her appearance at the University on Friday, Oct. 15. Goodall begins, resilient and determined, personalizing her journey into chimpanzee life and emotion and explaining the reasons for hope behind her conservation efforts.

Fifty years ago, an opportunity which in those times was absurd, was given to Goodall by anthropologist Louis Leakey—to research Gombe's chimpanzees. Goodall shared three remarkable stories—of a mother rescuing her infant from a lurking serpent, of an ancient mother risking injury to intercede a battle between her son and a dominant male, and of a young orphan adopted by an older male.

These supportive, affectionate family bonds are reflective of human kinship. Within the chimpanzee society, traditions are passed and signs of culture are evident. Non-verbal communication in chimps—kissing, embracing, patting each other on the back—demonstrate their emotional capabilites. In terms of culture, chimps challenge our uniqueness. "Their proto-culture and intellectual abilities are evident in their competence to plan for the future, make use of memories, understand the moods of others and act accordingly to use abstract symbols,"said Goodall. Her incredible story of the chimpanzee, Flint who had an abnormally close relationship with his

Robert Costos, senior vice president of Investment at Merrill-Lynch & Co., presented "The Future of Your Money" Tuesday night.

Merrill-Lynch vice president Costos '67 gives financial insight

By Hillary Cuccia

Considering the strong interest in the stock market among a large and growing number of Americans, and the enthusiasm about the potential to be rewarded by such investing activities, it was not surprising that Robert Costos' presentation, "The Future of Your Money," drew a large crowd on Tuesday night in the LC Forum.

Sharing his views on current stock market conditions, as well as discussing past occurrences, Costos provided insight into the financial world and offered the audience both financial and personal suggestions based on his experiences. In discussing topics such as stock evaluation, stock prices, earnings, Internet stocks, online day trading and the future of full service brokers, audience members were able to listen to the opinions of an experienced and successful industry insider.

Scientist Dawkins promotes Darwinian vigor

By Katherine Nowak

Acclaimed scientist, author of *The Selfish Gene*, *The Blind Watchmaker* and most recently *Unweaving the Rainbow* , Oxford University professor Richard Dawkins powerfully advocated his support of the Evolutionary theory in his lecture at the Weis Center for Performing Arts on Monday, Oct. 18.

"If creatures visited from another planet—such as martians, what would we share?" he asked. "Would it be Shakespeare or politics? Freud or Marx? There is no reason to suppose interest on the part of these martians in matters such as this. Perhaps in mathematics and physics our guests may find levels of sophistication. But what about Darwin? Would our guests revere him?"

"There is only one workable theory to account for—the Darwinian theory of Natural Selection. The martian answer would have to equal that of the human answer- that all of life can be explained by Darwin's theory."

Proponents of evolution include Theodore Dobzhansky, who said "Nothing makes sense in science but the tenet of evolution." and Daniel C. Dennet who called Darwin's idea "the best idea." The elegant economy of Darwinism lies in its ratio: that which the theory explains divided by that which the theory needs to postulate. What the theory explains is all complexity, adaptedness and diversity of life which are then divisible by heredity. "Once you have heredity, you have self-producing entities, multiplication by numbers, and variety, leading to competition and therefore survival of the best genes, " said Dawkins.

The beauty of the theory lies in its simplicity. All that needs to be "assumed" is heredity.

Creationist arguments cast against the theory include that of adaptive complexity— living things are far too improbable to have come about through chance. Dawkin's display of thornbugs, whose anti-predator defense is in their thorn-like appearance and a lantern fly with its false head, whose front and back side is so difficult to differentiate that it can fool its predators, indicated the systematic and orderly workings of evolution. "Natural selection has shaped these effects."

To explain the evolution of animal adaptive defenses through intelligent design is sta-

Public Safety Log

October 14, 1999

SMALL FIRE–Public Safety responded to Vedder Hall for the report of a small fire due to an electrical problem with a hair dryer. The fire was extinguished and there were no injuries.

UNAUTHORIZED PERSON ON CAMPUS–Public Safety responded to Sigma Alpha Epsilon Fraternity for the report of an unauthorized visitor who had been frequenting the house. Lewisburg Police was notified.

NON-EMERGENCY MEDICAL TRANSPORT–An ill student contacted Public Safety and requested transportation to Evangelical Community Hospital Emergency room for treatment. The individual later returned to campus.

October 15, 1999

INFORMATION/SUSPICIOUS INCIDENT–A student reported to Public Safety that an unknown white, male adult with binoculars was observed on a bench off Loomis Street. The individual could not be located in a search of the area. Lewisburg Police was notified.

THEFT–Public Safety responded to Davis Gym for the report of items removed from a locker without authorization. The incident is under investigation.

MEDICAL TRANSPORT–A student contacted Public Safety to request Student Health Services transportation to Evangelical Hospital Emergency Room for treatment of a toe injury. The student later returned to campus.

VEHICLE DAMAGE–The Public Safety vehicle received minor damage while parked at Davis Gym. No witnesses or suspects could be identified.

October 16, 1999

BU PROPERTY DAMAGE–Public Safety responded to Coleman Hall for the report of a broken window. No witnesses or suspects could be identified.

UNDERAGE CONSUMPTION–While on routine patrol, Public Safety observed an intoxicated student exiting Chi Phi Fraternity. The student received university citations for underage consumption and open container.

VEHICLE DAMAGE–Public Safety responded to Dana Lot for the report of damage to a vehicle. East Buffalo Township Police was notified. The incident is under investigation.

UNDERAGE DRINKING/FRATERNITY VIOLATION– While on a routine fraternity check, Public Safety located an unauthorized party at the Theta Chi Fraternity House and an underaged student consuming alcohol. One student and the fraternity were issued university citations.

October 17, 1999

UNDERAGE CONSUMPTION/FRATERNITY VIOLATIONS– While on a routine party check at Sigma Phi Epsilon Fraternity, Public Safety observed an individual signaling students that an officer was present in the building. The party was ended and university charges were issued to the fraternity. Also, one student was issued a university citation for underage consumption of alcohol.

UNDERAGE CONSUMPTION–During a routine party check at Phi Kappa Psi Fraternity, Public Safety observed and intoxicated student who was issued a university citation for underage consumption of alcohol.

UNDERAGE CONSUMPTION/DISORDERLY CONDUCT–Public Safety responded to Vedder Hall for the report of an intoxicated student. The individual fled the area but was located outside the building. University citations for disorderly conduct and underage consumption of alcohol were issued.

TAMPERING WITH FIRE EQUIPMENT/UNDERAGE CONSUMPTION–Public Safety responded to the exterior of Swartz Hall for the report of a suspect discharging a fire extinguisher in Dana Engineering. East Buffalo Township Police responded and cited the visitor for underage consumption of alcohol. The charge of tampering with fire equipment is pending.

TAMPERING WITH FIRE EQUIPMENT–Public Safety responded to Roberts Hall for the report of a fire alarm activation caused by a discharged fire extinguisher. No witnesses or suspects could be located in a search of the area. The incident is under investigation.

HIT AND RUN VEHICLE ACCIDENT–While on routine patrol, Public Safety observed a student who was the victim of a hit and run accident on St. George St. The vehicle sustained some damage but there were no personal injuries. Lewisburg Police responded and the incident is under investigation.

INFORMATION–A University student notified Public Safety of a suspicious male who spoke with her at the Washtub laundry facility on 7th St. Lewisburg Police and Public Safety spoke with the student at her off campus residence and documented the incident.

October 18, 1999

INFORMATION–Public Safety responded to the Langone Center for the report of unpaid merchandise that was consumed by a student while on the premises. The individual was gone upon the arrival of the officer. The incident is being investigated.

Clothesline project exposes domestic abuse

By Rachel Laskow

Jonah Hall—The Bucknellian

Representing the national and worldwide effort to raise awareness for violence against women, the Clothesline Project has been put on display in the Langone Center.

Currently on display in the downhill stairwell of the Langone Center are t-shirts strung together demonstrating the reality of domestic violence. This effort is part of a national and worldwide effort to raise awareness for violence against women.

The Clothesline Project began in the fall of 1990 in Hyannis, Mass. Four years later, it was brought to the University for the first time.

Parts of the University's Clothesline Project have been on display at the Susquehanna Valley Mall, Lycoming College and Susquehanna University. They were also on display in Washington, D.C., in 1995 where they hung with 6,000 other shirts from around the country.

"[The project] helps to expose issues of domestic violence, not only through marriage but also through dating on campus," Krystal Buhr '01 said

"To see the pain that people have gone through is really powerful," Courtney Spohn '03 said, student intern at the Women's Resource Center.

Since the first year that the project took place at the University, 83 shirts have been decorated, including the six that have been decorated so far this year. A different color shirt is used depending on what type of violence the shirt is commemorating: white for women who have died of violence, yellow or beige for women who have been battered or assaulted, red, pink, or orange for women who have been raped or sexually assaulted, blue or green for women survivors of incest or child abuse, and purple or lavender for women attacked because of their sexual orientation.

Spohn said, "It's important for students to be aware of violence against women because it is an issue that affects everyone. As students we are family, friends, and even survivors of violence. It is important to acknowledge and understand what survivors go through in order to be a better person."

Director of Women's Resource Center, Janice Butler, said "The Clothesline Project is important for the college population for a number of reasons. The visual display reminds us how prevalent violence against women is, and shows that it can take different forms. Young women can see that their situation is not an isolated one. The project also allows survivors to symbolically break the silence surrounding their experience, and this can be an important part of the healing process. Finally, the exhibit is a public demonstration of our commitment to ending violence; it is a way of declaring 'enough.'"

The shirts will be on display in the LC until the end of the October, which is Domestic Violence Awareness Month. After the shirts are taken down, they are kept on file for next year.

Another workshop will be held on Saturday from 2-4:30 p.m. in the Women's Resource Center Lounge, 200 Roberts Hall, for anyone who is interested in decorating a shirt. All supplies are provided free of charge.

Kumba Baryah '01 believes that once people see what the project is about, they will want to help out. "When you see the shirts, it hits close to home," Baryah said.

STERNER From page 1

tubes running into his arms, and his family standing staring at him in despair. Unsure of what had happened to him, Sterner was told that he was in a car accident and that his three best friends— Aaron, Pete and Jim— were dead.

Sterner also explained that the their trip to Sanibel Island was the first Spring Break that the boys had been able to take in their four years at Johnson and Wales University.

"We wanted to do it right," Sterner said.

So, for each of the nights, a designated driver was assigned to ensure that the boys arrived home safely. Yet, there were six nights and only five guys, so the final night was uncertain. They had decided to go out but would stay close to their condo. The least intoxicated person at the end of the night would drive. On that final night, Sterner was chosen.

The morning after he awoke in the hospital, Sterner received even more terrible news. He said that he remembered waking up and seeing police officers in the hospital room with his parents.

They read him his rights and told him that he was being charged with the murders of his three best friends.

"That was the first time that I had ever seen my father cry. I was supposed to be the first one in my family to graduate from college," Sterner said. "Now, I was the first person in my family ever to go to jail."

Sterner told how he spent the next two years of his life in prison. He had to wake up at 3 a.m. and do laundry every morning. He had to wear an orange uniform and live with people that would make you "cross the street if you saw them coming."

On Nov. 12, 1996, Sterner was released from prison and placed on twelve years of probation. The only other survivor of the accident moved away and will no longer speak to his best friend because he "just wants to forget the whole thing."

"Not a day goes by that I don't think about my friends," Sterner said.

Sterner then talked about how he constantly asks himself what life would be like today for his friends: Would they be married? Would they have kids? What would they be like? He has to deal with these questions every day of his life.

Sterner's message was clear: for him, sorry doesn't cut it. He said that he could be sorry for the rest of his life but he will never be able to look his friends' parents in the eyes again. As a part of his probation, he has to write a letter of apology to the parents of the victims.

He indicated that all he can do now is to share his story in hope that other people do not make the same mistake that he did. Sterner said that he does not want a night of fun to turn into the nightmare of your life.

He concluded the night with a stoic message, "think about your best friend, your boyfriend, your girlfriend and imagine if they died tonight," Sterner said.

"And that you were the only person in the world who could have stopped them from dying. I live with that everyday. I killed my friends."

This week in BUCKNELLIAN headline history

victory Starved Bucknell Bison and Lafayette Leopard Battle in Homecoming Tilt Saturday
October 20, 1932

A badly battered Lafayette Leopard and a sorely wounded Bucknell Bison will come to grips Saturday afternoon in a contest which will, beside offering the grid attraction for Bucknell's Homecoming Day, present both teams their last opportunity to make or break themselves. The kick-off will be at 2:30, and advance ticket sales indicate a crowd of 11,000 will see the game.

Infirmary is Jammed as Tough Scrimmage Lays Out Gridders
October 22, 1936

Five members of the frosh football squad, and three of the varsity are on the injured list, as a result of one of the toughest scrimmages this season.

Four were injured on one play, with Joe Bosze, varsity end, and Jim Tyson, frosh lineman, hurt the most seriously. Bosze received a broken nose and a deep cut over the right eye. Two of Tyson's ribs were broken, an x-ray revealed.

Borough Council moves in Weis controversy
October 19, 1973

Lewisburg Borough Council passes motion to move Weis Supermarket. The market would be moved from Market St. to the new shopping plaza on Route 15. Some worry that it will affect the University's non-driving students.

Gym Construction Causes Blackout
October 21, 1977

Candlelight dinners usually entail extra costs, but at Wednesday nightís meal in the University Center cafeteria it was standard fare. At about 4:10 pm, just 35 minutes before dinner was set to begin, the UC as well as Davis Gymnasium, Bucknell West and the traffic light on Route 15 lost all electricity.

An electrical circuit shorted out by construction at the new Sports Complex [Fieldhouse], apparently caused the power failure. Nevertheless, it was not identified as the problem for many hours, and power was only turned on sporadically after 6 pm.

Coping With Bucknell Rain
October 21, 1977

During their stay in Lewisburg, most students gradually come to the striking realization that Bucknell offers them something which few other universities offer them in such abundance of rain.

The fact that Bucknell has an annual rainfall approaching that of the Amazon Rain Forests should have been obvious to me from the start. Every time I came here for a visit, I felt as if I had been transported back to the time of the Great Flood.

Commercial filmed on campus
October 18, 1985

Bucknell's ideal campus and beautiful fall foliage made Bucknell the college of choice for a new Hundai commercial. The director chose Bucknell over a list of other colleges because it looked like a picturesque American learning institution. Twenty-five to thirty students were chosen as extras in the commercial.

Morale problems persist
October 26, 1990

A group of students handed out special pamphlets at the Princeton-Bucknell football game. The pamphlets suggested that the University is being unethical by imposing only some of Pennsylvania's state laws and manipulating them to oppress the students.

Compiled by Jim Leahy '03 and Maren Johnson '02

Sojka honored for distinguished service

By Peter Van Emburgh

Caitlin Deily—The Bucknellian

Sojka was honored by the Pennsylvania Association of Colleges and Universities for his many years of hard work in higher education.

Professor and former president of the University Gary A. Sojka recently received the prestigious Sheepskin Award for "Distinguished Service to Higher Education in Pennsylvania" by the Pennsylvania Association of Colleges and Universities (PACU). The award is given to an individual that has distinguished themselves as an educator, a member of an insitutional governing board, a philanthropist or as a government official. The Sheepskin Award has honored 31 prominent individuals since its inception in 1973 and is presented at the annual meeting for PACU institutional members.

Upon notification of receiving the award, Sojka was very surprised. "I actually thought it was a another tasteless joke," Sojka said. "I raise sheep, so I thought it was quite ironic to be awarded the Sheepskin Award."

"From a student's perspective, it is not surprising at all to learn that Professor Sojka was presented with such a distinguished award," Kerri Bishop '02 said.

Founded in 1896, the PACU includes 114 institutions in all sectors of Pennsylvania higher education, including community colleges, state universities and independent colleges and universities. The mission of PACU is to promote higher education in Pennsylvania and to establish a unity of spirit and understanding among the sectors. At the 102nd meeting held in Hershey, the award was presented to Sojka by James H. McCormick, member of the PACU Board of Directors.

McCormick recalled Sojka's many accomplishments while serving as the University's 13th president from 1984-1995. Under Sojka's leadership, the Endowment fund nearly tripled, enrollment targets were reached every year, nine buildings were constructed and the fundraising campaign far exceeded its original goal of $58 million. Upon completion of the fundraising campaign, more than $90 million was collected.

Referring to more recent accomplishments, McCormick noted that Sojka took the role of interim president of PACU from September 1997 through June 1998. According to Sojka, the state of PACU was deteriorating, and he stepped in to refocus the members of the association towards satisfying their mission. McCormick noted that Sojka led the restructuring of PACU's governance process and a thorough review of its vision, mission and goals. McCormick commended Sojka's skill in preparing the association for the future.

"It is always flattering for me to look at the past recipients of the award, that's quite a distinguished list."
—Gary Sojka, professor of biology

"I am very pleased to win this award," Sojka said. "It is always flattering for me to look at the past recipients of the award, that's quite a distinguished list." Sojka referred to past congressional members, heads of national and state educational organizations, and presidents of universities.

Sojka plans, over time, to continue to "wind down" some of his involvement in organizations and focus the majority of his time with his work at the University.

"I would like to spend time with the lab and my students and be perfectly happy," Sojka noted.

Alum addresses the future of investment

COSTOS From page 1

Costos, Senior Vice-President of Investment of Merrill-Lynch & Company, is a 1967 engineering graduate of the University. His love for finance developed while earning an MBA from the University of Delaware at night, while teaching nuclear reactor physics to naval officers by day. After five-and-a-half years as a Naval Officer, Costos joined Merrill-Lynch in the summer of 1972. There, he currently manages in excess of $500 million of corporate, institutional, and individual portfolios. *Town & Country* and registered representative magazines have listed Costos among the top ten brokers in the United States. He has also been profiled in *Money* magazine and was elected to *Research* magazine's Broker Hall of Fame in 1992.

Costos stressed the importance of investors understanding what they do with their money. He remarked, "I see a lot of gambling. I don't see a lot of investing." He proceeded to express his belief that making a profit from investing in stocks or mutual funds is very possible if people understand what they own and behave rationally. He also stressed the importance of global awareness and understanding, as he noted that large amounts of money are, and will continue to be, moving significantly around the globe.

In discussing personal finance, Costos covered both investments in mutual funds as well as individual stocks. While he acknowledged the benefits and rewards from mutual fund investing, Costos advised investors to take several precautions. He commented that "the game of managing money has become a marketing game." As a result, funds are very (sometimes excessively) concerned with making returns look impressive and producing eye-catching performance charts to attract investors. Such funds, Costos warned, may not be well-diversified and because of their focus on short-term performance, may fair poorly in the long-term. Costos advised, "You have to understand what they [the mutual funds] own."

Investment in individual stocks can be rewarding as well, but Costos once again stressed the importance of understanding your investments. Encouraging stock owners and potential stock owners to monitor their stocks consistently, Costos emphasized that doing so will put you "significantly ahead of the curve." Basing stock buying and selling decisions not on "fad" or the media, but rather on rational valuation measures such as price to earnings ratio, profit margin, return on equity, and return on assets has been part of Costos' strategy. He urged audience members to invest using these valuation measures as vital tools, and to concentrate on maintaining a well diversified portfolio.

Related to the "fad" buying and media hype on Wall Street, Costos touched on the subject of Internet trading, and the potential threat that it poses to brokerage firms like Merrill-Lynch. He said, "I do not fear Internet trading at all. Most people will lose a lot of money [through Internet trading] and learn a lesson. You need to understand what you are doing."

He feels that people will continue to enjoy the advantages of brokerage firms and that the financial services industry itself will have a wonderful upcoming ten years. Urging us to be well-informed, educated investors, Costos told us that it was acceptable, and most likely wise, to have professionals assist us in our investing activities even, he said, if we pay them for their assistance. Encouraging the absorption of experts' knowledge, he remarked that, after twenty-seven years in the financial services industry, he considers himself only "a sophomore," and regularly looks to the opinions and projections of those who have been in the business for a longer time.

In addition to his financial discussion, Costos chose also to emphasize the importance of looking after all aspects of your life, and finding that career that provides the greatest fulfillment. In addition, much to the liking of University students in attendance, Costos informed the audience of the advantageous position that we, as graduates from this University, will be in upon entering the workforce.

"You will stand above most everybody out there," Costos predicted.

University to nominate exceptional students

By Nicole Gull

USA Today, in addition to a number of national educational groups have recently issued an invitation to various universities and colleges across the nation to nominate exceptional students for its "All-USA Academic Team." The contest's first team will consist of 20 students who will each receive $2500 in cash prizes. A second team of 40 students will be selected and featured as well. The final team of 60 students will be presented in the publication's Feb. 17, 2000, issue.

The team is devised to note the academic and creative advances of students across the nation as they benefit the students both on and off campus. According to Robert Midkiff, associate dean of students, the application process may be initiated by a faculty member's suggestion or the student may "campaign" with the requested support of a faculty member.

The selection process, as carried out by USA Today, will focus on faculty recommendations, original intellectual product, academic talent, leadership and creativity. Intellectual products may include research projects, published work, or pieces of art of music.

All faculty members have received notification of the nomination process and as many students that are nominated are able to apply for the academic honor. Further information is available in the Office of the Dean in both the Colleges of Arts and Sciences and Engineering through contacting Robert Midkiff and Trudy Cunningham, respectively. The deadline for the application process is Monday, Nov. 12, 1999.

Controversial professor debates relative value of life

By Alex Piel

Courtesy of Alex Piel

Peter Singer debates human ethics regarding disability at Princeton.

Princeton's appointment of Peter Singer as the DeCamp Professor in the University Center for Human Values has brought much controversy to the former college of New Jersey. Professor Singer's eminence in the field of bioethics is indisputable.

Since his appointment, Dr. Singer has brought "national attention to the ethics of euthanasia, the sanctity of human life, disability, animal rights, and the ethical implications of the divide between rich and poor." The topics he addresses are controversial and consequently, any side he takes will result in an increase in tension among those involved.

Singer's career began when he was thirty at Oxford University where he was elected to a professorship at his home university (Monash) in Australia. He has served as president of the International Association of Bioethics and as editor of its official journal (*Bioethics*), and won the National Book Council of Australia's prize for the best non-fiction book published in Australia in 1994 for his *Rethinking Life and Death*. Authoring such books as *Animal Liberation* and *Practical Ethics*, his thoughts have been taught in ethics classes throughout Australia, Europe and the United States, including here at the University. Skilled in teaching, Singer is clear and creative and has demanded a new consideration to the growing field of bioethics.

Singer's appointment has stirred emotions in the small town of Princeton. Controversy has erupted as protestors have blocked the gates to Nassau Hall and repeated threats have been made to the school and Singer.

Why? Some argue, as does Singer, that most of the controversy can be attributed to misrepresentation or misinterpretation of his views by the media. Not all of his views are misconstrued, however. Singer has the difficult and unadmirable challenge of taking sides on some of the most provocative topics of today. Furthermore, he not only addresses these often avoided issues, but he challenges our traditionally established ways of thinking. Singer is more concerned that we think about what he is saying that he is about encouraging us to jump on his bandwagon.

Professor Singer examines crucial ethical questions with great depth and rigor. He argues that it is our method of development as a society that is evoking these questions, not himself. In his own letter to the *Wall Street Journal*, Singer notes that rapid advances in medical technology force us to reconsider how we should make critical medical conclusions about life and death. "Our increased medical powers mean that we can no longer run away from the question by pretending that we are 'allowing nature to take its course,' he said. "In a modern intensive care unit, it is doctors, not nature, who make the decisions."

Peter Singer is a utilitarian. He believes in the greatest happiness for the greatest number. In doing so, he is committed to reducing the suffering in the world, though often by controversial measures. He discusses the ethical treatment of animals and how we can improve the environment for everyone to benefit.

As even Singer himself has said, "obviously, most of these matters are controversial. At Princeton, as throughout my teaching career, I hope to challenge my students and stimulate them to form their own conclusions on such issues. In my students, I look for the ability to think independently, and I assess my students on the quality of their argument, not on whether I agree or disagree with the conclusions they reach."

While Singer's appointment may evoke protests and initial outage with administrators, board members and even the local townspeople, he stimulates thought, questions beliefs and forces people to address the issues our society now demands.

Response from the students at Princeton has ranged from strong support to utter disgust and disappointment in the administrators for appointing Singer. As one student remarked, "What scares people about Peter Singer is that his views are a logical extension of their own."

Some however say, "There will always be people like Singer, those who love to cause a stir in the name of challenging convention. Mostly there is little to fear, as they are generally long on talk and short on action. Their ideas are not really dangerous as long as we thoughtfully weigh and test them. Truth will always be found by those who honestly seek it."

What better way to showcase not only Singer, but also his opposition than by having a debate in front of a national audience.

Provocative Singer-Asch debate held at Princeton

The Bioethics Forum of Princeton University sponsored an "Ethics, Health Care and Disability: A Discussion with Peter Singer and Adrienne Asch," debate on Tues., Oct. 12, at Princeton. The combination of Singer's utilitarian views and his opponent's, Adrienne Asch's, a blind professor from Wellseley, the stage was set for a potentially melodramatic explosion of energy. Instead, it was a well-organized, thought-provoking and controlled debate with both Singer and Asch, providing well-articulated and formulated arguments.

Singer, the Ira W. DeCamp Professor of Bioethics in the Princeton University Center for Human Values, has focused much of his writing on issues such as in vitro fertilization, embryo tissue experimentation, our society's explication of death and the allocation of scarce health care resources. In 1994, one of his many books, *Rethinking Life and Death*, was awarded the National Book Council of Australia's prize for the best non-fiction book published in Australia.

Adrienne Asch is the Henry R. Luce Professor in Biology, Ethics and the Politics of Human Reproduction at Wellesley College. Presently, she teaches Ethical and Social Issues in Genetics and Ethical and Political Issues in Reproduction. A member of Hillary Clinton's Health Reform Task Force, she was named Blind Educator of the Year in 1997 by the National Federation of the Blind. She is currently working on books focusing on cloning and on assisted reproduction.

Singer was initially asked to give a simple talk, but further discussion by the bioethics committee at Princeton, led by President Dan Kraus, prompted them to ask Singer if he would prefer a debate. The rationale behind it, explained Kraus, was to provide some counter-positions to Singer's extreme views. Singer actually recommended Asch not only because she is disabled, but also because she has "written extensively on issues related to disabilities and bioethics."

With a heavily secured lecture hall awaiting the arrival of 481 spectators, Princeton was set to host Singer's debut public appearance in the United States. CNN, MSNBC, National Public Radio and others demanded press passes to get a glimpse of who has garnered so much of the academic attention around Princeton these last few months. What transpired over the two-hour debate/discussion between Singer and Asch is captured in the following.

See SINGER, page 9

Dawkins explains Darwin's theory

DAWKINS From page 1.

tistically improbable. The designer would have to be even more complex. Evolution by natural selection is the only workable solution, breaking down adaptive complexity into small lumps. The key component is time, with the end product being the result of many generations. "The human mind is just not equipped to grasp the breadth of geological time—gaps are longer than can be imagined."

"Time tames the riddle of adaptive complexity."

Scholar G. Ledyard Stebbins explored how long it would take for a creature the size of a mouse to evolve into a creature the size of an elephant? We must assume a selection pressure for the growth of an animal of mouse-size to an animal of elephant size. Making the selection pressure very weak, so weak that the advantage of bigger mice to smaller mice is only tiny- it would take 12,000 generations, less than a million mammal years, less than ten bacteria years. With even this weak selection pressure, with time, evolution could produce such a creature. In reality, evolution is even slower than this, " said Dawkins.

Courtesy of Public Relations

Dawkins, professor at Oxford University, lectured in the Weis Center on Oct. 18.

The creationist argument of adaptive complexity also assumes "irreducible complexity"— the alleged property that if you remove one quality of an organism, the whole thing will not work.

"This is not evolution's outcome," said Dawkins. "With half an eye, you can still see, but see half as well. With half a wing, you can still manuever, but half as well."

"You cannot just assert that something is irreducibly complex. You cannot say that the editor of nature is too complex and thus God must have done it. Even if somethings is irreducibly complex, it doesn't prove that it cannot gradually evolve." Thus the extravagance of creationism is inelegant- its ratio: all complexity, adaptadness and diversity of life divisible by a creator who would have to be even more complex.

"Imperfections are even more revealing than adaptations," said Dawkins. There are contrasts between how organisms have evolved and how they would be if their current forms were designed

Legacies of history which have perpetuated through time include the shape of the flatfish, a quality that has disfigured its skull,

yet has been sustained. The vertebrate eye is another legacy of history in that if we look at the mollusk eye alongside that of a human, that of a mollusk is better equipped. Human vision would improve if we could flip our retina around— yet this is an imperfection— a legacy of history.

The laryngeal nerve is a nerve which runs from the brain to the larynx, loops in the chest and returns. "Imagine how long this nerve is in a giraffe," said Dawkins. But it would take too much for it to change— thus it is a legacy of history— a legacy of evolution.

The arms race is another line of support behind evolution. "The Creationist optimism for the future, for restoration of harmony between humans and animals, is unrealistic and inconsistent with nature. Nature is ruthless and harsh as exhibited in the cheetah and Thomson's gazelle," said Dawkins. The cheetah and the gazelle are the end products of the arms race— the beautiful adaptations of prey against predators in their movement and grace corresponding to the predators' ability to capture prey with their agility and speed. The arms race is just as apparent in the interactions between parasites and hosts as it is in predator-prey relations.

Another objection, a favorite of creationists, concerns the "gaps" in the fossil record. "There are not as many gaps as Creationist propaganda makes it appear," said Dawkins.

Although no actual descent and no literal ancestry are evident in the fossil record, there are no fossils in the wrong place. For this reason, it would be fairly easy to falsify the theory— by finding a fossil misplaced in time. However, the theory has never been falsified.

"The gap between *Australopithecus*, an ape, and *Homo erectus*, a human is analogous to the gap between children and adults, " said Dawkins. Where is the intermediate between the two? When do children "become" adults? There is an unbridged gap between them.

Another argument, that mutations are mostly bad, is inconsistent with the fact that mutations can lead to evolutionary improvements. Natural selection is like a sculptor, carving the gene pool into shape. Mutations are a part, although only a small part, of evolution. Scholar R.A. Fisher used the analogy of the microscope— its focus standing for evolutionary perfection. "We have one tube and a focus which can be either slightly raised or lowerd. Micromutation is this slight movement, risen or lowered by a fraction of a millimeter. Macromutation is like a sledge hammer," explained Dawkins.

There is a 50 percent chance of the microscope tube movement (either up or down) to improve or disimprove the focus— analogous to the 50 percent chance of a mutation being advantageous.

"As in any other flourishing science, evolutionists have their disagreements, " said Dawkins. Sewall Wright for example promoted genetic drift, disagreeing with Fisher, who strongly believed in natural selection.

Kansas' argument that Darwinism is "only" a theory is however not a good argument.

"It *is* a theory but it is a good theory," said Dawkins. "It needs to assume almost nothing in order to explain almost everything in life. It is equivalent to the "theory" that the earth orbits the sun— they are both equally supported. Creationism needs to assume that which it attempts to explain."

Dawkins confirmed that the surmise "if science disagrees with the Holy Book, it is science that must be wrong" holds no testable verity.

Morales shares Puerto Rican history through *Remedios*

By Melissa Milanak

In honor of Latino American Month this October, the Bucknell community welcomed renowned poet, essayist, and historian Aurora Levins Morales who addressed students, faculty, and friends last Monday night. Drawing from her rich Puerto Rican and Jewish heritage, Morales eloquently opened her lecture by stressing that individuals do not belong to simply one heritage, but instead belong to a unit of interconnected cultures and ethnicities.

Morales described herself as a "historian and storyteller of connections," explaining her desire to unite people of different heritages while simultaneously celebrating her own background as Puerto Rican and Jewish woman.

The lecture consisted of various selections from Morale's anthology *Remedios*, composed of pieces set thousands of years ago in Africa up to the present day. Morales discussed the ties that Latin Americans and Africans share because of the way in which African Americans have been denied the recognition of their culture.

She elaborated on the concept of what she refers to as the "absence of Africa," explaining the idea that history tends to leave out the role that Africa has played as an important cultural force, shaping other cultures throughout the world. In a selection entitled "First Mother," Morales powerfully illustrated the scientific theory that life began in Africa, giving rise to the different cultures that exist.

"I write history because I have a passion for the future," said Morales who continued to share her own Puerto Rican history through *Remedios*. In order to look to the future, Morales discussed the injustice and cruelty that Puerto Ricans, especially females, have endured. Through different pieces, Morales illuminated the determination and resistance of Puerto Rican women who have carried a culture through repression and times of violence through their hard work and strength. The poems celebrate the triumph of these women who have given rise to a culture rich in tradition and ritual.

Perhaps one of the most difficult yet powerful aspects of the lecture was the section that Morales devoted to the rapes that were all too common among Puerto Rican women. In a poem on this topic, Morales discussed the horrid accounts of women who were violated by Europeans who entered the New World.

Morales explained the challenge she faced while asking herself the question, "How do you turn cruelty and torture into something we can use as medicine?" Through her recognition of the difficulties that the Puerto Rican people have endured, Morales has helped to provide her culture and others with words that can heal. Morales culminated the program with a question and answer period.

When asked why she decided to delve into the writing field instead of a teaching profession, Morales succinctly remarked that "Poetry saves lives" and that poetry was her passion.

The lecture was co-sponsored by CUMBRE, the Women's Resource Center, Hillel House, the Dean's Office, and the University Lectureship Committee. President of Cumbre, Maria Lopez '02 said, "I think given Latino American Month, the speaker [Morales] is very essential to our spreading of culture within the Bucknell University community and is very influential to feel the interconnectedness of different cultures and heritages."

Aurora Levins Morales tells her story

By Kristen Jancuk

Courtesy of Kassandra Bernard

Aurora Levins Morales addresses students Monday night.

Many of us deal with issues of race, religion, ethnicity and gender daily in our lives. The University has several student organizations to address these topics and promote awareness, such as Hillel, Essential and S.A.A.B. This month, Latino Awareness Month, CUMBRE hosted progressive writer and speaker Aurora Levins Morales.

Levins Morales, whose diverse Puerto Rican and Jewish background helped to inspire her writing, is a modern-day historian of a different kind. She writes about U.S. and Puerto Rican culture as well as women's experiences in a prose poetry style that brings history to life. History, she says, is often intimidating and meant to give authority to the writer while maintaining a sense of distance and objectiveness. Her history is the opposite and therefore, she has had to struggle to use the personal voice.

Her fight has been successful, indicated by the publication of her three books. Her first, *Getting Home Alive*, published in 1986, she wrote with her mother, Rosario Morales. Her two most recent books, *Medicine Stories: History, Culture and the Politics of Integrity* and *Remedios: Stories of Earth and Iron from the History of Puertorriquenas*, both published in 1998, were the topic of her address, Monday night in Rooke Auditorium.

In each of these books, Levins Morales seeks to provide for people a "literature that reflects their own reality." *Medicine Stories* focuses on social identity and Levins Morales examines a variety of topics, including ecology and interracial relations. *Remedios* chooses a different course, telling the history of the Atlantic world through the stories of the poor and unheard Puerto Rican women: the slaves, the *mulatas*, and the workers.

Doing research on her topics was difficult, she says, especially for *Remedios*, which relies on the stories of women that, as she says, "are often buried," and have only been minimally researched in the past. When asked how she tackled most of her research, she responded candidly, "I gossiped widely." The research and writing of *Remedios* took seven years and extensive effort. Often, Levins Morales read whole books for one sentence or one footnote addressing her topic.

From the titles *Medicine Stores* and *Remedios* ("remedies" in Spanish), it is apparent that Levins Morales views her writing as a means of healing and this is an important aspect in both her recent books. Frequently, especially in Puerto Rico, women are the healers, using herbs and what little else they have at their disposal to help others. This, she states, are where the memories and history of women are often held: in the medicine.

In *Remedios*, many of her stories are about herbs and other medicines that the Puerto Rican women used. In addition, she explores the idea of herbs not only as medicine but also as poison in some of her more negatively toned stories. As a writer, Levins Morales is also a healer, not only of herself, but of her readers and those she writes about, releasing their history and healing old wounds.

Levins Morales' own life influenced her works, being a Puerto Rican woman herself. She was born in Puerto Rico in 1954 and moved back and forth between there and the United States for several years. In her works she has looked at all sides of her background. "I see myself as completely Puerto Rican and completely Jewish," she said. In addition, she also addresses the issue of femininity and the role of women in history, exploring her personal family history in some of her work.

When she's not busy writing and researching Levins Morales works as a professor, teaching classes on racism, anti-Semitism and feminist issues at the University of California at Berkeley. She also lectures nationwide on these topics.

Wink Thinks

Jacqueline Flicker—The Bucknellian

Dear Wink,

In my life I have only a few things that I am sure will always remain the same. As is the case with most people, one is my parents' never-ending pursuit to take care of me and do what is in my best interest. The next is the fact that I know I am a good person; my mind is clear and my heart open to anyone who wishes to enter it. The last constant I have in my life is the love of my boyfriend. No matter what happens to us in life I know that he will always love me and I him.

My boyfriend is like me in many ways but in others he is quite different. He has always been the type of person to say what is on his mind and does things because he wants to, not because they are "cool." In that respect he is very individual and others sometimes consider him odd. He does what makes him happy and for that I am drawn to him. In many ways I gain strength from his presence and attitude, and he has helped me become a better person. I would not trade him for anything, and that is why I hold him as a constant in my life.

However, a few weeks ago he came to me with an idea that was a little odd, as his ideas sometimes are, but I listened nevertheless. He told me that he wanted to remember me in a way that would last forever, and at that point I thought he was going to ask me to marry him but he had other plans in store. His idea was not of lifelong devotion, but a lifelong symbol to remember one another by: a tattoo, mine with his name and his with mine.

At first I thought, "He must be kidding," but after looking at him for a few seconds I knew that he was serious. I have always said that I would never get a tattoo. I have just never had the desire for permanent marks on my body, but in addition I have also told myself that I would do anything for him. After looking into his eyes I knew that he was hurt that I did not jump at the idea, and I felt as though I had let him down. I would never do anything to hurt him but I just don't know if I want to do this. I don't want to compromise my own beliefs and ideals.

Therefore, I ask, what should I do? Should I tell him that I just don't want to and risk hurting his feelings and ruining what we have? Or, on the other hand should I do it, and make him happy, because I know that he would do something incredible for me if I asked? How do I tell him all of this; how do I keep what we have?

Sincerely,
Talking of Tattoos

Dear Talking of Tattoos,

First off I must tell you that you have something that is truly unique, and I personally do not see what all of your concern is about. Remember what you have, who you have and what he means to you. There is really no need to worry, nothing is in jeopardy here. In my mind you have nothing to fear but understanding.

I know that your boyfriend probably thought that it was a great idea, and from what you say it sounds like he has interesting new ideas like that frequently. I think that it is really good that you listened to him before you said anything. You always had him in your mind and thought about how your actions might make him feel. However, I really do not know if a tattoo is the way to go in order to remember someone. Maybe you could ask if he could buy you a card instead, or even better carve your names into a tree. I would definitely say if you have the least amount of doubt about getting the tattoo, which it seems that you do, do not do it. The truth is that it really isn't worth it, and you may regret it later in life. A tattoo is really just a permanent reminder of a temporary feeling.

I do not think that you have to fear telling your boyfriend that you are not quite sure that you want to get one. Tell him that you do not think this is the best thing you can do for each other right now. I have no doubt in my mind that he will understand. He clearly loves you, and if you tell him that you do not want to, he should understand if he only wants what is best for you. If he is hurt, that is really his problem, not yours. Even though you would do anything for him, a tattoo is asking a whole lot. People get over hurt, but you may not get over a permanent marking of his name on wherever it may go.

From this situation I think that you should also do some analyzing about who you are and what is important to you. You said that you told yourself that you would never get a tattoo, and I think that you should stick to that. Learn that you should not change who you are, what you think or now you act because another person wants you too. Be who you are and don't act a certain way for the sake of another person. Caring about someone means doing what is right, not simply doing what the other person wants. It is awesome if you give your heart to another person, but it is not always a great idea to give up your mind for them too.

I have faith that everything will work out for the two of you. It is easy to see that there is something between you and there is no need to worry, it will not end over a tattoo. To everyone, I suggest that you do what you think is right, not just what another person wants you to do. Most importantly, do not forget who you are. Until next time relax, have fun and let Wink's wisdom be your guide.

If you are interested in writing to Wink there is no need to worry—all questions are confidential and answers are always thorough. However, please write questions that are decent because we cannot include material that is libelous or an invasion of privacy. Questions or comments can be sent to Eli Winkler at box C2815, attn: Wink Thinks.

Bucknell in Barbados:
Students share a life experience

By Erin Windle, Kelly Gallagher, Anthony Georgiadis and Brian Carr

Courtesy of Bucknell in Barbados

Erin Windle '00, Donna Engle '00, Karen Rave '00, Shanna Ferrara '00 and Kelly Gallagher '00 enjoy touring Barbados.

Last semester 13 University students traveled to Barbados with Economics Professor Winston Griffith, on the Bucknell-in-Barbados program. The group was composed of five male students: Mike Long, Anthony Georgiadis, Casey Bowden, Brian Carr and Nick Zamparelli; and eight female students: Sara Coates, Karen Rave, Erin Windle, Kelly Gallagher, Donna Engle, Shanna Ferrera, Jen Ciotta and Shallonda Trim. They came from a variety of disciplines including sociology, education, economics, business management and English. Each was required to take two classes at the University of the West Indies as well as a Caribbean Economics course taught by the fearless leader, Professor Griffith.

Their studies at the University of the West Indies were supplemented by internships that corresponded to their chosen field of study. The education majors were able to observe and teach within a primary school allowing them to obtain a comprehensive understanding of the Barbadian Educational System while enjoying the experience of meeting these gracious children.

"The children were very receptive to us (Kelly, Karen, and Sara) and the Bajan teachers appreciated our assistance in the classroom. The schools provided us the opportunity to immerse ourselves in their unique culture," Karen Rave said.

Brian Carr a business management major, who interned at the Barbados Institute of Management and Productivity, believed that his experience gave him a glimpse into the business environment of a developing foreign economy. His internship led him around the island interviewing various business managers about their marketing mechanisms.

Erin Windle and Nick Zamparelli teamed up on a research project for the Caribbean Development Bank. Erin and Nick's extensive research on savings in the Caribbean region was presented to the economists of the Caribbean Development Bank and eventually will be published.

The overall educational adventure in Barbados has turned out to be one of the most influential experiences in each and every one of their lives. Every day they were able to acquire a new piece of life from this small island in the eastern Caribbean. Adventures from travelling to the various Caribbean islands to using the Barbadian public transportation system all enhanced their overall semester abroad. Moreover, they became much closer to one another in a way we would never have become had they spent the semester at Bucknell.

Barbados has a rich sense of culture and tradition that will capture you within its heart. If you are interested in this life experience please feel free to contact any of the Bucknell-in-Barbados students, Professor Griffith and/or the Office of International Education for more information about this extraordinary study-abroad opportunity.

University students lend an ear

By Eric Green

At a time when the media attributes school violence to a lack of communication and involvement in the lives of American youth, there is a dire need for eager ears who may help to prevent a child from feeling lost and alone. In light of recent tragedies, many school systems across the country have begun to implement preventive measures to reach out to those students who may be looking for much needed attention. Lewisburg Middle School, however, thought it was a good idea back in 1978.

For over twenty years, the Lewisburg Listening Post has served as a valuable resource for middle school students in Lewisburg. The program is designed so that University students, "near-peers" as they are called, interact with the sixth through eighth graders by listening, talking, or just serving as an outlet for the students during their lunch or free time.

According to the program's advisor, Cathy Stechschulte, "Many of the students come in just to talk about all of the normal troubles that accompany the teenage years, but the Listening Post also serves as an extra layer of support for those students who have more serious issues and may be looking for someone to whom they can turn."

The near-peers serve as an intermediary by making referrals to guidance counselors

when the need arises. As a branch of the guidance department, the Listening Post near-peers also co-facilitate groups in conjunction with the guidance counselors.

Although the students benefit by having such a dynamic support system which is readily accessible, the University near-peers also have a unique chance to grow from their experiences with the kids. This program also serves as a wonderful bridge between the school/community and the University.

With little opportunity for the younger children in the area to interact with University students on a regular basis, ideas are formed about college life that are not always in good light—the presence of the near-peers in the schools helps to break these preconceptions and build a good image of the students here at the University.

Sponsored in part by the United Way, the Listening Post is a non-profit organization. Many local businesses and individuals also contribute to its operation by way of charitable donations (donations made to the United Way can be designated to go to help fund the Listening Post).

Over its 21-year existence, the Listening Post has seen much growth. In addition to the services provided at the middle school, near-peers also spend time with students at Linntown Intermediate School (from 11:30 to 1:00, Monday-Thursday). Future goals of expansion include making the program available to students from kindergarten to grade 12.

"Midnight Mania" a success...but where's the spirit?

The Office of Campus Activities and Programs' renewed effort to provide events that both create meaningful alcohol-free alternatives and foster University spirit executed its biggest event of the semester last weekend in co-sponsoring "Midnight mania" in the fieldhouse. And while event was well-planned, well-publicized, and well-organized, its end results were mixed.

The program was a success on many fronts. In its second year, many of the "kinks" regarding publicity and execution were ironed out and the event, while not perfect, was certainly executed well.

Advance publicity for the event—which ranged from campus e-mail to signs and posters to OCAP employees "talking the event up" throughout Bostwick Cafeteria, was thorough and effective. In contrast to many other alcohol-free events on campus, Midnight Mania was advertised well enough that every student on campus was at least given the chance to attend.

Major student organizations on campus also rallied behind the program, increasing its validity and ensuring, again, that every student was allowed the opportunity to participate. Bucknell Student Government rallied behind the plan, and nearly all fraternities abided by Dean Roy Baker's decision to hold no registered social functions on the night of Midnight Madness.

Most importantly, though, the University invested considerable time, manpower and money in helping Midnight Mania grow into a truly worthwhile event. As the Bucknellian has stated on several occasions, University efforts to create meaningful alcohol-free events must be targeted and thorough—a half-hearted attempt to provide all-campus alternatives would simply be a waste of time and money. The money invested in Midnight Mania—from the extensive publicity to the quality and quality of prizes available to be won—was considerable, and the combined efforts of students and staff in planning and executing the event made it a success. Midnight Mania was a priority of the OCAP office, and it showed.

But while the event was successful in achieving one of its objectives—creating a worthwhile alcohol-free social alternative—it was, by and large, not a success in another of its aims: fostering school spirit. The failure to meet this objective is not a fault of Midnight Mania's planners or organizers, but is rather the product of an all-campus atmosphere that fails to promote University unity.

Although the event drew well, the approximate attendance of 1,300 did not mean it constituted an all-campus event. More importantly, though, the students that did attend, by and large, did not attend for reasons related to school spirit. Midnight Mania was attended to get free food, to participate or watch some of the skill events that were scheduled, or to try to win one of the several large prizes. In almost all cases, the purpose for attending the event was not to be a part of a unified University in a spirited event, as is the purpose at countless other "Midnight Madness" events on campus across the country.

It is obviously unrealistic to expect to expect Bucknell's "Midnight Mania" to resemble similar programs at the University of Connecticut, Indiana, Michigan or other schools with powerhouse basketball programs. School spirit is easy to foster at events like those: the students in attendance simply go to celebrate the first day of practice for their immensely popular basketball teams. Men's basketball is arguably the most zealously followed spectator sport among students, but the support, for obvious reasons, does not resemble the support exuded at larger Universities.

But without basketball as a center point, Midnight Mania could not foster the spirit that it would at other institutions. There was no central rallying point, no reason for all students to unite. In fact, many of the events—including the prize raffles—were about competition, not unity.

The event only served to highlight an institutional problem that has pervaded Bucknell for decades—lack of spirit and campus unity. It is a problem that was beyond the scope of Midnight Mania, and arguably beyond the scope of any campus office or administrator. The reasons for the lack of campus spirit are as numerous as they are complex, and finding an event—save for making students wait in line overnight for Dave Matthews concert tickets—to address the problem is a tough task.

Midnight Mania's successes are numerous: the event afforded students a well-conceived, well-executed alcohol free alternative. it received the support of the University Greek System and campus leaders. And it gave students the rare opportunity to gather together and attempt to build a semblance of school unity.

Through no fault of Midnight Mania's organizers, students failed to take advantage of that opportunity.

Should the Bucknell Greek system have co-ed fraternities?

Yes

By Rebecca Rowland

When the trustees decided that Dartmouth College was to disband its Greek organizations, the students were given the option of founding and joining co-ed fraternities. Why are co-ed Greek organizations different and are they a viable alternative for Bucknell?

The points of Greek organizations are to promote self-growth and foster a sense of brotherhood/sisterhood among the members. Why can't these objectives be met with members of the opposite sex? Interaction with the opposite gender is looked upon favorably in a social sense, why not in the other aspects of Greek life as well?

Both fraternities and sororities participate in charities and fund-raising, both hold their members to the same standard of conduct and responsibility, it seems that the merging of these two institutions is only natural.

In a Greek organization, you are to think of your brothers and sisters as equals, the members of your fraternity or sorority are your true friends. This leads to men seeing only men as equals and vice-versa for women. It would be most beneficial for relationships between the sexes if men and women identified, if they saw each other as being on the same level.

The administration at Dartmouth cited this as one of their main reasons for advocating co-ed fraternities; if men and women can feel a fraternal bond, Dartmouth believes the instances of date rape, sexual assault, and other gender-related crimes will decrease.

Fraternities and sororities are integral to the other's party scene. Therefore by merging the two Greek groups, you are not changing any of the dynamics of the social life. In fact, proponents of co-ed fraternities would say that you would be improving their social lives. Co-ed Greek organizations would be excellent places to start relationships. The men and women involved have already developed levels of trust, friendship, and acceptance with each other and relationships evolving out of that background begin on a very solid and healthy base.

Perhaps one of the most important aspects of a co-ed fraternity is the way it forces men and women to interact as equals on a professional level. Leadership roles are assumed, projects are undertaken and the spirit of cooperation is alive and well. Like in the real world, these activities would be done in the company of men and women. The "boys club" mentality of the corporate world is fading fast, as is the "stay-at-home Mom." It is imperative the sexes learn to work as equals. What better place to do so than in college through a Greek organization that will stay with you for your lifetime.

The "separate but equal" mentality of the Greek system at Bucknell is unnecessary; if it comes down to choosing between a co-ed Greek system and no Greek system at all, should the choice really be that hard?

No

By Ryan Delahanty

Last year, Dartmouth, the quintessential Greek school, underwent a massive social change when it announced that there would be co-ed fraternities, instead of the normal fraternities and sororities. In direct opposition to the Delta frat in "Animal House," which supposedly was based on the Greek system at Dartmouth, this new trend, which surely it will become, is a danger to small schools like Bucknell.

Although the common myth about fraternities is that there is a myriad of drinking, it is usually done in a controlled manner here at Bucknell. But, the recent deaths at schools such as M.I.T. and Rutgers has led campuses across the country to crack down on binge drinking. Administrators and policy makers believe that fraternities and sororities are the great evil. This blame is improperly placed but even so, they are convinced that the Greek systems at schools should be inexorably altered so that they put more of an emphasis on philanthropy and community service, the whole aim of a co-ed fraternity.

I guess that administrators would like to see a joining of men and women in a Greek atmosphere. I think I know why they would: men drink more than women and if fraternities were disbanded then perhaps the binge drinking would go down and the school would be deemed "safe". But no, co-ed fraternities do not belong at Bucknell.

We have one of the best Greek systems in the U.S. and there is a general understanding between the IFC and the faculty of what needs to be done in order to keep the present Greek system alive and well. Many improvements have been made over the past year and a half that indicate that the students are aware that changes need to be made. For the most part we have acquiesced. We need the current Greek system because it is such an integral part of the social scene.

Bucknell has the reputation of work hard/party harder and we, the students and faculty, have gone to great lengths to see that the motto is changed to party hard/work harder. What the administration needs to realize is that we can undergo this transformation with the current Greek system. While the change to co-ed fraternities would help us to our goal of the party hard/work harder motto, it would irrevocably destroy much of the social life at this great school.

Our fraternity system is recognized throughout the country as one for other schools to emulate. I concede that we are not perfect but the school is continually trying to improve any slight problems that we do have. A change to co-ed fraternities would be like a slap in the face to the students and would be seen as the worst of betrayals. Bucknell is in the process of altering the Greek system to follow the national trend of curbing binge drinking and the absolute last thing the university needs right now is a major change in the way the school is run. Going to co-ed fraternities would not only affect the social scene, but also would change rush, housing, and residences. Co-ed fraternities can only hurt Bucknell.

For an article in next week's Opinions page, we would like to hear from anyone with an opinion or experience regarding the social scene at Bucknell. You can defend the social scene or trash it. We would like to hear from Greeks, non-Greeks, professors, and administrators. Comments should be sent to guyan@bucknell.edu ASAP. Thank you.

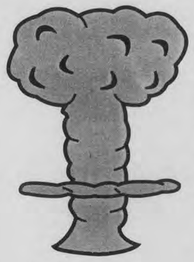
Defeat of Nuclear Test Ban Treaty sparks debate

United States decision fails to set a good example for other nations

By Jim Leahy

On Thursday, October 14, 1999, the Senate defeated a nuclear test ban treaty on a narrow vote of 51-48. The defeat dealt a crushing blow to President Clinton's foreign policy agenda and took the United States off the list of countries who want to put an end to the testing of live nuclear warheads. Why did a perfectly good treaty fall off the desks of the Senate and into the recycling bin? There are numerous answers to these difficult questions.



The Worldwide Nuclear Test Ban Treaty is made up of four simple provisions: nuclear testing explosions would be prohibited around the world, a global detection system and network would be created and monitored to provide for compliance verification, testing of the warheads themselves for safety and sustainability reasons would be conducted underground to prevent any released radiation from contaminating the atmosphere and environment, and member nations would be able to inspect any site that seems suspicious in that testing may have or may be occurring there. These simple statements have been the source of vociferous debates in Washington within the past few weeks. Why?

Following the defeat of the treaty, President Clinton held a lengthy press conference during which he complained of "a new isolationism" and "a reckless partisanship." "We are in a battle with the new isolationists in the Republican Party," said President Clinton. He went on to issue a stern warning to India and Pakistan: "Do not take yesterday's vote as a sign that America does not care whether you resume nuclear testing and build up your nuclear arsenals."

Clinton portrayed the Republicans as the enemy in this debate. They were the aggressors here and because of their actions, the United States and the rest of the world must suffer. The political parties are supposed to be partners in our government, this makes them look like polar opposites.

Republican Majority leader Trent Lott issued a response to President Clinton. During his response, Lott explained the modus operandi of the Republicans in the Senate before and during the debate and vote. One of his statements sums up the Republican stance very well—"We have some of the most thoughtful Senators that said that this treaty was not verifiable, that it was fundamentally flawed, and it should not be passed."

Also, according to Lott, the vote was not partisan politics or isolationism but actually the Senate doing "...the right thing for our country." The Senators feel that "Our advice was not asked, and we did not give our consent." But is this the whole story or just a case of politicking?

As in many cases throughout the years in Washington, one side never gives the whole story. This debate is no different. There is partisan bickering and that is leading the American public down a false path. I think that David Sanger, writing in Sunday's New York Times put it best. He writes that this entire debate is "an argument not over whether the United States is strong, but over how it should use its power."

While I cannot disagree totally with the Republican decision to turn down the treaty, their picture in this debate is skewed, do not think that the Democrats are much different. Isolationism is not the way to go, but I do not believe that this vote casts the United States into isolation. What it does do is possibly mislead our enemies and allies in the world.

As globalization creates a worldwide interdependence between nations, the United States should thoughtfully assess its visibility. We should, as arguably the most powerful nation in the world, assert that power to create a peaceful environment for all. We need to keep possibly hostile nations like Pakistan, India and North Korea in check so as to protect our allies and interests at home and abroad.

These nations that I mentioned did not even sign the treaty and by doing so raise all kinds of concerns. The only way this can happen is with the American backing of that treaty. Picking battles carefully would seem to point Washington down the road of the treaty. On the whole, I think that the GOP has missed the boat. The ratification of this treaty would have been in the best interest of our nation as well as in the best interest of our overseas friends. We can only hope, as citizens of the world, that bad things will not come out of this.

Senate focuses more on presidential hatred than on international treaty

By Josh Guyan

There was, of course, only one thing to write about this week. Can you believe what's going on in Washington right now? We have reached the absolute peak of partisanship when a Republican controlled Senate hardly even considers an international nuclear test ban treaty simply because it was sent to them by a Democratic President whom they hate beyond measure.

If we leave out the merits of the Comprehensive Test Ban Treaty for a moment, we can focus on the sad state of partisanship going on between Congress and President Clinton.

Senator Robert C. Byrd voted "present" on treaty ratification and wrote an editorial in last Friday's New York Times to explain why. He blamed the Democrats for using the Test Ban Treaty as a "political club" to hold over the Republicans because of the Treaty's overwhelming popularity. He blamed the Republicans in the Senate for not even giving the Treaty its due consideration before rejecting it.

> *We have reached the absolute peak of partisanship when a Republican controlled Senate hardly even considers a...treaty simply because it was sent to them by a Democratic President whom they hate beyond measure.*

Under our Constitution, the Senate, which is supposed to be a "great deliberative body" must consider, debate, amend, and ultimately approve or disapprove of international treaties. They did not follow this process during the ratification process.

They instead had limited hearings, limited debate, and then a vote when 62 Senators wanted to delay the vote. They did this because Senate Majority leader Trent Lott and many other Republicans wanted to embarrass the President of the United States and try to make him completely ineffective.

This vote was completely partisan, with all Democrats and only four Republicans voting for ratification of the Treaty and the rest of the Republicans, whipped into shape by Senator Lott, voting against the Treaty.

The Senate has a serious responsibility when it comes to Treaty ratification. The Republicans in the Senate did not take the Comprehensive Test Ban Treaty seriously at all. They used it as a political weapon to display their intense hatred of President Clinton and their willingness to put good international nuclear policy and America's global leadership aside to spite their enemy. Keep in mind that in Newsweek this week Senator Lott received a down arrow because he, "Cuts off world's nose to spite Clinton's face."

I was well aware that the Republicans in the House of Representatives were willing to put public policy aside and risk their political fate to fight President Clinton on every issue, but I wasn't aware until now that the Senate would follow suit. Let's remember what came of that strategy for the House as well. The Republicans have effectively lost control of the legislative agenda, as demonstrated by the recent HMO reform bill that passed through the House supported mostly by Democrats and some moderate Republicans disgusted with their leadership. The Republicans will also, most likely, lose control of the House in the next election cycle.

Is that the model the Senate Republicans want to follow?

Also remember what side the American people are on regarding these issues. Popular support for the Test Ban Treaty was up in the eighties. The United States is now losing ground in global leadership on the reduction of nuclear weapons. Volatile nuclear nations such as Russia, China, North Korea, and India were waiting for our leadership in the banning of nuclear tests. While we cannot be certain these countries would have joined the U.S. in ratifying the treaty if we had in fact done so, we can be pretty certain now those nations will not feel any pressure to comply with the treaty.

Some things are much too important to be squabbled over by intelligent, distinguished, educated, informed, and unbelievably immature and childish so-called leaders in Washington.

LETTERS TO THE EDITOR

Darwinism lecture lacks focus and depth

Richard Dawkins does little to impress students with talk about evolution

TO THE EDITOR:

The Yanks played the Sox Monday night and won to earn their fourth trip to the World Series in five years. There was a nature special on wild African elephants on television and I had some physiology homework to do. All of the above were neglected, however, due to a speech I attended by Richard Dawkins, famed author of *The Selfish Gene* and most recently *Unweaving the Rainbow*. Well, we can only learn from mistakes, right?

As a "professor" at Oxford, Dawkins doesn't teach. The sole job of Dr. Dawkins is to spread the word of evolution. And spread the word he does; my question is, to whom? It is clear that Darwinism is being taught in most educational institutions around the world. Natural selection is now a fundamental theory (or fact, as he puts it) of evolutionary biology. Maybe Dawkins doesn't know this though. Maybe he thinks his voice on the matter rings louder than all of the text books, all of the teachers and professors, and all of the newspaper articles that refer to evolution. Honestly, I don't know what he thinks.

What I do know is that Richard Dawkins accepted generous funds from Bucknell and wasted the time of about 300 people Monday night. His arrogance, tasteless jokes, and high school level lecture made for a complete waste of my time. If I want to learn about Darwinism, I will open my Biology textbook.

What do I expect? I expect something more in-depth. Dawkins coined the term "memes" which, as I understand, refers to ideas which are passed down through generations just as genes are. It is a term that has been well supported by some contemporary philosophers and mocked by others.

In either case, Dawkins has an opinion but neglected to share it in his lecture. Bare in mind that there is a tremendous controversy in Kansas over the teaching, or lack thereof, of evolution in the public schools. Whereas Dawkins initially addressed this topic in his talk, he said he would incorporate it further later. Unfortunately, he never did.

Richard Dawkins, like any speaker of his status, is obligated to consider his audiences. At an academic institution such as Bucknell, one would think he could have avoided the cheesy jokes and tasteless humor and instead discussed more indepthly the ramifications of teaching creationism and offered a more in-depth analysis of Darwinism. In the future, Sir Richard, lose the laptop and avoid stating the obvious.

Homecoming weekend disappoints alumni

More receptions and better planned events could add to overall enjoyment

TO THE EDITOR:

On the whole I was disappointed with the Homecoming 1999 Weekend. Although a fairly recent graduate ('93) and thus not yet a wealthy one, I felt unwelcome. Despite the Welcome Alumni Banner, and the post-game reception, there were no events scheduled that would seem to draw me back, or warrant my interest in attending homecoming.

I have attended every Homecoming since I started at Bucknell and have now come to see no real reason to attend in the future. The football game was enjoyable, but not specifically for designed for Homecoming. The post-game reception lost it's festive atmosphere by not having a tent, and while the food was better, the drink selection was poor. Juice (kool-aid type) and coffee were the only drinks available, not even a soda was to be found.

Because the event was open to everyone, it was not even an event designed to attract Alumni specifically. It would have been nice to come back and have a specific place to meet fellow graduates in a classy social atmosphere, and possibly have a glass of wine while listening to some background music.

I lament the passing of the parade. It seems a shame the local community has to suffer as well as the alumni. The Art Gallery events were nice, but not something that is an attraction.

Perhaps in the future a reception or a dinner for alumni & faculty would be possible. Somewhere, besides the overcrowded Bull Run (a private bar, of which we have several at home), where one could chat with one's friends, and perhaps families they have brought back, would be appreciated. I realize that attendance at these events has not been astonishing in the past, but it was welcomed by those of us who did attend them.

I would even encourage that the event be open to the entire Bucknell community, with a wristband policy in place. Recent graduates will want to talk to undergrads that they still know.

I greatly enjoyed Reunion Weekend when I attended, so maybe the same people who planned that could plan Homecoming.

Thank you for your time.

Sincerely,
Mischa Blair '93

Making a difference in the lives of many elderly people

By Allyson Demerath

This past weekend I had a very eye-opening experience. I spent Sunday afternoon chatting with Riverwood residents for part of a Greek service project.

Pressed for time to finish the studying, errands, and laundry I had put off, I admit visiting the home for the elderly was not at the top of my priority list. After completing a brief tour of the facility, we were instructed to travel around the different wings and talk to the residents. I was a bit nervous about simply walking into someone else's room. However, by the end of the day I truly felt as though I made a difference in someone's day, and they certainly made a difference in mine.

After this weekend, I realized the importance of making an effort to remember the elderly people in our lives. Whether it is a grandparent, family friend, or complete stranger, elderly people deserve respect and consideration.

Because many of these people live alone or are tucked away in homes like Riverwood, they are often deprived of the daily interaction and friendships that younger generations tend to take for granted. Even though I visited for just a short time, every person seemed very grateful to have someone to talk to.

In addition, elderly people can be some of the most interesting and captivating characters. First of all, elderly generations may have grown up in a very different time period, but they have experience far beyond anyone in our generation. Though they may have a tendency to start sentences with the phrase "I remember when..." they certainly gained experience and wisdom from each of those stories. Perhaps it was the 40's or even 30's instead of the 90's, but the insight they have gained over their lifetime applies to all lessons of life.

Secondly, many elderly people are eager to share their stories. A grandparent can be the best history book you ever had, not to mention the most entertaining. Instead of trying to learn about historical events by reading them in a book, ask someone who actually lived through it. Throughout history, events have been told by one generation to the next in the form of storytelling.

Thirdly, elderly people can provide the best advice. History repeats itself, and most elderly people have dealt with many of the same issues our generation is dealing with now. The circumspection they have gained over the years provides the best bases for giving advise. They may not be familiar with the specifics of a situation, but the universal truths they have learned are timeless.

After chatting with many people this weekend, I realized the importance of caring for the elderly people in our community. They have so much to offer, and it seems as though the slightest efforts are appreciated. Even sitting and chatting for just a few minutes in your day can make a big difference in theirs.

Science & Technology

Goodall takes University on spiritual journey

GOODALL From page 1

ancient mother, Flo, further supports, in that after Flo's death her son's grief was comparable to clinical depression. Flint was dead within a short time.

"Humans are thus not the only beings capable of personalities, capable of solving puzzles, capable of emotions," said Goodall.

"The chimps who have taught us so much are disappearing. The gene pool is not big enough. There are more people in many areas today than the land can support.

Conservation education is thus vital, as are tree nurseries, vegetation growth, instruction against soil erosion and for improved farming methods—all projects of Goodall. Additionally, Goodall educates women, giving women small capitals. Family planning, primary healthcare and AIDS education are unfolding aims.

In regards to the chimps, poaching in eastern Zaire has resulted in chimpanzees losing their limbs in wild snares, dying of gangrine, chimpanzee infants being stolen from their mothers, and the commercial trade of chimpanzee meat soaring. The roads of logging companies have opened ways into the forest, settlements beginning to spread. Humans are shooting all organisms within the surrounding—bats, elephants, birds—drying their meat in the sun and selling it to the vast majority of Africa's inhabitants who culturally prefer the meat of wild animals.

There is now an estimated 120,000 chimpanzees remaining. The deserts are sufferring from soil erosion. Rivers are silted up and forests are gone. People are dying from poverty, famine, and disease. There is pollution of industry, the ozone layer is degrading away, and flood and hurricanes are getting worse. But overconsumption among the affluent societies continues. "How is it that I have written *Reason for Hope*?" asks Jane.

"Many with whom I've shared the podium do not believe that there is hope."

Goodall names four reasons: the human brain, resilience of nature, the enthusiasm and commitment of youth and the human spirit.

Tim Choate—The Bucknellian

The first, the human brain, has the potential of being an environmental genius. Nature's resilience, the second, is evident in London where birds and fish were, for a time, gone; in Lake Erie, which used to be a 'fire hazard'; and on the grounds upon which the atomic bomb fell 1945 a tree today blooms where growth was predicted to cease. The third, the commitment of youth is evident in Goodall's organization Roots and Shoots which begun in Tanzania and has expanded to a dozen countries maintaining three projects including a hands-on animals project, human community outreach, and an environmental activity. The scope of these endeavors is broad and the work is inspiring. Finally, the human spirit.

"We all know people in all walks of life who have exhibited incredible inspiration," said Jane. She spoke of Mendella's rule over Africa, held up a weave made for her by a leper, and showed us the surgical glove of a man who lost his hands as a child but, intent on becoming a doctor, persevered and is today an orthopedic surgeon. She then revealed the account of a chimp Jojo who was shipped from Africa to America and placed within a group of chimps in a zoological park. A man, Rick, and his wife and child, visitors of the zoo, were witness to Jojo's attempt at escape from the threatening males in the group. Jojo made a leap into the moat surrounding the enclosure, not realizing he cannot swim. He began to drown and Rick, leaping over the safety barrier with all present attempting to hold him back due to the danger of the chimpanzee males, pulled Jojo from the water, and returned to his family unharmed. At hearing this story, an assistant of Jane asked Rick "What made you do it?" Rick replied that the chimp had looked into his eyes and it was like looking into the eys of a man—and he was saying "Won't anyone help me?"

And it is this look, said Jane, that is seen in children and animals across the world today. We must jump in like Rick—we have the power as individuals when this power is used collectively.

Coffee consumption questioned

By Debra Lowry

The coffee bean is vital to nearly 50 percent of the U.S. population which consumes a minimum two cups of coffee per day. Of this 50 percent, 25 percent drink about five cups daily, and another 25 percent consume 10 or more cups per day. The average consumption in the United States is 10 pounds of coffee per person every year, reports *National Geographic*. More than half a billion cups of coffee are drank daily in the United States alone.

One could estimate that at least 15,000 cups of coffee are consumed daily on the University campus. This estimation is based on the statistics for the U.S. population that does not even take college students into account. That college students depend on coffee to stay awake throughout the day and to get through all-nighters is a notion with which each student is familiar.

Courtesy of National Geographic

Why is consumption of coffee so high? The reason is that coffee contains the most popular and widely consumed drug in the world—caffeine. That caffeine is an addictive drug which results in an energy stimulus has been proven. Aside from providing this energy boost, caffeine is also responsible for many adverse effects. The average amount of caffeine found in one cup of coffee is between 50 and 180 mg.

One cup of coffe provides enough caffeine to produce an apparent temporary increase in mental clarity and energy level while reducing drowsiness. In some cases, it does improve muscular-coordinated work activity. Unfortunately, the amount of coffee needed increases with regular use. Besides providing a quick pick-me-up, caffeine is known to increase heart rate and cause a short-term rise in blood pressure.

Caffeine acts much like a diuretic, a smooth muscle relaxant, and a stimulant to gastric acid secretion, says *National Geographic*. This effect is associated with increased heartburn, urinary loss of several vitamins and minerals and ulcers.

In a moderate amount, caffeine results in an increased state of alertness and wakefulness. Regularly higher levels of caffeine intake may produce headaches, insomnia, anxiety, nervousness and other symptoms. People with a serious addiction to caffeine, consuming 1,000 mg (10 or more cups of coffee) of caffeine usually result in a disorder called caffeine intoxication. Symptoms for this disorder include appetite loss, weight loss, irritability, chills, flushing of the face, insomnia, difficult digestion, irregular heartbeat, and rambling thoughts and speech.

Caffeine is a proven carcinogen, reports *National Geographic*, but coffee contains numerous other carcinogenic chemicals that are created by the high heat of roasting. Chemicals include creosote, pymdine, tars and polycylcic aromatic hydrocarbons. There are suggestive but not conclusive data that coffee consumption leads to a higher incidence of cancers of the pancreas, ovaries, bladder and kidneys.

Women who are pregnant or breast feeding are warned to avoid coffee. Fetuses and newborns cannot metabolize caffeine in their livers so the effects of caffeine will remain in their body for long periods of time. Studies have shown that women who drank coffee during pregnancy increased in the rate of miscarriages, stillbirths, breech births and low birth weight.

Caffeine has been proven to be addictive, but by no means is it as addictive as alchohol or nicotine. When caffeine is suddenly removed from a regular coffee drinker's morning, he suffers from headaches, fatigue, depression and is unable to function at his usual level of efficiency. However, caffeine withdrawal symptoms last only a few days.

Doctors say that coffee is not harmful to most of us who consume moderate amounts, and thus there is no reason to stop drinking. However, if coffee makes you shaky, raises blood pressure, causes irregular heartbeat and interferes with your sleep, you may want to consider quitting your habit. There are two ways of quitting coffee: either "cold turkey" or by gradually decreasing the amount of caffeinated beverages consumed by 50 percent each day.

Doctors recommend that if you want to quit coffee, do it when you do not need to function at your best. The symptoms of caffeine withdrawal should pass within a few days. Eventually you should feel more awake and have more energy throughout the day than when you were drinking coffee. A few weeks or months after ceasing the habit most people come to realize that they feel increasingly better—without needing the coffee.

Now that you know about the effects of coffee, have they convinced you to quit? Or can you not imagine your life without that freshly-brewed cup of Starbucks coffee first thing in the morning? Is the eye opener worth the possible consequences?

Concrete-eating bacteria dispose of nuclear waste

By Jon Anson

Until recently, cleaning up old nuclear sites had often involved removing dangerous layers of contaminated concrete. This was a messy, expensive process and exposed workers to high levels of radiation. However, researchers at the Idaho National Engineering and Environmental Laboratory are studying a potentially safer and cheaper method to clean up contaminated areas. They have developed a bacteria-infested yellow gel that eats away at concrete and has the ability to clean floors and walls contaminated with radioactive material. The bacteria involved, *T. thiooxidans*, is one of the leading causes behind the corrosion of concrete buildings and bridges.

In the past, workers have been forced to slowly chip or blast away at contaminated concrete a few millimeters at a time. Not only does this expose them to high levels of radiation, but it can create clouds of radioactively-contaminated dust as well. The bacterial gel developed by researchers offers a safer but slower way to clean up waste. It works by feeding on sulfur-containing compounds in the concrete. The bacterium convert these compounds into sulfuric acid, which in turn eats away at the concrete. When scientists decide that enough concrete has been cleared away, the gel is allowed to dry out. When the gel is dried, none of the bacteria are able to survive. This allows researchers to accurately control the amount of concrete that is cleared away. The remains of the gel and the infested rubble can then be easily swept up and safely stored at a designated disposal site.

Researchers in Idaho have spent four years developing the process, and they plan to begin testing the gel within the next two months. It will be applied to contaminated concrete in a walkway of the Sellafield nuclear reprocessing plant in Cumbria, UK. Contamination in this area dates back to a fire in 1957. It will take some time to determine the effectiveness of the gel, as it is only capable of eating through a centimeter of concrete per year. Fortunately for researchers, however, most contamination can be found in the first few millimeters of concrete surfaces. If the testing is a success, researchers will have found a significantly cheaper and safer means of cleaning up nuclear contamination.

Dangerous dolphins?

By Brienne Terril

We think of dolphins as intelligent and playful animals, but recent research shows that these mammals practice infanticide and can kill other species for no apparent reason.

Marine researchers noticed a large number of baby porpoises washing ashore in the early 1990s with unusual injuries such as bruising, broken rib and spines and internal organ damage. In 1996 Dr. Ben Wilson of Aberdeen University in Scotland and his colleagues concluded that the bottlenose dolphins they had been studying were killing harbor porpoises and practicing infanticide.

"We weren't really that surprised to find that some species of dolphins practice infanticide. Examples of that kind of behavior are abundant in nature. What is surprising is the attacks on porpoises; there doesn't seem to be any good explanation for that," said Dr. Andrew Read, professor of marine mammalogy at Duke University, in an Environmental News Network report.

Courtesy of Environmental News Network

Female animals sometimes kill the offspring of other females, and males sometimes kill the existing offspring to make room for a new family—but none of these explanations apply to the dolphin circumstance. The only justification scientists have been able to find is that young male dolphins may be practicing their attack skills since the porpoises are the same size as dolphin calves.

With the increase in the number and the popularity of "swim with the dolphins" programs at many seaside resorts in Hawaii, Florida and Australia, researchers fear for the safety of the swimmers. There have already been reports of tourists being bitten, batted around and pulled under and many think it's a matter of time before more serious injuries occur. "Dolphins in the wild are like bears in that they are big wild animals. Normally they're not too interested in humans in that we're not good swimmers and, as food, we lack appeal. But if you disturb a dolphin, who's to say what might happen?" Read said.

The federal government along with several other groups are working to develop Watchable Wildlife Guidelines which will apply to both terrestrial and marine animals alike. "You don't go on safari and get out of the jeep to pet the zebra, you don't feed bears and you don't walk up to a moose to take its picture," says Trevor Spradlin, a scientist with the National Marine Fisheries Service. "Interacting with wildlife is always a high-risk behavior. People need to take a realistic look and put the wild back into the equation when they think of dolphins."

Superhuman savant skills possible

By Tamanna Hye

During our college years we often think that if we were endowed with superhuman mental skills it would be much easier to pass tests and complete papers before the crack of dawn. Today's research proves to us that we do possess these superhuman skills of which we are unaware. People already endowed with these skills are autistic savants—"people who score low on IQ tests but who nevertheless have seemingly superhuman competence in a specific area like music, art or maths," reports *New Scientist*.

This recent theory, proposed by psychologists Allan Synder and D. John Mitchell from the Centre for the Mind at The Australian National University in Canberra, postulates that savant skills are "possessed by everyone," and can be enhanced with modern-day technology. Synder and Mitchell think that savant skills are the "manifestation of brain processes" that occur in everyone, but are thrown into the unconscious backs of the brain. Through brain-imagining experiments, Synder and Mitchell formulated their theory from studying mathematically-adept savants. "In savants the suppression doesn't happen so they see the picture in fantastically detailed[1] components, like individual pixels in a photograph," says Synder.

The question arises that if "savant cognition" is happening in everyone, is it possible to reverse the consciousness and be aware of it? Niels Birbaumer of the Institute of Behavioural Neurobiology at the University of Tubingen, Germany, believes its possible. The reason why the savant skills are held back is because from a very early age, people are trained to think in conceptual ways, and to "extract meaning from the overall picture rather than concentrating on the concrete details of each perception." Autistic savants are unable to process things this way.

Micheal Howe, a psychologist at Exeter University who has studied autistic and non-autistic people explains, "Savants seem to just 'see' things effortlessly, but I think if a non-autistic chess player who has been immersed in the game for 30 or 40 years looks at a game in progress they just 'see' the position and the best moves in a similar way." Howe concludes, "The main difference between experts and savants is that savants do things which most of us couldn't be bothered to get good at."

The underlying moral is to cease strictly concrete thought-processing in our attempts at intelligence gain and allow our mind to wander, perhaps allowing superhuman competence to surface.

New Princeton professor Peter Singer: provocative and controversial

Alexander Piel '01 breaks down a recent debate between Singer and Adrienne Asch on the Princeton campus

SINGER From page 1

Part 3: The Debate: Singer's Side

Kraus began the session by welcoming everyone and summarizing the field of bioethics and its significance to the world today. He said the goal of this debate, in part, was to "increase student awareness and student thought on the topic of bioethics." Each speaker summarized his and her views and thoughts on not only bioethics, but also on disability in bioethics. Due to the broad nature of Singer's views, he could not comment on all that gained him such universal attention. Instead he explained how the criticism he receives is due to misinterpretation of his words or the failure to read his words in full context. The following was mentioned as a prime example: "if killing the hemophiliac has no adverse effect on others, it would, according to the total view, be right to kill him." He admits to saying that, but unless that sentence is read in full context, the meaning can be, and has been, easily misconstrued. The following is the full context:

When the death of a disabled infant will lead to the birth of another infant with better prospects of a happy life, the total amount of happiness will be greater if the disabled infant is killed. The loss of happy life for the first infant is outweighed by the gain of a happier life for the second. Therefore, if killing the hemophiliac has no adverse effect on others, it would, according to the total view, be right to kill him.

He remarked on how the mere change in our definition of terms since the early 1970s causes confusion between what he is saying, and what people are hearing. Two major groups of people oppose his views, those opposed to euthanasia under all circumstances, and disability advocates such as "Not Dead Yet."

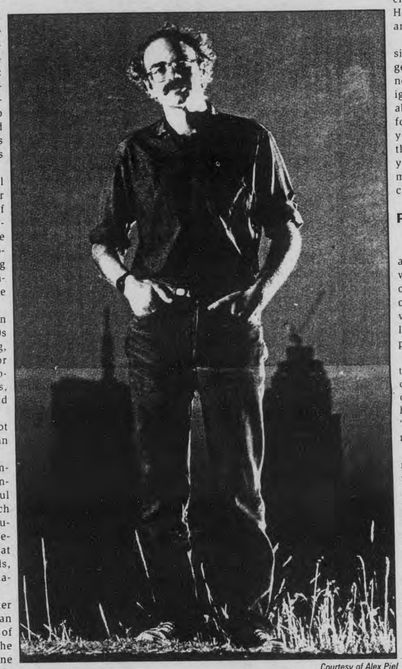
The question he posed was whether or not a life with a disability is less worth living than a normal life. He would argue yes.

Singer attempts to reduce suffering and increase happiness, as is defined by utilitarianism. His views contribute to a very powerful argument for animal rights. "Is it so much more seriously wrong to take the life of a human being than a non-human being?" He believes no. What is it about human lives that justifies taking the lives of all other animals, whether it be for food, medical experimentation or clothing, but not that of humans?

He concedes that, in his heart, a greater tragedy is felt when a human is killed than when a pig is. Is it because the pig is not of our species? No, he says. Is it because the pig is not capable of suffering? No. Everyone now knows that animals can suffer. The only reason we feel less when a non-human is killed is because they lack the very qualities that define the human species: the ability to reason, awareness not only of ourselves but also of our surroundings, and most importantly, our consciousness. His definition of a human being comes from 17th century philosopher John Locke who said that a human being is a "rational and self aware being."

What Singer is essentially arguing is that not all humans share these characteristics that separate us from other animals. This is crucial for Singer. For example, infants do not reason: they are not yet aware of their world and they are far from conscious beings. He says these fetuses/infants have potential for these things, but lack them in their current states. Singer argues that this potential is not enough to protect the infant. His argument states that the killing of an infant is wrong not because of the loss to the infant, for the infant cannot conceive of loss, but because of the loss experienced by the infant's parents.

Singer's first interest in disability began when he learned of a fairly common practice in medicine today. He discovered that doctors do not treat disabled infants as they do all other infants: often they withhold vaccines and modify treatments. Singer sees this as quite similar to his views, though demonstrated within a different context. In essence, these doctors intend for these infants to die, but instead of ending the life sooner, they prolong the life of the infant by reducing medicine and extending care. This practice is not condemned, although doctors must often waver between federal rules, personal morals and parental desires.



Courtesy of Alex Piel

Professor Peter Singer voiced his controversial views against those of his disabled opponent, Professor Asch, before Princeton spectators. It was his debut public appearance in the United States, attracting CNN and MSNBC.

According to Singer, two problems lie with this practice. The first—that parents are not involved in these decisions. The second— these infants are predestined to die but the process is artificially made into a slow one, thus prolonging the suffering. He thinks the parents should be making these decisions together with the doctor's assistance. Singer admits that not all parents feel the same way in terms of the future of their disabled child, whether the disability is hemophilia, Down's Syndrome or spina bifida. Many letters written to him from parents say had they known the amount of pain their child would endure throughout life, they would have aborted the fetus.

This is where the rest of us come in and where Singer talks publicly about what so many people speak about behind closed doors. As horrific as it sounds, Singer wants us to imagine the future of a disabled child, to question whether making that child live that life is fair when one is aware of the obstacles, the pain, the suffering that lies ahead. Here, the Princeton audience became silent and Singer raised his voice.

When he finished talking, the silence signified the viewer's consideration to forget the protests, to forget the pre-conceived notions of the GREAT PETER SINGER, to ignore the threats and the media press and absorb and reflect. Just when the new information begins to settle and you find yourself caught between what you once thought, what you should think and what you want to think, the Wellseley professor makes her entrance— the 1997 Blind Educator of the Year—the other side.

Part 4: The other side: Professor Asch

Professor Asch approached the podium and initially said nothing. Then she opened with "Well, Peter Singer and I do agree on one thing: he thinks his views are not out of mainstream and he is not entirely wrong." This was a surprise. "The reason I love bioethics is because reasonable people can disagree, and that's okay."

She conceded that it is false to contend that everyone values a normal life over a disabled life. There is not a single parent of a disabled child, Asch emphasized, who has not heard the phrases "You're a saint," "You deserve so much credit," or "You are remarkable."

The constant reminder of her disability makes it difficult for Asch not to fall victim to Singer's views. "If there is a monster, it is not Peter Singer, but it is his views. They are monstrous and they are wrong." Astonishingly, Asch adds that she supports the autonomy of competent individuals and as a result is pro-choice.

Asch however attacks Singer's utilitarianism, claiming that he is wrong in his premises. Before accepting the fact that we should try and preserve the happiness for the greatest number, she desires to know how we can measure happiness. How does Peter Singer know what is more valuable than something else? "What makes me happy does not necessarily make you happy, right?"

"To claim that the lives of disabled persons are valuable, I don't have to claim that the disability is valuable. There are other aspects to people, other characteristics."

Asch believes the misconception we hold in regards to disability stunts the life of a person and burdens the family disallowing for other redeeming attributes. Disabled persons have other interests, desires and emotions. For Asch, the parents who are aborting their disabled infants lives are not examining life as a whole, but instead only one facet.

"It's wrong," says Asch, "to say that all pleasures are on one platter and that life without a disability is always greater than a life with one." "The problem lies within society where we have accepted the notion that a disability is universally an unfavorable form of human variation: one that can never be compensated for, Singer's views are simply misguided."

Singer replied briefly, "I don't have to believe that ALL life without a disability is greater than a life with one. Merely that, with all else being equal, that premise is true." He concedes that while we are prematurely judging the life of these infants, we are always making choices under circumstances of uncertainty. All we can do is to judge situations by what we do know. What we do know is that disabled infants will experience a greater amount of suffering than those who are not.

Asch accused Singer of thinking like a racist or sexist in that Singer was obvious in his preference of an individual with one characteristic over another. "One-hundred percent discrimination," she says. For Asch, a disability is not a blessing and not a curse. Just like temperament or physique or height or hair color, it is a trait.

Part 5: Response from the crowd

A question-answer session hosted by Kraus followed. Questions poured in from the crowd, most of them direct and careful to avoid personal attack of either guest.

A young man stood up and asked if Dr. Asch thought the life of a cow to be more valuable than the life of a defected human infant. Clearly, Singer replied yes. Dr. Asch hesitated initially and then responded with "I don't know if the infant's life is more or less worthy. I just have to believe it is worthy." Singer responded, "I don't feel that yours is an acceptable answer at a debate like this." Asch struggled for words until finally claiming that yes, the life of any child is more valuable than any non-human—even the most cognitively defected infant has a higher ability to plan and exhibit more rationale than any other animal. Her disinterest in the nature of the question was intriguing.

In the final few minutes, Singer was asked if he thought his views discourage people from putting money into resources for handicapped youth and does he foresee his utilitarianism as being accepted to the point of changing society entirely—will we eventually begin choosing our children for football player-qualities, blue eyes and blonde hair, merely because we are striving to eliminate all suffering? Singer explained that the Human Genome Project led by Francis Collins in Washington, D.C. has already forced us to consider these questions. He is not the creator of the problems and issues of today's society. He is merely forcing us to address them.

Singer was then asked if the killing of a highly cognitive-functioning human infant was the same as the killing of a less functioning human infant. His response—"absolutely not."

He compared taking the life of an actual life versus the life of a biographical one. The latter having the ability to tell a story and the former not having that ability. To Singer, the killing of the biographical life ends the story that is being told. For him, a story does not exist for the other.

Asch was asked at the end if Singer should have been allowed a position as a faculty member at Princeton. Without hesitation she replied, "Absolutely. I believe in academic freedom. I believe in academic debate. It is not Peter Singer who is the monster, but his views."

Oak Ridge Science and Education Institute offers internships for students and faculty

Internship, fellowship, scholarship and research opportunities available

Hands-on research opportunities in state-of-the-art national laboratories across the country as well as tuition funding are available to students and faculty through the science and engineering education programs administered by the Oak Ridge Institute for Science and Education (ORISE).

ORISE administers approximately 100 internship, fellowship, scholarship, and research participation programs for multiple federal agencies, including the Department of Energy,the Department of Defense, the Centers for Disease Control and Prevention, the National Institutes of Health, and the Environmental Protection Agency.

Most appointments are for eight to ten weeks during the summer; however, several academic-year, semester, and year-round opportunities are offered. Some sabbaticals are also available to faculty as well is funding for on-campus research.

Stipends and travel allowances are included for most research participation programs. For fellowships and scholarships, tuition and fees are also covered. Some programs also include travel to and from professional meetings as well as dislocation/moving allowances.

To learn more about these opportunities, visit the ORISE Educational Opportunities Web page at http://www.orau.gov/orise/educ.htm. Each listing details eligibility requirements,disciplines, locations, deadlines, benefits, and contact names/numbers.

This information is also included in ORISE's Catalog of Education and Training Programs. You may request a hard copy of this catalog by contacting Maggie West at westm@orau.gov or (423) 576-3424, or download the PDF version from the Web site.

The Oak Ridge Institute for Science and Education was established by the U.S. Department of Energy to undertake national and international programs in education, training, health, and the environment. ORISE and its programs are operated by Oak Ridge Associated Universities (ORAU) through a contract with the U.S. Department of Energy. Established in 1946, ORAU is a consortium of 87 colleges and universities.

Cocktail theater auditions to be held

Students in Theater 240 directing class have been preparing all semester for their one-act plays with performances this fall

By Elizabeth Eno

The Cocktail Theatre Series, a University theatre tradition, is returning once again for the fall semester season. The series of student directed one-act plays was started by Harvey Powers in the 1950s as a part of the Theater 240 course in directing.

Powers' vision on the role of theater in the university environment led to the development of the University's theater program. His ideas built the program up from a sector of the English department to an established, separate department in 1986. "Powers was really the founder of the theater department," Bob Gainer, associate professor of theater and instructor of the directing class said.

The plays are the final major project for students in the Theater 240 class. The student directors are in charge of all aspects of production including selecting a play, arranging auditions, designing a set and most importantly, communicating with the actors. Gainer described the students goals in directing the Cocktails as learning to work with the actors to tell a story.

In order for them to achieve this goal, the students must focus on applying the principles of play analysis to their creative work rather than the use of elaborate costumes or set design. The students use background from their own performance experiences in order to communicate their ideas to the actors they will work with.

"One of the greatest strengths of this class is the extent of responsibility that we, as directors, receive. It's experimental learning at its finest, I think," Kate McDevitt '01 said. McDeavitt will direct David Howard's play, "Electric Roses."

This year's series includes seven plays that will be performed at 5 p.m. beginning Wednesday, Nov. 17 in the Tustin Studio Theater located next to the Gateways. The one-acts performed this year will be: "Electric Roses," "I'll be Home for Christmas," "Perfect," "Ferris Wheel," "Anything for You," "The Rising Moon" and "This Property is Condemned."

Auditions will be held from 7 p.m. to 10 p.m. on Tuesday, Oct. 26, in Coleman 218. "The plays are all of a realistic style that is accessible to young actors," Gainer said, encouraging all interested people to audition.

"Since the rehearsal period is relatively short and the plays are only about ten minutes in length, this is a great opportunity for newcomers and experienced actors alike to explore the stage at the University," McDevitt said.

Between the seven plays, there are a total of 12 roles for men and 11 roles for women available. Interested students are encouraged to look over the scripts on reserve in the library under Theater 240 before auditioning. Each of the student directors will select a short scene from their plays for the auditions.

Beetna Kim- The Bucknellian

The theater 240 directing class prepares for the Cocktail theatre performances. Auditions will be held from 7 p.m. to 10 p.m. on Tuesday, Oct. 26 in 218 Coleman.

Burns demonstrates the power of love in the face of tragedy

In a powerful one-man show Kerry O. Burns leads his audience through a journey of life, love and death as he relives the relationship between him and his Timothy Alan Burns. In a 90 minute piece that he wrote himself, Burns proves to be a powerful storyteller as he leads the audience through his brother's early years growing up in New Jersey as their Irish bricklayer father drove his boys to be football players and "real men."

When their father discovered that Timothy is gay, the family was split apart and Tim was kicked out of the house. He ran away to Atlanta with $300, a battered suitcase and a camera to pursue his dreams of becoming an artist. Kerry followed his father's footsteps in construction work and for years he refused to even acknowledge his brother because of the fact that Tim is gay. Eventually, the two brothers began to reconcile as they wrote letters.

As Timothy found success as an artist with his hand-painted photography, he inspired his younger brother to search for his own creativity. He soon displayed his pieces in galleries and museums throughout the Southeast. Then, at the heigth of his aritistic career in the summer of 1986, Timothy was diagnosed with full-blown AIDS.

With raw emotion and passion, the actor leads his audience through the decision he made in moving to Atlanta to care for his brother. Ranging from relaxed humor to shouting rage at the frustrations of dealing with a disease that was taking his brother from him, the actor leads his audience through an emotional powerhouse of a story.

Kerry soon discovered that his brother's illness is not the only fight he has to face, but that society's prejudices are just as fierce. Ultimately, love wins out. While the two brothers were not prepared for the hell they endured together, they experienced a brotherly love neither man knew he was capable of.

This true story of a heterosexual brother and a homosexual brother who realize, through a terrible tragedy, that love is more powerful than difference leaves a mark on all who hear it. Kerry O. Burns will perform "Marking of the Soul" at 7:30 p.m. Monday, Oct. 25 in the gallery theater in the Langone center.

Press release courtesy of Kerry O. Burns

Irish poet Eavan Boland impresses campus with lecture and poetry

By Jolene Hart

The events surrounding this fall's Irish Focus Semester have already been attributed much success, due most recently to the visit of Irish poet Eavan Boland. During her stay at the University, Boland presented the campus community with a poetry reading and lecture which examined views surrounding Ireland at the end of the millennium. Boland's lecture, "Re-Imagining Ireland," was held Sept. 29 in Bucknell Hall before a diverse crowd of campus and community members.

Boland began her discussion by introducing the idea that, "every step toward an origin is an advance toward silence." Relating her thoughts on Ireland's political struggles to her poetry, she explained its long association with the national movement. Throughout the rest of the lecture, Boland presented her views on the social and political development of her native country. "The idea of re-imagining Ireland takes in volatile and heated ideas," she said.

Boland went on to share a series of stories and personal anecdotes about growing up in Ireland. She spoke of her experiences as a young adult, including her first job and her early career as a female journalist.

It was in these early years that Boland first grasped the true importance of the woman's role in the struggle for Irish independence. Boland ended her lecture with the opportunity for her audience to ask more about her ideas. A common focus was the political future of Ireland. "Nobody has ever been able to predict it. There is a very substantial entrenchment and disagreement, but there is also a political will for it to be resolved," she commented.

"Like everyone else Irish, I love my country...I understand who died for it." she added.

Boland's visit was made possible by the Stadler Center for Poetry, the Irish Focus Semester and the University's Association for the Arts. The next event in the Irish Focus Semester will be the theater department's production of "Tea in a China Cup", a work by Northern Irish playwright Christina Reid, at 8 p.m., Oct. 22-25, in the Harvey Powers Theatre in Coleman Hall.

Ciaran Carson fills Bucknell Hall with his beautiful poetic and musical talents

By Rebecca Wahl

Bucknell Hall opened its doors to the musical and written talents of Ciaran Carson last Monday. Born in Belfast, Ireland in 1948, Carson grew up with Gaelic as his native language. After graduating from Queen's University, he worked as the traditional officer for the Arts Council of Northern Ireland until his resignation in 1998.

Carson's written work includes numerous collections of acclaimed poetry. *The Irish for NO*, published in 1987, won the *Irish Times*/Aer Lingus Irish Literature Prize and his 1994 publication *First Language* won the T.S. Eliot Poetry Prize for outstanding British and Irish poetry. Also a talented flutist, Carson has authored a pocket guide to traditional Irish music. Topping off this esteemed list of accomplishments is a recently published memoir detailing Carson's life in Belfast.

As a poet, Carson is best known for his wit, varied use of verse and form and his ability to convey the experience of the modern, urban writer. As the lights of Bucknell Hall dimmed, Carson prepared to begin his reading. However, he did not open with a poem but instead chose to introduce his musical talents.

Pulling a mysterious box out onto the podium, Carson withdrew his flute and played a piece of traditional Irish folk music. This song set the tempo for the rest of the reading. Carson reads his poems with passion and sincerity yet did not hesitate to make a quick joke between works, to sing a few lines of one poem or even to play another song on his flute.

The themes reiterated throughout Carson's reading are those of love, loss, fear and remembrance. Carson's poetry focuses heavily on life in Belfast. The dark and gritty imagery conveyed in the poems reflects the chaos of living in this environment. After reading a dozen or so of his works, Carson put down his book and resumed on his flute. The soft strains of his instrument closed the reading; its bittersweet sound a compliment to Carson's written word.

Stephanie Metz- The Bucknellian

Carson is not only a gifted poet, but also a talented flutist as seen at his performance in Bucknell Hall last Monday.

University's John McPherson '83 pays visit to comics fans

By Courtney Spohn

In the midst of admiring fans, University alumus John McPherson '83 signed collections of his comic strip "Close to Home" while listening to his fans as some acted out their favorite strip.

Having graduated from the University in '83 with a degree in mechanical engineering and English, McPherson returned over the Homecoming weekend, enjoying the laughter his exhibit in the Bucknell Art Gallery elicited. Amid some good-humored sarcasm, he spoke about his career and lessons he learned from the University, and passed along advice to current Bucknellians and aspiring cartoonists.

The year 1983 found McPherson fresh out of college and in the midst of a bad job market. He spent a year and a half looking for work, knowing that he wanted to do something creative, but instead he found himself in a mechanical engineering job. In the fall of '84 he began drawing cartoons as a hobby. McPherson sent away his cartoons to various magazines and, in June of '85, his first strip was published.

Beetna Kim- The Bucknellian

John McPherson '83 is the author of the comic strip "Close to Home."

In the following years, McPherson put more time into his hobby than his job working as a freelance cartoonist for over 40 magazines by '89. In 1990, two books of "Close to Home" were published. It wasn't until two years later that McPherson quit his job as an engineer and devoted himself to being a cartoonist, turning his hobby into a career. In November of '92, "Close to Home" debuted in syndication. Today, "Close to Home" appears in over 700 newspapers worldwide. McPherson sometimes wonders how well his humor will translate overseas. "Wide-spread publication has taught me what an impact our culture has on the rest of the world," he said.

McPherson said his time at the University helped him approach cartooning as a business. Studying and working as an engineer gave him analytical skills that, McPherson said, not all artists have.

McPherson said he is able to market himself and view cartooning from its business aspect. He compares the pressure of his deadlines to the pressure of writing a school paper. McPherson tries to average a strip per day, but knows that it doesn't always work out that way. He said it is hard to keep his material fresh, but revels in the fact that he gets to be funny all day.

"I would tell the current student to pursue the things in life you love. I succeeded at something I wanted to do," he said. "Draw like crazy and read a lot. A cartoonist needs to have an overall understanding of life and what's funny."

Weis Center will host Carl Nielson Philharmonic Saturday

Fall mainstage, *Tea in a China Cup*, to be performed

By Krista McCabe

The time of year when months of practice, hard work and talent culminate into four nights of outstanding theater, has arrived with the opening of the department of theater and dance's fall mainstage, *Tea in a China Cup*. Written by Northern Irish playwright Christina Reid, the play is directed by Bob Gainer, associate professor of theater.

Set in Belfast in 1939, the play is a part of the University's fall focus semester on Ireland. Gainer said that the focus semester promotes a cross-disciplinary dialogue and collaboration between academic departments.

John Rickard, chair of the English department, acted as the dramaturgical advisor to the play. Attending the early rehearsals of the show, he helped the student actors choose movies to watch and articles to read in order to enhance their knowledge about Irish culture and history. In addition, Rickard recently returned from a visit to Ireland and brought authentic Irish music for the actors to learn. Gainer said that he was thrilled for the opportunity for the English and theater departments to work together.

Tea in a China Cup deals with a young girl trying understand herself. Throughout the play, she is faced with many tough decisions involving family, love and her future. The issues the characters face relate to issues and decisions facing students at the University. The show asks us, must we do what our parents would like or do we follow our own dreams? Gainer said that he believes *Tea in a China Cup* will connect with students.

Gainer, who has worked as director for the past two months, said he is looking forward to opening night. "There has been so much collaboration and hard work by actors, set, costume, lighting and sound designers, the dramaturg, technicians and all members of the department of theater and dance that it will be thrilling to see all of the contributions come together in an integrated theatrical work of art," Gainer said.

Tea in a China Cup opens at 8 p.m. tomorrow night in the Harvey M. Powers Theater in Coleman Hall. Additional performances are at 8 p.m. on Saturday, Sunday and Monday. Tickets are $5 and are on sale at the Langone Center box office or can be bought at the door.

After the performance on Saturday, a forum discussion involving the audience, actors, all involved in putting the show together and a special panel of guests will be held.

Led by Gary Grant, associate professor of theater, the forum will give audience members the opportunity to understand the amount of effort required to put up a mainstage show. Actors will answer questions about their training for their characters as well. In addition, Sam McCready, a native of Ireland and the artistic director for the Lyric Theater in Belfast where *Tea in a China Cup* was first produced, will be in attendance at the forum as well.

Courtesy of theatre department

Ann Bonner '00 plays "Maisie" while Hillary DePiano '02 plays the Grandmother and Cassandra Pisieczko '00 stars as "Beth." Pisieczko returns to the University stage after a year abroad.

Scenes from *Tea in a China Cup*...

Courtesy of theatre department

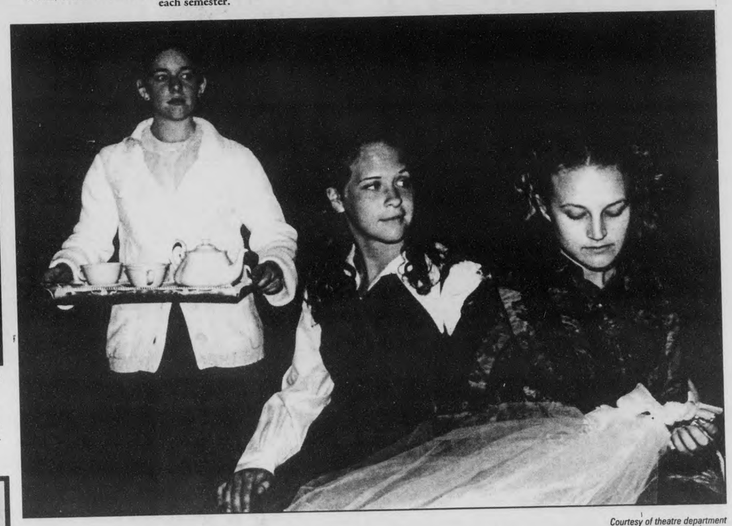
John Klaitz Jr. '01 plays the Grandfather with Alexander McCausland '02 takes on the two roles of "Samuel" and "Sammy." Jennifer Schmernumd '00 plays "Sarah" as DePiano and Bonner look on. The actors underwent extensive training in mastering the Irish dialect earlier in the semester. Barry Kur visited the University as the Irish Dialect coach.

Courtesy of theatre department

Schmermund and Pisieczko share a moment onstage as mother and daughter. Both actresses are members of an outstanding senior class of theater students who have worked throughout their years at the University to strenghten the department. Their efforts are reflected in the quality performances the department produces each semester.

Courtesy of theatre department

Pisieczko discusses her mother's future plans with Renee Awad '02 who plays both a clerk and a fortune teller. The costumes for the show were selected and designed by Paula Davis-Larson and her assistant, Amy Rinker, both newcomers to the University. The set was designed by Elaine Williams and Heath Hansum created the lighting design.



Courtesy of theatre department

Schmermund brings "tea in a china cup" to "Theresa," played by Kathleen McDevitt'01 and Pisieczko. The play, by Northern Ireland playwright Christina Reid, is performed in celebration of the University's fall focus semester on Ireland. John Rickard, associate professor of English, acted as the dramaturg for the play, helping the actors to understand their characters through achieving an understanding of the Irish culture.

"Tea in a China Cup" will be performed at 8 p.m. Friday, Saturday, Sunday and Monday in the Harvey M. Powers Theater in Coleman Hall.
Tickets are $5 and can be purchased at the door or in advance at the Langone Center box office.

Women's soccer hits highs and lows in busy span

By Andrew Bevan

The last two and a half weeks have been quite busy for the women's soccer team. They played a total of six games in 10 days.

Through this busy span the team hit some lows with its struggles in Boston but ended on a high note with an exciting overtime victory over Patriot League foe Army this past Friday.

The first game in this ten-day stretch was a matchup against Ivy League power Princeton. The Bison put up a strong effort but in the end were shut out by the Tigers, 3-0. Freshman goalkeeper Laurie Purse had a solid performance in net with 13 saves.

"It was the best team we played all year," head coach Chrissy Findlay said.

The Bison then traveled to Boston for the weekend for a pair of games. On Saturday, Bucknell faced off against Patriot League foe Holy Cross. Even though they outshot their opponent 13-9, the Bison allowed a goal early in the second half and were unable to find the equalizer, falling 1-0.

"The team did not play well against Holy Cross. We were a step off against them," Findlay said.

Bucknell lost an extremely close match against Northeastern the following day. The Bison jumped to an early 2-0 lead off a pair of goals from senior forward Katie McElligott. However, Northeastern raged back in the second half, scoring the tying goal in the 82nd minute and netting the game-winner in the last minute of the contest. Purse '03 added another strong performance in goal with nine saves.

"We were up 2-0 and let them back in the game. They played on emotion and beat us," Findlay said.

Other notable performances from the trip were the continued strong play of Meredith Barnes '02 and Tara Utchel '03 as well as the emergence of freshman defender Karla Killian, whom Findlay said "became an offensive threat from the back."

The Bison returned home to face Howard on Wednesday. Bucknell put in a dominating offensive effort with 39 shots in a 5-2 victory. At one point the Bison were up 3-0 on goals by McElligott '00, Sarah Klang-Glienna '02 and freshman Caralyn Desautels.

After Howard scored twice to cut the lead to one, the Bison finished off the scoring and any hope of a Howard comeback with another goal from McElligott'00 and one from Lindsay Slomer '02.

"We were obviously the better team, but we learned we can't underestimate anyone on our schedule," Findlay said.

While most students were heading home for fall break, the Bison traveled to sunny California for a set of games with Cal-State San Bernardino and Pepperdine. The trip was a great success due in large part to the efforts of assistant coach Danielle Rausch, who worked for a year putting the trip together.

Besides playing soccer, the team visited Six Flags amusement park and the Hard Rock Cafe and even got to be part of the audience for the Jay Leno show.

In their first game against Cal-State San Bernardino, the Bison

The Bison travel to Lafayette for a key Patriot League game this Saturday.

Bison running well

By Rose Sedo

Over the past couple of weeks, the Bucknell men's and women's cross country teams have been continuing their successful seasons. Sweeping the competition at home on October 2 and beating nationally-ranked teams in Indiana on October 16, the Bison have been steadily preparing for the Patriot League Championships.

On October 2, the Bison hosted Mount St. Mary's, Shippensburg, Rider and West Virginia. Overall, the men defeated all four of their competitors, beating Mount St. Mary's by 23 points, Shippensburg and Rider by 35 points and West Virginia by 21 points. The women also finished off the competition, defeating Mount St. Mary's and Rider (15-50), Shippensburg (16-47) and West Virginia (22-37).

Individually for the men, co-captain David Bronfenbrenner '00 led Bucknell's pack and was also the second-place finisher overall, crossing in a time of 25:07.00.

On the women's side, Becky Marshall '02 and senior captain Jen Hart crossed the line just three tenths of a second apart. Marshall finished second individually in a time of 17:51.3, while Hart placed third in 17:51.6.

Incidentally, the prestigious 18 minute mark was broken three times in the same race.

"I have never had more than one runner go under 18 minutes at home before this race. Here we had three runners that went under that mark, and two followed right behind them," head coach Art Gulden said.

Bucknell competed again on October 16 at the Pre-NCAA meet in Bloomington, IN — again with exceptional results.

Unfortunately, on the women's side, too many competing teams starting all at once led to some difficulties at the beginning of the race, with a Bucknell freshman being knocked down.

"Had the circumstances been different, it would have been nice for the women to be in the top 20. Still, we couldn't be going into conferences with a better situation," Gulden said.

Senior captain Carli Graytock agreed. "We are healthy now and we are running consistently. Our potential is our greatest asset for the future, and we couldn't be more excited about Patriot Leagues'," Graytock said.

Although the men didn't perform to their high expectations, they hope to bounce back for conferences.

"We went out really hard and beat a good West Virginia team. But although the men are ready physically, we need to become mentally prepared," Gulden said.

Mental toughness, however, should not be hard to achieve, considering that the men are in top form.

"We have been racing well, but not tough mentally yet. Basically, we just need to bring it all together in the next week or two," Bronfenbrenner said.

The Bucknell cross-country team's next race is the Patriot League Championships on October 30 at Lafayette.

Steph Mertz-The Bucknellian

The Bison will compete in the league championships on Oct. 30.

Men's soccer endures trying times

By Katie Yingling

The last few weeks have been some of the most trying for the Bucknell men's soccer team, as they doubled their losses, tied Philadelphia Textile, and went into overtime in three out of five games.

Despite all this, the Bison have come out on a high note, winning their first game in four this past Tuesday against SUNY Stony Brook.

When the Bison faced Army on October 2, they led the entire game by two goals until late in the second half, when Army scored two goals within thirteen minutes.

Tim Choate-The Bucknellian

Bucknell's four game win streak was snapped by a tie to Philadelphia Textile. The Bison look to get back on track against Lehigh at home Saturday.

The score remained tied until Sam Chamovitz '01 scored to complete his hat trick with less than two minutes left in the second, sudden-death overtime.

The victory over Army completed Bucknell's second four-game winning streak this season.

Bucknell's next game against Philadelphia Textile ended its winning streak, as the Bison competed in their second double-overtime game in a row.

After Chamovitz's goal in the first ten minutes of the game, the Rams were unable to answer until the eighty-eight minute mark. Neither team was able to break the 1-1 tie during the overtime periods, and the game ended as a draw.

The Bison were unable to pick themselves up for their next match against Bowling Green, losing 5-1. The lone Bison goal was scored by junior Geza Lendvai-Lintner.

In its third overtime game in four contests, Bucknell lost 2-1 to Fairleigh Dickinson, logging their fourth loss of the season.

Chamovitz found the net to tie the game for the Bison late in the second half, but the momentum of the goal was not enough to carry Bucknell to a win.

Despite the loss, the contest against FDU earned Patriot League Player of the Week honors for two Bison: Chamovitz, who is the team's leading scorer, and goalkeeper Nate Fitzgerald '00, for his thirteen defensive saves against FDU.

The Bison were suffering from the loss of several key players to injuries, but they finally seemed to pull back together for the their game against SUNY Stony Brook this past Tuesday. Bucknell walked away with a 1-0 victory.

"I think we've picked ourselves back up and are ready to face the rest of our schedule," said Erick Davis '01.

Bucknell's next match is against Lehigh at home on Saturday.

BEYOND THE BUBBLE

Yankees, Braves Reach World Series: Tuesday night's 11th-inning, bases-loaded walk to Andruw Jones sent the Atlanta Braves back to the World Series for the first time in three years and the fifth time in the '90s. They now prepare to face the same team that beat them in the 1996 series and the defending-champion New York Yankees.

Atlanta reached the National League Championship Series with relative ease and expected few problems against the New York Mets. New York, who had not been in the postseason since its World Series victory in 1986, managed only 3 wins in twelve regular-season meetings with the Braves. Games One, Two and Three of the series went pretty much as anticipated. Atlanta relied on strong pitching and timely hitting to take all three games by the scores of 4-2, 3-2 and 1-0 respectively.

The Mets refused to die, however, as they rallied in the eighth inning of Game Four for a 3-2 victory. The following night the two teams remained deadlocked at 2-2 until Atlanta took a one-run lead in the top of the 15th inning. But Robin Ventura answered with a game-winning grand slam in the bottom of the inning to keep the Mets' hopes alive. The series returned to Atlanta for game six and the Mets looked ready to pull off the impossible once again. After putting themselves in a 5-0 hole in the first inning, New York battled back to tie the score at 8-8 and send the game into extra innings. Todd Pratt's sacrifice fly in the top of the 10th brought home Benny Agbayani from third base and the Mets had a 9-8 lead. But Ozzie Guillen re-tied the score in the bottom of the inning with an RBI single. The game went to the bottom of the 12th still tied at 9-9. Atlanta loaded the bases against Kenny Rogers, setting up the series-winning walk to Andruw Jones.

The Yankees, meanwhile, had their hands full with the Boston Red Sox. The arch-rivals met for the first time ever in the postseason and they did not disappoint. Game One saw Yankees' centerfielder Bernie Williams drive a game-winning home run over the centerfield wall of Yankee Stadium in the bottom of the 10th inning. In Game Two, New York rallied for two runs in the 7th inning to grab a 3-2 victory and 2-0 series lead. The series moved to Fenway Park for Game Three, where the Red Sox bats finally decided to come alive. Boston exploded for 21 hits in a 13-1 spanking of New York. Game Four was a close battle for eight innings until Ricky Ledee smacked a 9th-inning grand slam to give New York a 9-2 victory. Boston was victimized by two blown calls late in the game, but then their four errors didn't really help either. The Bombers got two quick runs in Game Five and that was all they would need. Chuck Knoblauch opened the game with a single and Derek Jeter followed him with a two-run home run to the deepest part of Fenway. Starting pitcher and series MVP Orlando "El Duque" Hernandez gave the Yankees seven shutout innings in the pennant-clinching 6-1 win. New York will now attempt to defend last season's World Series title against the Braves.

The Stilt is Dead at 63: Wilt Chamberlain, the man who shattered NBA records night after night for fifteen years, was found dead in his Bel Air home on Tuesday, October 12th. The cause of death has been attributed to congestive heart failure.

Chamberlain, who stood seven-feet, one-inch tall, was simply one of the greatest basketball players ever. By the time he retired in 1973, "The Stilt" held the records for both career points (31,419) and rebounds (23,924). He never fouled out in over 1,200 regular-season and playoff games. He was the league MVP four times. He went to the playoffs thirteen times and won two championships. But probably his most famous achievement came on March 2, 1962 when he scored 100 points in a single game.

Rams Continue Undefeated Start: The St. Louis Rams had the league's worst record in the '90s before this season. Now they can't seem to lose to anybody. After opening the season with victories over Baltimore, Atlanta and Cincinnati, the NFL's only undefeated team continued its winning ways with a 42-20 thumping of the San Francisco 49ers two weeks ago. The Niners, who have traditionally owned the NFC West, played well but could not score points against the Rams' stingy defense, which is currently ranked third in the NFC. St. Louis then traveled to Atlanta for their second meeting with the Falcons this year. Atlanta (1-5) has been having serious trouble in trying to defend last season's NFC title and they had even more trouble against the Rams. St. Louis scored four times in the first half, using nearly every method possible to put the ball in the endzone. Kurt Warner threw a 4-yard touchdown pass, Marshall Faulk scored with a 6-yard run, Tony Horne returned a kickoff 101 yards for a touchdown and Grant Wistrom scored after returning an interception 91 yards. In the end, the Rams' 41-13 victory sent a very real message to the rest of the NFL: you're not going to be kicking us around anymore. And just when you thought it couldn't get any easier, this week they will take on the Cleveland Browns, the league's only team without a win (0-6). If St. Louis wins, it will be its first 6-0 start since 1985.

Compiled by Matt Fraser

Quote of the Week:

"To hell with New York fans, they're a bunch of stupid (expletives) anyway... I'd say the majority of them aren't even human."

Remember, play hard and have fun!

World Series time again!

By Sean Houston

Its that time of year again. We're all back from fall break and resuming our busy lives. But the frenzy of studying, interviewing and applying for graduate or professional schools will shortly be interrupted by an event that none of us should miss.

I am referring to the Fall Classic, the World Series of baseball, which starts Saturday night in Atlanta. This will be one of the most anticipated October contests of the decade, as the two best teams in baseball square off for a rematch.

Three years ago, the New York Yankees beat the Atlanta Braves in 6 thrilling games, winning four in a row after dropping the first two. This fall's World Series promises to be even better.

At stake is the distinction of being labeled the "Team of the Decade". The Atlanta Braves have won eight straight division titles, are making their fifth trip to the World Series during the 90's and were world champions in 1995. They haven't been the national league champions since 1996 and are thirsting for revenge on the Yankees. The Yankees are intent on winning their second consecutive world championship and third in four years.

Although they are not the same juggernaut which swept the Padres last year, winning an AL record 125 games in the process, the Bronx Bombers are still a lot better than the Braves. The Yankee's post-season starting rotation of Orlando Hernandez, David Cone, Roger Clemens and Andy Petitte matches up well with the Braves' rotation of Greg Maddux, Kevin Millwood, John Smoltz and Tom Glavine.

Both teams have excellent fielders in the outfield and infield (with the exception of Yankee second baseman Chuck Knoblauch, affectionately known to his fans as "Blauchhead".) The bullpens of both clubs are similarly excellent.

The outcome of this series will hinge upon offense and health. In these regards, the Braves cannot match the Yankees. Injuries to Andres Galarraga and Javy Lopez have weakened the Braves' offensive attack. The Braves' hottest hitters, Eddie Perez and Brian Jordan, also appear to be hurting. The Yankees, by comparison, have an all-star offensive talent at every position. With the exception of Chipper Jones vs Scott Brosius and the starting pitchers' slot , the Yankees outgun the Braves everywhere in the lineup, and they also have a stronger bench.

But nothing is certain. Post-season series are often decided by the unpredictable heroics of little-known players. That annoyingly incessant chant (OOOOOOOHHHHHH) of Atlanta spectators, and the "tomahawk chop" might just be enough to drive the Yankees insane.

Prediction: Yankees in five

SOCCER from page 14

were by far the stronger team but had difficulties scoring and lost 1-0. "We were the much better team, we just could not finish," Findlay said. "This game was the epitome of our entire season. We can be successful on the field, but if we can't score, we can't win games," Findlay said.

The following day the Bison put in a strong effort against a very good Pepperdine team. Bucknell got on the scoreboard first with a goal by Melissa Montefusco '02. "(Montefusco) has been playing very well. She is a spark on the field," Findlay said.

The Bison fought hard but eventually lost in overtime, 2-1.

"The California trip was a stepping stone to beating Army. Pepperdine was an extremely competitive, well coached team that challenged our physical and mental abilities as players," Meredith Gannon '02 said.

After their California trip, the Bison had a full week to prepare for their Patriot League contest with Army this past Friday. For Bucknell, this game was a must win.

"I told the team it was going to be a battle, and we were as good as them and they were as good as us, and the team that sticks it out for 90 minutes will win," Findlay said.

After falling behind very early in the second half, the Bison battled back to even the score with a tally from Utchel, who finished home a cross from Montefusco.

At the end of regulation the score was tied and the game proceeded into overtime. Katie McElligott scored in the second overtime off a pass from Utchel, sealing the crucial victory for the Bison.

"I'd have to say that's the best complete game we've played all season. We hadn't been coming out as strong as we should have for the last few games and lost some that should have been wins. With Army, though, we knew we had to win if we want to have a shot at making the tournament, and it turned out to be a great game," senior tri-captain Katie Senderowitz said.

This week the Bison travel to Mount St. Mary's on Wednesday and to Easton on Saturday to face Patriot League rival Lafayette in another must-win game.

"I think the team has managed to play as a cohesive unit despite its wins and losses. It is easier to do this when you are winning and the fact that the team has done this is exceptional," Rausch said.

FOOTBALL from page 18

Bucknell lead to 35-13 after a blocked extra point attempt. The Bison were flagged for nine penalties for 94 yards in the game, and Gadd noted that he was especially disappointed with his team's two personal fouls.

But that would be as close as the Dukes would get, as Marrow would find the endzone on one and 30-yard runs on Bucknell's next two possessions.

The Bison offense shrugged off the difficulties it had in capitalizing on scoring opportunities against Columbia, scoring touchdowns on seven of its first nine possessions and converting every time it drove inside its opponent's 20.

Marrow's four touchdowns against Duquesne upped his '99 total to ten, and after an 11-touchdown performance last season, Marrow is clearly Bucknell's go-to guy on the goaline.

"We had great field position and took advantage of the opportunities the (defense and special teams) gave us," Marrow said. "When the offensive line does such a great job, it's easy to move the ball and score."

The defense shut down their talented foes, as the front seven held Donte Small to just 67 yards and the secondary made big plays at crucial moments. The Bison intercepted two of Zimmerman's passes to end Duquesne drives, the first by Eiben in the second quarter and the second by Bobby Young '02 early in the fourth period.

Shawn Redd '01 upped his team-leading season total of tackles to 75 with nine against the Dukes, including a three-yard tackle for loss.

Powell, who leads the team in rushing and all-purpose yards in '99, has proven his versatility by serving the Bison as a receiver, kick returner and now running back.

"I'll do whatever I can do to help my team win," said Powell. "It's been fun."

The Bison begin a crucial stretch in their schedule this Saturday when they travel to challenge 1-5 Patriot League foe Lafayette. They will then have a bye week before closing the season with three conference clashes.

A Career With A Great Company Behind You And No Ceiling Above You.

If you're looking for a career that offers the potential for unlimited income and personal growth, American Express Financial Advisors can help. We provide professional training and ongoing support to help you get started and remain successful as a financial advisor. For more information, contact us for consideration.

Prince Ali's Football Picks

By Ali Ahmed

NFL

Steelers (3-3) 24: Falcons (1-5) 3
Behind an Improving offensive line and a dominating defense, Jerome Bettis has another 100+ yard performance on Monday night.

Minnesota (2-4) 27: San Francisco (3-3) 17
Big day for Jeff George fixing Cunningham's role as the best backup QB in the NFL. Randy Moss has another big game.

Seahawks (3-2) 17: Bills (4-2) 13
Bills struggle to run the ball and without Moulds loose their big playpotential and the game.

Chargers (2-4) 20: Green Bay (3-3) 17
Forget the numbers - the Chargers have the best defense in the league. Kramer is able to use his experience to beat a young Packer secondary.

New England (4-2) 21: Denver (2-4) 13
Lack of a running game hurts Denver as Bledsoe continues to perform strongly.

Washington (4-1) 31: Dallas (3-2) 10
Champ Bailey and the Skins' secondary dominate hurting Cowboy's receiving core. Dallas loses third in a row.

College

Bucknell (5-2) 42: Lafayette (1-5) 12
The Bison offense will run over a weak Lafayette defense. Coach Gadd will be assured his fifth straight winning season.

Bison win-streak snapped

By Jennifer Cruickshank

Before dropping a disappointing 4-1 loss to the University of Pennsylvania on Sunday, the Bison field hockey team had been virtually unbeatable. Prior to the Penn game, Bucknell had won six straight games, including two victories over Patriot League rivals Ursinus and Lehigh.

Back on September 29th, the Bison hosted Ursinus and picked up a convincing 3-1 win over their conference foe. At the 20-minute mark, forward Maura Higgs '01 set up line mate Melissa Maher '02, who found the back of the net to put the Bison on top.

Less than two minutes later, sophomore Lauren Campbell scored on a scramble in front of the net — that proved to be all the Bison would need to secure the win.

After another first-half goal by Brett Russo '01, the Bison defense took over. Ursinus scored late in the second half but was unable to muster any late game heroics against the solid Bison defensive unit.

Helen Hunt-The Bucknellian

Penn handed the field hockey team it's first loss in six games this past weekend. The bison will play at Colgate Wednesday.

Later that week, the Bison finished off their fourth consecutive Patriot League opponent when they traveled to Lehigh. Sophomore **Annie Hunsicker** and freshman Sonja Wettergreen **led the Bison** from opposite ends of the field, **Hunsicker** on offense and Wettergreen in the cage.

Hunsicker scored a hat-trick, picking up her first three goals of the season. The first came off of a pass from classmate Dena Ebert in the first half; then Hunsicker registered an unassisted tally in the second that she followed by another score off of a dish from senior tri-captain Jenny Zimmerman. The Bison prevailed by a 3-0 margin, as Wettergreen denied everything shot her way to pick up her second shutout of the season.

"Winning back-to-back Patriot League games was really a confidence booster," said Zimmerman. "And it really started to show over the course of the next four games."

To complete their six game winning streak, the Bison picked up a 3-2 sudden-death overtime victory over neighboring Lock Haven, pulled out two close matches at Southwest Missouri and St. Louis, 2-1 and 3-2 respectively, and crushed Siena 6-0 upon returning back to Lewisburg.

"Penn was kind-of a let down after winning six straight, but we can't really think about that now," added Zimmerman. "We have two really tough league games against Colgate and Fairfield waiting for us."

Bucknell (3-1 in the Patriot League) will travel to Colgate on Wednesday and Fairfield on Saturday. After winning six out of their last seven games, the Bison remain optimistic and focused on their goal of winning the Patriot League Championship.

Still winning ways for women's golf

Bison to host ECAC tournament this weekend; 21 teams to show

By Mike Brophy

Over the last several weeks, the Bucknell women's golf team has been busy competing in several tournaments. Claiming second, fourth and fifth place finishes, the Bison have kept their winning season alive.

Beginning on the 28th of September, Bucknell hosted four teams in a single day of competition. Bucknell shot a team score of 304, which was enough to defeat Gettysburg, Dickinson, and Franklin and Marshall. Unfortunately, the Bison could not oust Mount St. Mary's, who won by ten strokes.

The following weekend Bucknell ventured to New Jersey for the Princeton Invitational. Competing against nine other teams, the Bison finished the weekend in fifth place, behind the two Princeton teams, Rutgers and Elon. Sophomore Hilary Mainka shot the best for Bucknell, scoring a two day total of 173. Other major contributors to the fifth place finish were freshmen Molly Campbell and Amy Jones.

The next weekend produced another solid tournament for the Bison. Playing in the Rutgers Invitational Tournament, Bucknell captured fourth place out of a field of 13 teams. Shooting the best score for the Bison was Jones, who shot an 87 and a 78. Mainka, Campbell and Jess Hetrich '03 all had a solid weekend and contributed to the success of the Bison.

Coach Brad Tufts was pleased with his team's performance over the last few weeks, but he quickly diverted his emphasis away from the past performances and onto this weekend's upcoming tournament.

The Eastern College Athletic Conference championship tournament is being hosted at Bucknell this weekend for the first time ever. The Bucknell Golf Course will play host to 21 teams and over 110 players, consisting of top eastern schools such as Penn State, James Madison, Princeton and Rutgers. Tufts commented that he is, "really looking forward to this event. It is the first time that Bucknell has ever hosted a ECAC event in any sport."

The tournament starts on Saturday at 8:30 a.m. and will continue into Sunday.

Bison perfrom well against stiff west coast competition

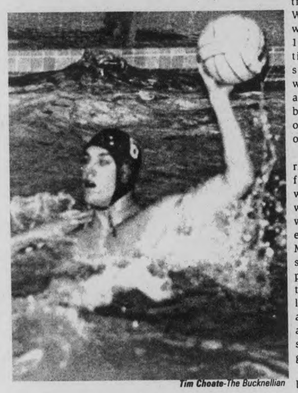
By Allison Kuhn

Bucknell men's water polo captain Kevin Permisohn '01 slept through the earthquake ranked 7.0 on the Richter Scale that hit during the Bison's tournament in Claremont, CA this past weekend. This proved to be advantageous as the sharp Bison won three out of their four games in the Claremont Convergence Tournament.

Bucknell's only loss was to Santa Clara, 9-8. Santa Clara scored the game-winning goal with less than a minute left. Tate Greditzer '01 led the Bison with five goals.

The Bison defeated Cal Baptist 7-6 with much thanks to sophomore goalkeeper Dave Kennedy's 15 saves.

Greditzer and Josh Watts '00 lead the team with four goals apiece in an 8-5 victory over Santa Cruz. Bucknell's most accomplished victory was its 10-9 triumph over Whittier, who was ranked 17th in the nation. Watts scored the winning goal after a rebound with only ten seconds left.



Tim Cheate-The Bucknellian

The men's waterpolo team defeated nationally ranked Whittier in a tournament in California.

"Our experience in California was wonderful; it was exactly what we needed," coach Mike Wooster said. "We played teams that were fairly equal to us and we were able to play solid, close games."

Over fall break the Bison were able to defeat all three of their opponents at the Southern Division League games at Salem-Teikyo. The Bison conquered their toughest opponent, George Washington, 21-15. Greditzer led the offense with five goals and Ryan McCarty '02 contributed four goals.

Their victories over Slippery Rock (14-10) and Grove City (13-7) were easy wins for the Bison. "They are new teams and we were able to give all of our team some playing time," Wooster said.

The North South Invitational ended in a letdown for the Bison. In a weekend that saw a sick and exhausted Bucknell squad, Harvard defeated the Bison 12-4. The Bison also fell to Queens, 16-8, and to UMass, 9-5. Bucknell did manage a win over Iona, in which Kennedy came up with 17 saves.

"Queens and UMass were expected to be extremely competitive games, but our loss to Harvard was embarrassing. This time of year always seems to be a low point in our season," Wooster said.

Their impressive results in league play in '99 give the Bison confidence heading into the ECAC championships this weekend.

Alum inducted to Hall of Fame

Courtesy of Shelbe McClintock

Baird '72 was 38-1 in his Bucknell career winning his last 27 matches. In '76, he became the youngest national champion.

By Joshua E. Gish

The name of another Bucknell graduate was written into the national record books when Steve Baird '72 was inducted into the American Platform Tennis Hall of Fame. Rising from the Bucknell record books as one of the greatest tennis players to grace the Bison courts, Baird has proven his excellence in this elite and challenging sport and has made a huge impact on the game.

Platform tennis follows many of the same rules as the traditional game but focuses more on patience and accuracy rather than speed and power. It is a cold weather activity played on a court one third the size of that in conventional tennis, which is surrounded by 12-foot high screens that allow for the continuation of play. The game is played with teams of two.

From the start of his career, Baird had shown that he was a winner. He lettered in four sports in high school and then went on to hold a captaincy on the Bucknell squad, obtaining a conference singles championship amongst many other achievements.

Baird's legacy makes an outstanding mark in the Bucknell books, having been awarded three varsity letters and having been inducted into the Bucknell hall of fame. Baird also was named Bucknell's top senior athlete in 1972 with a three-year overall record of 38-1, winning his last 27 matches.

He moved on to platform tennis, following in is father's and brother's footsteps, and immediately excelled in becoming the youngest player to date to win the national championship, winning with his brother in 1976. Baird attended the national finals thirteen years in a row and took home the championship in ten of those drives.

Baird played with his brother as a team until 1980, when his brother retired and he picked up a new teammate. He was recognized for his ability to create flow and momentum with his partner through his in-depth understanding of how to combine skills and techniques necessary for success. He had an unparalleled ability, proven by his accomplishments and by the fame that he has obtained.

Capturing the true Bison spirit, Steve Baird exhibited his excellence throughout his years at Bucknell and has now moved on to receive the highest honor in platform tennis.

Good times between friends, great taste between classes.

Sports

The end of the road?

When an athlete starts getting up in age, the issue of retirement inevitably rears its ugly head

The criteria as to whether the athlete should retire or continue playing concern his level of performance, in comparison to the league standards, and his desire to compete.

Miami Dolphins' quarterback Dan Marino has been surrounded with controversy over the last few years regarding his retirement. By analyzing his case, I try to determine which catergory Marino falls under.

Marino has bro- ken virtually every NFL passing record in his 18 years in the league, but the one thing that has alluded him is a Super Bowl ring.

Commentary

Carmen Mauriello
Sports Editor

Marino has considered retirement after the past few seasons, but his desire to compete and to win a Super Bowl championship has won out over his aching bones. He is still one of the top quarterbacks in the league numberwise; he finished in the top three in the AFC in completions, yards and touchdown passes and surpassed 3,000 yards for a record 13th time last season.

Marino led the Dolphins to the big game in his rookie season (losing to San Francisco), but he has failed to return since, as Mami has been unable to build a strong supporting cast around him. Jimmy Johnson was brought in to coach Miami in 1995, and he immediately began a massive restructuring of the team, gearing it towards youth and potential.

But after Johnson's system failed to achieve its desired results, he turned the heat onto Marino — threatening to bench him in 1997.

Johnson obviously didn't question Marino's talent, just his ability to allude the rush and make critical decisions. It is true that Marino has lost some mobility over the years, and he threw 15 interceptions last season and already has five in '99.

After a 23-18 loss to Buffalo in week four of this season, Johnson blamed Marino's poor responses to Buffalo's pressure and three turnovers for Miami's anemic offensive performance.

"Dan's got to make some better decisions," echoed Johnson. "When he's getting banged around, he made some poor decisions... If he gets hit, his play drops down significantly."

Johnson unleashed a whirl of controversy by hinting that if Marino didn't improve his performance in the Dolphins next game against the Patriots, Johnson wouldn't hesitate to replace the 18-year starter with unproven Damon Huard.

Marino didn't even give Johnson a chance, passing for 393 yards and engineering three fourth-quarter scoring drives to give the Dolphins a 34-31 victory. Johnson's criticism seemed to motivate and challenge Marino into an intense and energetic performance, marked by his calm and efficient operation of the offense when the game was on the line.

"I don't always say the right things, but I say what I feel," said a reserved Johnson about his previous week's comments.

But just when it seemed Miami's quarterback controversy was over, Marino got injured on his second pass (a 57-yard interception returned for a touchdown by Andy Katzenmoyer) against New England. Huard came in and promptly threw an interception that Ty Law returned 24 yards for a score on his first pass attempt.

But the young quarterback settled down, converting three crucial third down plays and finding Stanley Pritchett for a five-yard touchdown pass on the final, 59-yard drive that sealed Miami's 31-30 comeback win.

Huard finished the day 24-for-42 for 240 yards and two touchdowns, while rushing six times for 54 yards. Patriots' coach Pete Carroll recognized that Huard's versatility and running ability kept his defense off-balance.

"We believe in him. He played outstanding game," Johnson said of Huard, failing to recognize his costly interception and the nine times he was sacked — the most ever allowed by the Dolphins in a single game.

"But there's no quarterback controversy here," Johnson quickly added. "Dan's our quarterback. Dan's our starter."

Marino's shoulder injury was not serious, and he was cleared to practice as early as this Thursday. In regards to the week seven starter against Philadelphia, Johnson said Huard will get the start unless, "Dan's 100 percent and I see he's 100 percent."

Does anyone else smell some controversy here? If Huard gets the start (which appears likely as a precaution to Marino's health) and performs well against the Eagles, Johnson may be hesitant to replace the youngster even when Marino is "100 percent."

It's certainly going to be an interesting few months in Miami. Whatever the outcome, there's going to be a media circus surrounding Marino's retirement come January.

So what's the ruling: is Marino over the hill or is he wrongly being pressured into retirement? Let's start with the first criteria. Is Marino still performing up to the level of NFL quarterbacks, or is he being surpassed by younger athletes?

There's no doubt that Marino is still one of the league's premier quarterbacks, as proven by his elite rankings in many passing statistics in '98 and '99. It is also true that many young quarterbacks have more mobility, durability and versatility than Marino, but his experience and leadership are unrivaled.

Damon Huard was able to engineer a late fourth quarter comeback against division-leading New England (something Marino failed to do against Buffalo), but Huard just did once what Marino has been doing for 18 years. And note that Huard was sacked nine times and picked off for a score by the Pats.

Does Marino still have the desire to compete in the league? Look no further than the Indianapolis game, in which Marino responded to Johnson's adversity with a fiery and gut-wrenching performance. He constantly displays his dedication to winning and his determination to capture a Super Bowl ring.

It's obvious that Marino still deserves a starting spot in the NFL. Maybe he should find another team that will better appreciate his ability and that has a better chance of advancing to the Super Bowl.

Bison roll past Duquesne, 49-20

By Carmen Mauriello

Jabulani Powell '02 recorded his third straight 100-yard rushing game and fullback Jason Marrow '01 ran for four scores to lead Bucknell to a 49-20 win over Duquesne in last Saturday's homecoming game.

With their dominating performance, the Bison answered many of the questions that have been nagging them throughout the '99 season. The offense capitalized on opportunities and tallied 506 yards. The defense stepped up to make big plays, with two key interceptions and avoided a late letdown. And its shaky kicking game was solidified with freshman Chris Lundberg's perfect 7-7 performance on extra point attempts.

Head coach Tom Gadd called the dominant win, "something we needed for the confidence level of this team."

After the Bison defense thwarted two early Duquesne scoring opportunities, the offense took to the ground on a 78-yard touchdown drive. Six of the eight plays were rushes, highlighted by Powell's 33-yard scamper to the Dukes' 27 and his 12-yard scoring run.

The Bison defense then forced Duquesne to a three-and-out, and the offense took advantage with excellent field position at the Dukes' 46. It only took the Bison offense 1:31 to reach the endzone on Marrow's one-yard plunge, extending their lead to 14-0.

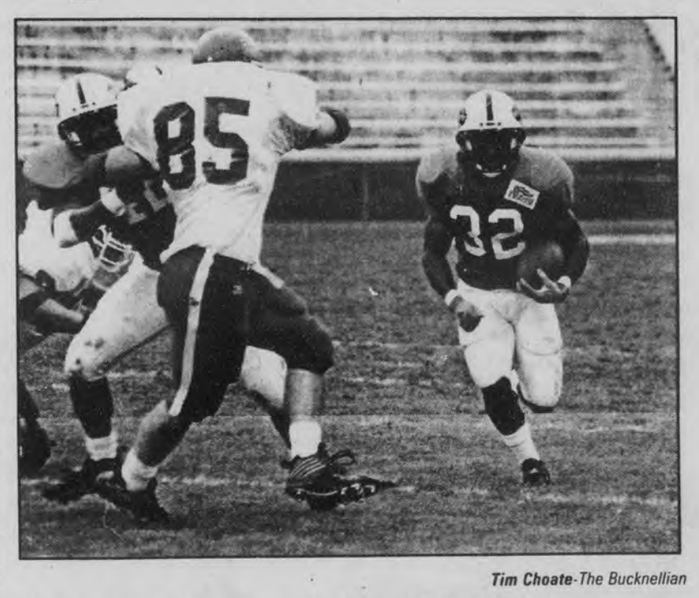
Kevin Eiben '01 picked off Duquesne's Tony Zimmerman on the third play after the kickoff to bring the high-powered Bison offense back onto the field. Bucknell's passing game benefited from the success of its ground game. Don McDowell '00 completed four passes on the drive, and the Bison gained positive yardage on all nine plays. Marrow again ran up the middle for a one yard score to put Bucknell up 21-0.

Tim Choate-The Bucknellian

The Bison offense tallied 506 yards and scored seven touchdowns against Duquesne. It hopes for similar results when the Bison travel to Lafayette Saturday.

Sports Rules!! Join the team!

But on the second play of Duquesne's ensuing possession, Zimmerman exploited Bucknell's achilles' heel - its secondary. He found his favorite target, Gerald Foster, for a 71-yard touchdown strike that cut the lead to 21-7.



Tim Choate-The Bucknellian

Jabulani Powell '02 registered his third straight 100-yard game.

Bucknell defensive back George Cowan '02 recognized that the secondary is trying to learn from its past mistakes to become a cohesive unit that can understand and fulfill its role on the team.

"The front guys are playing really well, but the secondary has been tested a lot this year and hasn't always answered," Cowan said. "The secondary is going to continue to work hard and improve with each league game that we play so that we can be ready to face (Lehigh quarterback) Tom Stambaugh, which will probably be our toughest test of the season."

On Bucknell's next possession, McDowell orchestrated a nine play, 75 yard drive that ebbed the Dukes' momentum and sealed the Bison victory. He threw 18- and 16- yard completions to Jim Horan '03 and Dan Palko '00 respectively, rushed for an 11-yard gain, and hit sophomore Mark Wyland for a seven-yard score to give the Bison a commanding 28-7 lead going into the half.

Powell's 46-yard kickoff return to open the second half gave the Bison excellent field position at the the Dukes' 41 yardline, and the offense converted with McDowell's 11-yard scoring strike to runner-turned-receiver Dan Palko.

The Dukes took advantage of three costly Bison penalties on their next possession to march for a touchdown, which narrowed the

Women's v-ball prepares for Patriots

By Justin White

The Bucknell women's volleyball team recently completed a five-game stretch against its Patriot League rivals, and the Bison are excited and poised to enter the second half of their season and compete in key conference rematches in the upcoming weeks.

"Our season didn't really begin to pump us up until we started to play our Patriot League rivals," said Whitney Williams '02.

The Bison have been battling against their conference rivals since the beginning of October. They are currently 2-3 in league standings (8-8 overall) after facing each team once. This stretch has served as a wake-up call, as the team began to realize its potential for the '99 season.

Bucknell's first Patriot League game came on September 29 against a struggling Lafayette team. It took the Bison four games to dispose of the Leopards. Bucknell jumped out to a quick start, capturing the first game 15-6. After a letdown in the third game, losing 15-6, the Bison put away Lafayette with a 15-5 victory in the final game.

Senior co-captain Michelle Lesh '00 led the team with 18 kills. Other major contributors were Shannon Walker '02 with ten kills and freshman Jen Wrigley with ten kills, two service aces and six digs.

Bucknell only had a one-day layoff before taking to the road again against Colgate. The Bison did not fare as well this match, falling in four games to lose their first Patriot League contest. The Red Raiders outhit Bucknell by a count of 71 kills to 51. These numbers contributed to the wide gap in hitting percentages of .059 for BU to .297 for Colgate.

Junior outside hitter Brooke Bader tallied 15 kills to lead the Bison offense. Wrigley had 19 of the team's 75 digs and also manufactured 11 kills.

Following the Colgate game the Bison lost their second straight league road match, going down to Army, 3-1, by the game scores of 9-15, 7-15, 15-11 and 3-15.

Bader and Lesh both had strong performances in the losing effort, providing 23 and 13 kills respectively. Bader pointed to "mental lapses" as a part of the Bison's midseason struggles.

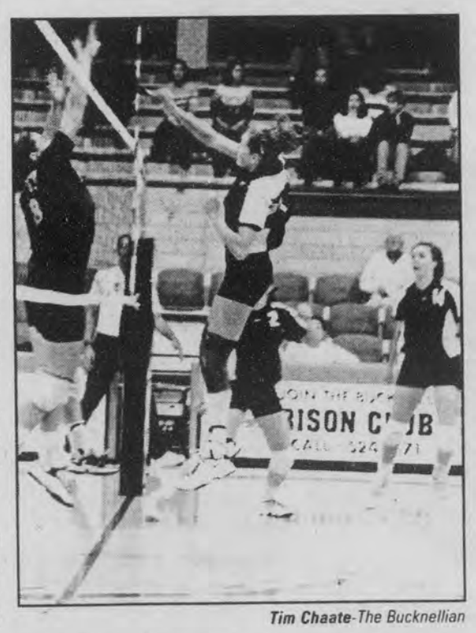
"We still need to come together as a team," Bader said. "We have the outstanding individual performances but need to put it all together and play as a team."

Bucknell next hosted the Naval Academy on October 5. The Bison built an early two-game lead, winning 16-14 and 15-11 in the first two games. But Navy came back to easily win the third game before battling to win the fourth, 15-12. In the final rally-point set, the Bison fell behind early and couldn't overcome Navy's offense, falling 15-9.

Lesh led the Bison attack with 19 kills along with Wrigley, who tallied 12 kills and 24 digs.

Holy Cross came to Davis Gym on October 8 for another Patriot League contest. The Orange and Blue were able to pull out a victory in five games.

The Bison had many strong performances, including Walker, Williams, Lesh and Wrigley with 16 kills, 55 sets and 14 digs, 18 kills and 11 digs, and 19 kills and 22 digs respectively.



Tim Chaate-The Bucknellian

The Bison will play at Holy Cross this Saturday.

Head coach Cindy Opalski said that her team possesses, "the physical skills and the potential to be a top team in the Patriot League. We have terrific kids that understand what it takes to be successful."

She also recognized that, "both Jen (Post '00) and Michelle (Lesh) are providing leadership, settling into their leadership roles as co-captains."

Bucknell's most recent match came against Lehigh last Wednesday. Despite playing well early, the Bison lost in 4 games (10-15, 15-10, 15-8 and 15-4). Walker produced 15 kills, Post added 17 digs and Bader registered 13 kills for the Bison.

The Bison have had 10 days off to mend their injuries and re-evaluate their performance and strategies. Coach Opalski expressed a great deal of excitement for the upcoming challenges as the team enters the second half of the season, after some early frustrations.

"It is a gradual process in moving up the ladder to success, because if you try to go up too fast, you trip and fall back down," Opalski said.

Bucknell's next challenge is a home rematch against Holy Cross, after barely squeaking out a victory two weeks ago.

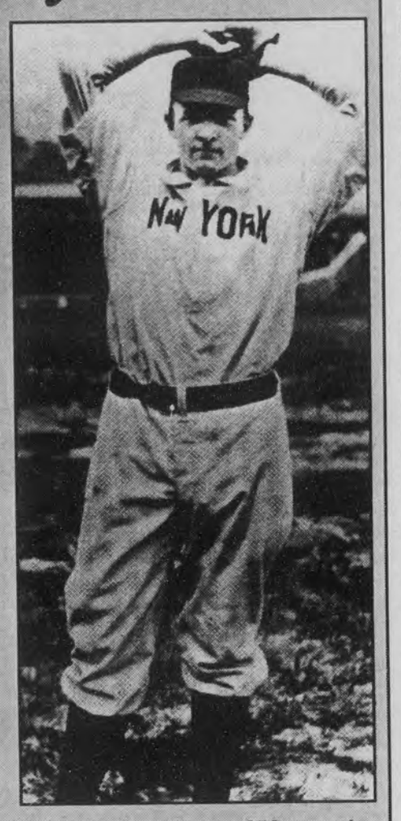
Mathewson named to Baseball's All-Century Team

By Chris Ellis

He is arguably Bucknell's most famous student. Now, he is further immortalized in American lore.

Pitcher Christy Mathewson, who attended the University from 1898 to 1901, was named as one of the nine pitchers on Baseball's All-Century team. The team, which was announced during Game Two of the World Series this week, is comprised of 30 players elected both by fan balloting and a panel of baseball experts. Mathewson was not one of the six pitchers elected to the team by season-long fan balloting, but he (along with pitchers Warren Spahn and Lefty Grove) were named as late additions to the 30-man squad.

The three at-large selections joined Nolan Ryan, Sandy Koufax, Cy Young, Roger Clemens, Bob Gibson, and Walter Johnson on the team. Ryan's 992,040 votes led the team, while Mathewson's 249,947 was good for 14th among the 26 pitchers named to the ballot.



Christy Mathewson won 373 games in his Major League baseball career.

Mathewson's prowess on the mound and eloquence off it have led some to refer to him as America's 'first modern sports hero,' and his game more that backs up this assertion. After leaving Bucknell in 1901 to play for the Cincinnati Reds—his first contract paid him just $100 per season—Mathewson went on to use his famous screwball and top-notch control to notch 373 career victories in his 13-year career. Mathewson pitched in 634 games in his career, which ended prematurely in 1918 when he volunteered for service in the U.S. Army.

Despite his 373 wins, 2502 strikeouts and lifetime ERA of 2.13, though, Mathewson is likely best remembered for his work in the 1905 'World Series.' In a performance that, because of modern pitching rotations, will never be duplicated, Mathewson hurled three consecutive shutouts in a six-day span to lead his New York Giants over the Philadelphia Athletics. That series, which gave both fame to Mathewson and a second champion to the city of New York, is credited with helping to lay the framework for baseball legends of the twenties and thirties to leave a lasting impression on American culture.

Mathewson's died of tuberculosis in 1925, likely as a result of the poisonous gas that he was exposed to in wartime conditions. Despite his premature death and the 300-plus inning seasons that did irreparable damage to his arm Mathewson's career was long and celebrated enough that he became, in 1925, one of the first five players enshrined in baseball's Hall of Fame.

Senior Gift Drive eyes ambitious goals

Led by Pam Scovill '00, Senior Gift Drive hopes to achieve 70 percent participation

By Chris Ellis

With a lofty participation goal and a desire to meaningfully improve the University's stature, the 1999-2000 Senior Gift Drive Committee kicked off its donation campaign Sunday night with a celebratory dinner. The dinner, which featured speeches by University graduates and parents, was the beginning of a year-long process in which committee members will attempt to drive home the importance of donating to the University and the programs that they benefited from most.

The committee, led by chair Pam Scovill '00, wishes to raise a substantial amount of money to donate to the University before graduation. But for the committee's members, the chief goal is not total dollars but senior participation. The total number of dollars raised is important, but the committee's basic message is simple: this is your first chance to give back.

"We've gained so much in the past four years," Scovill said. "A great education, a lifetime of friendships, and so many positive experiences. This is our chance to give back to the University that's given so much to us. This year's class seems excited, and I'm confident we'll reach our goals."

Bucknell graduate and current Bison basketball coach Pat Flannery '80 and Ross Alfieri, chairman of the Gift Drive's "Parent Challenge," were the keynote speakers at the dinner. Both stressed the value of a Bucknell education and the value that a Bucknell degree represents. Flannery, an economics and political science major who was a four-year starter in basketball and a member of the Delta Upsilon fraternity, discussed his experiences as a senior at Bucknell, saying that he often took the University "for granted." It wasn't until his graduation, he said, that he realized how esteemed a Bucknell education is considered to be.

Scott Solomon—The Bucknellian

After a record participation level in last year's campaign, this year's Senior Gift Drive Committee hopes to become the first to realize 70 percent participation. Basketball head coach Pat Flannery '80, Gift Drive Chair Pam Scovill '00 and Parents Challenge Chairman Ross Alfieri spoke at Sunday's kickoff dinner.

Last year's Senior Gift Drive raised over $23,000 from students and had a 67 percent participation rate. By streamlining the solicitation

Adams holds open campus forum

Dorm construction, alcohol plan among topics discussed

By Anne Monoky

The crowd was small, but the questions were numerous.

Tuesday evening's open forum with President Adams was an arena for students to voice their opinions and receive information on topics of campus interest and concern. In attendance were a congregation of curious students and several representatives of the administration.

Students voiced their interest in the campus' physical changes, including the construction of a new dorm. Adams indicated that the project is on schedule and that its conclusion is set for fall of next year.

He further explained that the new dorm is being built with the intention of eliminating substandard living on campus and emphasized that it was not being built in order to increase student enrollment. He indicated that there will be an elimination of dingles, an elimination of lounges turned into rooms, and a reduction of triple rooms. The administration hopes that the new dorm will create a place to house students while other dorms are being renovated.

Students continued to raise dormitory issues by questioning the absence of the recycling bins in residence halls and asking why Residential Life has not taken steps to activate such a program. Associate Dean of Students Gerald Commerford said that a follow-up to this issue would take place.

Conversation also focused on a major concern that the employees in Dining Services are understaffed and overworked. The administration replied that they have worked hard to take care of this problem. Most recently, they

Students participate in charity "Crop Walk"

By Katie Marston

The reward of free Pizza Hut pizza was not the only reason for the strong participation of Bucknellians in the annual Lewisburg Area Crop Walk this past Sunday.

Sara Given '02, member of Alpha Chi Omega, said, "The fundraiser was a great bonding experience and a good opportunity to give Lewisburg a positive view of Greek life at Bucknell."

The University is currently looking for ways to improve and strengthen its relations with the Lewisburg community. With hopes of uniting for a common goal, enthusiastic students and Lewisburg residents participated in the Crop Walk.

The annual fundraiser is actively held in approximately 2,000 locations across the U.S. as a method of promoting worldwide health and nutrition. Every year, the average number of participants totals about 3.3 million people across the country.

The overall goal of the 1K or 10K walk/run is to raise $10,000, through significant monetary donations and active participation. As a function of the Church World Service ecumenical group, the Crop Walk's contributions

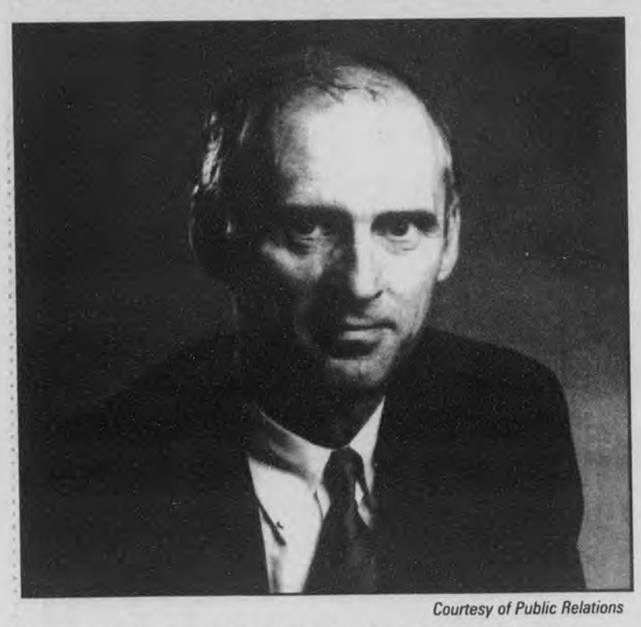
Presidential search takes its first steps in selection process



Courtesy of Public Relations

Lee Hamiilton '57, chair of the Presidential Search Committee

By Heather Napolitano

The search begins.

Members of the committee to select a successor for University President Bro Adams have been selected, a search consultant has been retained and the group has begun its pursuit to acquire highly qualified candidates.

The 13-member committee is composed of the following individuals: Faculty Chair John A. Peeler, Associate Professor of Chemistry Dee A. Casteel, Associate Vice President for Information Services and Resources Ray Metz, Bucknell Student Government President Yoshi Maisami '01, President of the Alumni Board of Directors James Zimmerman '81, Joseph A. Ciffolillo '61, Susan J. Crawford '69, David D. Ekedahl '56, D. Lee Hamilton '57 (committee chair), Arthur D. Kinney, Jr. '56, Stephen P. Renock IV '74, Chairman of the Board of Trustees James W. Schubauer '56 and De Lores Weaver. The latter eight individuals are all members of the University Board of Trustees and were selected from that group by Schubauer.

The on-campus administrator supporting Hamilton on logistical and administrative matters is Director of Institution Research/Assessment Jerry Rackoff. Rackoff will not carry a vote in the committee, but he said he will "assist in management and administrative tasks to keep the search moving forward."

Hamilton has finalized a search consultant that will assist the committee in seeking out individuals who will be capable of succeeding Adams. The services of the Education Practice of the firm of Korn/Ferry International have been acquired. Managing Director R. William Funk will work directly with search committee.

On Sept. 28, on the University campus, the group convened for the first time. The majority of the members were present, although several could not attend because of scheduling conflicts and were subsequently briefed on the proceedings.

According to Hamilton, "the current activities are primarily to communicate broadly that we are conducting this search and to identify a pool of candidates that is as large and strong as possible."

With this goal in mind, the committee has accomplished several key tasks that will aid them in beginning their search. They have decided upon the wording for an advertisement that they have placed and will soon appear in *The Chronicle of Higher Education*, *Black Issues*

Public Safety Log

October 20, 1999

UNIVERSITY PROPERTY DAMAGE–Public Safety responded to Ward House for the report of a broken window. No witnesses or suspects were located in a search of the area.

INFORMATION–A student reported to Public Safety that a video camera was taken from a vehicle parked on Coleman Road. The equipment was found later at another location.

October 21, 1999

UNDERAGE CONSUMPTION/PUBLIC DRUNKENNESS–While on routine patrol, Public Safety observed a student striking a stop sign. University citations for underage drinking, public drunkenness, disorderly conduct, and a property violation were issued.

UNDERAGE CONSUMPTION/PUBLIC DRUNKENNESS–Public Safety responded to 7th Street Lot for the report of reckless driving by a student. Lewisburg Police responded and issued a citation for careless driving. University citations for public drunkenness, reckless driving and providing false information were also issued.

INFORMATION/ASSIST PSOP MILTON–Public Safety responded to Kelly Crossroads to assist Pennsylvania State Police in locating two students who did not return from a class field experience conducted in that area. Public Safety located the students who were returned to campus.

October 22, 1999

HARASSMENT–Public Safety responded to Larison Hall on the report of a student being harassed. Lewisburg Police was notified and will be conducting an investigation.

UNDERAGE CONSUMPTION-ALCOHOL OVERDOSE-MEDICAL TRANSPORT–Public Safety responded to Larison Hall for the report of an ill student. The individual was transported by ambulance to Evangelical Community Hospital for treatment and later released. University citations for underage drinking and public drunkenness were issued.

DRUG VIOLATION–Public Safety responded to Smith Hall for the report of the odor of marijuana. Drug paraphernalia and a bag of marijuana were located in a plain view search of the area. Lewisburg Police responded and charges will be filed.

UNDERAGE DRINKING/PUBLIC DRUNKENNESS–Public Safety responded to Carnegie Hall for the report of an intoxicated student. University citations for underage, drinking and public drunkenness were issued.

OCTOBER 23, 1999

MEDICAL TRANSPORT–Public Safety responded to Swartz Hall for the report of a visitor with a hand laceration. Public Safety transported the individual to Evangelical Community Hospital for treatment.

UNIVERSITY PROPERTY REPORT–Public Safety responded to Harris Hall for the report of two broken windows. No witnesses or suspects could be located in a search of the area.

MEDICAL AIDED–Public Safety responded to the Fieldhouse for the report of an injured student. The individual refused medical treatment and signed a patient waiver form.

INFORMATION/VEHICLE DAMAGE–Public Safety responded to Moore Avenue for the report of a damaged vehicle. East Buffalo Township Police responded. The incident is under investigation.

NON-EMERGENCY MEDICAL TRANSPORT–A student contacted Public Safety to request transportation to Evangelical Community Hospital for treatment of an ankle injury. Student Health Services transported the individual, who later returned to campus.

UNDERAGE CONSUMPTION/PUBLIC DRUNKENNESS– While on routine patrol, Public Safety observed a student walking with staggered gait near the Langone Center. University citations were issued for underage consumption and public drunkenness.

UNDERAGE CONSUMPTION–While on a routine fraternity party check at Phi Psi Fraternity, Public Safety observed three students holding cans of beer. University citations for underage consumption were issued to the individuals. Phi Psi Fraternity was also issued a university citation for three counts of serving alcohol to underage persons.

UNDERAGE CONSUMPTION–While on a routine fraternity party check at Lambda Chi Alpha Fraternity, Public Safety observed a student holding a can of beer. A university citation was issued for underage consumption/possession of alcohol. Lambda Chi Alpha was also issued an university citation for serving alcohol to an underage person.

VEHICLE STOP/UNDERAGE DRINKING– While on routine patrol, Public Safety observed that a student drove at a high rate of speed and failed to stop at a stop sign at the intersection of Moore Avenue and South 7th Street. Three of the four occupants of the vehicle admitted to having consumed alcohol. East Buffalo Township Police responded. The driver was cited for reckless driving and other traffic violations. The passengers were cited for underage drinking.

UNIVERSITY PROPERTY DAMAGE–Public Safety responded to Kress Hall for the report of a broken window. No witnesses or suspects could be located in a search of the area.

Gift drive encourages participation

DRIVE

from page 1

process and more vigorously pursuing senior donations, this year's drive will attempt to achieve 70 percent participation. All donations will be matched with a $25 donation from the Parents Challenge, increasing the weight of each contribution.

The process for donating is simple: simply fill out a card provided by a member of the gift drive's campaign committee and choose a payment method. According to the drive's members, though, the reasons for donating are greater than ever.

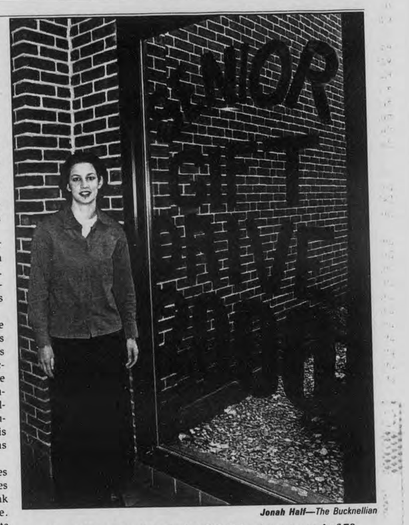
"This is a great opportunity for students to show their appreciation for the University," Scovill said. "Bucknell is expensive, but an integral part of where money comes from is alumni gifts."

The committee emphasizes the importance of "silent scholarship" as integral in explaining why students should give back to Bucknell. According to figures provided by the Office of Annual Giving, even students who pay full tuition do not fully cover the cost of a Bucknell education—nearly $6,000 per student is provided solely through donations and annual gifts.

The committee also emphasizes the importance of annual giving rates in determining the University's rank among institutions nationwide. Bucknell usually ranks below its frame-of-reference schools in percentage of alumni who make annual donations to the University, and this factor may cause the University to be held in less esteem in national ranking systems. By encouraging early giving through the Senior Gift Drive, the Gift Drive Committee hopes to set a plan for giving that will eventually raise the prestige and worth of a Bucknell degree.

Perhaps the drive's biggest draw, though, is its decision to allow students to give to specific programs or concentrations within the University. Each gift can, at the discretion of the donor, be earmarked towards a specific academic program, club or activity, or office on campus. Students cannot donate to individual fraternal organizations or individual club sports, but can give directly to any other organization they wish. According to Scovill, this permits students dissatisfied with the University at large to donate to the program which has benefited them the most.

"This (the specific donation program) makes people more willing to give," Scovill said. "If someone is not happy with the entire University, they still are able to give to something that really made a difference in their Bucknell career."



Jonah Hall—The Bucknellian

Pam Scovill '00, chair of the Senior Gift Drive, has set a goal of 70 percent particpation among seniors. "This year's class seems excited, and I'm confident we'll reach our goals," she said.

WALK

from page 1

provide food, shelter and supplies to starving people all over the world. In addition, the funds provide refugee assistance, improve health care, purify water supplies, provide disaster relief and stress global education. The Lewisburg food bank receives 5% of the total donations raised locally.

Beginning at the New Hope Lutheran Brethren Church in Lewisburg, the scenic route of the walk loops through the surrounding countryside, ending the six miles back at the church.

As the lead representative for the University, Associate Professor of Management Mark Bettner explained his goals to collect significant monetary donations from individual students and student organizations, as well as to have a broad mix of students take part in the walk. Bettner described the Crop Walk as "a very worthwhile project" for the University community due to the diverse benefits. The contributions will not only impact the Lewisburg food bank, but will also strengthen the relationship between the town and the University.

For the past several years, Bucknellians have had a tremendous presence at the Crop Walk. Sunday's event attracted about 100 members of the campus community, while about 50 Lewisburg residents participated. The majority of the monetary donations came from Bucknellians as well.

Alpha Phi Omega—a community service organization on campus—shares a similar goal and mission as the Crop Walk, making it an active member of the fundraiser. Additionally, several sororities and fraternities , such as Delta Gamma, Alpha Chi Omega, Lambda Chi Alpha and Kappa Sigma, participated in the walk as a form of community service for their organization.

"The success of the Lewisburg Area Crop Walk is due to the students, which will hopefully continue," Bettner said.

The active participation of students in the fundraiser reflects positively in the eyes of the Lewisburg community. This community bonding demonstrates the positive influence that the presence of the Greek system has. The sincere involvement of the students will be acknowledged in letters of recognition to campus and local publications, thanking students and organizations for their generous support. These letters, promoting goodwill between the campus and the community, are a strong step in bringing together these two common inhabitants of Lewisburg.

SEARCH

from page 2

in Higher Education and *Hispanic Outlook*.

"Our search committee will be extending similar invitations to the various Bucknell constituencies," Hamilton said. "We have established a list of Bucknell publications and are determining what messages might be appropriate to appear in them, based upon their publication dates."

The group has also been looking into the possibility of creating a web page devoted to the search. If established, this site will be accessible through the University home page.

Meanwhile, the search consultant has taken some initial steps to fulfill his task. Hamilton said that he "has begun reaching out to a massive database of contacts soliciting suggested names of potential candidates." However, the committee has not received any formal applications at this time. They have only been given a few nominations and recommendations of individuals to consider.

Hamilton expects that some of the applications will arrive in response to their advertising and networking. He expects that others will be identified but will have to be developed through personal contact with the search consultant and/or the committee members. He further notes that some candidates will simply have a natural interest and will apply directly on their own.

When the committee does begin to receive applications, create files on the candidates and accumulate administrative materials, they will be stored in a secure "search room" which has been recently established on campus. The room will be accessible to only the thirteen members of the search committee.

The next meeting is scheduled for the committee as a whole is on Nov. 22. This will coincide with the close of the phase to establish a candidate pool, assuming that the current schedule is maintained.

Hamilton has noted that the first meeting indicated that this committee has excellent chemistry. "My assessment is that the group will work together quite smoothly as a unit," he said. "It is clear that we are unified in our overriding objective of identifying and securing the best possible president for Bucknell at this point in its history."

BSG President Maisami serves as link between students and search

By Beth Slaby

The University is embarking on a monumental endeavor. As we approach the millennium, we are concomitantly starting the search for the 15th President of the University. Ever since President Bro Adams announced his decision to pursue other opportunities this past summer, the University has actively begun the quest for someone to lead the University as we move into the year 2000 and beyond.

Yoshi Maisami '01, president of BSG, is part of this prodigious process to seek the appropriate person for the presidential position. The committee is primarily composed of trustees, administration and faculty, but Maisami is the only student that serves on the board. "When I first heard that President Adams was stepping down, I started inquiring about the process. They responded to my inquiries," says Maisami.

Maisami remembers the letter that was sent out to all students that outlined the numbers of faculty administration, students and trustees that would be participating in the search process. He received the same exact letter. Upon his return to campus in the fall, however, James W. Schubauer '56, chair of the board of trustees, contacted him to confirm his heightened interest in the search process. His answer was a resounding "yes."

The committee, comprised of 13 members, conducted its first meeting on Sept. 28, 1999. That meeting served as a way for members to get to know one another and set the outline for the basic processes that would follow. "Everyone left the first meeting with their own ideas and agenda." The diversity of the committee will ensure a favorable presidential selection process.

> *"My number one objective is to represent the student constituency to the best of my ability, while at the same time maintaining confidentiality."*
> *—BSG President Yoshi Maisami '01*

Maisami is thrilled to be a part of the search, "My number one objective is to represent the student constituency to the best of my ability, while at the same time, maintaining confidentiality." He works well with the other members and admits, "We're all on the same page."

Maisami admits they are still at the preliminary stages of the search. "The biggest part is still to come." Their objective is to have the 15th President of Bucknell University named by the spring of 2000. This requires working cohesively with the other members of the board. Because search members live across the country, however, they are planning 2 conference calls in early November. The weekend of the Nov. 11-13, the board of trustees will reconvene in person for a meeting on campus.

In the meantime, Maisami is concentrating on the role BSG will play in the search. They are in the process of creating their own student advisory committee. They are asking organizations such as BSG, RHA, IFC, Panhellenic Council and BAC to make nominations for the position. Maisami emphasizes that they want the committee to be diverse, to come from different backgrounds: Greek/non-Greek, athletes/non-athletes, males/females and multicultural students. "Ultimately, the committee will supplement the Presidential search and provide us with student objectives, recommendations and criteria for the selection process."

Maisami also emphasizes that student input is not only important, but it is a quintessential part of the search. "I encourage students to speak up and voice their interest and concerns." It is very much of value to the committee. He also urges students to contact him at BSG@bucknell.edu if they have any concerns, questions or input. "Right now it's time for the campus at large to come together as a community and talk about Bucknell's best interest."

The search is still in its preliminary stages. Ultimately, there will be a given number of final candidates. The committee will implement a selection process that will narrow the list to between two and four candidates. They will then announce their choices in a public fashion. It is here where the students, faculty members, and administration will have the opportunity to meet one-on-one with the final candidates and make the final selection.

Maisami strongly encourages the student body to get involved. To facilitate their involvement, Nov. 11, 1999 will serve as trustee access day open to student organizations that want to inquire about the search. The President's office will be sending out a notification to invite various organizations to ask specific questions pertaining to the selection process.

Choosing a new President will prove to be a daunting task. Maisami is doing more than his best to represent the interests of the campus, and to proceed in a democratic fashion.

"I've been involved with BSG since my freshman year. I love making a difference," Maisami said.

His involvement in the presidential search exemplifes his pride and commitment to not only his University, but to his fellow classmates as well.

Jonah Hall—The Bucknellian

BSG President Yoshi Maisami '01 will serve as the Student Representative on the search committee looking to find a successor for Bro Adams.

NEWS BRIEFS

Three US Citizens Kidnapped in Yemen

Three U.S. citizens have been kidnapped in Yemen, and Washington is working with the government of Yemen to win their freedom, the State Department has confirmed. The official did not disclose any information about the three Americans who were abducted or indicate who might be responsible.

The incident comes on the same day that Yemen, which has been plagued by abductions and bombings in recent months, said it would set up special courts to deal with the kidnapping of overseas nationals and acts of sabotage, the official SABA news agency reported.

Tourists and business people from abroad have been frequent kidnap targets of disgruntled tribesmen in Yemen, one of the poorest countries in the Arab world. The tribesmen have also regularly bombed and damaged Yemen's main pipeline from the east of the country to the Red Sea coast. The abductions and sabotage attacks are usually aimed at pressing demands from the government or foreign oil companies for better infrastructure in tribal areas.

Animal Rights Extremists Target Harvard Researchers

Six Harvard University scientists have received threatening letters booby-trapped with razor blades and allegedly sent by a group of animal rights extremists. A communique from an organization calling itself the "Justice Department" was intercepted during the weekend by a group that monitors such extremists, police said. It contained a list of about 80 researchers scattered across the country who do work with primates, police said.

There were 12 Harvard researchers on the list, and all were alerted Monday. There was no immediate word on whether similar letters had been received at other research centers.

The six Harvard scientists who received the letters Tuesday turned them over to campus police. Only one opened his letter, and he was not cut by the blade inside, said Harvard Medical School spokesman Don Gibbons. The letters refer to the use of primates for laboratory tests and disease research. "You have been targeted and you have until autumn of 2000 to release all your primate captives and get out of the vivisection industry," one letter said.

The "Justice Department" organization has carried out similar mail attacks in Britain and Canada.

Late Term Abortion Issue Likely to Head to Supreme Court

A sharply divided federal appeals court has upheld Illinois and Wisconsin laws banning some late-term abortions, a decision experts predict will wind up before the U.S. Supreme Court.

"This decision creates a constitutional crisis which will probably go to the Supreme Court," said Janet Benshoof, president of the New York-based Center for Reproductive Law and Policy.

The center, which advocates abortion rights, says 30 states have passed similar laws, and 20 states have been barred or sharply restricted by courts from enforcing them.

The procedure in question is known medically as a "dilation and extraction." It involves reducing the size of the fetus' skull as part of the process of removing it. The court said reducing the skull "causes the adverse public (and legislative) reaction" to the procedure.

Anti-abortion groups were elated by the decision after losing a round last month when a federal appeals court in St. Louis struck down similar laws in Nebraska, Arkansas and Iowa.

Nebraska Deputy Attorney General Steve Grasz said the Illinois decision heightens chances that his state's case will be the first major abortion case heard by the U.S. Supreme Court since it upheld the Roe vs. Wade decision in 1992. Grasz said Nebraska will petition the court to consider its case. The Wisconsin law, enacted last year, provides for life in prison for anyone performing the procedure except to save the mother's life. The 1997 Illinois law calls for a three-year prison term.

Russian Jets Continue to Bomb Chechen Capital

Russian jets swooped over central Grozny on Wednesday, aiming their most serious attack on the Chechen capital since a rocket strike last week killed at least 150 people in a city market. Chechen officials said the latest attacks killed 38 people and wounded 100, but the report could not be confirmed.

In Moscow, Russian President Boris Yeltsin praised the punishing military campaign, aimed at driving Islamic militants who have twice invaded neighboring Dagestan from the rebel region.

"Russian soldiers and officers are bringing peace back to the long-suffering Chechen land. Every day and hour they display courage and heroism, cleansing Chechnya of bandits," he said in his most extensive comments yet on the fighting. The Interfax news agency, citing the Russian air force, said Russian jets had flown 34 missions over the region, killing an estimated 100 militants. The death toll could not be independently confirmed.

Russian television reported on Tuesday that up to 200 Russian tanks were attacking an area nine miles (15 km) from the Chechen capital.

Moscow says the aim is to destroy guerrillas it blames for a series of devastating bomb blasts in Russian towns, and also hopes to avoid a repeat of the ill-fated 1994-96 Chechen war in which tens of thousands of people were killed.

News Briefs Compiled By David Arnold '00 from CNN Interactive

Alcohol, Greeks hot topics at "Yo Bro" forum

BRO from page 1

have looked into recruitment for the Dining Services program and advertised positions at a job fair in the area.

One individual asked Adams to review the process of selecting a graduation speaker. Adams addressed the controversy over the compensation of the speaker. He explained that in the past he had viewed speaking at graduation as a honorific moment and therefore compensation was previously thought of as unneeded. He believes that this is no longer the case. However, he reminded the audience that in the past couple of years, speakers have not been chosen because of issues such as scheduling, not money.

Adams was also asked by several students to address the selection process which determines what occupations on campus are considered full—time and what occupations are considered part—time, namely in the position of the LBGA coordinator. Adams said that the University works very diligently and carefully when they choose to add full—time positions to the staff. He indicated that there are a number of requests each year and that the standards for the full—time positions are quite high but that he is quite sympathetic to the demands.

Adams was further asked to discuss the Ten-Point Plan to reduce alcohol use and abuse that is in effect for students. Many concerns about this plan were raised, mainly concerning its effects on student social life. Several first-year students questioned the intention of such a plan, saying that they have noticed that it has simply driven "partying" into more private situations such as dorm rooms.

Another student asked about what has been done to provide social alternatives for students. Adams replied that the process is slowly being implemented on campus.

"The intention of the program is to establish a new standard for a sense of a healthy, appropriate lifestyle," Adams said. He encouraged students to take the focus of social life off of alcohol.

He further noted that the issues such as these are plaguing campuses across the nation. He emphasized that this University is not in a unique predicament.

Furthermore, Dean Roy Baker, associate dean of Greek life, encouraged student participation in the first ever non-alcoholic campus-wide fraternity party at Chi Phi as a possible alternative on campus.

One female questioned the gender equality in the Greek system at our University. She asked why sorority houses do not exist on campus. Dean Baker replied that, in the past, the sororities have declined to take the responsibility of houses on campus. "The sororities' national organizations do not allow them to party in the houses, so they would simply be a residential unit," Baker said. President Adams said that this situation seems to be an artifact of history.

Jason Aines—The Bucknellian

Although it was sparsely attended by students, President Bro Adams tackled several questions at this week's open forum.

Shackelford addresses feminism in economics

By Jim Leahy

How do women and other minority groups fit into the teaching styles used by economists and professors in other disciplines? This question, and many others, was answered Tuesday afternoon at a small, informal lecture and discussion headed by Professor of Economics Jean Shackelford in Arches Lounge.

Shackelford has had an extremely active career since graduating from the University of Kentucky with a Ph.D. in economics. From authoring numerous books and articles to teaching at the University, she has remained busy within her field. She has also directed the Writing Center, chaired the University's Title IX Committee and is serving on the Committee for Planning and Budget.

Matthew Kasdan—The Bucknellian

Jean Shackelford discussed feminism and its role in economics in the Arches Lounge on Tuesday.

Feminist economics is another field that Shackelford has been deeply involved with. Helping to found the International Association of Feminist Economics and serving as the group's first president, she is now its executive secretary. In addition, the soon to be released Biographical Dictionary of Women Economists contains research and contributions from her work.

This view of economics takes into account a woman's role within the system. Presented as a study of "learning environments," Shackelford's feminist economic beliefs came across as contrary to the general beliefs about the neo-classical economist's canon and overall pedagogy.

"Sage on the Stage," the term used to describe the traditional instruction method for the classical and neo-classical economics based on a strict and almost concrete set of principles, was repeated numerous times by Shackelford during the lecture to emphasize the feminist's movement away from that methodology of instruction. She went on to present new styles of instruction to the audience.

The feminist group seeks a group-oriented way of teaching. A revision in the old way brings about a form embracing those who are seen as traditionally unequal—women, minorities, even children—and brings them into the learning environment. This environment is therefore breaking down the traditions of male dominated economics teaching.

Shackelford discussed a method of teaching used by another professor in which the students were asked to choose whether they wanted to take the course as individuals or as a team. Those who wanted to learn as a team had to learn together while in class and teach each other the material while ridding the group of the student parasite. On test day, the roll of a die determined the student who would take the test for the team and carry the grades of all on his back.

The point of this exercise is to make students learn together. By learning as a true group or team, the students teach each other, themselves and the teacher. Because of this form of learning, none of the students get left out and, in general, everyone benefits. Stereotypes and learning barriers are also demolished.

To sum up the ideas of feminist economics presented by Shackelford at the lecture on Tuesday, economic models and the way in which they are taught do not take into account the inequality problems in society. Shackelford, while not stressing this altogether outright, made it known that things need to be changed in the system of teaching to benefit all those involved.

This week in BUCKNELLIAN headline history

Revive Tradition of Kidnapping Presidents to Supplant Annual Water Tower Painting

November 4, 1837

"Kidnapping will be a legal offense on the campus next Friday night, Homecoming Eve, as the result of a tradition revival arranged by the two lower classes through their spokesmen and the Student-Faculty Congress.

As a substitute for the tradition of painting the water tower, banned this year because the standpipe is being painted by the White Deer Mountain Water Company, its owners, the freshmen and sophomore classes will attempt to abduct their rival presidents.

The captured president, or presidents, will be borne in state on a rustic float on a farm wagon, in other words, during the Homecoming parade the next morning. His own classmates will provide the motive power for conveyance."

Freshman Footballers Trample G-Burg, 40-0

October 26, 1962

"Last Friday afternoon, the BU Baby Bison football team crushed the Gettysburg Bullets, 40-0 to start Homecoming weekend off in fine style. Quarterbacks John Pawlowski and Bill Lerro engineered the blitzkrieg that took the Bullets by surprise and left them scoreless. It was the first time in three years that BU had beaten G-Burg."

Union Voices, New Sounds in WVBU-NER Coalition

October 28, 1965

"November 1 will mark another milestone for the new WVBU-FM. The station has recently become a member of National Educational Radio, and on November 1 the WVBU transmission of entertaining and informative NER programs will begin."

"Membership in National Educational Radio, the radio division the National Association of Educational Broadcasters (NAEB), is open to institutions and organizations engaged in educational, cultural, and public service non-commercial broadcasting over a radio station licensed by, and under the regulations of the FCC. WVBU-FM is proud to have been accepted as a member of this organization and to present these outstanding programs over its facilities."

Dining Service provides channels for suggestion

Oct. 29, 1968

A misunderstanding among University women brought about the rumor that women are allowed to wear slacks or shorts to meals in the dining hall; Apparently, the director of Dining Services had only said that Bucknell would not chase down the women who chose not to cooperate by not wearing skirts to meals. A student and staff committee was subsequently formed in order to address any dining services issues that should arise in the future.

Adams to be inaugurated as the 14th Bucknell President

Oct. 26, 1995

Over 2,000 students, faculty, alumni, and friends are expected to attend the inauguration of William D. Adams. The ceremony will take place in the field house. Although Adams has been at the University since March, he is just now being officially sworn in as president.

"Markings of the Soul"

Carey Burnes shares the story of his brother's battle with AIDS

By Katie Councilor

Two brothers, diametrical opposites on the surface, leading different lives in different places, came together and realized that the separate road they each traveled was really the same journey.

This does not sound like the framework for a presentation about AIDS, but it began the story that Carey Burnes portrayed in his piece "Markings of the Soul," which he performed Monday night in the Langone Center.

Burnes told the story of himself and his brother, Timothy, and their struggle with Timothy's AIDS. What made Burnes' portrayal different was not only that it was the true story of his life experience but that he chose to focus on the joy, the love and the magic of life, rather than pain, hurt and anger.

"I never expected to go through that hell, but I never knew people were capable of that love either," Burnes told the audience after the performance.

Matthew Kasdan–The BUcknellian

Carey Burnes shares his personal experience with AIDS in "Markings of the Soul" Monday night in the Gallery Theater.

Burnes delivered an hour and fifteen-minute performance then stayed for a personal question-and-answer session. He explained that he does not relive the experience each time he performs, but rather, he has a text and works as an actor.

"What made it so powerful was that it was very personal," Robin Manning '02 said. There was one man on the stage with few props, while brother Timothy's artwork was projected behind Burnes as he performed.

Burnes had a very powerful, poignant voice, which captivated and moved the audience throughout the piece. He began his story with his childhood, presenting himself and his brother at the beginning of their journey that would eventually bring them back together. He interspersed this history with pieces of wisdom and bits of humor.

He told the audience of his personal epiphanies about finding a magic in life that he never felt before. As he and his brother spent time together, they realized that simple time together is a gift in its own right.

Burnes wrote "Markings of the Soul" in 1991 and performed it for the first time off-Broadway in 1993. He has performed off and on in different regional theaters around the country, totaling about 30 performances. In addition, Burnes is considering setting up a tour to begin next April.

Fran McDaniel, the Lesbian/Gay/Bisexual Concerns adviser was contacted by the Williamsport AIDS Alliance about bringing Burnes to campus. McDaniel believes that AIDS education is vital and that it must continue to be taught, especially in the college setting. McDaniel feels that through education, those with HIV will have "an environment where they feel comfortable," which is of supreme importance.

For additional information about Burnes or his performance, contact the Lesbian/Gay/Bisexual Concerns office.

Wink Thinks

Jacqueline Flicker—The Bucknellian

Dear Wink,

During the summer I was dreading finding out who my roommate would be. I am a first-year student and therefore had no choice in the matter.

I was feeling all the usual things that someone does in that situation: wanting your new roommate to be like you, dress a similar way, have a similar personality and, most of all, worried about getting along well. When I got a letter saying whom my roommate would be I was somewhat relieved, but was then faced with the chore of calling him to see if my fears were substantiated. After talking to him on the phone, I thought that everything would be cool between us. We had a ton of things in common and I was really looking forward to meeting him.

Ever since I arrived at school, things have been really great between us, and we have become pretty good friends. However, there is one factor about my new roommate that I simply cannot stand.

My roommate has what I would call somewhat of an odor. I am sure that he wears deodorant but, let me tell you, it does not seem to do the trick. I feel bad for him because I do not know if it is something that he is aware of, and I know that it can hinder the ability for people to interact with him in a social atmosphere.

My main concern is that with the passing of each day our room starts to smell a little worse, and it is getting to the point where every time I walk in the room I feel a little nauseated. I really want the whole problem to go away, but I am afraid to say anything to my friend because I fear that it will ruin our friendship.

For his sake as well as mine, I feel that something needs to be done. Yet, I just don't know how to go about it. Do I tell him flat out, or should I just drop some hints that will make this smell and problem go away?

Sincerely,
Pungently Awaiting

Dear Pungently Awaiting,

Though I feel for your roommate, I can understand your situation. I think that to accomplish your goal of anti-stench a few things need to take place.

First, to understand the situation you need to place yourself in your roommate's shoes. I mean, how would you like it if you smelled? Surely if you knew you had a problem you would try to do something about it, but for all you know it could be some kind of physical problem that he has. Would you like someone coming up to you and saying, "Hey man, you stink and you have to do something about it." There are obviously two possibilities here.

The first is the possibility that maybe he just does not know that he smells. It could just float around in the air and never reach his nose. The second scenario is that he may know that he smells. However, in either case it is a tough situation.

I personally do not think that you should go and tell him that he smells. There is really no easy way to do it, and it is inevitable that you are going to hurt his feelings. Even though I think some people would probably like to know if they smell, I know that I would not tell them. There are too many emotional aspects involved, and I do think that it could jeopardize your friendship. I mean, just listen to it: "Hey, I have got to tell you something. You smell." Doesn't sound too great, does it? Therefore, I think that you may have to use some James Bond-type tactics.

First of all I think that you may want to get him a new kind of deodorant. Tell him that you picked up one at the store but it was the wrong kind so you might as well give it to him because you don't want it to go to waste. The second option that you have is to buy him a bottle of cologne for an upcoming holiday or his birthday or something. Lastly, you should buy an air freshener for your room, and a strong one. Something potent should do the trick or at least help out some. The most important factor that you need to realize is that you cannot let him catch on that you are doing this because of him.

I think that it is very noble trying to help your friend out, and yourself for that matter, but just remember that you do not want to hurt your friend. I know that stench is a tough thing to live with, but if you can deal with it to save your friendship I think that you should try. Sometimes saying something can do you more harm than good.

Until next time relax, have fun and let Wink's wisdom be your guide.

If you are interested in writing to Wink there is no need to worry—all questions are confidential and answers are always thorough. However, please write questions that are decent because we cannot include material that is libelous or an invasion of privacy. Student Democrats fight voter apathy

By Kristen Jancuk

The day you turned 18 was probably one of the more exciting days of your life. You were legally an adult. Maybe you went out and bought a pack of cigarettes or went to an 18-and-older club, enjoying the privileges that went along with that magic number. But how many of you rushed out and registered to vote?

Low voter turnout is a problem that has consistently plagued the United States over the last decade, especially in the 18-24 age group. Not only has the country seen a decline in voter turnout but a decline in voter registration as well. While many ponder what can be done, College Democrats of America is taking action to reverse this alarming trend.

"In order to promote a better America, with equality, opportunity, and freedom within a just and strong society, we dedicate ourselves to organizing the participation of democratic college students across the nation," states the CDA's constitution. While many have never heard of the organization, its history is extensive.

CDA, originally founded in 1932 to fortifying Franklin Delano Roosevelt's presidential campaign, has been nation's largest student political organization for much of this century. Although it encountered difficult times during the Vietnam War when protests prompted President Johnson to cut off the organization's funding, the CDA has been making great strides since the 1988 presidential election. Today, CDA has over 1,000 chapters nationwide and a network of over one million student participants.

While one of CDA's primary goals is the election of Democrats to office, it also places a great emphasis on registering college-age voters and has been extremely successful. While in 1992 CDA registered an impressive 500,000 new voters this number doubled to one million during the 1996 elections.

The CDA represents the "student arm" of the Democratic Party. Thousands of its members work on local, state and national level campaigns. In part because of the organization's efforts, young people between the ages of 18 and 24 have been the most consistent supports of Democratic candidates in the last two presidential elections.

The mission of the CDA is four part: to educate, organize, mobilize and take action on legislative issues. To assist in these efforts, CDA seeks to establish local college and university chapters across the country.

Jason Aines–The Bucknellian

College Democrats of America (from left), Andrew Ahren '02, Jacqueline Phillips '02, Alex Cochran '02, Matt Dewey '02.

Here on campus, a chapter of CDA was recently founded. Although the University has not officially recognized it (the organization is currently seeking an advisor) this local chapter is registered with CDA and plans to become active during the 1999-2000 school year.

"Our basic goal is to increase political awareness at Bucknell and assist with electing Democratic Candidates to office at the national, state and local level," said President Alex Cochran, '02.

CDA plans to bring Democratic speakers to campus as well as hold a voter registration sometime in the near future. In addition, Cochran hopes to send participants to political rallies sponsored by the national CDA. More specifically, the upcoming presidential race in 2000 has sparked interest in becoming actively involved in the Al Gore and Bill Bradley campaigns.

Though early in its formation, the campus chapter of CDA has elected organization officials, Vice President Andrew Ahern, '02, Treasurer Matt Dewey, '02 and Secretary Jackie Phillips, '02, and is seeking new members. Anyone interested in reversing the voter apathy trend and becoming a part of CDA is asked to contact Jackie at jphillp@bucknell.edu.

Looking out for students' best interests

Pollock assumes role as Interim Vice President for Student Affairs

By Eric Green

What do *The Alchemist*, *Midsummer's Night Dream* and *The Taming of the Shrew* have in common? Yes, those of you who guessed that they are plays are correct, but they also happen to be three of many productions one unlikely University administrator has taken part in both his time here on campus and while pursuing a career in professional theater. Tucked away in a corner office in Marts Hall, Charles Pollock, the new interim Vice President for Student Affairs, remains frozen in time thanks to a picture in Coleman Hall as the character "Subtle" in the University's 1970 production of *The Alchemist*.

Graduating from the University with a degree in English in 1970, Pollock left Lewisburg to explore the world of theater before returning to campus a few years later to do some Masters work. Although he never envisioned a career in college administration, his work at Juniata College in the field of public relations grew into a job that would eventually lead him to be secretary at Allegheny College and bring him back to campus in July 1998 as the Assistant to the President and Secretary of the University.

With President Adams impending resignation, the University is currently in a transition phase as the search for a new president continues. It is also a transition period in another area of the executive staff, particularly the position of Vice President for Student Affairs. When the position was vacated, an unsuccessful national search was conducted and the decision was then made to postpone any appointments until the new president was hired.

Meanwhile, it was also deemed necessary to redefine the position of Vice President for Student Affairs to encompass a broader spectrum. This was signified by the new title: Vice President for Student Affairs and Enrollment Management. Without a new member of the staff to fill this position, the duties of the vice president were divided and made the responsibility of two people, Charles Pollock and Mark Davies.

Already working as the Secretary of the University and Assistant to the President, Pollock has assumed the role of interim Vice President for Student Affairs. In this new position, he must oversee all of the activities defined as student affairs in addition to athletic and chaplaincy concerns.

Commenting on the interim position Pollock stated, "For this year, I hope to add an extra measure of senior level oversight to Student Affairs. More than that, I hope to bring an integration of these functions with the other major functions of the University as a member of the president's staff."

As the situation currently stands, both Pollock and another person working through this transition phase, Interim Dean of Students Allen Schweinsberg, both report directly to President Adams in the interest of the student body. Although he finds the combination of duties challenging to say the least, Pollock also regards the position as "engaging."

"I find the issues particularly interesting and stimulating. Some of the major issues for the University right now are in the student affairs area. If that wasn't true, we could have imagined going through this transition period without this interim position."

When asked what qualities that he hopes the University seeks in a new president, Pollock said he would like to see "vision, leadership, and a continuation of the kind of forward thinking that Bro Adams brought to the presidency."

What are the effects of uncontrolled drinking?

The setting: a first-year dorm room.

The props: bottles of hard liquor.

The storyline: students get excessively drunk incredibly quickly.

This is not a new story, but nonetheless an important issue to discuss—especially in the light of the University's ongoing plan to reduce alcohol abuse on campus.

This is alcohol abuse at its worst ... an environment of continuous, uncontrolled drinking.

And the result of this type of drinking has once again shattered the invincibility of many first-year students. At this past weekend's 'Freshman Formal', a student had to be escorted via ambulance to the hospital for an alcohol-related illness. There are, certainly, a handful of University students out there that have experienced such an ordeal, but it is not by any means the normal college occurrence.

And yes, "pre-partying" in rooms before such an event is not a new phenomenon, but will it take a campus death to show students the danger behind this type of binge drinking?

The Office of the Deans of Students and Public Safety has reported an increase in alcohol-related incidents in residence halls this school year. This is difficult to quantify and interpret, however. Is there more drinking occurring? Are RAs and Public Safety paying more attention? Is it a result of fewer open fraternity parties?

There is really no valid way to determine the underlying cause. There are a few items that are evident, though.

Faced with more restrictions, fraternities as a whole seem to be holding fewer parties and are implementing more stringent rules, rules that may have an effect on the drinking "culture" of the University. This is not a restatement of the old argument that if fraternities are forced to curtail their actions, students will simply drink more at other locations; it is simply a statement of fact: if drinking is done now, it is more likely to be done at other locations.

First-year students pose special problems in that they commonly do not know how to drink responsibly. Their drinking experience is many times minimal, and dorm drinking can create a radically uncontrolled, decentralized environment for alcohol.

So the University fraternities have made commendable progress in curtailing drinking at Greek houses, and other University social options for those who choose to drink are extremely limited. What should Bucknell do to educate its students—and help ensure that tragedy is avoided?

One possible aspect to a solution is increased first-year student programming aimed at responsible drinking. Instead of concentrating on solely stopping drinking altogether, the University should supplement its 'no tolerance' programs with programs that help students learn to drink responsibly. Such programs may serve their purpose by working with students to reduce "overdrinking" and severe illness associated with alcohol.

At first glance, the University may see this attitude as condoning under-age drinking. The administration needs to stop playing this PR game, however, and not work against students. Undertaking efforts to urge responsibility does not mean that violators will not be punished, but drinking education may help to prevent similar severe cases.

Additionally, recent programs like Mark Sterner's DUI story leave lasting impressions on students and could also contribute to education endeavors. Another similar presentation is already slated for Nov. 16—this time it involves a Bucknell graduate who is still incarcerated for killing six people while driving drunk.

In closing, *The Bucknellian* would urge students to imagine what life would be like if any past alcohol-related hospital trips resulted in deaths instead. And to the University, accept that drinking will continue, and put efforts toward more responsible student drinking.

Are tricks or treats better on Halloween?

Tricks

By Jack O'Lanturn

The time of year has come once again where children dress up and wander their neighborhoods demanding either a "trick" or a "treat." Customarily, people hand out treats and the children are on the way. It makes one wonder, why do they even ask for tricks? It is because tricks are better and, somewhere along the line, people got out of the habit or providing them. Children are merely asking for tricks to be returned to them.

In the old days a "trick" would commonly be a magic trick, a riddle or a puzzle. People were poor and could not afford treats, subsequently they used their skills to entertain the passing children. This, the spirit of making children happy, is the original spirit of Halloween. In modern times the holiday has been commercialized to the point of the complete exclusion of any offering non-chocolate.

Many children think of Halloween as a free day where they can gorge on as much candy as they want. This leads to many stomach aches, cavities, and post October 31st weight gain. In a society where 40% of the adult population is obese, perhaps an entire day devoted to eating fattening food is not the message to send to children.

One of the most creative aspects of Halloween has been the costumes. Children would beg their parents to outfit them in extravagant costumes and their parents would oblige, parading them around the neighborhood with pride. Now, people wear the bare minimum of a costume just so they can walk around and get treats. Handmade masterpieces have been cast-off in favor of mass-produced plastic monstrosities. There is no pride in the caliber of one's costume or one's appearance on Halloween night, simply in the amount of loot secured from one's neighbors.

The promise of treats also helps lure characters that should not be out Trick-or-Treating out of the woodwork. Seventeen year olds greedy for free candy peruse the streets in half-hearted costumes making the amount of candy available for younger children. Certain unsavory characters also hang around corners and steal candy from passing children. These acts of violence and selfishness are motivated by one factor: candy. One cannot steal a riddle or other inedible forms of entertainment.

In conclusion, treats are the motivating factor for all of the negative aspects of Halloween. If society went back to elaborate costumes and "tricks" at every door, the quality of Halloween not to mention teeth, would improve ten-fold.

Treats

By Kandee Khorn

We are at the edge of a new millennium. For the last century we have been at the forefront of technological advantages, constantly improving our quality of life.

These improvements were not limited to only one part of our society. Children's toys are now high-tech and many presents are received on birthdays and holidays. The field of candy has also been swept by change and children now expect to receive a lot of candy on Halloween. And rightfully so.

Candy is no longer lollipops and sugary maple leaves. Treat lovers can now enjoy fruity candy, gummy candy, chocolate-y candy, all in bite-size pieces. The size allows people to eat many and have it be similar to eating a large candy bar, or eat only one and get the taste of their favorite candy for little health problems.

The words "Trick or Treat" are spoken at each door on Halloween by children seeking candy. "Tricks" have become obsolete and "Treats" rule the evening. In our busy society, who was time to answer the door in costume with something funny and entertaining planned? It is much more time efficient to just give out candy. Children want it and who can ensure that your "trick" would be funny?

In a Donald Duck cartoon, Huey, Dewey, and Louey come to his door on Halloween night. "Trick or Treat" they chorus and Donald promptly drops a bucket of water on them. I use this example to show that the "tricks" dispensed by the public on Halloween have a huge potential for being mean. There are sick people out there, who wants to give them the opportunity to kill or injure your child? You already have to lock up your cats on Halloween, what a shame it would be if you had to lock up your children too.

Halloween is a night of many things: it is a celebration of fall, of things that are spooky, of neat costumes, and of candy! The ideas of Halloween and candy have been permanently woven together into one glorious day where people have a carte blanche to eat any candy they want. It may not be healthy, but it does only come once a year. There is nothing wrong with a little indulgence on October 31st. People eat chocolate on Valentine's Day and almost every major holiday involves eating.People bond over food and on Halloween children and their friends bond over the collection and devourment of candy.

In conclusion, Halloween has become focused on the "treat" part of "Trick or Treat." For whatever reason, tricks have been fazed out in favor of yummy candy. Do you hear me complaining? No way—pass the Kit Kat!

Social housing could be an enjoyable alternative to Greek life for students

By Maren Johnson

As everyone knows, Greek life is the most popular—if not the only—form of social life on our campus. Being that Lewisburg is not exactly a booming metropolis, we as students are left with few other weekend options (i.e. there are no dance clubs, more than one bar, or other amusements of the sort).

Of course we do have the occasional events planned by TOKENS and BAC, but they don't occur every weekend, and the bottom line is that sometimes we all just want to go to a good party. However, the emphasis on Greek life at the University seems to be causing some discomfort among the faculty this year.

Going back through *The Bucknellian* archives, it appears that the issue of "the faculty vs. the Greek system" has been an ongoing debate. However, it seems to me that there are options offering compromise that may not have even been considered. Take for instance, the idea of "social housing."

This concept has been part of Middlebury College's social life for quite some time. Since they do not have a Greek system at the college, they have groups of students who sign up to live in houses together. No one is turned away. The students get to name the house and plan activities for its members. They can have parties and do philanthropies as well. They seem to have most of the benefits of the Greek system minus the exclusivity.

My question is, why not have both the Greek system and social housing as options at Bucknell? Many people choose not to join the Greeks because they don't want the Greek "stigma" or they don't think they fit in. Others are cut from the system altogether or choose to drop out during rush. When I mentioned this article to some of my friends (who are members of the Greek system) they said that it would be a fun option to have and showed interest in the idea. It seems to benefit both parties—the students and the faculty— in that it satisfies everyone's interests. The faculty no longer has to worry about the exclusivity of the Greek system, and having another option on weekends might deter people from the supposed drinking problem found in fraternities. Students who would just like to get a group of friends or acquaintances and live with them in a group setting would benefit from the option of not having to rush or join the Greek system if they feel its not right for them.

The presence of social housing on campus would also create a new group of people to plan activities and create another social setting for the students. It seems to me that the solution is not to criticize or even try to abolish the Greek system, but to broaden our social horizons.

Getting out of hand: How to drink responsibly without losing control

By Rebecca Rowland

In order to avoid appearing like they are advocating drinking, the University's alcohol policy revolves solely around devising punishment for alcohol offenders. Students drink, students get caught, students get in trouble. The University has accomplished its goal.

But what about the those students who drink, and do not get caught? The administration cannot catch everyone; the possibility is huge that someone who drinks undetected will get hurt or even die. What can the administration do about that?

The rules of the risk-management game the University is playing dictate that any attempt to educate students on the practice of safe drinking equals permission. Never mind that lives can be saved; never mind that students will drink no matter what, they aren't waiting for permission—it is not acceptable.

Well it is my opinion that that avoidance is unacceptable. There are too many little things about drinking that can mean life or death and too many overzealous drinkers who don't know them for the situation to stay this way. Someone needs to put the "Rules of Drinking" in print and that someone is me.

Before the Party

There are a few things you can do before you go out to ensure that you will come back alive. The main thing is to eat enough during the day. Alcohol will effect you faster if your stomach is empty. Remember that episode of "90210" "Unless you want your friends rallying with signs trying to convince the Dean to let you graduate, drink some milk, eat some bread, and have a sensible dinner. The "empty stomach theory" does work both ways, however, so if you eat Thanksgiving dinner before going out, the chances of you getting drunk are extremely slim.

Another cautionary tactic is to make sure someone knows where you are going and when you plan to be back. If someone is expecting you at 2 a.m. and you don't show up, they can start to look for you immediately, potentially limiting the amount of bad things that can happen.

Another good idea is to carry identification in case you are unable to identify yourself if the police find you or you wind up in a hospital.

At the Party

Perhaps the most obvious yet ignored rule of drinking is, once you are drunk, stop! Get to the party, drink till your mouth goes numb...then stop drinking and enjoy your night. If you keep drinking when you are drunk, eventually your judgment about what and how much to drink will leave. After 12 beers, funneling vodka sounds like a good idea. Is it? No!

Another factor to take into consideration is time. Maybe it happens to be your 21st birthday and you have to drink 21 shots. Maybe you also weigh 105 pounds. Your body will be able to handle 21 shots if and only if you spread them out over 5 or 6 hours. Keep in mind that you are going to get blasted no matter how much time between shots, you just "up" your chances of seeing your 22nd birthday if you take it slow.

Always remember the words a wise man once spoke: "Liquor before beer, in the clear. Beer before liquor, never sicker." Learn it, know it, live it.

After the Party

Okay, you went out, you rocked on, and now you are going to bed. Just because you made it home doesn't mean that you are in the clear. The first thing you should do once you get home is drink some water. Alcohol dehydrates you so it is important to replace the fluid before you go to bed; dehydration is a serious health problem.

Some people swear that taking Advil or Tylenol before going to bed helps reduce your chances of waking up hungover. This has never really been proven but it has been noted that Tylenol and alcohol are an unhealthy combination. A good rule of thumb is to never mix over-the-counter drugs, antibiotics or narcotics with alcohol.

If you come home feeling really sick, make sure you have water and a trash can next to your bed. If you sleep on the top bunk or in a loft, sleep on the floor. Cuts and bruises aren't the worst that can happen if you fall, think broken neck/cracked-open head.

If you are helping a passed out friend to bed, do not lay them on their back. If they vomit they will choke and asphyxiate, a la Jimi Hendrix. Also, know the signs of alcohol poisoning: sluggish pulse, irregular breathing and heartbeat, and the rolling of the eyes back into the head. If you suspect alcohol poisoning but do not see any of the signs, send them to the hospital anyway.

That brings me to my final point—if you or a friend is sick and need emergency treatment but are underage, *get help anyway!* You may get in trouble and Mom and Dad sure will be mad if you get busted but I don't think they'll be too thrilled if you die either.

Follow these simple rules and I guarantee that you will be able to wake up and be embarrassed about what a jerk you made out of yourself the night before. Yea!

Pros and cons of the new voice mail system

By Allyson Demerath

I miss the blinking light. Call me strange, but there is something very comforting about coming home from a tedious day of classes and studying to see that flashing light on your answering machine. Other than making you feel extremely important, it is tangible proof that someone missed you while you were out.

Maybe it was just a classmate calling with a study question, maybe it was just a friend calling to talk about their day, maybe it was just your mother, or maybe it was him or her. Regardless, I love my answering machine and I miss it.

Consequently, I am not too thrilled about the newly activated voice mail system on campus. I see both the pros and cons of the system and a long transition period ahead. While I am ecstatic that the University is trying to make life better and easier for the students, I wish they had asked for some input before making the final decision to install voice mail.

Although there were numerous rumors about the system being installed, very few students actually realized it was here until receiving a pink instructional package in the mail. A poster in the mailroom stated that "answering machines would be obsolete."

What if I like my answering machine?

I credit the University for providing extremely easy startup instructions. Actually, activating my voice mail took less than five minutes. However, many students did not realize that the voice mail was a requirement. Consequently, trying to get in contact with students on campus became extremely difficult. After endless ringing, a recording picked up to inform you the person's voice mail was not activated.

I just adjusted to dialing a "seven" before the regular extension number to prevent hearing that stupid recording about reaching a non-working number at Bucknell University. Now, I have to hear about not having an answering machine setup. This is more frustrating than J.Crew at Christmas time!

However, by the weekend most students had their voice mail up and running due to a state of panic that they might miss that important call. Apparently setting an answering machine for two rings to beat the voice mail causes glitches, which results in not all messages being received. Thus, students were forced into using the voice mail system.

While voice mail may eventually become the norm, it takes some getting used to. For instance, who wants to come home to a broken dial tone in the place of a blinking light? Once you discover there is indeed a message, actually getting to it takes FOREVER. Then, the message may not even be for you; it could be for your roommate. So say the message is for you, who can remember a password that is at least eight digits long? I have trouble remembering my MAC card number!

Perhaps once I get used to the whole system I will begin to enjoy the benefits of my voice mail. It is convenient to be able to check messages from anywhere on campus, especially since I forgot my answering machine code to do that after the first day!

Another added benefit is sending silent messages. By simply dialing 7-6600 and entering the extension you want, you can leave a message without even having the person's phone ring on the other end. A nice bonus for those 3 a.m. calls! Plus, if for some reason you get a little tongue tied after the beep, you can always erase and re-record your message until it sounds perfect!

For these reasons, I have developed a love/hate relationship with my voice mail. While I am sure that one day I will wonder why I ever doubted it, I still miss my blinking light!

LETTERS TO THE EDITOR

Students lack spirit and dedication

Bucknell needs to find ways to increase loyalty and support for school

TO THE EDITOR:

What is Bucknell SPIRIT? The American Heritage Dictionary gives several definitions of the word. Spirit, it tells us, is strong **loyalty** and **dedication**. Does that exist here among the student body of Bucknell? I don't really think so. The plural of the same word is defined as an alcoholic beverage. Does that exist here at Bucknell among the student population? That's a rhetorical question, isn't it?

I look fondly back on my undergraduate days at the University of California at Berkeley, back in the 60's when the University was (and still is) known as "Cal" to its alumni, faculty, and student body. There was a great sense of being part of a great institution of higher learning. We had **loyalty** and **dedication**. Everyone turned out in great numbers for campus events, especially the football games.

The night before the Big Game with archrival Stanford, there would be a huge rally and bonfire in the Greek Theater up on the Berkeley Hills overlooking San Fransisco Bay. All the stone seats were hammed with students, chanting "Give 'em the axe, the axe, the axe. Give 'em the axe, the axe." Emotions soon were at a fever pitch before the big game. The next afternoon we all would march into the stadium and cheer on the Golden Bears, hoping that we would be able to retain for another year possession of the mighty Axe, the trophy that was given to the winner of the Big Game.

I've been a member of the Bucknell Community for almost thirty years. Each year I find that there is less and less spirit, vitality, loyalty, whatever you want to call it among the students that call themselves Bucknellians. Check it out upperclass persons! Next time sing the Alma Mater without looking at the lyrics.

Look at the situation this year. No Homecoming parade. A couple of concerts thrown in for the alumni. A "Night of Madness" at the Rec. center for the students. What does all of this have to do with fostering and generating, and more importantly, instilling a Bucknell spirit? I don't believe that it has anything to do with campus spirit, other than a feeble attempt at entertaining students and alumni.

It seems to me that **loyalty** and **dedication** do not really exist at this institution. The name Alma Mater translates from the Latin as "soul mother." When you eventually graduate from Bucknell, she has spiritually given you rebirth, "respirited" you so to speak. It seems to me that most of the Bucknell students are going to be "still born" when they finally do graduate from her cloistered walls for they show little if any real college spirit.

I wish that I truly had some way of dispelling this apathy that seems to pervade our campus. I might suggest that you as students start to attend and support the men and women athletic teams and events. Perhaps it's time to organize a spirit group. Cal has its "Royal Skull and Key," a dynamic spirit organization of campus loyalists who keep the flame burning under the spirit caldron.

I hope that I have been able to upset or anger enough members of the campus community by this letter. You may ask why I really care about the lack of spirit on campus. After all, what concern should it be to me? I guess that I really feel a sense of loss for you students. You are missing out on a wonderful part of your collegiate career, a part that will engender your commitment and future to your Alma Mater. I hope that this spirit will be awakened in each of you before it is too late.

Biology Department

Religion and evolution not intended to be excluded from school teachings

TO THE EDITOR:

In Kevin Mueller's recent Forum article "The Evolution Debate: Who should make the decision?", he wrote, "the United States constitution provides for the separation of church and state as a guaranteed right. That is, the children have the right to be educated without religious influences.

In fact, the phrase "separation of church and state" appears nowhere in the U.S. Constitution. The phrase is attributed to Thomas Jefferson who wrote separately that the First Amendment erected "a wall of separation" between the church and state.

The Constitutional Amendment rather says "Congress shall make no law respecting the establishment of religion, or prohibiting the free exercise thereof....".

With respect to the "right to be educated without religious influences", perhaps we should consider whether it was the intent of the founding fathers to exclude religious instruction from education. Fisher Ames, commenting on the introduction of secular texts into the classroom wrote:

"It has been the custom, of late years, to put a number of little books into the hands of children, containing fables and moral lessons. This is very well, because it is right first to raise curiousity, and then to guide it. Many books for children are, however, injudiciously compiled...Why then, if these books for children must be retained, as they will be, should not the Bible regain the place it once held as a school book. Its morals are pure, its examples captivating and noble. The reverence for the sacred Book that is thus early impressed, lasts long; and, probably, if not impressed in infancy, never takes firm hold of the mind."

Ames was clearly concerned about a trend in American schools wherein new, secular textbooks were displacing the Bible, not the opposite. Who was Fisher Ames, you ask? Fisher Ames was the man who proposed the wording of the First Amendment.

So, here was the man who gave us the "guaranteed right" saying we must not allow other books(or unproven theories) to push the Bible out of public schools. Thus it is clear that it was not his intent to guarantee an education without religious influences were "pure, captivating, and noble."

John Wilkins

Graffiti boards reveal opinions about Greeks

By Krystal Buhr, Kumba Baryoh, Phillip Jones, and Courtney Spohn

Two weeks before Fall Break, the Peer Educators of the Women's Resource Center sponsored the Graffiti Board Project. The graffiti boards were designed to encourage members of the University community to express their opinions on certain topics. Blank poster boards were placed in academic buildings and residential halls throughout campus to spark discussion on issues that directly affect students.

One of the graffiti board questions was "What do you think about the Greek system at Bucknell? Should it stay or should it go?" Although a few people interpreted the questions as antagonistic to Greeks, the project was designed by students to promote dialogue, not take a position on the idea. In fact, 87 remarks were supportive of the Greek system.

One of the graffiti board questions was "What do you think about the Greek system at Bucknell? Should it stay or should it go?"

One response said, "The Greek system should stay and anyone who questions it should take a serious look at the benefits it gives students." A writer commented, "Greek is a tradition of Bucknell, take it away and you lose years of history and hard work."

Another comment stated, "The Greek system is a very important part of Bucknell life. It provides a sense of community, provides leadership opportunities, community service, and life long friendships." A final example of positive Greek comments: "Definitely must stay. The best thing this place has going for it."

On the other hand, 66 remarks were not supportive of the Greek system. Some expressed the notion that the Greek system should go because, according to one writer, "it gives students an excuse to party and encourages alcoholism." One statement said the Greeks should go "because they think they rule the whole campus," to which someone else responded "Fake People!" which was then followed by the remark, "Big Ass generalization."

A group of comments suggested the need for other social outlets. One individual stated, "There is a serious need for alternative options. The Greek mentality and group thinking can be quite a problem." One individual remarked that "the Greek system should not be segregated and that the administration should encourage Greeks and non-Greeks to have activities together." Another individual stated "It's ok, but completely suffocates all other social activities/groups on campus." There were some comments that said that the Greek system should stay but that it needed to be reorganized.

Sixteen remarks referred directly to use of alcohol. Some examples: 1) We need more beer! 2) Definitely stay. Where else will we get beer! 3) If we lose the Frats, when will freshmen get beer? And 4) Fraternity life is an unacceptable form of alcoholism backed on high by alumni and hated by freshmen who the next year turn around and embrace it.

There were approximately 11 remarks that could be considered sexually offensive. Some mild examples: 1) Agreed, it should stay! What would horney [stet] junior guys ("girls" written in) do without it? 2) All Greeks are gay!

Additional remarks were derogatory to individuals or Greek organizations.

Science & Technology

New programs stress health awareness

Health Promotion Program director Tracy Shaynak discusses upcoming agenda and emphasizes importance of positive change

By Kate Nowak

After nearly one year since the inception of the University's Health Promotion program, a series of programs dealing with stress management, rest and relaxation, physical exercies and nutrition basics have been initiated. At the head of the program is Tracy Shaynak, director of Health Promotion Progams on campus.

"I have a series of programs, most of them educational instruction conducted within the residence halls. One of the series is called 'Power Programs,' concise 30-minute programs that cover all the basics," said Shaynak.

The rest and relaxation exercises appear to be best received by students who are excited by the program's relaxation exercises— which constitute the quality study break that Shaynak emphasizes is essential.

"I have to say that thus far the most rewarding aspect of my job has been on the hall, doing the rest and relaxation exercises, talking about stress and the topics significant within each campus community," Shaynak said.

The relaxation activities emphasize the importance of relaxation and explain what happens physiologically when one is stressed.

"Stress is what gets us through the day—it's how we choose to manage with stress that matters," said Shaynak.

The program reviews different ways to deal with stress from stretching exercises to bike-riding. Tracy also accents study breaks which can benefit from deep breathing, imagery and visualization.

Shaynak's new location, room 218 of the Langone Center, has brought more student traffic her way, with her office accessible and her assistance available at any time for students.

This year, Tracy is working with two presidential fellows, doing research with the student body. Goals of the research are to investigate students' health education needs and interests and get a feel for student health behaviors.

She is also working with some peer educators who have been planning a body image program. Tracy wants students to be aware of how eating disorders can be diagnosed and when to know a friend is in trouble.

"It appears that people are more ready to talk about it. We want to address the issue from a cultural standpoint- a body image standpoint," said Shaynak.

Stopping negative self talk and sentiments of self-consciousness is the program's focus.

"You should compliment people on things other than what they are wearing that day—let them know they gave a great answer in class," Shaynak said.

Boosting self-image in a positive direction thus involves a focus away from disease and onto the person. To blame the disorder on things external of the self such as on the negative aspects of the media is not as helpful as to understand these factors and know how to work beyond them. Tracy is thus taking positive images from the media, including expressions, images set to music, heroes and quotes. A favorite quote of Shaynak's applied to the program involves asking why Mother Teresa had looked so young throughout all her years of work and service. The reply, "a good feeling is worth more than a beautician."

"The focus on the person is what health promotion really is— keeping people well and helping them find their personal best," said Shaynak.

Today, one sector of the LC's second floor office is being constructed into a resource center to be open to the entire campus. A resource computer and pamphlets on alcohol abuse, sexual health and stress management, as well as Tracy herself will be available to assist and aid students.

Shaynak keeps close contact with RA's, who are the source of most of her programs. Her future plans include outreach to the athletic teams with a possible lecture on sports nutrition. To look at student living conditions and environments and provide each hall with educational bulletins is another plan. Tai-chi and yoga are intended to be offerred in the Spring.

Programs on sexual responsibility will begin in February and will be emphasized before students go on Spring Break. Shaynak also plans to have a display in the Susquehanna Mall and to pass out fruit and brochures around campus. Student surveys on emotional health will also be distributed.

The positive direction and advancement of the program is both exciting and promising. Tracy Shaynak, with the assistance of Bucknell LIVE, Psychological Services, Student Health Services, faculty and students is elevating health awareness on campus, urging us to take the appropriate time and measures to care for our bodies and minds.

Kate Nowak -- The Bucknellian

In collaboration with Bucknell LIVE, Tracy Shaynak organized a pink carnation distribution this month for breast cancer awareness. This is the second year in a row that carnations, with the help of faculty and students, have been given out.

Dow index to include Microsoft, Intel

By Matthew Trunnell

Microsoft and Intel, two of the most widely-held technology stocks, were added to the Dow Jones Industrial Average this week, marking the first time that issues from the technology-heavy Nasdaq have been included in the index.

The changes point to the growing importance of the technology sector in the nation's economy. Technology firms Hewlett-Packard and IBM were already in the index, but are listed on the New York Stock Exchange. The recent move sets a precedent for issues on the Nasdaq, as more may be included in the future.

According to online *News*, two other stocks, SBC Communications and Home Depot, were also added. To make room for the newcomers, Chevron, Goodyear Tire & Rubber, Sears Roebuck and Union Carbide were removed; these companies' stock had been part of the index for nearly 70 years.

The Dow is composed of 30 of the most popular stocks that have the heaviest bearing on the U.S. economy. Which stocks are included in the average is decided by the editors of Dow Jones' publication *The Wall Street Journal*. The landmark action of including non-NYSE issues in the industrial average mirrors the way tech stocks are changing the foundations of thinking on Wall Street.

As with any change in the investment industry, many have questioned the wisdom of the decision. The move is not as bold as including two Internet stocks such as Amazon.com or eBay, however. After all, Microsoft and Intel are well-established leaders in software and processor design.

The technology industry, due to its continued and rapid growth, has not quite settled into a well-defined and understood role in the stock market, especially in the minds of many investment analysts — at least not to the degree that the energy industry is understood, for one example. Nevertheless, its new representation in the DJIA is a large road sign on the path towards maturation.

The Dow Jones Industrial Average

This chart shows the performance of theindex from November 1998 to present. The Industrial Average is arguably the market's best indicator for confidence in the market.

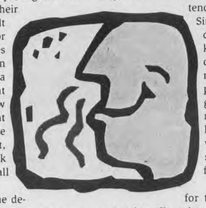
Digitized Scent : What does your webpage smell like?

By Scott Hagadorn

The next revolution in virtual sensory stimulation may soon be arriving at your desktop. A company called DigiScent is on the verge of digitizing almost every "smell" on the earth.

Joel Lloyd Belleson and Dexster Smith claim that they have developed a revolutionary process that gives them the ability to encode odors as digital data and "play" them back via a small odor synthesizer. It is as easy as playing your favorite MP3s, catching the scent of your favorite flowers on FTD's website may soon be possible.

Belleson and Smith, former Stanford University undergraduates, have a long history of creating high-tech startups, DigiScent being their latest. One of their first, Pangea Systems, built genetic databases for major pharmaceutical companies such as Incyte. They then founded Libra Digital, a venture capital firm that would be used to start new high tech businesses that eventually led them to the development of DigiScent, a company that will work to combine scent with all media applications.



Before looking into the design of a system that would digitize scent, Bellenson set out to gain an in-depth understanding of the way the human body deciphers odors. Research shows that when odor molecules are pulled into the nose, specific molecules bind with particular proteins on the surface of a neuron. A human nose just so happens to have nearly 10 million of these odor-detecting neurons. Each of the particular proteins are shape-speeific, meaning that when a molecule finds a mate protein, the neuron is stimulated. A message is then sent to the brain where the smell is deciphered.

Due to the inherent complexity of determining the exact shape of these protein molecules, Bellenson searched for proteins that could be more easily modeled, discovering a resemblance in those of certain bacteria. After a long process of trial and error, he coded the software alogrithms that could simulate this biological process.

Using a small box about the size of a pencil sharpener, a fan can blow air over vials of oils that are heated according to the algorithms of the scent. A simple serial cable will link the device to a PC or Macintosh.

The creators of DigiScent predict its release sometime around next spring, however a beta version should be available by the end of this year. Price ranges for the Smell hardware will run anywhere from under $200 for the low-end version to over $500 for the high-end model. Smell cartridges are estimated to cost under $50 and predicted to last a few months.

Although no deals have been closed with major marketers, talks have begun with Nintendo, Comcast and Sega. Simulation video games could prove to be a killer-app for DigiScent products. Autoracing games could provide the reek of gasoline and burning rubber while games like Quake may provide the grotesque stench of laser roasted flesh.

The applications for this technology, if it ever takes off, are boundless. The real question for DigiScent's survival will be its ability to attract a large market of interested customers. After all, an odor blowing gizmo could prove to be a farce in the competitive world of new technolgy. However, this does add a whole new dimension to media applications. This product has the potential to be sparked by its capabilities for phenomenal web applications. For example, "whiffs," as they may be labeled, are sure to soon find themselves just as ubiquitous as "gifs" in the vast of world of cyberspace. And how about aromatherapy online? Pheromones on the web could potentially be a top seller for XXX-sites looking to sway a user's libido!

** See Wired (7.11) for a full article on DigiScent.*

Controversy between science and religion remains untamed

By Alex Piel

With the recent controversy in Kansas and last week's University visit of evolutionist Richard Dawkins, it appears appropriate to further explore the roots of the ancient conflict between church and state.

Whereas most people believe that the facets of religion and science collided hundreds of years ago, a recent book, *The Sun in the Church*, claims otherwise and backs its claim with evidence. Current research shows that centuries of simplifications have concealed how hard Rome worked to accumulate scientific and astrononomical tools, measurements, tests and knowledge of the world outside that of humans.

Long ago, the Roman Catholic Church adapted cathedrals throughout Europe to utilize vaults serving as solar observatories. It appears that beams of sunlight falling over the cathedrals' works of art and religious marble columns inspired and provided information to astronomers about the sun, the earth and their relationship to one another. In *The Sun in the Church*, John L. Heilbron exposes an incredible ubiquity to the solar observatories. He argues that the church was not as much pursuing knowledge for knowledge's sake, but instead pursued improvement to their established calendar. The ultimate goal was to better establish a date for Easter.

Dr. Heilbron, 65, a professor emeritus and vice chancellor emeritus at Berkeley and a senior fellow at Worcester College in Oxford, lives in London and travels around the world studying old observatories. According to Heilbron, "the church gave more financial and social support to the study of astronomy for over six centuries, from the recovery of ancient learning during the late Middle Ages into the Enlightenment, than any other, and probably all other, institutions." After discovering that a multitude of churches across Europe had these solar observatories, he published his book, filling it with old drawings, geometrical figures, complicated mathematical equations and astronomical insight.

As he describes the churches, he takes the reader on a tour of some of the most beautiful places in Europe. The buildings displayed were dark inside and required only a miniature opening in the ceiling to permit a beam of sunlight to enter and strike the floor and the interior of l'eglise. This, in turn, produced a clear image of the solar disk and changed the church into a pinhole camera. These instruments lost much, if not all, of their astronomical value in the middle of the 18th century due to telescope advances and modernizations of other astronomical tools. Heilbron writes that the observatories however retained their significance as solar timepieces and were often used to correct and validate mechanical clocks which were of recent popularity.

Today's traditional view is that the church holds great hostility towards science. This belief originated with Galileo and his condemned house arrest in 1632 when he was charged with astronomical heresy. Galileo, using new telescopes, was convinced that the surrounding planets revolved around the sun, contradicting the period's established belief that the Earth was the center of all the planets. Galileo's censure at the age of 70 has forever imprinted a red dot next to the church. Not until 1992, almost 360 years later, did Pope John Paul II finally acknowledge the church's mistreatment of the infamous astronomer.

The controversy in Kansas over creationism and evolution as well as the visit from Darwin-proponent Richard Dawkins has shown that the debate between church and science remains strong. Today, it centers around the argument over the teaching of evolution and creationism in the nation's schools. Tomorrow it may be something else. Evolutionists and creationists each insist that the holes in their opponent's arguments will never be filled because the antagonistic argument is of false hope. How does one prove faith? Why should one have to quiet the masses? Perhaps it should be agreed to disagree.

Arts & Entertainment

Winter and Earth Band unveil *World Tree* concert

By Patrick Welsh

Davis Gym was transformed this past Saturday into an amazing scene of both sight and sound.

A crowd of close to 1,000 was treated to an unforgettable experience as Altoona, Pa. native Paul Winter brought his unorthodox blend of African tribal music, jazz and nature sounds to the University.

The outskirts of the gym floor were several stages that were occupied by Winter's fellow musicians. Five ramps led from the floor to a central stage, on which stood the would-be "World Tree", a metallic structure complete with chimes and bells hanging from its "branches".

A unique aspect of the concert was the audience location—a large portion of the crowd was situated in a circle between the outer stages and the central stage, making for a truly integrative experience.

Winter said of this unconventional arrangement, "I would like to offer people a much deeper participatory experience of music. So my dream has been to create events in which everyone takes part, so that we are all 'us'."

Included in Winter's Earth Band were several percussionists and a cello player, along with Winter on woodwinds. The ethnically dressed drummers added a tribal, Rusted Root-like flare to the performance.

When the crowd was not awestruck with the musicians and their mastery of blending jazz and percussion, tribal dancers seemed to appear from out of the crowd. They climbed the ramps and danced on the center stage with an energy that left onlookers begging for more.

"I would like to offer people a much deeper participatory experience of music," Winter said in a press release. "So my dream has been to create events in which everyone takes part, so that we are all 'us,'" Winter continued.

For the past three decades, saxophonist WInter and his various ensembles have traveled the world, performing over 2,500 concerts in 35 countries, exploring wilderneess areas in six continents, and recording 35 albums, some of them in natural aucoustic settings like the Grand Canyon and Siberia's Lake Baikal.

As artists-in-residence in the world's largest Gothic cathedral, New York's St. John the Divine, Winter and his Consort have presented almost 100 events during the past 20 yearrs, including the annual Winter and Summer Solstice celebrations, their renowned "Missa Gaia" and their "Carnival for the Rainforest."

Out of this wealth of experience as a composer, bandleader, recording artist and concert performer, Winter created *The World Tree*, a universal mythic image common to many cultures, symbolizing the diversity and interdependence of the entire community of life.

In recognition of his musical innovations and environmental work, Winter has received numerous honors over the years, including a "Global 500" Award from the United Nations.

The event attracted a large crowd of students, faculty and community members, fulfilling the purpose of focusing more attention on the interconnectedness of the rich diversity of cultural traditions and natural life forms of the Earth.

(Compiled with the help of publicity information.)

Saxophonist Paul Winter visited the University last weekend with his new ensemble, The Earth Band, to perform the world premiere of his newest work, *The World Tree*.

Art is in danger

Recent incident highlights thr eat to freedom of expr ession and attack on the cr eative arts

By Andrew Kohn

Commentary

What is art? I would suggest that art is anything visually appealing or thought provoking to the creator or viewer. Art is highly subjective. Everyone has his/her opinion about what is aesthetically pleasing and what is personally repulsive. And that is what is beautiful about art, it is a personal journey of discovery within oneself. Some may enjoy the old masters, like Raphael or Ruebens, while others particularly enjoy Liechtenstein or Warhol. Whatever the artist or genre, there is something in the art world for everyone.

Art is in danger. Recently in New York City, in which the Brooklyn Art Gallery was threatened with a revoke of public funds because some viewers were offended by what they believed to be pictures with an anti-Catholic message. This exemplifies the attack on freedom of expression and the endless struggle to preserve a basic constitutional right. These people, though they may have been offended, possess no right to demand that an art exhibit conform to their personal beliefs.

No one has the right to control art. I can look at some works in the Metropolitan Museum of Art in New York, especially the blank white canvases, and question their placement in an art collection. But I dare not censor it. I am reminded of the Broadway show "Art," where a man buys a white canvas for an extraordinary amount of money. His friend criticizes him for wasting money on a piece of no importance. We later find out that this work of art made the buyer feel good. Why shouldn't he have bought the painting if it made him feel good?

By censoring art, we are controlling creativity. Our society places too much emphasis on material possessions and fewer and fewer students are entering the creative fields of the arts—theater, dance, painting, photography and many others. The National Endowment for the Arts must deal with a shrinking budget controlled by a government that feels it can regulate the definition of art. It is only when we can look at art with an objective, open mind that we can see what it truly represents—an outlet for cultural, political and social release where the artist is freed from the constraints of our society. Or at least that's how it should be.

Beetna Kim—The Bucknellian

An intern at the Stadler Center for Poetry, Michael Carlin is an important member of the campus community. Carlin will give a poetry reading at 8 p.m. Sunday, Nov. 7 in the Vaughan Literature building.

Carlin is a valuable addition

By Jolene Hart

The campus community welcomes poet and writer Michael Carlin as the latest Stadler Intern.

A native of Los Angeles, Carlin received degrees from the University of California, Santa Cruz, and the University of Miami. He has taught classes and creative writing workshops at the Los Angeles County Museum of Art and the University of Miami. He has also held a poet-in-residence position at the Pasadena Public Library. Carlin has performed throughout southern California and has been published in literary magazines spanning the West Coast.

Working in the Stadler Center for Poetry, Carlin's position focuses on reading and reviewing manuscripts that have been sent in from around the country for possible publication. From these submissions, the Stadler Center hopes to compile three collections of works for publication this year.

"One of the most exciting aspects of the position is the opportunity to, hear, see and meet a number of interesting writers," Carlin said.

In January, the Stadler Center will sponsor Carlin in a trip to Nicaragua as part of the Bucknell Brigade, helping to build a health clinic for a neighborhood of refugees from Hurricane Mitch. Carlin expressed his excitement at the opportunity to help out in such an important project, as well as to experience the culture of Nicaragua.

"I've long heard that Nicaragua is a country of poets—from the world renowned Ernesto Cardeal, Gioconda Belli, and Ruben Dario, on down to every other person you'd meet on a streetcar—that Nicaraguans are into poetry the way that Americans are into sports and celebrity worship," he said.

Carlin's invqlvement as intern extends beyond the Stadler Center and directly into the life of the campus. He co-hosts the show *Attack of the Killer Poets* on WVBU 90.5, every Wednesday from 11 a.m. to 1 p.m. "We read and discuss poems, interview guests, play jazz and novelty music and present America's fastest news hour including reports of bizarre but true news accounts trawled off the web," he said.

He is also the faculty advisor of the campus art and literature magazine *Fire and Ice*, which is currently at work on future publications. "And I get to teach a creative writing class at 8 a.m.," Carlin joked. "My students work hard and they're growing as writers in their ability to stun, or delight and instruct, with fresh and vivid language, imagery and the like."

While not immersed in University involvements, Carlin hopes to use this internship opportunity to work toward the long-term goal of the publication of a book. "I hope to get a book placed before I leave here, or at least a strong manuscript," said Carlin.

Outside sources have described Carlin's poetry as "displaying the offbeat wit associated with standup poetry."

"I'd like to think of them [my poems] as accessible and somewhat mysterious at the same time." Although his poems rely largely on humor and satire, Carlin admitted to having once received the advice, "don't end it funny...leave them with their heads shaking."

Michael Carlin will present his works in a poetry and fiction reading with 1999 Philip Roth Resident Tom Franklin, at 8 p.m., Sunday, Nov. 7, in the library in Vaughan Literature building.

Grace Notes! at Weis Center will open with violinist and pianist

Violinist Barbara Govatos and pianist Barry Hannigan come to the University as the first event of this season's *Grace Notes!* series. The concert will include violin sonatas by Beethoven, Brahms and Prokofiev.

In addition to the concert, the artists will discuss and demonstrate the music being played at their concert. The lecture, part of the *Preludes!* series is at 7 p.m. tonight in the Weis Center.

Pianist and professor of music at the University, Hannigan is known for his performances throughout the United States and Europe. He made his New York debut in Carnegie Recital Hall and his European debut at the Edvard Munch Museum in Oslo, Norway. Recently honored as the recipient of a solo recitalist grant from the National Endowment for the Arts, he also has received prizes and grants from the Ford Presser, Belin, and Surdna foundations as well as three awards from the Pennsylvania Council on the Arts.

A graduate of the Juilliard School, Govatos is a member of the Philadelphia Orchestra's first-violin section and music director of the Wilmington Music Festival. A prize winner in several major competitions, she has appeared as soloist with the Delaware Symphony, Concerto Soloists of Philadelphia, the Juilliard Orchestra and the Dallas Symphony.

Grace Notes! is a series of chamber music concerts curated by Hannigan. The series is funded by the Bucknell University Association for the Arts, the Weis Center and the Kushell Music Endowment. Established in 1971 by Charles J. and Isabelle Kushell, the endowment provides financial support for residencies and special programs for the department of music.

The concert is at 8 p.m. this Saturday in the Weis Center.

By Joshua Gish

Each month the Lewisburg Subway singles out female Bucknell athletes and awards them for their outstanding performances academically and athletically. One student-athlete is chosen for each of the fall women's sports — field hockey, volleyball, golf, cross-country and soccer—and is recognized at the monthly Bucknell women's sports luncheon.

Representing the Bison field hockey team, Malina Anderson '00 was selected to receive this award for her outstanding performance and team leadership. Anderson has played solid defense during her career as a four-year starter, and she was selected to the All-Patriot League Second-Team following the 1998 season. Anderson has tallied one goal this season, bringing her career total to four, and has assisted in a score from the backfield.

Coach Cindy Opalski nominated Michelle Lesh '00 to receive this month's Athlete of the Month award for the women's volleyball team. Lesh, a four-year starter for the Bison, has led the team throughout its 16 games with 210 kills. Lesh is second on the team with 20 service aces and has accumulated a hitting percentage of .214, which is third best for the team.

Andrea Beisser '03 has raced her way to the top to earn this month's award for the women's cross-country team. After walking on to the team at the beginning of the season, Beisser has not stopped running for the top, placing first for the Bison twice in the team's first three races. Her accomplishments include finishing second at the Bucknell Invitational, seventh at the Spiked Shoe Invitational, and fourth in a meet with Rider, Shippensburg, Mount St. Mary's and West Virginia. She performed outstandingly as Bucknell's second place finisher (overall 82nd of 228) at the Pre-NCAA meet two weeks ago.

In its second year of competition as a varsity sport, the women's golf team has been motivated by the outstanding performance of Molly Campbell '03. Campbell has been selected to receive this award after her performances have captured the second best average on the team, at 85.9 strokes per 18-holes. Campbell displayed her prominence on the Bucknell squad by placing first among her teammates with a career-low round of 81, at the Dartmouth Invitational in mid-September.

Head coach Chrissy Findlay selected Kelly Irvin '03 to be the recipient of this month's award for her performance on and off the soccer field. Irvin has been an instrumental part of the Bison defense, starting all thirteen games this season. The defense has held the opposition to merely one goal in seven of its games this season. Irvin was also credited with being instrumental in the team's opening day shutout against Duquesne.

All of the student-athletes that have received this award represent the true Bison Spirit and have accordingly been recognized for their excellence. Congratulations to those who have been selected.

"Let luck be your lady tonight"

After two controversial losses, the Bison's postseason hopes depend on coin toss

By Jenny Cruickshank

Luck can often play a large role in sports, but its not usually something a team is forced to rely on.

This weekend the fate of the Bucknell field hockey team will be held in the hands of luck. In order to qualify for the Patriot League Tournament, the Bison must win a coin toss.

A week ago this event would have seemed ludicrous, but the Bison dropped two crucial games against league rivals Colgate and Fairfield, placing them in a three-way tie for third.

Since only the top four teams in the Patriot League advance to the tournament, Bucknell, Colgate and Holy Cross (all 3-3 in League play) must revert to a tie-breaker. Each team is 1-1 in head-to-head play, voiding a possible tiebreaker. The top two teams in the flip-off will advance.

"It's a tough way to settle it," said senior tri-captain Katey Twombly. "But I guess there is no other way—the season is just to short."

Last Wednesday, the Bison lost a close match at Colgate, 3-1. Bucknell got on the board early when Melissa Maher '02 connected on a pass from tri-captain Jenny Zimmerman '00 only three minutes into the contest.

But that would be the only time the Bison would find the back of the net, and Colgate would soon answer, sending the game into halftime at a 1-1 tie. After a controversial goal early in the second, Colgate scored a third unanswered goal to seal the victory.

Tim Choate-The Bucknellian

The Bison will host Georgetown this Saturday at noon.

"I think [Colgate's] second goal really threw us off," admitted defender Katie Yingling '01. "We dominated the game positionally, but we were thrown off emotionally after that call."

The Bison would face similar officiating at Fairfield last Saturday. Bucknell fell behind early as the Stags scored two unanswered first half goals.

But the Bison fought back in the second when Zimmerman found the net off of a penalty corner, assisted by Maher and Maura Higgs '01.

Later in the second stanza Twombly set up sophomore Dena Ebert, whose goal tied the score at two-apiece, sending the game into overtime.

In the first overtime, Zimmerman connected on a penalty corner from Maher and Higgs once again, but the officials called the goal back, claiming that the shot was too high to count.

After much controversy, the teams battled through the remainder of the first overtime and seven minutes into the second overtime, when Fairfield netted the winning goal.

After an unlucky week of League play, the Bison are due for some luck in the tournament determining coin toss this weekend.

Bucknell, which holds a 10-6 record overall, hosted Cornell this past Wednesday and will host Georgetown on Saturday.

BEYOND THE BUBBLE

Payne Stewart Killed In Crash:

PGA Tour golfer Payne Stewart, the 1999 U.S. Open champion, was one of six people killed when his jet crashed near Mina, South Dakota Monday. The plane left Orlando, Florida Monday morning and was headed for Dallas, Texas. Investigators believe that the aircraft, which was flying at approximately 39,000 feet, became suddenly depressurized, killing everyone on board almost instantly. It continued on autopilot for about 1,400 miles until it ran out of fuel over South Dakota. Also killed in the crash were Stewart's agents, Robert Fraley and Van Arden, golf course designer Bruce Borland and the two pilots, Michael Kling and Stephanie Bellegarrigue.

Stewart, 42, was one of the most successful players ever on the PGA Tour. During his 18-year career, Stewart won 18 tournaments, including two U.S. Opens in 1991 and 1999. He is currently ranked third in all-time career earnings. His trademark knickers and cap also made him one of the most recognizable golfers ever. Said golfing legend Arnold Palmer, "This is one of the most terrible tragedies of modern day golf." Jack Nicklaus added, "He will be sorely missed by anyone who ever knew him or had the pleasure of watching him play."

A memorial service will be held Friday in Orlando and the PGA Tour has rescheduled events for that day so players can attend. Stewart is survived by his wife, Tracey, his 13-year-old daughter and his 10-year-old son

Yankees Continue Postseason Dominance:

Any notions that the Yankees' domination during the playoffs would end against the Atlanta Braves appear to have been put to rest. New York won the first two games of the Series in Atlanta this weekend before returning home for a dramatic come-from-behind victory in ten innings Tuesday night. The Yankees now sit just one victory away from their second-straight World Series title and third in four years.

New York has now won five consecutive playoff games and are 10-1 in the post-season this year. Their only loss was a 13-1 drubbing at the hands of the Red Sox in the ALCS. In the past two seasons, the Bronx Bombers have compiled an astounding 21-3 record in the post-season. The Yankees have also won nine consecutive World Series games, dating back to 1996. They lost Game Four in Atlanta that year before coming back to win Games Five and Six. They swept the San Diego Padres in last year's Series and are 3-0 so far against the Braves this year.

Young Not Ready to Retire:

San Francisco 49ers' quarterback Steve Young suffered his fourth concussion in three years on September 27 and has missed all three games since then. After much speculation that this latest injury would force him to retire from pro football, Young, 38, announced Wednesday that he intends to return to the team sometime in the future. "I would like to (play again) if it's appropriate," he said at a news conference. "Yet it very well might not happen this season. If time runs out on the season, so be it."

Two weeks ago, Young's primary neurologist, Dr. Gary Steinberg made a long-term recommendation about whether he should play again. While Dr. Steinberg's opinion hasn't been disclosed, Young has conceded that the report was "discouraging." His agent has said that the opinion has been reaffirmed by other specialists. Though Young has no real hope of receiving medical clearance to play any time soon, he remains optimistic that his condition will clear, leaving at least a possibility of a return next season. Said Young, "I feel tremendous responsibility to this team. The 49ers, it is much more than the game, it's the people. I intend to do anything I can to help this team win."

Woman Defeats Man in Kickboxing:

A 24-year-old woman scored a first-round technical knockout over a 39-year-old man in a kickboxing match last Thursday night in Mesa, Arizona. The scheduled three-round bout was stopped at the 1:20 mark after Sunshine Fettkether dropped Randy Pittman with a kick to the head. Pittman got up, staggered back to his corner, sat down and was counted out over the cheers and jeers of the standing-room-only crowd of 500 at the Nile Theater. "It kind of looked like he didn't want it anymore," said Fettkether, who won a silver medal at an amateur kickboxing tournament last year. "He showed up. I was a little worried he might not show up." Pittman, a construction worker from Mesa, declined comment after the fight.

Bison host ECAC Tourney

Women's golf hosted a 22-team field at the Bucknell Golf Club last weekend

By Mike Brophy

Bucknell hosted an ECAC championship for the first time in its history last weekend, when the women's golf team hosted the ECAC final tournament.

Playing at the Bucknell Golf Club, 22 teams gathered for a chance to defeat last year's champions, Penn State, and become the new ECAC conference champions.

After a rainy practice round on Friday afternoon, the teams were ready to compete on Saturday morning. The day proved successful for the young Bucknell team, as it finished in a very solid ninth place. Freshman Molly Campbell led the team with a 80 on her first round and was tied for 11th place in the individual standings.

Coach Brad Tufts was happy with the first day of competition. His expectations were for the team was to finish 10th or better, and the Bison appeared to be well on their way.

As the golfers took the course on Sunday, the Bison were in a pivotal position to advance in the standings. Unfortunately, Sunday did not go as well as planned. Bucknell faced extremely tough competition and slowly slid down the standings as the day went by.

After the last hole was finished, the Bison dropped four places to 13th in the standings and were forced to end their season on a down note. "We were all disappointed with the way that we played, but it was definitely not for a lack of effort," emphasized Tufts.

Molly Brown led the team with a two day total of 172 (80-92) and ultimately finished 39th in the individual standings. Sophomore Hilary Mainka and freshman Jess Hetrich placed 46th and 52nd respectively, in the field of 115 players.

In the end it was Penn State winning for the second straight year, as they overcame Yale by a 12-stroke margin.

Coach Tufts was very impressed with the way that the tournament was run. "The tournament went very well. I was extremely pleased we were able to host an Eastern Championship for the first time."

Opposing schools gave similar thoughts, as several coaches commented to Tufts that Bucknell was a great host and put on a tremendous tournament.

This was Bucknell's final match for the semester, but the Bison will be back in action during the spring. In only their second year as a collegiate team, the Bison improved a great deal and will be looking to compete in future tournaments.

All Blacks with 5-1 start

MEN'S RUGBY from page 11

Matt Scheiffer—The Bucknellian

The All Blacks will compete in the EPRU championship this Saturday.

By Joe Tierney

This season has proven to be a great one for the Bucknell Men's Rugby Club team, the All Blacks. Despite being ravaged by injuries and playing without a coach, the All Blacks have gotten the job done.

There are two seniors that take full responsibility for the team—president Geoff Sargeant, the team's leading scorer with five tries, and captain Mike Morris. They lead the team day in and day out.

However, it is the team as a whole that produces wins for the All Blacks. There are many seniors on this rugby team that have contributed since their first day of practice as freshmen.

Players like Jacob "Chops" Frechette, Marcus Hernandez, Mike Kagey and Mike Vanderveer have established themselves as tough and dedicated rugby players. And there is also senior Mike levers, a workhorse on the team for four years whom fans may remember as the player who literally trucked over two opponents with a full head of steam to set up a Bucknell try.

The All Blacks also have great depth with juniors Mike Naporano, Greg Manz and Piers Causton and sophomores Keon Burley and Braham Nell.

They will are the future of the All Blacks and will keep the winning tradition alive. Bucknell has a record of 5-1 this fall, with its only loss coming to Lock Haven.

However, the All Blacks will get another chance at Lock Haven at the Eastern Pennsylvania Rugby Union final on October 30 in Philadelphia. All season this Bucknell team has played with high energy and intensity, and they plan to give it their all to come out victorious as the EPRU champions.

Soccer falls to Lehigh

Close season against Navy Sunday

By Katie Yingling

As the Bison come off of a 1-1 week, they're looking for some better luck as they face the rest of their Patriot League schedule. Bucknell defeated Stony Brook, 1-0, but lost to Lehigh, 4-2.

Bucknell started off the week with a 1-0 victory over SUNY Stony Brook. Despite being out shot, the Bison clinched their victory with junior Sam Chamovitz's goal off of a cross by sophomore Nate Hopfinger.

Chamovitz currently leads the Bison in overall scoring with 11 goals and two assists.

The Bison faced Lehigh on Saturday, another trying game with a less satisfying end.

The game was held scoreless until the second half, when Lehigh placed two balls in the back of the net.

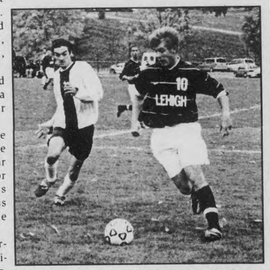
Bucknell came back from the two-goal deficit to tie the game at 2-2 with goals by Geza Lendvai-Lintner '01 and Steve DeLuca '00.

Unfortunately, these two goals were not enough to give the Bison the momentum to break the tie, as Lehigh scored twice more in the second half to defeat the Bison, 4-2.

This past week's results put the Bison at 9-5-1 overall and 2-2 in the Patriot League. With only two games left on its schedule, both being Patriot League matches, Bucknell's season is far from over.

"Our season is still within our control," senior Brian Carr said. "The next two games will be the most important in determining where we end up."

The Bison hosted Lafayette this past Wednesday in their last home game of the season, and they will travel to Annapolis on Sunday to face Navy.



Evans Mitchell—The Bucknellian

A 1-1 week left the men's soccer team at 9-5-1 (2-2 in the Patriot League). Its match at Navy will determine its final League standing.

Crew announces fall schedule

Team opened season in Boston on Sunday afternoon

By Rose Sedo

Both the men's and women's Bucknell crew teams were busy this past weekend, competing in the famous Head of the Charles Regatta in Boston last Saturday. The team opened its season hosting the third annual Bucknell Invitational on October 3.

Head Coach Steve Kish '92 has announced several changes in regards to the previously published crew schedules.

For one, the Bison will not be competing in the traditional Frostbite Regatta in Philadelphia on November 6, nor will they row the next day in the Bill Braxton Memorial.

The next competition for the Bison crew squad is this upcoming weekend, October 30, in the Head of the Schuylkill Regatta in Philadelphia.

There is also a change in the date of the Bucknell Sprints on Walker Lake, near Trxelville, PA. The race has been moved up a week to November 13th. Expected to take the water along with the Bucknell crew team are: Ithaca, Lafayette, Marietta, Mercyhurst, Rochester and tentatively Fordham, Lehigh and Marist.

Women peaking at the right time

By Andrew Bevan

The Bucknell women's soccer team stayed on the winning track this week after a tough overtime victory over Army, downing Mt. St. Mary's, 2-1, and Lafayette, 2-0.

The Bison traveled to Emmitsburg, Maryland last Tuesday to face Mt. St. Mary's in a non-conference match. Mt.St.Mary's got on the board first with a tally four minutes into the contest, but Bucknell did not wait long to tie it up. Just 55 seconds later, freshman Tara Utchel put home the equalizer with a blast from 20 yards.

Mt. St. Mary's then proceeded to pack the box and implement a defensive-minded strategy. This game plan frustrated the Bison offensively as they hit the crossbar four times.

Katie McElligott '00 finally broke through for Bucknell, notching the game-winner off an assist from Sarah Klang-Glienna '02 just over 15 minutes into the second half to seal the 2-1 victory.

Notable performances included the consistent play of Utchel, as well as a strong game by senior tri-captain Sarah Stopper.

Last Saturday the Bison traveled to face Lafayette in a key Patriot League matchup. The Bison turned in a powerful offensive performance, outshooting their opponents 18 to five en route to a 2-0 shutout victory.

"We dominated the Lafayette game," Findlay said. "(Lafayette's) only attack was up top and our defense did a good job of stepping up and possessing the ball well."

Defender Karla Killian '03 got things going for the Bison 25 minutes into the second half with a powerful left-footed blast that put Bucknell up 1-0.

McElligott sealed the victory 18 minutes later with her eighth goal of the season, off a cross from Colleen Butler '00.

"McElligott is back on track. She is playing with confidence and fire," Findlay said. For her efforts, McElligott was honored as Patriot League Offensive Player of the week.

Findlay recognized the outstanding performances of Meredith Barnes '02, Lindsay Slomer '02 and Kelly Irvin '03 against Lafayette.

"Everyone was really pumped for our game against Lafayette on Saturday and it showed," Barnes said. "We all knew that we had to beat them if we wanted a chance to go to the tournament."

With their victory over Lafayette the Bison moved to 3-2 in the Patriot League and are right in the thick of things for the Patriot League tournament. A victory this Sunday at home against Navy will assure Bucknell a spot in the tournament.

"The team is finishing better and playing with more confidence. They know how important this weekend is," Findlay said.

Sunday's Patriot League match against Navy is senior day, and the team's six seniors will be recognized for their contributions and achievements to the program. The game will be at 2:00 p.m. at the Davis Gym fields.

The Bison finish up their regular season with another home match this Tuesday against Wagner.

"The team is peaking at the right time. Our fitness is good and the young players are stepping it up. Its that time of year," Findlay said.

Tim Choate—The Bucknellian

The Bison defeated Mt.St. Mary's and Lafayette.

"Everyone was really pumped for our game against Lafayette on Saturday and it showed. We all knew that we had to beat them if we wanted a chance to go to the tournament."
—Meredith Barnes '02

MILLIONS OF THE BEST MINDS IN AMERICA HAVE ALREADY CHOSEN THE BEST RETIREMENT SYSTEM:

TIAA-CREF.

When it comes to planning a comfortable future, America's best and brightest turn to the expert: TIAA-CREF. With over $250 billion in assets under management, we're the world's largest retirement system, the nation's leader in customer satisfaction,* and the overwhelming choice of people in education, research, and related fields.

Expertise You Can Count On

For over 80 years, TIAA-CREF has introduced intelligent solutions to America's long-term planning needs. We pioneered the portable pension, invented the variable annuity, and popularized the very concept of stock investing for retirement. In fact, we manage the largest stock account in the world (based on assets under management).

Today, TIAA-CREF can help you achieve even more of your financial goals. With TIAA-CREF you'll find the flexibility and choice you need, backed by a proven history of performance, remarkably low expenses, and peerless commitment to personal service.

Find Out for Yourself

To learn more about the world's premier retirement organization, talk to one of our retirement planning experts, or better still, speak to one of your colleagues. Find out why, when it comes to planning for tomorrow, great minds think alike.

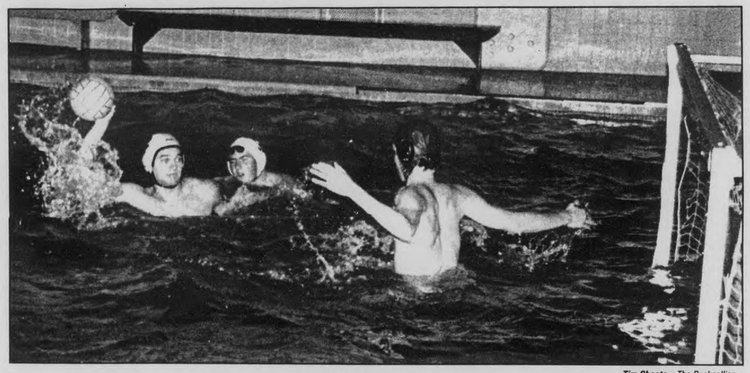
Bison suffer disappointing weekend

Lose to Massachusetts, 15-7, and Brown, 8-3, in ECAC Championships.



Tim Choate—The Bucknellian

The men's water polo team did defeat George Washington, 12-10, and it will need to beat GW again this weekend to adavance to Easterns.

By Allison Kuhn

Playing without the leadership of captain Kevin Permisohn '01, the team leader in assists and an imposing defensive player, the Bucknell men's water polo team faced two disappointing losses in the ECAC Championships this past weekend at Brown.

The Bison lost to Massachusetts, 15-7, and Brown, 8-3. However, Bucknell did manage to defeat George Washington, 12-10.

Coach Mike Wooster called the loss to Brown, "horribly disappointing. We should have easily beat Brown. Although the defense played great, we missed seven power play opportunities and eight of our shots didn't even touch the goal."

Wooster was equally disappointed with the loss to Umass, identifying that, "13 of their 15 goals were results of counter attacks. We just weren't warmed up and ready to go."

Wooster recognized that there are three levels of teams on the East Coast: the top level teams, the middle of the road teams and the new teams. "We are a team that belongs in the top level of teams, but this weekend we played like a middle of the road team," Wooster said.

The win against George Washington proved to be Bucknell's only high point of the weekend. This marked the third time that the Bison have defeated George Washington this season. Tate Greditzer '01 had five goals for the Bison.

The Bison will face George Washington again this weekend in the Southern Championships at Princeton, and with a win they will advance to the Eastern Championships.

"Our win over George Washington gives us the confidence that we need to be successful at Southerns," said Alex Bozic '00.

Prince Ali's football picks

By Ali Ahmed

Green Bay(4-2) 27: Seattle (4-2) 20

There is no way that Favre will let his old coach get a victory on hisreturn to green Bay. Seattle's lack of a running game will hurt them.

Dallas (4-2) 20: Indianapolis (4-2) 26

Aikman, Smith and Irvin look like old men next to Manning, James and Harrison. Indianapolis must stop the Cowboys run game to win this one, though.

St. Louis (6-0) 24: Tennessee (5-1) 30

The Titans have had an extra week to prepare for the Rams. Eddie George and Thigpen have big games as usual, whichever quarterback the Titans start.

Minnesota (3-4) 34: Denver (2-5) 20

Jeff George should lead the Vikings to another big win. Even Ray Sherman will have a hard time messing this one up.

Miami (5-1) 13: Oakland (4-3) 17

This should be another close game, but without Dan Marino, the Dolphins will lose out at the end.

San Diego (4-2) 13: Kansas City (4-2) 10

Don't expect Kramer to have three bad games in a row. The Chargers win a close one.

Tampa Bay (3-3) 17: Detroit (4-2) 13

It's time for the Bucs to start playing to their potential and for the Lions to realize that they are not as good as their 4-2 record.

New York Giants(4-3) 10: Philadelphia(2-5) 13

Improving Philly plays another ugly game but manages to beat out the slightly better of the two sorry teams from New York.

Last week's record: 4-2

PLAY HARD AND GOOD LUCK!

FOOTBALL from page 16

session, setting up the offense with excellent field position at the Leopards 43. Bucknell capitalized, as McDowell's 19-yard scramble brought the ball inside the 10 and Jason Marrow '01 crossed the goalline on fourth and goal. Lundburg's PAT put the Bison ahead 14-0.

Lafayette threatened on its next possession, but Reed Tunison '01 blocked a 35-yard field goal attempt to keep the Leopards off the scoreboard.

A crazy sequence followed: McDowell was picked off on the ensuing play, but Kevin Eiben '01 intercepted Armstong on Lafayette's second play. The Bison offense went three-and-out, and Lafayette ended with the ball near midfield.

This time the Leopards took advantage, marching 53 yards on eight plays to cut Bucknell's lead to 14-7.

On the first play of Bucknell's ensuing possession, Jabulani Powell '02 broke loose for a 50-yard romp that sparked the drive. Powell tallied 104 yards for his fourth consecutive 100 yard game, but he was held to just 10 yards in the second half.

McDowell scrambled for a 29-yard score, and Lundburg's PAT gave the Bison a 21-7 lead going into the half.

But the game was a tale of two halves, as the Bison offense was held to 70 yards, three first downs and zero points in the second half—after outgaining Lafayette by a three to one margin in the first half.

"We couldn't get the defense off the field (in the second half)," Gadd said, "and that allowed Lafayette to build some momentum."

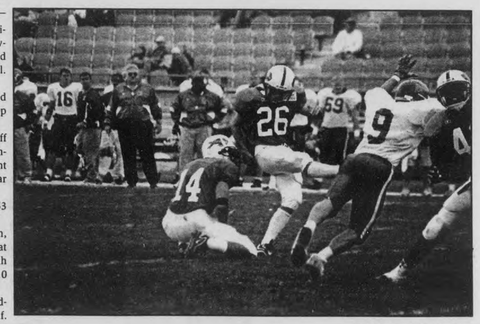
Lafayette back Brian Tuma's 44- and 30-yard jaunts led to a field goal and a touchdown respectively on the Leopard's first two possessions of the second half, slashing Bucknell's lead to 21-16. Tuma ran over the Bison defense for 166 yards and two scores on the day.

On the game's next nine possessions, both offenses shut down and failed to mount any scoring drives.

When Lafayette took possession at its own 27 with just 3:51 left in the game, the Bison needed just one more defensive stop to secure the victory. But Tuma rushed for 44 yards on three plays, setting up the Leopards at Bucknell's 29. And after senior Justin Lustig's sack forced the Leopards into fourth and 17 from the 36, Armstrong found May for the "heartbreaking" score that secured Lafayette's 22-21 comeback victory.

Justig, who led the Bison with 15 tackles (three for loss) and a sack, recognized the continued "inconsistency" of the defense in the Lafayette game. "We're great at times and we're terrible at times," Lustig said.

Gadd plans to give his players "some time away from football" to get healthy and refocus, as the Bison have a bye this week before embarking on their final three-game Patriot League stretch.



Tim Choate—The Bucknellian

Freshman kicker Chris Lundburg was 3-3 on PAT attempts against Lafayette.

Every Rose has its thorn

Phones rang off the hook for hours at NBC-affiliates last Sunday, after reporter Jim Gray's nationally broadcast grilling of All-Century Team player Pete Rose.

Minutes after Rose received the longest ovation among the 17 living members of the team by Atlanta's Turner Field crowd, Gray began "bombarding" the legend about his gambling on baseball, to the shock of Rose and fans nationwide.

"You're bringing up something that happened 10 years ago... I'm sure everyone's tired of hearing about that," Rose said. "It's too festive a night to worry about it. I'm just a small part of a big deal tonight."

Commentary

Carmen Mauriello
Sports Editor

But on a night that was designed to honor the greatest baseball players who ever lived, Rose was the biggest show in town. And unfortunately it wasn't his major league record 4,256 hits that drew all the attention, but rather the lifetime ban from baseball that Rose agreed to in 1989.

In 1988, then-baseball comissioner A. Bartlett Giamatti launched an investigation into Rose's suspicious gambling habits. The probe turned up "overwhelming evidence" that Rose not only bet on baseball, but from 1985-1987, he frequently bet on the Cincinnati Reds, the team which he played for (through 1986) and then managed.

Fearing public humiliation, Rose agreed to his banishment in 1989. But it contained the provisions that he could apply for reinstatement after one year and that, "nothing in this agreement shall be deemed an admission or a denial by Peter Edward Rose of the allegation that he bet on any major-league baseball game."

Although admitting that he had a compulsive gambling problem and was seeking help, Rose claimed that he never bet on baseball - a stance that he hasn't wavered in until this very day. When Gray played hardball to try to get a confession, Rose proclaimed, "I'm not going to admit to something that didn't happen."

Another stance that hasn't wavered a hair in the last decade is the League's on Rose's re-instatement to baseball. Rose waited until 1997 to apply for reinstatement, but his case still has yet to be decided on. Commissioner Bud Selig has shown no desire or intent to reinstate Rose (his unofficial stance on Rose's reinstatement being, "over my cold, dead corpse").

Being on baseball's ineligible list, Rose can't manage a MLB team or be selected into the Baseball Hall of Fame - his lifelong dream.

If it were not for his banishment, the long list of achievements and records that Rose compiled over his 24-year playing career would have ensured him selection into the Hall in his first year of eligibility in 1992. In addition to breaking one of baseball's longest standing and most coveted records, Ty Cobb's career hits record, Rose also played in the most winning games, had the most at-bats and hit the most singles of any player in baseball history.

The 629,742 fan votes that Rose received for the team reflect the public's growing willingness to forgive him. A 1998 survey administered by the AP revealed that although less than one-third of those surveyed believed that Rose did not gamble on baseball, the majority, by a 2-1 ratio, held that he should be reinstated.

Gray's harsh tactics resulted in a public outcry against the reporter and for Rose. A "Fire Jim Gray" web site was created, NBC advertisers have received thousands of e-mails and calls to cut their support of the station and most suprisingly, the Yankees refused interviews with Gray after their Game Three win Tuesday.

After hitting the game-winning homerun, Yankee Chad Curtis was approached by Gray and had but one thing to say before walking away. "Because of what happened with Pete, we decided not to say anything," said Curtis, speaking for the entire Yankee team.

A USA Today Poll taken Tuesday revealed that 23% of fans made the switch to support Rose's reinstatement after Gray's interview, in addition to the 59% who stood firm in their prior advocacy.

But should this public outcry result in Rose's reinstatement? Not in the eyes of the only man that matters: Selig. "That certainly can't influence your decision," Selig said. "In life, you have to do what you think is right... You can't be governed by what you think 'X' number of people feel."

What does he have to do to get reinstated? Patience for one—and lots of it. In about five or so years, Selig most likely will step down as the League's headman. Rose will get another chance then to present his case to the next commish.

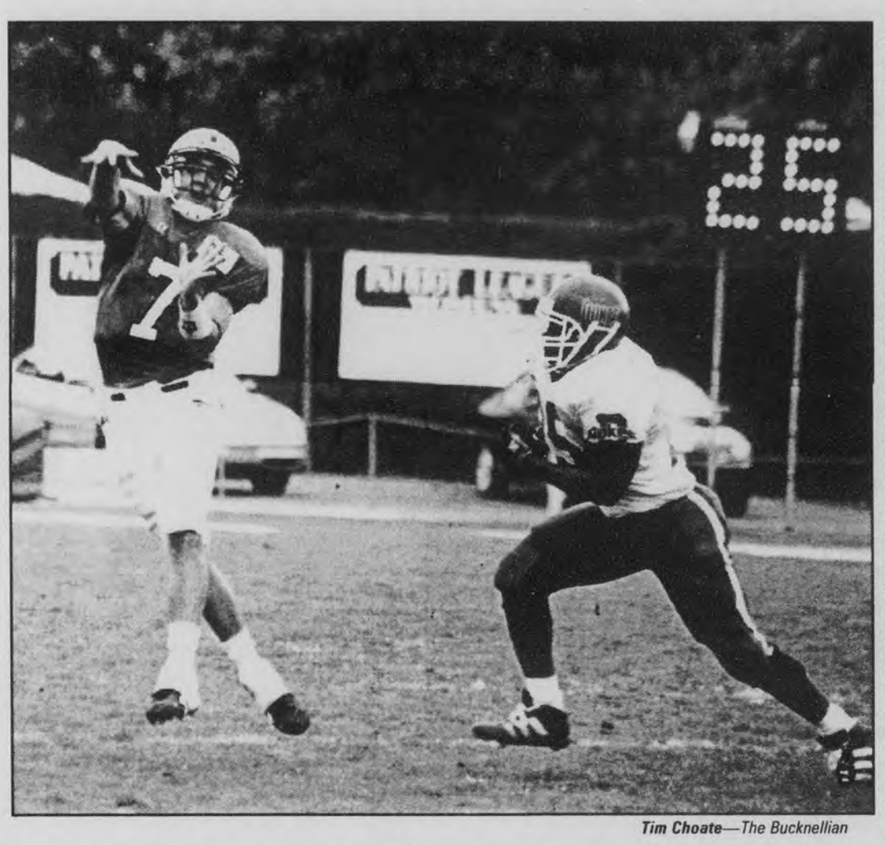
Another thing that Rose needs to work on is being remorseful. Regardless of whether he's guilty or not (which most people believe he is), Rose has caused a lot of shame to the game. He's been too bull-headed to solemnly admit that; if he humbles himself (the "great one" humble himself—not likely, I know) and appears sympathic, that will help his cause.

Rose also needs to start doing some penance for his sins. He's been recognized as an unfaithful husband, a poor father, a drinker, money-grubbing and a self-admitted compulsive gambler—all things that don't exactly meet the "character" and "integrity" requirements for Hall of Fame selection. He's got to start giving back to the community, fans and game that made him who he is.

Pete Rose was a great baseball player and it's a shame that he's not in the Hall of Fame. But it's not worth wasting any tears over, because "the great one" wouldn't shed any for anyone but himself.

A heartbreaker for Bison in Easton

Last second touchdown pass seals Bucknell's fate in 22-21 loss to Lafayette



Tim Choate—The Bucknellian

Don McDowell '00 led the Bison to 21 first-half points, but Lafayette's defense held the Bison scoreless in the second half, as Bucknell managed just 70 yards and three first downs.

By Carmen Mauriello

There's just over a minute left in the game. Your team is ahead 21-16. Your opponent has the ball on your 36-yard line. It's fourth and 17. On the previous play, you sacked your opponent's first-time starter at quarterback—the sixth time you'd sacked him on the day. What do you do?

Head coach Tom Gadd was faced with these exact circumstances and was posed that exact question in the Bucknell football team's game at Lafayette this past Saturday. Instead of sitting back in zone coverage and giving Lafayette quarterback Harry Armstrong time to throw the ball, Gadd elected to pressure the inexperienced quarterback with a strong rush—leaving his defensive backs isolated on Lafayette's receivers.

But the same gameplan that had stymied Lafayette's passing game in the previous 59 minutes didn't work here, as Armstrong found Andy May on a 36-yard scoring strike down the right sideline that sealed Bucknell's fate. Unfortunately for the Bison, the 22-21 conference loss may have ended their hopes of a Patriot League crown, dropping them to 1-2 in League play (5-3 overall).

Gadd took responsibility for the loss, saying that he and his staff, "outcoached ourselves. The players put us in a position to win the game. We needed to give them a chance to finish it."

For All-Patriot League linebacker Shawn Redd '01, who recorded nine tackles, an interception and a pass breakup against the Leopards, Lafayette's last second score was a nightmare. "It was like, 'This isn't happening. We played too hard for this.' I didn't realize it until after the game."

Although they didn't finish strong, the Bison started out on the right foot—scoring on their first possession to take a 7-0 lead. In all three of its losses this season, Bucknell has ironically scored first.

Quarterback Don McDowell '00 engineered the 84-yard drive that ate up 5:29; he found the endzone on a seven-yard bootleg. Chris Lundburg '03 booted the extra point to give Bucknell a 7-0 advantage.

The Bison defense then held Lafayette to minus seven yards and a three-and-out on its ensuing pos-

see FOOTBALL, page 15

Volleyball downs Holy Cross

Prepares for crucial Patriot League matches vs. Lehigh and Lafayette

By Justin White

A timely comeback from the women's volleyball team helped the Bison maintain their momentum in the Patriot League standings.

The Bison defeated Holy Cross on the road this past Saturday to advance their overall record to 9-8. More importantly, the team is 3-4 in the conference and has solidified a fifth place position. They now must advance to one of the top four spots in order to qualify for the Patriot League tournament.

Bucknell struggled early against Holy Cross, losing the first two games, 11-15 and 13-15. Coach Cindy Opalski was disappointed with the first two games, saying, "there was not the energy and enthusiasm that we're capable of."

The Bison stormed back to take the next two games 15-8, led by the strong hitting of Shannon Walker '02, who finished with 25 kills and a .288 hitting percentage.

The Orange and Blue managed to buckle down in the fifth game, finishing off Holy Cross, 15-13.

Contributing to the winning effort were senior co-captains Michelle Lesh and Jennifer Post. Lesh had 14 kills and 11 digs, while Post led the way on defense with 14 digs.

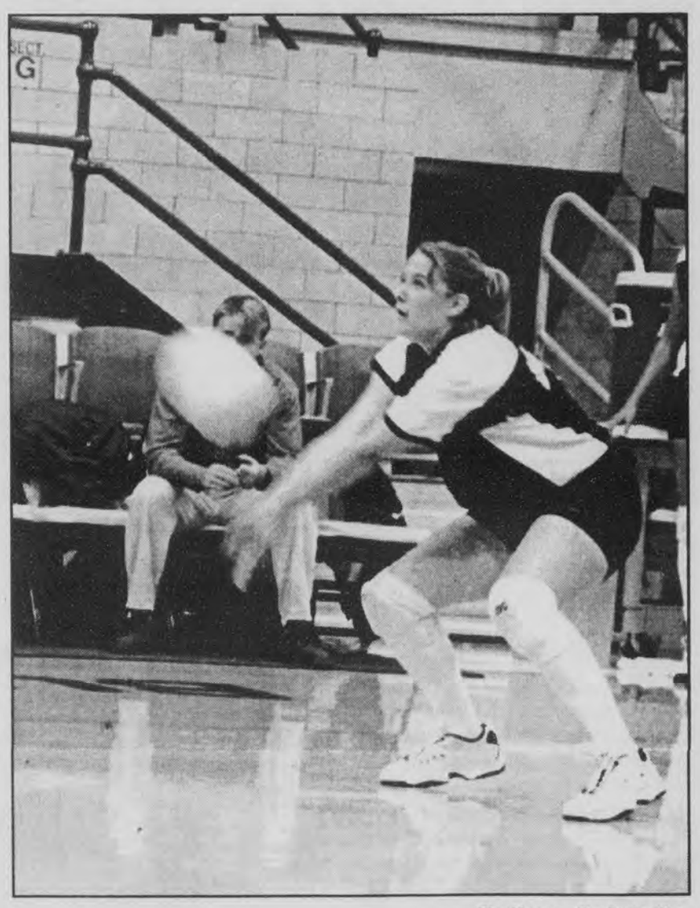
The team's recent success has a lot to do with its new starting setter, Whitney Williams '02. She has started the last three games for the Bison and tallied 53 assists against Holy Cross.

"She's stepped in and done a nice job for us, changing the level of intensity and running a quicker, more diverse offense," Opalski said. "She's also added creativity with what she does with the ball."

The Bison are entering the most pivotal part of their season, facing off first against Lafayette on Friday evening and then against Lehigh on Saturday afternoon. Both games are in Davis Gym.

"We have the talent to beat any team in the Patriot League," Walker said. "No team has been able to blow us out of the water."

However, the Bison are a very young team with only two seniors and a few juniors. "This inexperience is indicative of us not being on top of the conference," Opalski said. "However, it will be fun to see what happens."



Tim Choate—The Bucknellian

After falling behind 2-0, the Bison fought back to defeat Holy Cross.

Chi Phi to host "dry" all-campus party

By Rachel Laskow

As a change of pace from the normal weekend scene, Chi Phi Fraternity will be hosting a non-alcoholic party from 10 p.m. to 2 a.m. this Friday. The party is open to the entire campus, and snacks and soda will be available.

This event comes in response to a challenge set forth by Interim Dean of Students Allen Schweinsberg and Dean of Greek Life Roy Baker for fraternities to hold a non-alcoholic social event this semester.

This event will be funded in part by the budget for the Swartz basement social space that will be completed later than the administration had anticipated. Contributions from a University fund that supports "dry" social functions will account for $2000 of the event's cost. The chapter's alumni association will contribute $1000. Chi Phi itself will also contribute a few hundred dollars of their own to the party.

Emmet Swimming, a band from Virginia with a modern rock sound in the genre of bands such as Dave Matthews and Pat McGee, will constitute the party's entertainment. Chi Phi President Brian Fisher '00 said, "When we were searching for a band, we talked to some recent alumni in the DC area. When we mentioned Emmet Swimming to them, they laughed and said that we would never be able to get them at our place because they were too good and we wouldn't be able to pull it off. They were in shock when we called them a few days later and told them that we had booked them."

Schweinsberg believes this to be an excellent start and said, "I would still like to see other fraternities or fraternity/sorority combinations respond as well."

According to Baker, Theta Chi Fraternity did attempt a non-alcoholic party last year, but it was not as successful as they had hoped.

Adams named President of Colby College

University president remains "dedicated" to his work at Bucknell; will relocate in summer months

By Heather Napolitano

The timing was right.

University President William D. Adams announced to the campus community on Monday that he was selected to serve as the nineteenth president of Colby College in Waterville, Maine beginning, July 1, 2000. In doing so, he will replace William D. Cotter, president of the institution since 1979. The search to replace Cotter coincided with Adams' decision to resign as President of the University at the close of the 1999-2000 school year.

"I had originally thought that I would spend next year on sabbatical, but then I got involved with the search and really liked what I saw," Adams said. "There was some luck in it, luck in the sense of timing."

The presidential search to find a successor for Cotter began last January. In the months that followed, the 19-member selection committee collected a pool of 100 applicants. Adams was interviewed both in July and in September. In October, he visited the campus as one of the three finalists. At that time, members of the faculty, administration and support staff were invited to meet the three potential candidates.

The College's Board of Trustees met in Boston last Sunday and made the official election and announcement of Adams' selection.

In a recent press release, Chairman of Colby's Board of Trustees James B. Crawford said Adams was "the best candidate from a very strong pool ... [he] will arrive with proven experience from running a respected university, where he established a record of strong leadership in areas that reflect Colby's current priorities."

The press release issued by the college cited Adams' accomplishments during his time at the University to include the endowment's growth as a result of unprecedented fund-raising success and excellent investment results, the expansion of the faculty to lower the faculty-to-student ratio, the record number of applicants received in the last two years, and the admission of the strongest and most diverse classes in the history of the University.

Adams believes that the College's features made it an excellent match for his skill sets. "Colby had a very successful campaign that just ended ... I knew that it had real potential in terms of fundraising," he said. "The admissions profile is also very strong ... They are very interested in diversity, very committed to it and want to make progress on it. I learned a lot about that here."

Meanwhile, the college has a number of qualities that are attractive to Adams' professional and personal interests. First and foremost is the outstanding reputation, which was also what drew him to the University. Second, the Adams family has roots in the state of Maine. Third, the New England area is very important to Adams and his wife and has been a geographical area that great-

More students receive invite to *"Late Show"*

By Anne Monoky

Fifty lucky University students will receive the opportunity to travel to New York City to see the taping of the Late Show on Nov. 16. This group will be one of many from the University in recent years that have been given the chance to become members of the studio audience.

Why has the Letterman show extended repeated invitations to the University community? Associate Dean of Students Kari Conrad ventures the guess that "when Bucknell students are fans of something they are really fans."

Last year, Conrad received a call from a representative of the show asking if the University would be interested in sending a group of students to be a part of the audience. "We had a huge response, and many students had a great time," Conrad said. Following the group's trip, the University didn't hear from the show again until early this year when Roy Baker, Dean of Greek life, was contacted and asked if a group of Greek students would like to again participate in the audience.

"I think that it is great that the entire student body is offered this opportunity. I know that I submitted my name, and I really hope to be selected."
—Susan Beshel '00

The show encouraged that those who continuously watch the show and are familiar with the on-going humor attend. Again, the response was positive.

"The show said that Bucknell students are fantastic audience members. They can understand and appreciate a lot of Letterman's humor," Conrad said.

Conrad has recently sent an email to students inviting them to enter in a lottery. The drawing will occur sometime within the next week. Students can stop by the CAP Center (Langone Center, room 306) by this Friday to officially submit their names.

Senior Susan Beshel said, "I think that it is great that the entire student body is offered this opportunity. I know that I submitted my name, and I really hope to be selected."

Professors attempt to raise awareness of Union activity

Lack of alumnus involvement in worldwide labor movements sparks AFL-CIO coordination

Stephanie Metz—The Bucknellian

Joell Molina '01, a past participant in a "Union Summer" program, assisted profess or of economics Charles Sackrey in educating students on labor activity.

By Peter Van Emburgh

Of the approximately 750 University graduates that have graduated since the 1950s with a degree in Economics, only one has gone into the labor movement.

This startling statistic prompted Professor of Economics Charles Sackrey, Professor of English Saundra Morris and Professor of Geography Paul Susman to become American Federation of Labor and Congress of Industrial Organizations (AFL-CIO) campus coordinators. The main goal for the professors is to promote campus awareness of the union movement and also to help recruit students to participate in two summer programs that are sponsored by the AFL-CIO.

"We've decided to bring the union movement 'to campus' to let students know more about it," Sackrey said. "Because Bucknell has kept itself pristinely separated from unions, in particular."

Sackrey also said that the purpose was to make students aware of job opportunities in the non-profit sector of business and the labor movement in particular. The programs that the AFL-CIO offer during the summer are both "education and career possibilities," according to Sackrey. The AFL-CIO sponsors two summer internship possibilities that are centered on bringing in students to learn more about union organizing drives and injustices in the workplace.

"Union Summer" is a month long internship that offers hands-on work with union members at various locations across the country while the "Organizing Institute" prepares people that wish to become full-time union organizers during a three-day training program.

The first step for Sackrey, Morris, and Susman is to present an information session that discusses both the summer internship programs and future job opportunities in the union movement. The session took place last Thursday and featured Elissa McBride, a member of the AFL-CIO Organizing Institute, and Joell Molina '01, a past participant in "Union Summer."

McBride kicked off her presentation with shocking statistics about workplace injustices. McBride pointed out that the average CEO of a business makes 400 times more money than the average employer. She also discussed the growing gap between the rich and the poor.

She pointed out these figures and trends in order to explain the purpose of unions. "The impact of unions helps protect wages, prevent racial discrimination and promote worker safety," McBride said. "You need to make a choice to not be a part of the jobs that help increase profits of an organization, because there's a

Public Safety Log

October 26, 1999

VANDALISM—Public Safety responded to Kappa Sigma Fraternity for the report that an unknown person(s) did break a window and cause damage to light fixtures. Lewisburg Police was notified. The incident is under investigation.

INSTITUTIONAL VANDALISM—Public Safety responded to Roberts Hall for the report that an unknown person(s) did break a window frame and window glass. No witnesses or suspects could be located in a search of the area.

MISSING PROPERTY/POSSIBLE THEFT—A student reported to Public Safety that a book bag was missing from the storage area at the front of the University bookstore. No witnesses or suspects could be located in a search of the area. The incident is being investigated.

INFORMATION/NON-REPORTABLE ACCIDENT—A student reported to Public Safety that a vehicle was damaged while parked on Fraternity Road. Witnesses were located and the individual responsible will pay for the damages.

AIDED/SHS TRANSPORT—An ill student contacted Public Safety and requested transportation from Smith Hall to Evangelical Community Hospital for treatment. Student Health Services provided the escort and the individual later returned to campus.

October 27, 1999

INFORMATION/SUSPICIOUS PERSON—A student reported to Public Safety that a suspicious male had been seen multiple times in the backyard of an off campus residence. The resident also notified Lewisburg Police when the incidents occurred and the investigation is continuing.

UNDERAGE CONSUMPTION/OPEN CONTAINER—While on routine patrol, Public Safety observed an underage student with an open container of beer in the Gateway parking lot. University citations for underage drinking and an open container violation were issued.

October 28, 1999

TAMPERING WITH FIRE EQUIPMENT/RECEIVING STOLEN PROPERTY—Public Safety responded to Phi Gamma Delta Fraternity for a fire alarm activation. A student admitted to discharging a fire extinguisher which belonged in Vedder Hall. Criminal and university citations were issued.

MEDICAL AIDED—Public Safety responded to Hunt Hall for the report of an ill student. The individual requested treatment at Evangelical Community Hospital and was transported by a friend. The student later returned to campus.

INFORMATION/MISSING BICYCLE—A student reported to Public Safety that an unlocked bicycle was taken from the Smith Hall bike rack. Lewisburg Police was notified and the incident is under investigation.

INFORMATION/SUSPICIOUS PERSON—Public Safety responded to Swartz Hall for the report of a suspicious person in the doorway of a unisex restroom. The individual could not be located in a search of the area. East Buffalo Township Police was notified.

INFORMATION—Public Safety responded to Smith Hall for the report of property damage. A male University student had urinated on two female students belongings in their room. The residents of the room also had personal safety concerns. The incident was reported to Lewisburg Police is and being investigated.

INFORMATION/MISSING PROPERTY—A student reported to Public Safety that an unlocked bicycle was removed from the Student Health Services garage. No witnesses or suspects were located in a search of the area.

October 29, 1999

UNDERAGE DRINKING/PUBLIC DRUNKENNESS—Public Safety responded to Kress Hall for the report of an intoxicated student. University citations for underage consumption and public drunkenness were issued.

October 30, 1999

UNDERAGE DRINKING—While on a routine party check at Kappa Sigma Fraternity, a Public Safety cited a student under the age of 21 for underage possession and drinking. After an investigation, Kappa Sigma Fraternity was also cited for serving alcoholic beverages to minors.

UNDERAGE DRINKING/ALCOHOL IN ROOM OF UNDERAGE PERSON—Public Safety responded to a fire alarm at Roberts Hall. Two students were issued University citations for underage drinking and having alcohol in the room of an underage person.

MEDICAL ASSIST/TRANSPORT—Public Safety responded to Swartz Hall for the report of an ill student who was transported by Public Safety to Evangelical Community Hospital for treatment and later released.

DISORDERLY CONDUCT—While on routine patrol on Fraternity Road, Public Safety observed a male University student running without clothes on. The individual was issued a university citation for disorderly conduct.

October 31, 1999

UNDERAGE CONSUMPTION—While on routine patrol, Public Safety observed a female walking with a staggered gait on Vaughan Literature Road. Upon investigation, the officer discovered that the student was intoxicated. She was cited for underage drinking.

MEDICAL ASSIST—Public Safety responded to Vedder Hall for the report of a student having an allergic reaction to insect bites. Student Health Services transported the individual to Evangelical Community Hospital where he was treated and later released.

INFORMATION—Public Safety responded to the exterior of Kress Hall for the report of person(s) firing a pellet gun. No witnesses or suspects could be located. Office of Housing and Residential Life was notified. The incident is being investigated.

RECOVERED BICYCLE—A student brought a bicycle to Public Safety that had been found unlocked in the Langone Center bike rack. Lewisburg Police was notified. The bicycle was secured at Public Safety.

PROPERTY DAMAGE —Public Safety responded to Harris Hall for the report of two broken window panes. No witnesses or suspects could be located in a search of the area.

This week in BUCKNELLIAN headline history

Loyal 400 Expected to Journey to Yankee Stadium; Busses Lacking
Nov. 6, 1947

Buses will not be chartered to transport students, desiring to glimpse the Bucknell-New York University football game Saturday, to New York City's Yankee Stadium, stage for the melee, according to Paul Watkins, head of the Booster Club.

Arrangements had been initiated several weeks ago to obtain chartered buses, but the bus company reported that all its vehicles had scheduled for this weekend.

Approximately 200 tickets for the contest have been distributed to university students, the Treasurer's office reported earlier this week, leaving 150 ducats still to be claimed.

The Bucknell cheering section will occupy Section 33 at the Stadium situated on the left field side of the mezzanine, corresponding roughly to the 40 or 45-yard line.

'Its Up to Us', Claim Fraternities on Conduct Issue
Nov. 6, 1947

That each fraternity be responsible for its own regulations regarding the use of alcoholic beverages is the recommendation of the Inter-Fraternity Council to be presented to the Social Committee.

At its regular meeting Monday night the council discussed the recommendations from each house which were brought to the meeting by the representatives and consolidated the opinion into one statement.

Sophomores join movement to abolish comprehensives
Nov. 2, 1967

Following a class meeting the sophomore class decided to back the juniors and seniors in their petition to abolish comprehensives; Students say that these tests (three-hour long exams that test your knowledge of your major) should no longer be required to graduate. Students feel that a three-hour test cannot possible show what it took them four years to learn.

Dennis O'Brien is inaugurated twelfth president
Nov. 5, 1977

On Saturday morning, George Dennis O'Brien was inaugurated at a formal ceremony in Rooke Chapel. The ceremony was well attended, and followed by a luncheon. There he was formally welcomed by the students, who requested that no matter what obstacles he faced, never let them keep him from listening to the students.

Bisons Take Western Maryland for 32-6 Sleigh Ride Saturday
Nov. 9, 1989

With 'King' Funiar stealing the reins away from Dad for a few hours and driving through majestically on four long touchdown processionals, the Thundering Herd crowned the Father's Day Weekend by royally shellacking the Western Maryland Terrors, 32-6, for their second and most decisive victory of the season.

In making their triumphant re-entry into the circles of winning football powers, the Bisons tallied nine first downs and gained 298 yards from rushing while limiting the Terrors to a total loss of nine.

UNIONS from page 1

direct connection in lowering wage and living standards as a result."

Joell Molina '99 spent his summer working with unionized carpenters in California and learning about the injustices of their work environment. By the end of his experience, Molina was able to suggest ways to improve the workplace to the carpenters.

"The focus of my job was to let the workers know of their rights and to help them work together to solve their differences," Molina said. "Some of the demands of the workers, for example, were clean water and of course, higher wages." Molina also mentioned the wage variance between the different races of the workers.

"The purpose of their union was to be treated with dignity [in the workplace] and they were willing to fight for it," Molina concluded.

The short-term goal, according to Sackrey, is to get at least five students to participate in "Union Summer" this year. "We want students to be aware of their options in the union movement," Sackrey. "We think there are a lot of students on this campus that are interested in the non-profit sector and this is a particular opportunity in that sector."

The University now joins the AFL-CIO recruiting program that has involved students from Harvard, Bard, Brown, Duke, Holy Cross, Swarthmore, and Cornell, among others. As liaisons for the AFL-CIO, Sackrey, Morris and Susman are responsible for continuing to promote union awareness by presenting another informational session in the spring, which will include another speaker.

"Unions are not something that University students consider when searching for job opportunities," Sackrey said. "We just hope that we can provide another alternative in the non-profit sector of business."

Bucknellian sponsors symposium speaker

The Bucknellian, Bucknell University's student newspaper, will be sponsoring "Fairness in the Media: America's Preoccupation with Crisis," a lecture by author and professor Susan Moeller, on Monday, Nov. 8 at 7 p.m. in the LC Forum. Moeller is the Director of the Journalism Program and Assistant Professor of American Studies at Brandeis University. She is also the media columnist for The Christian Science Monitor.

Moeller has authored two books, *Shooting War: Photography and the American Experience of Combat* (1989) and *Compassion Fatigue* (1999). Her latest work critically examines media treatment of the "Four Horsemen of the Apocalypse"—disease, famine, war and death.

Following Moeller's talk, she and members of the *Bucknellian* editorial staff will answer questions. The event is cosponsored by the Departments of English, Economics and Political Science, BSG, Lectureship committee and Kappa Sigma Fraternity.

HOW TO BE AN ANGEL!

In the spirit of the season,
the BookStore AT BUCKNELL
is sponsoring a Literacy Tree.

Every angel on our tree represents a child attending a local Head Start Center, who would love to receive a book this holiday season.

Each time you buy a book as a book angel, the gold angel becomes the gift card which accompanies your selection. In place of the angel, a star with your name magically appears, a shining symbol of your generosity (it can be anonymous if you'd prefer).

If returned to the General Book department by December 8th, the Bucknell University Bookstore will wrap and deliver your gift to local area Head Start Centers.

Thank you for sharing the spirit of the season by encouraging a child to read.

NOTICE OF EMPLOYMENT
Temporary Part-Time Engineering Intern

Uni-Tec Consulting Engineers, Inc., is seeking an individual to fill a temporary part-time intern position at its Lewisburg Office.

Responsibilities will include preparation of planning documents and preliminary engineering reports, completion and submission of project permits, preparation of construction drawings and specification and on-site resident project representation, while under the supervision of senior engineering staff.

The successful candidate should have a background in one of the following engineering disciplines: Civil, Structural, Mechanical, Chemical or Environmental.

The candidate should be self-motivated, possess good verbal and writing skill, and be able to work under pressure and deadlines.

This position is a non-benefit position. Salary will be commensurate with experience.

Interested parties should send a letter of interest with resume to:

John L. Bender
Uni-Tec Consulting Engineers, Inc.
434 Market Street, Suite 304
Lewisburg, PA 17837-2401

An open letter to the University community regarding campus parking:

To the campus community:

Some members of the campus community have written *The Bucknellian* recently to express concern about the parking situation on campus. (As was described in the open meeting on parking held last spring, as well as in the follow-up *Bucknellian* article, and the notice included on all of the parking maps distributed this summer and fall, we are in the midst of a multi-year implementation of the longer-term campus master plan, which includes changes to parking, building locations, pedestrian/bike access, and other aspects of the campus environment.) We appreciate everyone's patience as we adjust to these many changes over the months and years to come.

There are some specific parking changes and challenges associated with the new construction, and we have endeavored to make the transition as painless as possible. The notice on the parking maps pointed out that the construction on campus was going to seriously impact available parking spaces, and suggested that students should consider this when deciding to bring a car to campus. This fall, notices about the parking changes were included in "Notes and Notices" and "What's Happening," as well, and at the beginning of the school year, Public Safety issued warnings rather than citations, in an effort to give people time to adjust to the many changes that have occurred.

In particular, in response to the displacement of parking in the former Weis/Swartz lot, we have added new parking areas, and also changed some area designations. We constructed additional parking at the football practice field for staff and visitors last spring, created an entire new lot for students in the old Seventh Street tennis courts this summer and have begun construction on an additional parking lot available for all parkers at the top of the football stadium, which will be completed at the end of this month. In addition, ROTC Drive was paved as an overflow parking lot, which created much additional parking, which is also available for all vehicles.

Designation of all lots and spaces has also been adjusted—Stadium Drive has been reassigned as student parking; the former car pool lot in front of the Field House has been designated for all vehicles, and spaces within the Moore Avenue lot have been reassigned, including creating additional 15 minute spaces for drop-off/pick-ups at Langone. In addition, in response to student requests, we have gone to a "one-sticker" system for students, in order to increase flexibility in the student parking spaces across campus.

As always, of course, the public spaces along Moore Avenue and Seventh Street are available for all vehicle parking any time. And finally, when the construction of the new buildings is completed next fall, a portion of the Weis and Swartz parking lots will be recovered.

In all, with the completion of the upper stadium lot, we have replaced the parking spaces that were eliminated as a result of the Weis and Swartz lot construction and, as evidenced by our regular surveys of the parking lots at various hours during the week, there is sufficient parking a short and reasonable walking distance from the center of campus. We hope that the campus community will be able to tolerate the inconveniences caused by these changes, and the ongoing changes over the next few years as major construction projects continue and we continue the implementation of the campus master plan. And of course, we welcome your suggestions at anytime.

ADAMS from page 1

ly interested them. Finally, he believes that the quality of the people at Colby is very important.

"I could imagine easily staying there 10 to 12 years," Adams said.

His presidency will come following the 20-year reign of Cotter, who may now be considered a legend at the College. "He has been very successful and well liked, and there are certain challenges to that. But frankly, I would much rather come in the wake of that than follow someone that has been weak and ineffective or has had problems," Adams said.

Adams believes that aspects of his transition will be a trying one. Each college and university is unique in terms of its people and its history which may make the adjustment to a different institutional context a difficult one. The risks of making such a transition may be that the president will assume too quickly that he understands what is going on, or that he will translate too much past experience into the new context.

Adams' past experience in the role of president will also aid him in this transition, however. He will enter into the position with an understanding of the business. "Not much will surprise me in terms of subject matter," he said. "I think all of these places feel the same impulses."

Overall, Adams is very excited about his selection. He feels that the process has reminded him how much good luck and good fortune have to do with success. Its close brings a sense of relief.

Colby College, meanwhile, is very enthusiastic about its nineteenth president. "Everyone on the campus is delighted," Cotter said. "We look forward to a very smooth transition."

The College's students are also pleased with their future president. Colby Student Government President Benjamin Humphreys '00 said, "I am exceptionally excited about President Adams' assumption of the presidency here at Colby. He is personable, insightful, articulate, friendly and intelligent. He seems to have a clear vision of how to improve Colby and the directions we need to explore." Humphreys also said that he feels that "the student body echoes these sentiments."

Adams will leave the University to face great new challenges and meet many new successes. He is sentimental about his departure from the University, however.

"I want to stress how much I have enjoyed my time here, and how much respect and regard I have for [the students]. I think that at all these places, in the end, the students are the best part of it."

Adams' presidency at the University will terminate on June 30, 2000. "I have another eight months here," he said. "I have a lot of work to do."

University to host "Trustee Access Day"

By Katie Marston

As a means of breaching the gap between University trustees and the campus community, the University will be hosting its 11th Trustee Access Day next Thursday. All members of the campus community—students, faculty, support staff and administrators—are invited to meet informally with representatives of the Board of Trustees.

With 20 trustees participating in the event, there will be accommodations for about 100 appointments. Organizations and individuals with particular concerns will be paired up with those trustees who possess knowledge in that area, in order to maximize the degree to which they have a common understanding. The issues discussed encompass a wide range of interests, such as continued strength in academic and extracurricular programs, aspects of student life and the success of and involvement in particular athletic teams.

Students, faculty, and staff may bring any topic to the Trustees' attention, from a personal interest to a University policy. Last year, members of the board met with groups such as the Student Environmental Action Committee, PULSE, and the "Bucknell Brigade" to Nicaragua. During the session, the trustees respond to the concerns and questions, share their knowledge and if applicable, determine an appropriate course of action.

An additional function of Trustee Access Day is to enhance the board members' personal contact with campus community members, familiarizing them with the broad range of perspectives and concerns of the institution. This event is extremely beneficial and essential in that it brings the board much closer to the pulse of the University. It encourages a broader sense of knowledge for its participants.

The attendance of organizations and individuals at these sessions demonstrates that they acknowledge the board's ability to bring insight to prevalent issues on campus. Meanwhile, the trustee's thinking is informed by what they learn from the individuals therefore ensuring a strong mutual understanding of the University's affairs.

PARTY from page 1

The University will try again, however. "It gives the campus and one fraternity a chance to see how well a party can be pulled off without alcohol," Schweinsberg said.

"The party scene right now seems to be concentrated on fraternities and there hasn't been a tradition of non-alcoholic parties," Schweinsberg said.

Schweinsberg believes that this might be a welcomed alternative. Some students who are accustomed to alcoholic parties might enjoy a dry event.

"All of the brothers of Chi Phi are extremely excited about the band and this party. We hope to have an excellent turn out, and from things I've been hearing around campus, our house is definitely going to be a big center of attention on Friday night. It should be a great time for everyone on campus to enjoy," said Fisher.

NEWS BRIEFS

Crew Member Complained About Faulty Part on Crashed Plane

A crew member aboard EgyptAir Flight 990 reported the plane experienced thrust reverser problems coming into Los Angeles before it headed to New York.

Investigators are looking into that aspect as one of the possible causes of Sunday's crash that killed all 217 people aboard, the sources said. The jetliner plummeted into the Atlantic south of Nantucket after taking off from John F. Kennedy Airport en route to Cairo. A massive search and recovery mission is ongoing. CNN learned Tuesday that the Federal Aviation Administration became concerned earlier this year about potential thrust reverser problems on Boeing 767s after discovering serious problems that could lead to pilots losing control of the aircraft in flight.

Castro Claims Dissidents Aim to Disrupt Summit

With an international summit nearing, Fidel Castro unleashed an unusual televised attack on both the U.S. Diplomatic Mission in Havana and dissidents he said are planning to use the gathering to carry their complaints about Cuba's communist system to the world.

"It's important that our people know that they (the U.S. mission) aren't here just to give out visas but rather to wage war, to openly conspire against Cuba, openly and without hiding it," Castro said during a televised address Tuesday.

The Cuban leader discussed conversations that allegedly took place between U.S. diplomats and Cuban dissidents, whom he accused of being traitors. The U.S. State Department declined to comment.

Indian Army Helicopter Drop Relief Supplies to Victims

Army helicopters on Tuesday dropped relief supplies to victims of one the most powerful cyclones ever to strike India, but the effort was not nearly enough to reach millions of residents demanding clean water and food.

"This is the worst flooding in 100 years, I would say the worst in India's history," said Asim Kumar Vaisshnav, chief adminstrator of Baleshwar, the capital of Orrissa.

Thousands of people are feared dead from the cyclone, which slammed into the northeastern coast on Friday with winds up to 260km/h (160 mph) and waves 10 meters high. Entire villages along the Bay of Bengal were reportedly washed away.

Communications were severed to most of the state and the hardest-hit areas remained inaccessible Tuesday. One witness who managed to get out told CNN correspondent Jane Arraf that he saw more than 100 bodies drift by as he drove through washed-out roads.

Others reported seeing human bodies and animal carcasses hung in trees after the floodwaters receded. Helicopters dropped packets of protein-rich food and fresh water to survivors on Tuesday, but were only able to reach thousands of the estimated two million people affected along the 90-mile stretch of coast.

Suspect In Hawaii's Worst Mass Murder Surrenders

Police arrested the suspect in the slayings of seven Xerox Corp. workers Tuesday after a five-hour standoff and identified him as 40-year-old Byran Uyesugi, who joined Xerox in 1984.

The copy machine repairman walked into a meeting of his co- workers Tuesday morning in Nimitz Highway warehouse and shot seven men dead, police said. The suspect fled in a company van but was cornered two hours later by police, several miles from the shooting scene. As a customer service engineer, Uyesugi traveled to various sites to service and repair printers and copiers, Xerox said. Uyesugi was a member of his high school rifle team and had up to 17 weapons registered in his name. "This could have been much, much worse," Mayor Jeremy Harris said.

Uyesugi was described by neighbors and co-workers as mild- mannered and reclusive.

Revitalizing Lewisburg without losing the charm

Downtown Lewisburg has often been criticized by students for limited resources—whether in a social context or by the shopping enthusiasts among us.

Because of this, Dean Ruth Burnham is heading a group aimed a "creating a 'vision' for the development/revitalization" of the Lewisburg community.

But will student recommendations represent legitimate methods to improve one of America's "Top 10 small towns," a quaint area free (in the downtown area, at least) from chain restaurants and strip malls? Students may rightly cry for the addition of more shopping, dining and entertainment options in the town, but will the addition of an Abercrombie and Fitch truly fit with the image of an historic small town?

Asking for student input on means through which downtown Lewisburg can be invigorated is important, and a very positive step in fostering a campus and a community where students, professors and lifelong residents can all feel a sense of belonging. As evidenced by the usual overcrowding of the Bull Run Inn and the relatively few entertainment options available in Lewisburg, students would appreciate more diverse activities in the town, and the student population and relative affluence of Lewisburg residents suggest that there is money to be made for entrepreneurs looking to take a chance on adding options to a small town.

But a balance must be struck between making Lewisburg a more exciting place for students and preserving the quaint friendliness of Lewisburg that makes the town so highly regarded.

One of the things that makes Market Street and its immediate surroundings so impressive is that, save for a few businesses, is its relative freedom from "chain" restaurants and shops. Route 15 may be home to the Wal-Marts and Burger Kings, but downtown Lewisburg is, for the most part, a collection of small, specialized business offering specialized products. The preservation of the "small-town" feel is integral in maintaining Lewisburg's charm—no matter what stores are put in town, Lewisburg is still three hours from a major city. No matter what corporation puts roots here, Lewisburg will never be Manhattan—it's important to make sure it remains that way.

But even if Chi-Chis isn't the answer, Lewisburg could still benefit from the addition of more options—especially late-night options—that could not only generate economic growth, but help improve the sometimes-tenuous relationship between students and residents. The idea is not to drown out the existing local businesses, but to accentuate them.

It can be argued that a primary reason for the often strained relationship between students and residents is the fractioning of social life between the two areas. Students generally stay on campus (whether at a fraternity house, a Weis Center Concert or a room party) for social activities—if they venture into town, the Bull Run is the most likely destination.

A business that would provide students a meaningful reason to venture into Lewisburg for social activities would, if nothing else, give students meaningful exposure to the town. A coffee house or bar featuring a student band, for example, would likely provide a draw for students to visit Market Street, spend money, and socialize.

The development of businesses that cater to both student and resident interest and that provide meaningful social options—dare we say meaningful dry social options—will undoubtedly take time. Devising a local business that will thrive in a small town is certainly much more difficult that dropping an Eddie Bauer on Market Street. But that is precisely the point. Thinking about what businesses would be successful is the job of residents, town leaders and University members. Maybe through collaboration, a balance can be found between giving Lewisburg more dining, shopping and entertainment choices and preserving the charm that makes Lewisburg a model for American small towns.

Here's your chance to ask us all your burning questions—Come to *The Bucknellian's* lecture/discussion on 'Fairness in the Media' ... Mon., Nov. 8 (7 p.m.)

Is air travel a safe means of transportation?

Yes

By Ryan Delahanty

With the recent accidents involving commercial and private airplanes, many people have started to wonder if air travel is safe. To many, air travel is beginning to seem like an incredibly risky, unnatural way to travel. And they're right, it is. But that doesn't mean it is unsafe.

What the American public is experiencing is mass paranoia. We don't understand how we fly in planes, we just know that we do. That kind of blind faith is bound to make passengers nervous. We may not know what is going on around us but the pilots and mechanics do.

Pilots have to log thousands of in-flight hours before they can operate commuter planes. The vast majority of commercial airline pilots also flew in the Armed Forces. Likewise, the mechanics endure extensive training; these people aren't auto mechanics looking to move up in the transportation world.

The only machine whose inner workings the general public is even vaguely familiar with is a car. We know cars need gas, oil, and every couple thousand miles, new parts. So do planes. They refuel at every stop-over and get general inspections with great regularity. Certain parts of a plane, just like in a car, are guaranteed for so many thousands of miles. Many airlines replace these parts before they "go bad." Despite these precautions, the majority of crashes occur when parts or the planes itself are old—which is why the FAA is currently working on new regulations.

Imagine the worst, that one of your engines blows or essential parts gives out mid-flight and you begin to lose altitude. Pilots are trained to never give-up. Until the second of impact, the two people in the cockpit work with the people at air traffic control tower to correct your problem. As a passenger you will never hear a pilot say "Well, we've done all we can, it seems like we are just going to die today." It's because of this policy that many potentially fatal situations are avoided. The newscasters may not report them, but emergency landings have been utilized many times to get a plane and its occupants to the ground in one piece.

Air travel may not be the most natural way to travel, but neither is auto travel. There is undoubtedly room for the improvement of airline companies and their procedures but, until airplanes are %100 safe, just sit back and know that you are in the capable hands of two trained pilots, many trained mechanics, and an experienced crew. No one can guarantee that you won't die in a plane crash, but the forces are working against it.

No

By Rebecca Rowland

Bad things always come in threes and, at least in the world of commercial aviation, we have reached our quota. Starting with the death of golfer Payne Stewart and five others in a Learjet crash, followed by a Blue Angels crash that killed two members of the Navy later that week, and ending with the crash of EgyptAir 990 that killed 217, I'd say the world of flying has had a pretty bad run.

Every year or so a major airline has a major crash and hundreds of people are killed as a result. I personally am terrified of flying, many people are. When that hunk of steel shoots up in the air you just can't help thinking "What if I die? What if the plane crashes and I plunge tens of thousands of feet to my death?" You think it can never happen to you? So did Payne.

Unfortunately, flying is virtually a necessity. In our world, it is perfectly normal to go from New York to California in one day. Duh, you fly! Driving is now impractical, try organizing a trip to San Francisco and telling your fellow travelers that the trip should only take 4 days. Not flying is simply not an option. Yet I feel, as countless others do too, that flying is unsafe.

Whenever you tell someone you have a fear of airplanes, you inevitably get the same response, "Oh really, it is so much safer than driving." And, in a sense, that is true. There are hundreds of car accidents a day per hundreds of millions of car trips daily. There are only a few plane crashes a year out of millions of plane trips daily, a fairly low percentage of crashes. The thing with plane crashes is, so many people die when one occurs!

The chance of survival in a car crash is relatively good, when the 747 you are in plunges to the ground from 32,000 feet, that chance is severely reduced. In a car, if something little goes wrong, you blow a tire, your brakes fail, even if your engine explodes, you can guide your car to safety on the side of the road. If even the smallest thing goes wrong after a plane has taken off, the only thing you can do is fall fast and land hard. You cannot stop flying and hover while you try to determine how to fix the problem; it's fly or die.

Flying is a high-risk endeavor, you may not crash all that much but, when you do, the results are horrific and for that reason I believe that flying is unsafe.

The best four years of your life

Take advantage of all the opportunities that college has to offer

By Allyson Demerath

College is fun. Although there are times when the whole experience can be incredibly overwhelming, these have to be some of the best years of life. After taking a step back and comparing college life to life in the real world, I realized there are so many benefits I tend to overlook.

To start, at what other point in your life will you be allowed to take naps? After coming home from a long and tedious eight o'clock class or two o'clock class, nothing beats crawling back into bed. Granted, most of the time you are taking a nap because you stayed up until three o'clock in the morning having a heart-to-heart with your roommate, and you really need the sleep. But that is not the point, there are very few careers that will allow you to crash for a couple of hours a day.

Secondly, when else will you be able to watch Friends, or 90210, or The Dukes of Hazard with twenty of your closest friends. College is the only place where people actually plan their day around making it back to the dorm or the house or the suite in order to watch their favorite shows.

In addition, it is the only place where you can always find someone to watch a movie with you at four o'clock in the morning. This leads to a third benefit. Although living in the dorms, on the suite, or in a fraternity house can be a little cramping at times, it creates endless possibilities. It is like being at summer camp. You can always find someone to talk to, cry to, complain to, relate to, or just order pizza with. No wonder you make some of your best friends for life here. How could you not?

In addition, college provides a great learning environment, and I am not referring to classes. For the first time in your life, you are on your own. You are free to experiment, which often leads to some of your biggest accomplishments and worst mistakes. They represent something you created independently, which can be wonderful or devastating. For the first time, it seems like you are learning about yourself on a daily basis.

Finally, not to many people over twenty-five stay out until three o'clock in the morning at least two nights a week. College is the only place to party like a rock star without actually being one. For four short sweet years, you have the ideal social life. There are no curfews and aside from the occasional exam, no pressing commitments to hold you back.

College is the best time to party. For these reasons, I feel these college years represent an amazing time. I only wish they could last longer.

OPINIONS

Graffiti board project, Part II: "What do you think about dating at Bucknell?"

By Krystal Buhr '01, Kumba Baryoh '01, Phillip Jones '02, and Courtney Spohn '03

Two weeks before fall break the Peer Educators of the Women's Resource Center sponsored the Graffiti Board Project. The graffiti boards were designed to encourage members of the Bucknell community to express their opinions on certain topics. Blank poster boards were placed in academic buildings and residential halls throughout campus to spark discussion on issues that directly affect students at Bucknell.

One question the peer educators asked on the graffiti boards was, "What do you think about dating at Bucknell?" Out of the 10 boards that we received comments on, there were a total of 198 comments. 89 of the comments were pertinent to the question, giving feedback on dating, and one hundred nine of the comments did not address the question. Of the relevant comments, twenty were sexist remarks; some were anti-male or anti-female, while others were ambiguous. One student commented, "Yeah, what's dating? Show me some men and I'll start dating." Another individual remarked, "Who needs the women around here when we have Skip's?"

Eleven of the constructive comments said that only "hook-ups"/casual sex occurred on campus, not dating. One student wrote, "That is stupid because all people want to do is hook up. They don't really want to take the time and like someone—at least not so far." Another individual commented that, "Dating equals consecutive hooking-up."

Ten comments indicated that dating does exist. One student explains that, "Dating is how you meet someone special, how you know if they can be part of a meaningful relationship with you." Another comment gives suggestions of areas where people can go on dates which include Bingo and Casino nights, the Wednesday and Saturday night movies in the LC Forum and Seventh Street Cafe for smoothies.

Thirty-five comments were anti-dating or confused on what dating was. One student remarked that "Dating at Bucknell is practically non existent. Maybe if people were a little less superficial." Another individual wrote "Dating? Does that mean when you figure out all of your classes and meetings in your date book? Cuz that's all I do." In addition, there were some comments that were difficult to categorize because of sarcasm.

One of the main feelings received on the dating boards was one of cynicism. This doubt that a healthy dating relationship can exist at Bucknell has already been commented on in the newspaper. Laura Day, in her article "Is old-fashioned dating possible during college?" (Sept. 30, 1999), calls for men to "get your creativity flowing."

It is important to note, however, that women need to take action when it comes to dating, also. It is unfair to expect the man in the relationship to do all the planning and asking. Similarly, it is unfair to assume that all dating is heterosexual. Day makes a good point when saying, "We should make the circumstances we want." If people are as frustrated and unhappy with dating as the boards show, it is time for students consider ways of changing or enhancing the dating process.

While many students are lamenting the lack of dating, others are doing something about it. As of October 26, about 700 students had filled out surveys in order for DataMatch, one of Management 101's current projects, to help them find a compatible date.

In conclusion, the graffiti boards were used to spark dialogue and conversation about two issues that affect students. The purpose of the boards was to conduct an anonymous discussion so that participants could openly share his/her feelings. However, this anonymity led to some juvenile and obscene comments, reinforcing the point that discussion about these issues needs to keep happening.

Scandals detrimental to Gore's campaign

Clinton's presidential issues are influencing the decisions of the public

By Josh Guyan

I am very intrigued by the polls for the 2000 election. George W. Bush started out with quite a lead and has held it pretty well even though Al Gore and Bill Bradley represent the majority of American people on most issues. In fact, if we were to look at opinion polls on current issues and see which candidates held the most popular views, my guess is that Gore would come out on top with Bradley right behind him. Also, since Al Gore is the Vice-President under a President with extremely popular policies (if not a popular personality), he has a huge advantage. So why isn't he the front-runner? Where is this support for George W. Bush coming from? It seems fairly obvious that it's coming from the so-called Clinton backlash.

Whenever I mention Gore's chances of becoming our next President, a fair amount of people respond with a particular look. This look means that although they don't really have any substantive problems with him, they tie him to the scandals of the Clinton Administration and are unwilling to go through those kinds of problems again. And really, who can blame them?

But do we honestly think that just because Clinton had scandal problems that Gore will? The conservatives say we need to return morality and dignity to the office of the president. Gore does not have a "morality" (aka infidelity) problem so we have no fear there.

However, the impeachment wasn't the only scandal we had to deal with. The major ones had to do with the Chinese and campaign finance and Gore did have at least some involvement in those. So, in at least that respect, Gore can be tied to the scandals of the Clinton Administration.

But Gore's scandal record, as far as scandal records go, pales in comparison to many other politician's. Newt Gingrich had all kinds of problems with misuse of power and money. Bob Livingston, Gingrich's heir to the Speakership, admitted to marital infidelities and stepped down. George W. Bush is already having problems with possible past cocaine use although, since we now know that the writer who claimed Bush was arrested is a convicted felon, the claim has lost some credibility.

We should also ask ourselves if the Clinton-Gore administration was actually that much worse than past ones have been in terms of scandals. We now know that Kennedy was having multiple affairs and did a fair amount of drugs during his administration which happened to coincide with the Cold War, a time when America needed an attentive, strong leader, and yet he is still considered one of our country's greatest presidents.

If we really hold marital infidelities against our politicians then the people should have a serious problem with many of our past presidents and much of Congress as well.

The difference is that prior to the past decade or so, the scandalous doings of politicians weren't reported or exposed. The Clinton hatred in Congress, combined with the sensationalism of the news media, resulted in a Congress that called attention to everything the President did wrong throughout his life and every newspaper and talk show in the nation reporting on them.

Now we take that and push it all onto Al Gore, no matter what his involvement was. The people may not be looking to send a public policy message when they vote for their President in this election. They may just want to send the message that they are sick of the recent events in Washington and they will single Gore out to send a message that politicians had better clean up their acts. This may be unfortunate for Mr. Gore and for the United States public policy for the next few years, but it certainly isn't a bad message to send. If only we could send both messages...maybe that's what Bill Bradley is for.

LETTERS TO THE EDITOR

Students demonstrate loyalty and dedication

TO THE EDITOR:

If school spirit is defined as loyalty and dedication then on the West Fields on Saturday it was plainly in evidence.

It was evident in the way twenty young women played hard for seventy minutes, it was evident in the tears that were shed as three seniors took to the home field for the last time in their careers and it was evident in the acapella group The Silhouettes' who so beautifully sang the National Anthem.

It was evident in the parents and fans who so loyally support the Field Hockey team and it was evident in the young men from the lacrosse team who painted both their bodies and signs, and with much amusement and a trumpet, cheered the Bison to victory.

Can we measure school spirit by counting how many students attend the football game or alumni who participate in the homecoming parade? I wonder if such demonstrations of school spirit are part of another era when students wore letterman jackets.

I was proud of the Bucknellians who supported us on Saturday and even more proud of the twenty athletes who day in and day out demonstrate both loyalty and dedication towards Bucknell University.

Alpha Chi Omega shows appreciation for beneficial fundraiser

TO THE EDITOR:

The sisters of Alpha Chi Omega would like to thank the following businesses for their donation to our raffle fundraiser:

Brother's Clothing
Brushstrokes
Celtic Exchange
Dunkin' Donuts
Italian Terrace
Italian Terrace Express
The Mercantile
Music n' More
Perkins
Pet Pourri
Premiere Clothing
Purity Candy
Stamm's T.V. and Appliances
Weis Markets

With the generous help of these stores and restaurants, Alpha Chi Omega was able to raise $1400 for the Alpha Chi Omega Foundation. Thank you for all your support.

Keri Egan '01
Philanthropy Chair,
Alpha Chi Omega

Responsible choice is to not drink at all

TO THE EDITOR:

"Responsible Drinking" sounds like a prescription for becoming a young professional, 35-40 years old, alcoholic with family/marital problems, and the beginning of severe liver disease. Alcoholism is a progressive disease (I use the word disease loosely, because we all have free will and can say No anytime) and that means it starts somewhere. Most times the beginnings are in your late teens and early twenties.

Four years in college spending every weekend and all social events "Drinking Responsibly" definitely will set up a pattern for the future. At a time in life when young people should be expanding and improving their personality, they choose to mask it with "Responsible Drinking." We all have only one life and every choice we make along life's path will have an effect on our future.

I have relatives and peers who lived your "Responsible Drinking" rules. They are now in their 40s, having very good jobs, failed marriages, dysfunctional families, poor health and a desire to quit "Drinking Responsibly." They can't stop because life is no fun without the alcohol and they do not know how to socialize without the mask of alcohol.

It takes a student of above average intelligence to be accepted to Bucknell. For this reason I cannot comprehend how they can have such an immature view on drinking. "Responsible Drinking" is being of age and having a glass of wine with dinner.

Bucknell University and The Greek system have a responsibility to uphold the laws of underage drinking and "zero tolerance" should be in effect.

Kathy Steen

All washed up and nowhere to go!

By Jim Leahy

One fine fall day, I realized that the bag of clothing in my closet was starting to devour every precious garment from the hangers above. My drawers were becoming empty and enough was enough. Laundry was the obvious remedy to the impending problem and off I ventured to the bowels of Vedder, my residence hall, in search of a washing machine and dryer. What I was about to discover would start me on a rampage that has lasted for the past week.

As I made my way into the cramped laundry room with the five hundred pound bag over my shoulder, sucking all the feeling out of my shoulder, there was an eerie silence. Now, Vedder's laundry room is not exactly the most unused room in the building. Usually, one must fight for the rights to a machine. But today, there was no one to be seen. I could not believe my eyes.

But this was only a cruel oasis. The truth was that none of the machines worked. This was not going to be my day.

Larison was my next destination. Its laundry room is a castle. I figured that my quest would end there. It did. Two washing machines were sitting there, just waiting to swallow my clothes and a large amount of pocket change. The clothes went in and I went back to my room for the twenty-six minute cycle to expire. Upon my return, better news awaited. There were two waiting dryers. What a lucky break, right? Wrong.

My clothes came out of the wash and went into the heat-breathing monsters. After closing the doors to the machines, I moved to surrender even more pocket change.

But the usually greedy machines did not want my money. Oh no! What could I do now? All of the other dryers were right in the middle of their hour-long cycle.

The wet clothes came out and went back into the bag. Now, that 500-pound bag felt like it weighed a ton as I stumbled back to my room. I decided to hang up the wet stuff and let it air dry. What a bad idea. It took 4 days to dry.

What is the moral of the story? It is based on a simple premise that we need working laundry machines. This school is primarily based on residence hall living. Knowing that this is true, every student does not have his private washer-dryer within his dorm room. We need public spaces in which to do our laundry.

When these spaces do not provide for the need, we have a problem. When entire laundry rooms are down, students are forced to go to other halls and this creates crowding, tension, and a medium through which more machines are overworked and become broken down.

Obviously, the school and the company that maintains these machines do not care about profit or their customers. We students expect our school to provide laundry facilities for us. They are failing. The school expects the company they pay to keep up their machines. They are failing too. One of these two has to go and of course, the school is not going anywhere. Get rid of this company is my recommendation. They are not doing their job correctly and they should not be allowed to continue to operate here at Bucknell. Period.

As students we have a responsibility too. We have to make it known to the company that their service stinks. Call their number when a machine breaks down and when you call, call more than once. Make them angry and waste their time. They are wasting yours.

Also, use Wash Tubs on 7th Street on occasion. That place is a for-profit business and they keep their machines in working condition. Problem solved.

Don't just let the school and their machine company's monopoly fool you. Speak out on the matter. Get working washing machines and your frustration levels will go down and peace and civility will once again thrive here at Bucknell.

School spirit is not too far out of reach

By Maren Johnson

So Professor Hoffman wants to know where our spirit is. In truth, that's really not a bad question. Bucknell may have a beautiful campus, be ranked highly in the liberal arts and engineering world, and have an exemplary Greek system, but the one thing we lack is school spirit. It's hard to say why some schools are their own cheering section while Bucknellians need a kick in the spirited butt, but I think there are some reasons that may have yet to be considered.

While Professor Hoffman seems to have gone to an ideal university filled with enough "rah-rah" for everyone, he seems to be forgetting that he went there about 35 years ago. As cliche as it might be, I have to say it—times have changed. That fact aside, he also went to a large state university on the west coast. If there's going to be a comparison made, could we at least try to compare apples and apples as opposed to apples and oranges?

...to create loyalty and dedication it helps to have a strong sense of community.

So what's our problem? I think it is a lot of things. First off, to create loyalty and dedication it helps to have a strong sense of community. Let's take the much- debated Greek system as our example. They are undoubtedly the most close-knit and enduring organization on our campus. Why? Because they have a strong sense of belonging within their respective chapters.

Now, keeping the Greek system in mind, let's look at how the rest of the school has been treating them. They've had the faculty and some dejected students on their backs since the beginning of the semester saying that they promote alcoholism and are too exclusive. I'm sorry, but when you have two groups butting heads constantly, it seriously deters from the sense of community that could exist otherwise. I don't care what the faculty says—I feel that they have turned the whole issue of the Greeks into an "us vs. them" situation.

I feel that this is most likely to be one of our major causes for lack of spirit on the campus. If people feel that the Greeks are too big of an influence on the campus, then why don't we turn that around and use it to our advantage. Instead of berating them for their influence, why don't we use it to rally up some spirit for the rest of the campus?

Let's not turn Greeks and the rest of the campus against each other, rather, let's create integrated activities. Whose bright idea was it anyway to exclude the rest of the school from Bid Day celebration. Can't we all celebrate the new Greeks?

Next, and I think that Professor Hoffman will agree with me, the "drinking issue" that is such a hot topic on our campus, probably wasn't such an issue back in the '60's. Believe it or not folks, no matter how helpful the school is trying to be in reducing the drinking on campus, its become another "us vs. them" story.

Students feel threatened by public safety, and would rather stay in the safety of their rooms than risk going out and getting caught for even the slightest offenses. Just last week, one of my good friends was harassed by Public Safety for "acting drunk" and "drawing attention" to the group even though she hadn't had a drop to drink all night.

So there you have it folks, just a few examples of why our morale is hurting so badly. The solution? How about some more school oriented activities that make us feel good about Bucknell? Have pep rallies. Encourage us to go to them. Cover the school with notices of events (e-mails just get deleted before they are even read). And finally, if you really want some spirit, then let's work on our sense of community. No us against them, just us. Bucknell. The proud Orange and Blue.

Arts & Entertainment

Visiting Artist Program brings craft appreciation to university

Jessica Rennie

The Bucknell Craft Center is pleased to announce the upcoming Visiting Artist Weekend Nov. 19-21. Gavin O'Grady, the Craft Center Coordinator, initiated the program in order to raise campus awareness and overall impression of contemporary craft.

The Visiting Artist Program invites an artist who has gained notoriety in their field and works in a traditional or contemporary craft media to the University to give a lecture and slide-presentation of their work, along with an intensive one-and-a-half day workshop.

O'Grady hopes that this program will help alleviate the misconception that craft is only a hobby. "It is very important for the community to be able to meet a real working artist who makes all or part of their income from what they create. That you can follow your passion and still make a living," he said.

He also feels that it is important for students to be exposed to all types of art to broaden their definition and appreciation of what art is. Often,art is thought of as including only visual objects, such as paintings and sculpture. However, art can also be physical and have a utility.

Craft arts such as furniture and pottery become art when the artist invests their work with unique physical qualities, conceptual content and meaning in addition to the utilitarian characteristics normally expected from craft objects.

The Visiting Artist Program was also created to clarify the point that craft is more than a hobby. While art and craft are fun, they also involve serious academic theory. Both entail an intellectual thought process that is not always recognized in the academic and public arenas, O'Grady said.

The Visiting Artist Program has been in place for two semesters. The first artist to visit was Carolyn Sheedy-Mazzuca, a papermaker from Kansas City, Mo. This semester David Fobes, a studio furnituremaker from San Diego, Ca. will come to campus as part of this program.

Fobes received his MFA in 1994 from San Diego State University, studying under the internationally known furniture maker, Wendy Maruyama. He has been making vibrant furniture with richly carved patterns and painted patterns for 20 years. He creates one-of-a kind furniture that is inspired the hybridization of the American and Mexican cultures, among other themes.

Fobes is very influenced by the "border culture," the line where two cultures meet and how the two cultures reflect upon one another. Fobes' art has been exhibited widely throughout the United States in such galleries and museums as the Renwick Gallery, the Peter Joseph Gallery, the Folk Art Center and the Museum of Fine Arts, Tuscon.

Fobes will present a free slide lecture to the general public from 8-9:30 p.m. on Friday, Nov. 19 in the Langone Center Gallery Theater. He will discuss his work, influences, processes and thoughts on furniture making. O'Grady said that this lecture is something that all people, whether they are artists or not, can relate to.

"David is a really great and charismatic speaker. He will talk about his work and discuss the techniques which he will be covering in the workshop. Although his focus is furniture finishing, these techniques can be applied to any type of painting. Hearing an artist discuss his work helps you have a better grasp and understanding of their art. Besides, everyone owns furniture," O'Grady said.

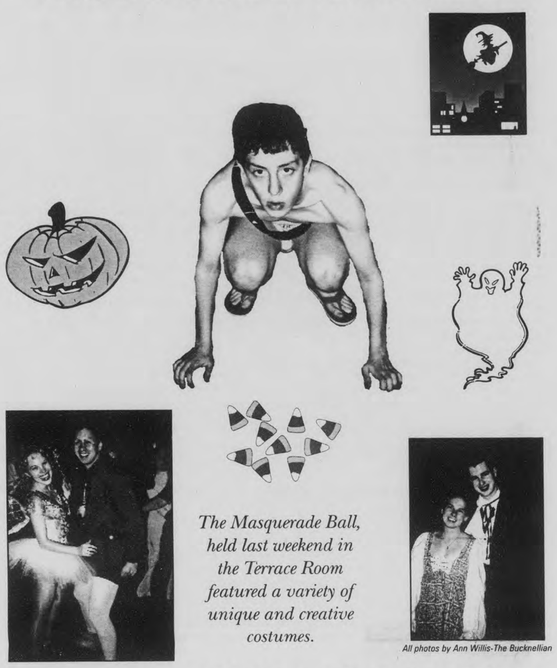
As part of the Visiting Artist Program, Fobes will also offer an intensive one-and-a-half day workshop, "The New Painted Surface: Pattern And Decoration," on Saturday, Nov. 20 and Sunday, Nov. 21.

Fobes will work side by side with those registered in the workshop, teaching his processes and techniques. The workshop will allow students to develop skills that they can then use in their own artwork. Specific topics that will be covered in the workshop are: historic uses of pattern, uses of a compass to develop and organize pattern, making durable stencils, photocopy transfers and decals, as well as color and value in developing pattern.

Those interested in this workhop should contact the Craft Center as soon as possible. Spaces for this great oppurtunity are filling up fast.

To see some examples of David Fobes' work, go online to: http://psfa.sdsu.edu/art/emphasis/eindex.html

~~EVERYONE IS COSTUME CRAZY~~



The Masquerade Ball, held last weekend in the Terrace Room featured a variety of unique and creative costumes.

Stadler Center hosts fiction and poetry reading

By Jolene Hart

1999 Philip Roth Resident Tom Franklin and Stadler Intern Michael Carlin will showcase their works in a fiction and poetry reading to be held at the University this weekend.

Franklin, a native of Alabama, attended the University of South Alabama, and later the University of Arkansas, where he earned an M.F.A. in fiction. He has been awarded the *Nebraska Review* Prize and the John Craig Stewart Award for his works, as well as the 1998 Writers at Work Nonfiction Prize.

The title piece in Franklin's collection *Poachers* will be included in the forthcoming fiction collections: *Best American Mystery Stories* and *New Stories from the South*. Franklin's upcoming novel, *Hell at the Breech*, will be released next summer.

As a Philip Roth Resident, Franklin was offered an environement conducive to concentration on his work as a writer throughout his time at the University.

Michael Carlin, originally from Los Angeles, received degrees from the University of California at Santa Cruz and the University of Miami. As the newest Stadler Intern, he is involved in various aspects of the campus including the literary magazine *Fire and Ice*, the University's radio station and a creative writing class. Carlin has performed throughout southern California and has been published in literary magazines spanning the West Coast.

The event will include an array of readings from both Franklin and Carlin. Franklin plans to present an excerpt from the book that he is currently writing at the University, while Carlin will share selected poems.

This fiction and poetry reading, made possible by the Stadler Center for Poetry, will be held at 8 p.m., this Sunday, Nov. 7, in the Willard Smith Library of the Vaughan Literature Building.

Hollywood High Sophomore Explains the Civil War

I used to think, "Who cares what happens east of the L.A. County Fairgrounds. If KCAL-News won't cover it, how important can it be?" But since my teacher made us sit through those videos with the sorry fiddle music, I learned about the guys who had their unbelieving faces blasted to confetti at Gettysburg and Bull Run, so I could one day kick it on the lounger with Doritos and a BigMouth, my speakers blaring Ice Cube, Snoop, Dr. Dre, and E-Z E. Those convenience stores that went up in telegenic flames, once the lawmen skated for whomping Rodney King--just a trailer, babe, for another civil war.

--Michael Carlin

I can't come up with any more catchy ways to get you to write for A&E.

7th Street Cafe Late Night Music Series Presents....

Courtesy of Chickpop Records

Magdalen Hsu-Li comes to the university at 11 p.m. this Friday at the Seventh Street Cafe.

Magdalen Hsu-Li is a pioneer among Asian-American women in music. She writes universal, personal and political songs that stretch the boundaries of our conciousness while appealing to a wide spectrum of people.

Hsu-Li is a consummate performer, visual artist and free spirit with a world vision which cannot be categorized.

Her spectacular live shows are high energy, conciousness raising events featuring piano, vocal and drumset duos, impromtu stand-up and theater, thought provoking poetry readings and spiritually rousing percussion and drum improvisations.

Her debut CD, *Muscle and Bone*, was released in 1997 on her own label, Chickpop Records.

The show is part of the 7th Street Cafe's Late Night Music Series.

Ani rocks Gettysburg

DiFranco's performance thrilled fans

Courtenay Mastain

"I just write about what I should've done and sing what I wish I could say, and I hope somewhere some woman hears my music and it helps her through her day," Ani DiFranco sings in "I'm No Heroine."

Yet at her Gettysburg College concert last Friday, Ani's herioc status was undeniable as she played to a packed crowd of adoring fans.

Belting out the familiar songs from her newest albums *Up Up Up Up Up Up* and *Little Plastic Castle* as well as old favorites, not only did I adore her, I worshipped her.

At first glance, Ani shocks the average person with streaks of green in her dreadlocked hair, large nose ring and tattoo and funky clothes, but she is striking in a way that most women can only dream of. Her messy hair and lack of make-up make her even more stunning, accentuating her tiny frame and arms strong from years of playing guitar. But I'm not here to discuss fashion.

Courtesy of ????

Ani DiFranco performed this past weekend at Gettysburg College. Her new album, *To the Teeth* will be released Nov. 16.

Both a musician and writer of her own lyrics, Ani is phenomenally talented, but her true gift is her ability to touch her audience. Ani doesn't have fans, she has admirers who find inspiration and solace in her lyrics which focus on the position of women in society, racism, sexism and even venture into love and relationships.

Though a tiny girl, Ani possesses tremendous stage presence which stems from an incredibly high energy level. Constantly dancing around the stage, she interjected a variety of stories between songs. With an infectous laugh, she lamented about her cracking jaw, then later addressed racism in America, receiving a positive response for a song off of her newest album, *To the Teeth*, scheduled for release Nov. 16.

Since she founded her own record label, Righteous Babe Records, Ani has consistenly produced about one album every year, quite an accomplishment for an independent musician. With each album, her evolution as a musician can be traced. Her music is unique—combining elements of punk, folk, jazz, blues and rock, she creates her own sound, rendering it impossible to accurately compare her to other artists. "The Band," as she affectionately calls the other musicians, play bass guitar, drums and electric keyboard. With guest artists Maceo Parker and The Artist,*To the Teeth* will certainly include new sounds.

At a time when it seems as though anyone can achieve fame in the music industry, Ani refreshes my faith in humanity—creative, talented and courageous individuals have not been entirely replaced by commercialized, one-hit wonders.

Paige Cuff-The Bucknellian

Catherine Payn, professor of music, is also the director of the Bucknell Opera Company which will perform at 8 p.m. this Saturday, Nov. 6 in the Weis Center.

Upcoming lo cal c oncerts

- Ben Harper at the Electric Factory in Philadelphia 11/6 & 11/8
- Bob Dylan at the Civic Arena in Pittsburgh 11/5, at the Bryce Jordan Center in State College, 11/6 at the Apollo of Temple in Philadelphia 11/9
- 311 at the Theater of Living Arts in Philadelphia 11/9
- Save Ferris at Graffiti in Pittsburgh 11/9
- Blink 182 at the Electric Factory in Philadelphia 11/16
- Live at the Tower Theater in Darby 11/21

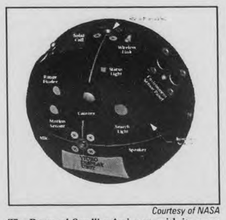
Science & Technology

New hovering robot will assist astronauts



Courtesy of NASA

The Personal Satellite Assistant, with its array of specialized sensors, will aid astronauts.

By Matthew Trunnell

The scientists at NASA's Ames Research Center are not known for keeping up with the latest in technology. They are known for defining it — and their latest gadget is a perfect example.

Remember Luke Skywalker's hovering sparing partner that taught him the art of the light sabre? What was once science fiction will soon be reality. The Personal Satellite Assistant (PSA), as it is called, will bring a whole new array of tools to astronauts on the Space Shuttle. Armed with sensors to monitor air pressure and temperature, as well as levels of oxygen and carbon dioxide, the orb will roam the Shuttle using small fans for propulsion. Range finders will alert the robot to obstacles in its path, such as astronauts.

Although the PSA is designed to be completely autonomous when necessary, it also responds to human voice commands. This is especially useful for a concept NASA calls "just-in-time training." For example, if the procedure for a certain task is not remembered, the astronaut can ask the PSA to recall whatever information is needed.

Linked to other computers aboard the ship via a wireless network, the orbs can not only retrieve data, but also will send video back to ground control. The scientists on earth will be able to steer the PSA around, watch the video feed and talk to the astronauts through a miniature built-in speaker. Such a device would prove extremely useful during emergencies too dangerous for humans. When a fire recently started in the MIR space station, a PSA could have been sent to first examine the area to more quickly determine a solution.

With the broad range of applications, this more natural style of interaction will also enable scientists who send special experiments with the Shuttle into space to observe the progress. A small fleet of PSAs would be an incredibly useful window into the space environment.

"We're developing an intelligent robot that essentially can serve as another set of eyes, ears and nose for the crew and ground support personnel," explained NASA Ames researcher Yuri Gawdiak. "Our research objective is to test intelligent autonomous systems that use advanced sensors and monitoring technologies for supporting current and future spacecraft operations." Gawdiak is one of the project leaders.

NASA designers believe that PSAs may be ready for duty in another two years, but many problems remain unsolved. The largest problem is data fusion—data from many different sources needs to be consolidated into a single, more manageable stream. The orb's array of sensors will each produce a large amount of information, all of which will need processing if it is to successfully carry out its job.

Another challenge is keeping the volume of the unit as small as possible. The plans call for a softball-sized PSA, but currently, the only sensors small enough lose their accuracy over time.

Courtesy of NASA

The Personal Satellite Assitant will be connected to other computers via a wireless network. By using these computers, it will process complex data to save battery power.

Is Darwinism a Social Construction?

Impact of social norms on Darwinism discussed at Lycoming College

By Katherine Nowak

On what grounds do scientists feel they are objective? "Epistemic norms," suggests Michael Ruse, whose recent lecture at Lycoming College was one in this year's Lycoming Evolution lecture series. Ruse, a professor of philosophy from Ontario, Canada, addressed the inquiry, 'Is Darwinism a Social Construction?' The factors he found to be effective upon objectivity included cultural aspects of religion, sex, race and politics. Science, however, must expel these non-epistemic values to be entirely objective. "As science matures, epistemic values expel non-epistemic values," said Ruse.

When science began, it was full of social and racial influences. Standards Ruse called epistemic, defined as "of or relating to knowledge," were originally adhered to by Charles Darwin 250 years ago in the initial stages of the Evolutionary theory. When one compared previous thinkers, such as Darwin's grandfather Erasmus Darwin, the mindsets were like night and day. Erasmus, firmly religious, believed that God put all in motion. Ben Franklin, a close friend of Erasmus, adopted his view, making evolution the vehicle of religious and social values.

Lamarck too belonged to the class of non-epistemic thinkers characterized by deeply cultural enthusiasm. Lamarck was an early evolutionist, seeing evolution as an entirely progressive process—at the bottom of the hierarchy were amoebas, at the top were higher forms-human beings. Couvier followed, opposing evolution through his cautious documentation of gaps in the fossil record. As a Protestant, Couvier had personal reasons to push for a culture-free science. He was desiring his own "belonging" and through his rejection of evolution he would stand out as a scientist, said Ruse.

When Darwin became ill, he handed his theory over to Thomas Huxley. "Huxley wanted something other for Darwin's theory," said Ruse. "He wanted to 'professionalize' biology and sell it to the medical world." Huxley did not see an immediate place or benefit for evolution and thus equated it with a secular religion, promoting the theory in recreational spots, such as men's clubs.

He failed to grant the theory its appropriate credit and serious attention, mentioning natural selection in only two of his 165 lectures.

"Huxley believed that evolution was not good science, but that it had the potential of being a 'popular' science. Temples would be built- these temples being museums." Huxley's division of professional science, under which morphology, physics, and embryology fit, from that of popular science, under which evolution was classified, was not diffused until the second half of the 20th century.

In Descent of Man, Darwin himself exhibited defeat—although his aspiration had been to give epistemic science, he ultimately added culture to his initial theory of natural selection. His aim had been evolution, but his legacy became 'evolution as progress.'

In the 1930's, agriculture, genetics and model building brought epistemic eminence to the evolutionary theory. In 1937, Thedosios Dobzhansky undid what Huxley had done by moving evolution out of museums and into the classrooms and laboratories. In 1947, the journal *Evolution* was published in an attempt to rid the theory of its non-epistemic norms. Ernst Mayr succeeded in keeping culture out by his consistency and simplicity in his writings on evolution and Darwin.

Phylogenetic speculation remains necessary today, as does quantitative work. Evolution has suffered much because of too much philosophy and speculation. Many public opinions have implied supernatural forces as contained by evolution. An integration with genetics, paleontology, comparative anatomy and embryology and phylogenetics is required to make evolution a professional and epistemic science.

Modern evolutionists believe evolution to be more than just a desirable alternative to Christianity. However, two sets of books have arisen: the professional and the popular. Richard Dawkins, according to Ruse, is an author of the popular. He carries the secular evolution. Edward O. Wilson carries the social evolution in his Sociobiology: The New Synthesis. The metaphors of Darwinism persist today, made in analogies to the arms race, natural selection and division of labour. Even the most professional of thinkers still incorporate cultural metaphors whose bases lie in the evolutionary theory.

"Darwinism today appears subjective because it is infused with culture thanks to its metaphors," said Ruse.

"Is all knowledge culture-relative?" asks A. Desmond, author of *The Politics of Evolution*.

"Prejudice of society should have little influence on the reliability of the scientific community," declared Harvard's B.Davis in his *Storm Over Biology*.

Evolution has excluded many cultural aspects, including religion. In this way, it has taken the objective approach. Its primary tenets are abided by in numerous fields including agriculture—if you cross a species you will go against the wisdom of the genes.

Ruse thus proposes that evolution was originally construed from the social need to explain the beginning of life. However, through various efforts at objectivity, especially those of Charles Darwin, the Evolutionary theory has grown to exclude many cultural facets. Its ties with society and ethnicity however still remain in the areas of popular science and the utilization of metaphors.

"The proof of the pudding is in the eating," Ruse said in closing.

Kenya continues to fight growing AIDS epidemic

By Alex Piel

While many believe AIDS to be an overwhelming problem in America, Kenya's challenge appears inconceivable. Since the report of its first case in 1984, AIDS has continued to spread at an alarming rate. Today it takes the lives of nearly 450 Kenyan men, women and children daily.

According to a recent report, an estimated 1.3 million Kenyans were infected with HIV as of Sept. 1997. Today, over two million people have contracted the virus and almost 100,000 are children under the age of 10.

While this disease is taking the lives of many children, it is also causing those living with the disease to drop out of school. In high school and college, one out of every 15 students has HIV and students between the ages of 15-19 are among the highest at risk due to sexual promiscuity and lack of awareness.

These figures show that it is not only American children and teenagers who are becoming sexually active during young adolescence, but children worldwide. Increasingly younger adolescents are exposing themselves to one of the most ruthless viruses ever known, and even with the knowledge available today about HIV and AIDS, sexual behavior appears to be increasing. In Kenya, public awareness has yet to establish itself as a means of protecting youth. Losing almost 200,000 people each year to AIDS, Kenya needs to take urgent measures if this disease is to be contained.

There is fear that stigmas will arise and people with AIDS will be isolated, until entire villages and families are finally lost. Kenya wants to avoid such a method of treatment as many believe that the disease, were it to loom in the background would create "stigma against people living with HIV/Aids," said Dr. Sam Okware, Uganda's Commissioner for Health Services. "They would be segregated and would be more dangerous in the background than the virus itself."

"The stigma discourages the 'infected and affected' people and their families from going for counseling," said Okware.

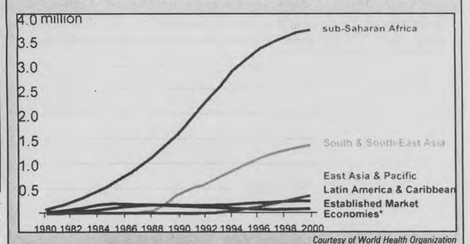
There are numerous issues that need addressing if Kenya is to remedy the serious threat to their country. Continued monitoring of the prevalence and trends of the epidemic as well as trying to strengthen surveillance systems require consideration. Strategic plans need to be drawn up to address crucial scopes in AIDS-related activities.

People have to think economically as well as politically. AIDS and STD prevention clinics need to be developed and promoted all over Kenya. Mobil clinics have proven to educate considerably in America and would work similarly in Kenya if they could be established and properly funded. Money recently given by major donors for AIDS education, barring any mishandling by government officials, should help Kenya face the problem.

Those concerned would like to see the money finance education and social support to orphaned and abused children. Proper coordination for research facilities on AIDS and STD's is wanted.

The list of desired steps and policies that the government needs to initiate is seemingly infinite. At this point, Kenya is on the brink of declaring a National Emergency as AIDS continues to be the number one cause of death in their country. Unfortunately, as it now stands, actions are minimal and resources limited. Promises have been made and money has been given, but how much longer can Kenya wait?

Annual number of new HIV infections



Courtesy of World Health Organization

* Western Europe, North America, Australia, New Zealand, Japan

Commentary by Richard Waller, University associate professor of history and expert on East African history and culture

"The level of AIDS in Kenya is high— perhaps half of the population of the Nyanza Province in the west will eventually get it. The level of public awareness is also high, though public understanding of what AIDS is and especially how it is transmitted is much lower. In areas with which I am familiar it is often seen as a disease of the 'outside' (i.e. it comes in from towns and strangers) not as something which is being rapidly spread locally.

The Kenya government has been somewhat (but not fully) open about the incidence of the disease— it is often not reported or is reported in a disguised way. African doctors, in Kenya as elsewhere, have been in the forefront of coping with the disease in areas of AIDS prevention and cures. African medical practitioners have made a considerable global impact.

It should also be noted that the prurient and condemnatory attitude so often found in the West is largely absent here. The sick are cared for, not condemned, and the dead are mourned not shunned. We have much to learn from Africa's compassionate response."

Features

Finding a home away from home

Benita Kolmen-Solomon encourages participation in Hillel activities

By Helen Shen

A comfortable lounge, a cup of hot chocolate and great conversation. A Bucknellian can find all three in a little known organization: Hillel. Located in the Martin House on St. George Street, the Bucknell Hillel program houses Mrs. Benita Kolmen-Solomon, whose enthusiasm and determination give Hillel a very bright future.

Born in Texas, Kolmen-Solomon did not stay in one place too long. She spent three years of her life in Austin, Texas, and then eight more in Bloomington, Indiana, where she was a beloved administrator who ran the graduate program. Her marriage to her husband brought her to Lewisburg, and to Bucknell as well. Now, she is the new Interim Hillel Director. Bucknell's Hillel is in the process of hiring a new rabbi, one that will be on campus full-time, and Kolmen-Solomon is very excited. "Having a full-time rabbi means that Hillel will be able to provide more programs for the campus students," she said.

Jonah Hall—The Bucknellian

Mrs. Benita Kolmen-Solomon, interim Hillel Director, welcomes all students to participate in Hillel activities.

Hillel is a national Jewish organization. It offers both religious as well as social services. Every Friday night, a dinner as well as a Jewish service is offered to all students. Recently, Hillel sponsored a pumpkin-carving night, as well as a hayride. For special Jewish holidays, such as Hannukah, Passover, and High Holy Day, Hillel offers special services. The Holocaust Remembrance Program is an emotional night that Hillel hosts once a year. And the Night of Broken Glass will take place on November 9th. But Hillel is not limited to only the Jewish students on campus. Kolmen-Solomon is very adamant about making all students feel welcome. "I want Hillel to be a comfortable place to come to," she explains. "When I was in college, Hillel was my home away from home."

Kolmen-Solomon is working hard at making Bucknell a new home away from home, too. She marvels, "I am really impressed with the calibur of students here. The campus is really beautiful. And of course, then there's Lewisburg. I've grown to really like it." She also believers that Lewisburg is an ideal place to raise her five-year-old daughter, Polly, and adds that "being part of the Lewisburg community" is something she treasures. "When you really try to find things in Lewisburg is when you figure out what's really out there." She adds that she feels Bucknellians tend to really focus on the campus, and suggests that some exploration will lead to great discoveries.

Kolmen-Solomon has many visions for Hillel. "I don't see myself as a person in authority," she says with a laugh. Her warm smile and carefree laugh draw several students into the room, students who stop by to ask how she is and share their plans for the day. "I'm the Hillel Mom," she adds. Indeed, Kolmen-Solomon radiates a certain warmth and friendliness that is irreplaceable.

"I hope to be a role model," she said. "What I want the campus to know is that Hillel is a program that is alive and in place."

Kolmen-Solomon puts much emphasis on the importance of making Hillel open to all. "I want to open the lounge for all students," she said. She concludes, "It's more than having leaders. You need to have people who want to come to Hillel. I want to make Hillel a place where students will want to come."

Her ultimate vision? Kolmen-Solomon wants to give to students what she thinks they don't have-time. She believes that her job is to not only be a cheerleader for the Hillel program, but also to physically be at the Martin House, helping whenever she can. "To be given the opportunity to do something makes you a leader," states Kolmen-Solomon, and she is determined to offer as much of herself as possible in order to help the Hillel students organize and conduct activities which are open to the campus.

Perhaps the most unique characteristic of Kolmen-Solomon is her ability to offer sound advice. She models what she believes-and is not afraid of who she is. "I want students to realize that if being spiritual is part of your life, then that's great. There's more people doing the same thing than you think." At Hillel, "no one is going to shove it down your throat." For Kolmen-Solomon, Judaism has always been a significant factor in her life. "It's always just been a part of me." She comments that the most significant milestone in her life is getting married to her husband, who is a Physics teacher as well as a faculty advisor here at Bucknell. Kolmen-Solomon believes that life has led her to many "good experiences."

She has one piece of advice for Bucknell students. "Learn how to relax." She knows that the pressure is extremely high on this campus, and adds, "Sometimes students need to not be afraid to take a breath." She reminds her audience, "Every kid has a right to fail. When you get to college, you realize that it is such a freeing experience. There is so much going on. There are so many groups available on campus. Just don't lose what you came with." Perhaps Hillel is just the place to make that happen, and Kolmen-Solomon is just the person to help.

Wink Thinks

Jacqueline Flicker—The Bucknellian

Dear Wink,

I am writing this to you from home where I decided to spend the weekend with my mom. She raised me by herself since I was six and I know my past couple of years at Bucknell have been a time of adjustment for her. But right now I am in shock. My mom is flipping out. Since I left for school this fall she has been working out at the gym daily and can now lift as much as I weigh. She is dressing differently too, wearing miniskirts so short my girlfriend wouldn't be caught dead in them. I mean, she has a great body for a woman her age, but it just doesn't seem right to me.

Also, she has become an avid vegetarian. There is nothing to eat in the house. I mean, how excited can a person get about carrots and bean dip or Tofutti instead of real ice cream? She informed me last night that she will be serving a Tofu and Bean Casserole instead of turkey for Thanksgiving dinner. Yuck. She couldn't understand why a drumstick and mashed potatoes are so important to me.

Wink, my mom feels like a stranger to me. What should I do?

Sincerely,
Hungry for Meat

Dear Hungry For Meat,

I can understand the concern that you have for you mom. I am sure that she is pretty torn up especially if you are the focal point of her life. Even though I am sure that you feel bad for her, I think that she is also proud of you at the same time for what you are doing. Going away and leaving your family behind is a big step, and it is tough for her I am sure. It is very noble that you decided to spend the weekend with her and I am sure that she recognized and appreciated that. I think that it is important that you continue to do things like that, make sure that your mom knows that you still want her to be a part of your life.

It seems as though you have a lot of concern for your mom. I think you should make sure that she is aware of that. Your mom is probably feeling abandoned, and just because you have been away before does not necessarily make it any easier. As a result she is probably exercising control over the only other thing she has total control over, herself. I would not necessarily say that working out daily is such a bad thing. I mean, we are talking about a middle-aged woman, and I know that my mom could not get to the point where she could lift as much as I weigh. Your mom is probably realizing that her life is changing and maybe she is trying to change a little as well by becoming a little more independent.

If you are truly concerned about your mom, which it seems that you are, just talk to her. Try to make her understand that she does not have to change her whole appearance to be happy. Work out some kind of schedule with her where you call her at a certain time every so often, it will probably give her a feeling of connection, as well as give her something to look forward to. If you think that your mom is doing things that are not characteristic of her, tell her so, do not be afraid to say what you think or are feeling; why hide the truth? I think that your mom will understand if you just talk to her, she will probably realize that what she is doing is a little crazy, but you must also realize that it is her decision. If it makes her happy than you will ultimately have to live with tha. Most of all just relax I am sure that things aren't as bad as they seems, it is probably just because it is your mom, and people don't usually think of their mothers as being very independent.

Now with the whole vegetarian thing, I just wanted to say that I am sorry about no turkey. It is really no big deal though, just ask your mom if you can have a turkey, she will probably make an exception for you this one time. Its hard to imagine a thanksgiving without turkey.

Overall, just remember that your mom is going through a rough time, help her along the way. People deal with things in different ways, we just have to respect them. However if someone is doing something that is troubling to you never feel afraid to tell them about it, they may not even be aware of it. Until next time relax, have fun, and let Wink's wisdom be your guide.

If you are interested in writing to Wink there is no need to worry-all questions are confidential and answers are always thorough. However, please write questions that are decent because we can't include material that is libelous or an invasion of privacy. Questions or comments can be sent to Eli Winkler at box C2815, attn: Wink Thinks.

Please note that Wink Thinks is meant to be instructional as well as entertaining. However, it is in no way a substitute for professional counseling.

"Heaven's Hotbox" provides forum for student expression

By Kim Spigelmire

Heaven's Hotbox is one of the newest and most unique additions to the already abundant variety of extra-curricular options at the University. It was founded by a core of several students, including Donald E. Jones II, '00, and Lamario Bradwell, '01. The purpose of Heaven's Hotbox is to create a forum where students, faculty and residents of Lewisburg will be comfortable expressing themselves emotionally, spiritually and intellectually.

The conception of Heaven's Hotbox came about quite by accident. Jones and Bradwell, both residents of Seventh St. House, as well as several other students were relaxing in Jones' room one night. As the group conversed and listened to music, spontaneous singing and discussions erupted. As the discussions and artistic expression grew more and more personal Jones and Bradwell, as well as the other participants, realized that they had discovered a way in which they could bring people of all ages, races and experiences together for their mutual benefit. Thus, Heaven's Hotbox came into being.

Heaven's Hotbox, although it may sound religious, is not a religiously based organization. The word 'heaven' is used to convey a positive image, while 'hotbox' describes the kind of lively discussion that takes place at meetings.

Within the group, which is not formally organized but is open to anyone who wishes to participate or watch, each member takes on a name. This name represents some fundamental characteristic of the person that is beneath the surface. Jones for example is called 'the muse,' and Bradwell 'the archangel.' By taking on this name, each participant is able to express a part of him or herself that may not usually be expressed.

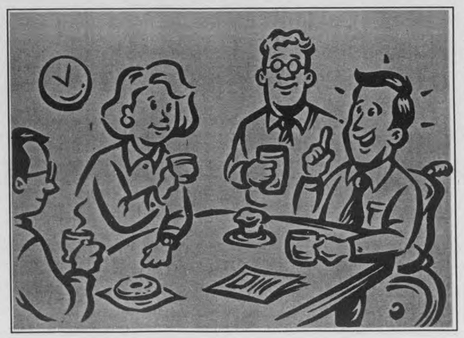
The actual meetings of Heaven's Hotbox incorporate three main aspects. The first is artistic expression. Participants are encouraged to sing, recite poetry, play music or express themselves in any way they want. During one session students participated in the creation of a spontaneous group poem which incorporated all of their individual views and feelings.

The second section is the topic section. Any topic may be introduced, and people are invited to discuss their opinions and various viewpoints.

The third section—knowledge—urges the participants to look within themselves and examine their inner selves. Many people share their life experiences with the group and discuss ideas and feelings which they are not usually comfortable sharing.

While most people participate in discussion, it is not mandatory and some merely listen and learn from those who do. The discussions, although they are centered on a specific topic, encourage spontaneity and freedom of thought. Participants are encouraged to break out of their social roles and express their inner feelings.

"This is a society where things are pent up. Heaven's Hotbox breaks all that up" said Bradwell.



The overall purpose of Heaven's Hotbox is to promote personal growth and learning among those who participate. Jones says "Heaven's Hotbox is a catalyst for healing. It is fun, but the emotional and intellectual aspect of the group is the most important part."

The group seeks to break down the divisions and hierarchy within the University community and surrounding area. Heaven's Hotbox is a way for people of different experiences, religions, races, ages and cliques to interact with each other and hopefully learn from each other by moving beyond their prescribed social roles.

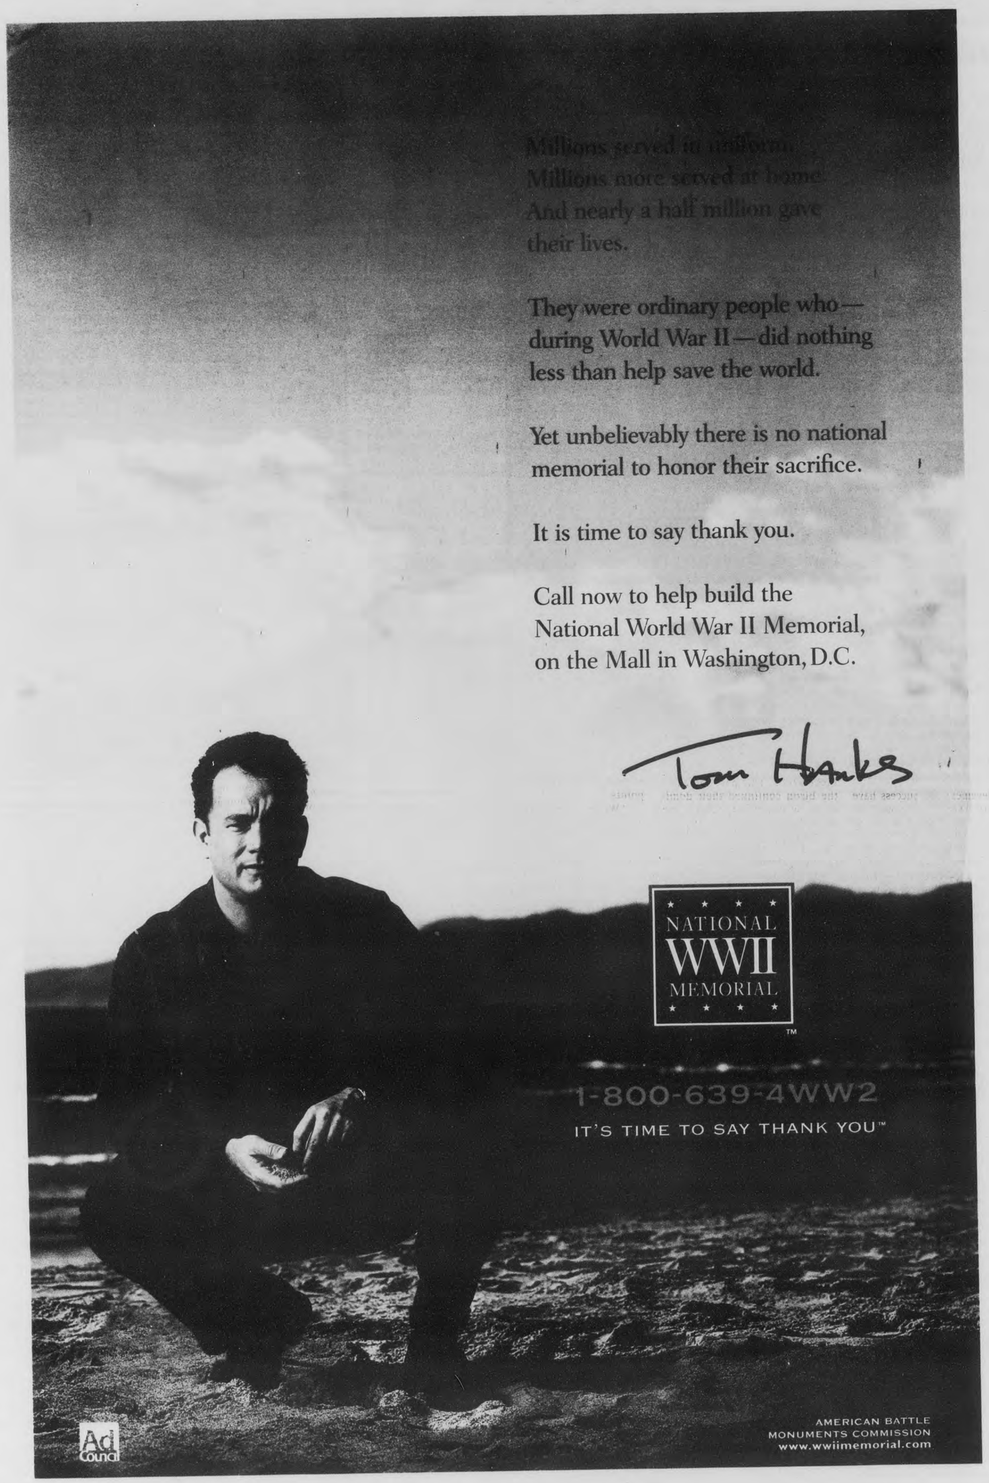
Jones and Bradwell feel that Heaven's Hotbox will greatly impact the University community. One of the main reasons for its formation was the lack of opportunities for students, faculty and community residents to express themselves in an artistic manner. Heaven's Hotbox provides an outlet for people to express their talent within the University rather than attending performances and lectures by outsiders.

In a wider sense, Jones and Bradwell believe that Heaven's Hotbox will be the catalyst of an inward change for those who participate. They hope that the group will change the way in which people view themselves, as well as the world community. They describe the group as a spark that will ignite the fuse of change. Gradually an explosion will take place, the effects of which will continue indefinitely. Acceptance and understanding will engulf the world, making it a better place for everyone.

The next meeting of Heaven's Hotbox will be November 7th at 9:30 in the Seventh St. House lounge. The meeting, which coincides with Minority Prospective Weekend, will be centered upon the actualities of the college experience, not just at Bucknell, but at any college.

Jones and Bradwell feel that music helps people to relax and encourages spontaneity of expression. They hope to blend various types of artistic expression with a broadening and deepening discussion section. An even larger crowd than the previous meetings (which averaged about 40 people) is expected.

Jones and Bradwell also hope that the diversity of the participants will continue to expand. Previous meetings were attended by a varied group, including members of all four classes, faculty and even a Lewisburg resident.



Millions served in uniform.
Millions more served at home.
And nearly a half million gave their lives.
They were ordinary people who—during World War II—did nothing less than help save the world.
Yet unbelievably there is no national memorial to honor their sacrifice.
It is time to say thank you.

Bison take three-game winning streak into Saturday's Patriot League Tournament

By Jennifer Cruickshank

After winning a tie-breaking coin toss to advance to the Patriot League Tournament, the Bison field hockey squad has won three straight games to close out its regular season. The Bison will travel to Easton this weekend with confidence, as first-seeded Lafayette will host the tournament.

"I think the team is really pumped for this weekend," junior forward Maura Higgs said. "We played great this week in preparation, and we're ready to play."

The Bison began their winning streak last Wednesday, as they blanked Cornell 2-0. Bucknell got on the board late in the first half when sophomore Melissa Maher found the back of the net. As a result of the strong defensive effort, one goal would be all that the Bison would need. Higgs scored an insurance goal in the second off of a pass from tri-captain Katey Twombly '00. The assist was Twombly's team-leading eighth of the season.

Bucknell closed out its final home game of the season with another shutout, beating Georgetown 3-0. The win marked Bucknell's 12th of the season, setting a school record for field hockey victories. Maher again notched the game winner, this time off a pass from classmate Dena Ebert. Ebert added her own score during the final seconds of the first half off of a pass from Amy Marvel '03.

Senior tri-captain Jenny Zimmerman converted her fifth penalty stroke of the season to add the final goal of the game. The goal was Zimmerman's team leading 12th of the year. She also leads the team in total points with 32.

Freshman goalkeeper Sonja Wettergreen recorded 10 and eight saves respectively in tallying the two shutouts, raising her total to six shutouts for the season.

Evans Mitchell-The Bucknellian

Dena Ebert '02 (#14) registered goals in Bison victories over Georgetown and LaSalle.

At LaSalle on Monday, the Bison provided for more of the same. Wettergreen picked up another shutout and Zimmerman netted two more goals as Bucknell cruised passed LaSalle, 3-0. Junior Brett Russo set up Zimmerman's first goal, and the second came off of a penalty stroke. Ebert sealed the victory in the second half with a goal off of a scramble in front of LaSalle's cage.

Bucknell is now 13-6 and will face Fairfield in the first round of the Patriot League Tournament on Saturday. The last Bucknell-Fairfield meeting ended in a controversial Fairfield win in double overtime, and the Bison are more than ready to seek their revenge.

"I was hoping we'd face Fairfield again this season," Higgs added. "Especially now, when things really count."

X-country wins Patriot League Title

By Rose Sedo

Achievement and success have an important distinction. Achievement is the knowledge that you have done the best that is in you; success is being praised by others for doing your best. Success may be nice, but it is not as satisfying as achievement.

The Bucknell cross country team knows all about both of these words. This past Saturday, the Bison continued their dominance by sweeping the men's and women's team titles at the 1999 Patriot League Championships on Lafayette College's Metzgar Fields Course.

Taking over the field, the Bison women placed five runners among the top six and set a new Patriot League Championship record with a team total of 17 points.

"We were only two points off of a perfect score, which is incredible in itself. But really, the best part of it all is that we enjoyed doing it," said women's captain Jen Hart '00.

Individually, sophomore Becki Marshall '02 won the race with a time of18:17, tying the Metzgar Fields Course women's championship record.

"Becki is really coming around, and I slowed her down in the last half of the race because it was so hot," commented head coach Art Gulden.

Freshman walk-on Andrea Beisser '03 finished right after Marshall in18:26, while senior tri-captains Jen Hart '00 and Carly Graytock '00 followed closely after, grabbing third and fifth places. Wrapping up Bucknell's top five finishers, Theresa Dennis '03 finished sixth overall.

Coach Gulden was thrilled with the women's performances. "The ladies ran extraordinary. Awesome was definftely the vernacular of the day, and these kinds of results come with work, and not luck. We ran patient and by the first two miles, it was clear that the outcome of the race had already been decided."

The men also ran an impressive race, capturing their third straight conference crown, and their sixth in the ten-year history of the Patriot League, with a team total of 30 points.

Senior tri-captain David Brofenbrenner '00 lead the Bison pack and won the race with a time of 25:33, besting the runner-up by more than 10 seconds.

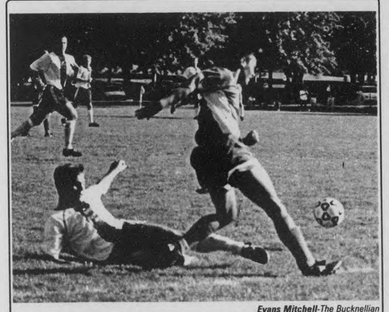
"David looked really good. He took command where it mattered and ran really strong. It's hard to run out there all by yourself, particularly with the warm temperatures that were present by the time the guys ran," Gulden said.

In addition, the Bison placed five runners on the all-league team with top-10 finishes. Tri-captain Brad Wertz '01 finished fifth in a time of 25:51, while Chris Nowakowski '02 was seventh in a time of 26:01. Rick Roundtree '00 crossed the finish line in eighth place in 26:04, and Steve Troisi '00 followed right behind his teammate in a time of 26:08.

"This race was a nice comeback for us. We didn't lay down and die after the disappointment of our last race two weeks ago. It's always great when a team can bounce back as well as we managed to do," said men's captain Ron Hess '00.

After such a weekend of such success and achievement, it was only fitting that coach Gulden was selected by his peers as the Patriot League Coach-of-the-Year for both the men and the women. It was his fourth such honor on the men's side, and the third time he has garnered top honors on the women's side.

"It really comes down to this: we did the work and we wanted it. We aimed for achievement, and success was forthcoming," Gulden said.



Evans Mitchell-The Bucknellian

Despite failing to make the postseason, the Bison finished above .500.

Bison season ends with OT loss to Navy

By Katie Yingling

After dropping its last two games of the season, the Bucknell men's soccer team still shouldn't be too down. It ended the season with its first winning record in years and definitely the first one any of its current players have seen.

Bucknell entered last week with a .500 record in the Patriot League, with two important league matches and the opportunity for postseason play remaining.

Lafayette was the first game of the week. After getting off to a good start with a goal by Sam Graziano '01, the Bison were unfortunately unable to follow through. The next three goals were scored by Lafayette, including one goal which the Bison scored against themselves. Walking away with a 3-2 loss, Bucknell's postseason chances were still not gone.

Sunday was Bucknell's last shot at making the Patriot League Tournament. After a scoreless regulation and suspenseful first overtime period, Navy scored the first goal of the game in the 106th minute of play. With its goal, Navy earned themselves a 1-0 victory, while eliminating the Bison from postseason play.

Despite this disappointing end to the season, the last two games were not truly representative of the Bison's play over the past three months.

"Although it was a huge disappointment that we didn't make it to the tournament," sophomore Greg Stunzenas said, "it doesn't take away from what we've accomplished this season."

Stephanie Metz-The Bucknellian

The Bison successfully defended their '98 League titles last weekend at Lafayette.

Beyond the Bubble

Walter Payton Dies of Cancer: NFL Hall of Fame running back Walter Payton died Monday of bile duct cancer. He was 45 years old. The disease was discovered earlier this year while Payton was being treated for a rare liver disease known as primary sclerosing cholangitis.

Payton announced in February that he would need to undergo a liver transplant as a result, but was then subsequently diagnosed with cancer of the bile duct, a vessel that carries digestive fluids from the liver to the small intestine. Said Payton's physician, Dr. Greg Gores, "The malignancy was very advanced and progressed very rapidly." Because the cancer had spread so rapidly outside of Payton's liver, the doctor said that a transplant, "was no longer tenable."

Payton played for the Chicago Bears from 1975 to 1987 and established himself as possibly the greatest running back of all time. He rushed for 16,726 yards in his 13-year career, a record that still stands today. He also won two MVP awards and a Super Bowl in 1985. Probably his most amazing statistic is the fact that he missed just one game in his entire career. After retiring in 1987, his #34 was immediately retired by the Bears, and he was elected to the Pro Football Hall of Fame in 1993.

"I wish there was another word I could think of other than greatness," former Bears linebacker Mike Singletary said. "That's what comes to mind. Greatness." "The guy didn't want to lose, didn't want to be tackled, didn't want to miss a game," added former teammate Jim McMahon. "To miss one game in his career was phenomenal."

Eric Dickerson, another Hall of Fame running back, said of Payton, "He was a guy of small stature but gigantic heart. He was an icon to all the guys who played that position"

Gonzalez Traded, Griffey Wants Out: Texas Rangers superstar Juan Gonzalez was traded to the Detroit Tigers in a nine-player deal Tuesday. On the same day, the Seattle Mariners announced that they will honor Ken Griffey Jr.'s request to be traded to a team closer to his Orlando, Florida home.

Gonzalez, one of the most feared power hitters in history, was sent to Detroit along with pitcher Danny Patterson and catcher Gregg Zaun. In return the Rangers received pitchers Justin Thompson, Alan Webb and Francisco Cordero, outfielder Gabe Kapler, catcher Bill Haselman and infielder Frank Catalanotto. "We've been working the last couple of years to acquire a marquee player," Tigers general manager Randy Smith said, calling Gonzalez, "a franchise player and future Hall of Famer."

The two-time MVP hit .326 with 39 home runs and 128 RBI this year. He led the Rangers to AL West titles in 1996, 1998 and 1999, yet all three seasons ended in disappointment, with the Rangers being eliminated in the first round of the playoffs.

Ken Griffey Jr., another of baseball's elite, will likely be moving elsewhere as well. His request to be traded will be honored by the Mariners organization. In a statement issued by the team, Griffey said he wanted to see more of his wife, Melissa, and their two children: son Trey, five, and daughter Taryn, four. "I want all Mariner fans to understand that my decision does not have anything to do with money or other issues. It is motivated solely by my desire to continue my baseball career playing on a team located closer to my family home, so that I can enjoy more time with my wife and young children."

Of course, acquiring a player such as Griffey will require any team to sacrifice a good deal of talent. Right now, it appears the only club anywhere near Orlando with that kind of talent is the Atlanta Braves. Players like All-Star centerfielder Andruw Jones might be enough to entice the Mariners into a deal, and it is no secret that Griffey would like to play for a title contender. Other possible destinations for the ten-time All-Star include the Houston Astros, Texas Rangers, Baltimore Orioles and New York Mets.

Syracuse Football Player Stabbed In Bar Fight: Three football players at the University of Syracuse—David Byrd, 21, Duke Pettijohn, 22, and Giovanni DeLoatch, 20—were injured in a brawl late Saturday night outside Sadie's Place, a bar in downtown Syracuse. Byrd, a senior defensive back from Schenectady, N.Y., was stabbed in the neck during the fight. He was taken to University Hospital and placed in the intensive care unit. As of Monday, he was listed in critical but stable condition. Pettijohn was treated at St. Joseph's Hospital for cuts to his body and head and released. DeLoatch was admitted to St. Joseph's with cuts to the body and head and was listed in stable condition.

Police arrested a pair of 22-year-old men Sunday and expected to apprehend more. Cheiron Thomas was charged with first-degree gang assault and second-degree assault, and Trequill Stackhouse was charged with first-degree gang assault and first-degree assault. When police arrived, several victims were bleeding badly and two knives were recovered from the scene. Syracuse police spokesman Sgt. Dave Sackett said the men did not appear to be targeted in the attack because they were football players.

The Bison successfully defended their '98 League titles last weekend at Lafayette.

BEYOND THE BUBBLE

Walter Payton Dies of Cancer:

NFL Hall of Fame running back Walter Payton died Monday of bile duct cancer. He was 45 years old. The disease was discovered earlier this year while Payton was being treated for a rare liver disease known as primary sclerosing cholangitis.

Payton announced in February that he would need to undergo a liver transplant as a result, but was then subsequently diagnosed with cancer of the bile duct, a vessel that carries digestive fluids from the liver to the small intestine. Said Payton's physician Dr. Greg Torres, "The malignancy was very advanced and progressed very rapidly." Because the cancer had spread so rapidly outside of Payton's liver, the doctor said that a transplant, "was no longer feasible."

Payton played for the Chicago Bears from 1975 to 1987 and established himself as possibly the greatest running back of all time. He rushed for 16,726 yards in his 13 year career, a record that still stands today. He also won two MVP awards and a Super Bowl in 1985. Probably his most amazing statistic is the fact that he missed just one game in his entire career. After retiring in 1987, his #34 was immediately retired by the Bears, and he was elected to the Pro Football Hall of Fame in 1993.

"I wish there was another word I could think of other than greatness," former Bears linebacker Mike Singletary said. "That's what comes to mind. Greatness." "The guy didn't want to lose, didn't want to be tackled, didn't want to miss a game," added former teammate Jim McMahon. "To miss one game in his career was phenomenal."

Eric Dickerson, another Hall of Fame running back, said of Payton, "He was a guy of small stature but gigantic heart. He was an icon to all the guys who played that position."

Gonzalez Traded, Griffey Wants Out:

Texas Rangers superstar Juan Gonzalez was traded to the Detroit Tigers in a nine-player deal Tuesday. On the same day, the Seattle Mariners announced that they will honor Ken Griffey Jr.'s request to be traded to a team closer to his Orlando, Florida home.

Gonzalez, one of the most feared power hitters in history, was sent to Detroit along with pitcher Darwin Patterson and catcher Craig Zaun. In return the Rangers received pitchers Justin Thompson, Alan Webb and Francisco Cordero, outfielder Gabe Kapler, catcher Bill Haselman and infielder Frank Catalanotto. "We've been working the last couple of years to acquire a marquee player," Tigers general manager Randy Smith said, calling Gonzalez, "a franchise player and future Hall of Famer."

The two-time MVP hit .326 with 39 home runs and 126 RBI this year. He led the Rangers to AL West titles in 1996, 1998 and 1999...yet all three seasons ended in disappointment, with the Rangers being eliminated in the first round of the playoffs.

Ken Griffey Jr., another of baseball's elite, will likely be moving elsewhere as well. His request to be traded will be honored by the Mariners organization. In a statement issued by the team, Griffey said he wanted to see more of his wife, Melissa, and their two children, son Trey, five, and daughter Taryn, four. "I want all Mariner fans to understand that my decision does not have anything to do with money or other issues. It is motivated solely by my desire to continue my baseball career playing on a team located closer to my family home, so that I can enjoy more time with my wife and young children."

Of course, acquiring a player such as Griffey will require any team to sacrifice a good deal of talent. Right now, it appears the only club anywhere near Orlando with that kind of talent is the Atlanta Braves. Players like All-Star centerfielder Andruw Jones might be enough to entice the Mariners into a deal, and it is no secret that Griffey would like to play for a title contender. Other possible destinations for the ten-time All-Star include the Houston Astros, Texas Rangers, Baltimore Orioles and New York Mets.

Syracuse Football Player Stabbed In Bar Fight:

Three football players at the University of Syracuse—David Byrd, 21, Deke Pettijohn, 22, and Giovanni DeLoatch, 20—were injured in a brawl late Saturday night outside Sadie's Place, a bar in downtown Syracuse. Byrd, a senior defensive back from Schenectady N.Y., was stabbed in the neck during the fight. He was taken to University Hospital and placed in the intensive care unit. As of Monday, he was listed in critical but stable condition. Pettijohn was treated at St. Joseph's Hospital for cuts to his body and head and released. DeLoatch was admitted to St. Joseph's with cuts to the body and head and was listed in stable condition.

Police arrested a pair of 22 year-old men Sunday and expected to apprehend more. Chetron Thomas was charged with first-degree gang assault and second-degree assault, and Trequint Stackhouse was charged with first-degree gang assault and first-degree assault. When police arrived, several victims were bleeding badly, and two knives were recovered from the scene. Syracuse police spokesman Sgt. Dave Sackett said the men did not appear to be targeted in the attack because they were football players.

CASH IN ON GOOD GRADES.

If you're a freshman or sophomore with good grades, apply now for a three-year or two-year scholarship from Army ROTC. Army ROTC scholarships pay tuition, most books and fees, plus $150 per school month. They also pay off with leadership experience and officer credentials impressive to future employers.

LEADERSHIP EXCELLENCE

ARMY ROTC
THE SMARTEST COLLEGE COURSE YOU CAN TAKE

For details, visit Spratt House or call 577-1013.

Here's your chance to ask us all your burning questions—Come to *The Bucknellian's* lecture/discussion on 'Fairness in the Media' ... Mon., Nov. 8 (7 p.m.)

AT TIAA-CREF, LOW EXPENSES ARE A HIGH PRIORITY.

All financial companies charge operating fees and expenses – some more than others. Of course, the lower the expenses you pay, the better. That way, more of your money goes where it should – toward building a comfortable future.

As the largest retirement system in the world,[1] we have among the lowest expenses in the insurance and mutual fund industries.[2]

In fact, TIAA-CREF's 0.35% average fund expenses are a fraction of the expense charges of comparable funds.[3] It's one reason why Morningstar says, "TIAA-CREF sets the standard in the financial services industry."

A focus on your future

Of course, expenses are only one factor to consider when you make an investment decision. Morningstar also noted our commitment to "consumer education, service" and "solid investment performance." Because that can make a difference in the long run, too.

At TIAA-CREF, we believe people would like to spend more in retirement, not on their retirement company. Today, over two million people count on that approach to help them build financial security. So can you.

TIAA CREF

Ensuring the future for those who shape it.™

Prince Ali's Football Picks

By Ali Ahmed

Chiefs(5-2) 20 at Colts(5-2) 31

Their shutout of the Chargers turned some heads, but the Chiefs don't have the weapons to compete with an impressive-looking Colts team.

Rams (6-1) 34 at Lions(5-2) 17

The loss at Tennessee will be only a minor setback for the Rams. Torv Holt needs to step up and solidify the Rams three-receiver sets.

Cowboys (4-3) 24 at Vikings (4-4) 31

Jeff George and the revitalized big play offense of the Vikings will be too much for the Cowboys.

Steelers(4-3) 24 at 49ers (3-4) 20

This is Stewart's best chance to have his breakout game in the air. The 49ers may have great receivers, but they have no one to get them the ball.

Titans (6-1) 27 at Dolphins (6-1) 16

Jimmy Johnson will be hoping that Marino returns soon, as this game will show that running the ball will not be enough.

Broncos (2-6) 13 at Chargers (4-3) 17

The Broncos are hurting at QB and Mcaffery is out. Hopefully Kramer won't screw up enough to loose this one.

Ravens (2-6) 16 at Browns (1-7) 6

The Browns have to face it—beating Ditka and the hopeless Saints means nothing. The Ravens defense should have an easy day handling Tim Couch

Bills (5-3) 24 at Redskins (5-2) 27

The Redskin's dream season should continue. Flutie better have a good game, or he might lose his position to Rob Johnson.

Last week's record: 3-5

Season to date: 7-7

Bison dive into 1999-00 season with experience

File photo

The Bucknell men's and women's swimming teams began competition last week against Bloomsburg. They will host Drexel this Saturday at the Freas-Rooke Pool, starting with diving at 11 a.m.

By Joshua Gish

With the loss of just one senior from last year's squad, Bison swimming coach Jerry Foley looks optimistically towards his second season with the team.

Sixteen new men and women swimmers and divers joined the squad this fall when the Bison hit the pool. Foley feels that they are a better team this year than last, stating that the team is, "solid top to bottom."

Foley said that both programs showed a lot of depth, and he feels that team members have stepped up and filled holes making for a more balanced squad. Refusing to single out any individual player, Foley feels that he has obtained an outstanding class that promises to strengthen the program.

The team feels confident in putting up two or three strong finishes in every event this year, a feat they were unable to do in the past. "We have great spirit and are developing strong character," Foley said. He cited the importance of enthusiasm throughout the long season, which stretches from September to March.

The Bison plan to attack this season agressively while still keeping scope of the long road ahead of them. They plan to stay steady, building momentum throughout the year based upon coach Foley's newly implemented ideals of "delayed gratitude."

Foley explains that this philosophy of "investing now to pay dividends later" will help the team maintain its patience, resisting the temptation to ride highs and lows.

In the opening meet of the season, both teams defeated Bloomsburg, a top 10 Division two school.

For the women, this win avenged their loss last year, helping to build confidence. The men proved once again that they were just the stronger team.

There has been no change in the training that the team has underwent, Foley feels that they are just performing better.

Although the Bison fell to Towson in their second match, morale is still running high.

Towson's spirited reaction to their win paid compliment to Foley's team, as it was obvious that Bucknell was a significant win for the Tigers. Foley was confident that his teams would make the necessary improvements to challenge Towson later in the season.

Looking to avenge losses to top teams such as Army, Lehigh and the Navy women, the Bison appear ready and confident for a very promising season. Keep your heads towards the water when the teams host Drexel this Saturday, diving at 11:00 a.m. and swimming at 1:00 p.m.

Crew improves at the Head of the Schuylkill

By Sean Houston

The Bucknell men's and women's crew teams spent this past weekend in Philadelphia competing at the Head of the Schuylkill. The results were encouraging for both the men and the women, and in many cases were an improvement over the results of the previous competition, the Head of the Charles in Cambridge, MA.

Although the men's varsity lightweight eight finished near the bottom of the pack of 24 boats, they did defeat rival University of Pittsburgh and rebound from a last place finish at the Head of the Charles.

The women's varsity openweight four finished a very respectable 11th out of 44 boats. The women's season began in a promising way with a commanding win at the Bucknell Fall Invitational but was hampered by equipment failures which prematurely ended their run at the Head of the Charles. The women's latest efforts proved that they are back on track.

The novice men and women also had promising results at the Head of the Schuylkill, finishing 14th out of 36 and 24th out of 47 boats respectively.

Coach Stephen Kish described the conditions at the race as being, "very beautiful and conducive to our high spirits. There was a slight headwind which slowed down the times somewhat."

The next test for the Bison crew will be this coming weekend at the Head of the Occoquan in Fairfax, VA. Each boat continues to gain valuable experience and expects success at Occoquan and at the upcoming Walker Lake Sprints, to be hosted by Bucknell.

Bison dive into 1999-00 season with experience

File photo

The Bucknell men's and women's swimming teams began competition last week against Bloomsburg. They will host Drexel this Saturday at the Freas-Rooke Pool, starting with diving at 11 a.m.

By Joshua Gish

With the loss of just one senior from last year's squad, Bison swimming coach Jerry Foley looks optimistically towards his second season with the team.

Sixteen new men and women swimmers and divers joined the squad this fall when the Bison hit the pool. Foley feels that they are a better team this year than last, stating that the team is, "solid top to bottom."

Foley said that both programs showed a lot of depth, and he feels that team members have stepped up and filled holes making for a more balanced squad. Refusing to single out any individual player, Foley feels that he has obtained an outstanding class that promises to strengthen the program.

The team feels confident in putting up two or three strong finishes in every event this year, a feat they were unable to do in the past. "We have great spirit and are developing strong character," Foley said. He cited the importance of enthusiasm throughout the long season, which stretches from September to March.

The Bison plan to attack this season agressively while still keeping scope of the long road ahead of them. They plan to stay steady, building momentum throughout the year based upon coach Foley's newly implemented ideals of "delayed gratitude."

Foley explains that this philosophy of "investing now to pay dividends later" will help the team maintain its patience, resisting the temptation to ride highs and lows.

In the opening meet of the season, both teams defeated Bloomsburg, a top 10 Division two school.

For the women, this win avenged their loss last year, helping to build confidence. The men proved once again that they were just the stronger team.

There has been no change in the training that the team has underwent, Foley feels that they are just performing better.

Although the Bison fell to Towson in their second match, morale is still running high.

Towson's spirited reaction to their win paid compliment to Foley's team, as it was obvious that Bucknell was a significant win for the Tigers. Foley was confident that his teams would make the necessary improvements to challenge Towson later in the season.

Looking to avenge losses to top teams such as Army, Lehigh and the Navy women, the Bison appear ready and confident for a very promising season. Keep your heads towards the water when the teams host Drexel this Saturday, diving at 11:00 a.m. and swimming at 1:00 p.m.

Crew improves at the Head of the Schuylkill

By Sean Houston

The Bucknell men's and women's crew teams spent this past weekend in Philadelphia competing at the Head of the Schuylkill. The results were encouraging for both the men and the women, and in many cases were an improvement over the results of the previous competition, the Head of the Charles in Cambridge, MA.

Although the men's varsity lightweight eight finished near the bottom of the pack of 24 boats, they did defeat rival University of Pittsburgh and rebound from a last place finish at the Head of the Charles.

The women's varsity openweight four finished a very respectable 11th out of 44 boats. The women's season began in a promising way with a commanding win at the Bucknell Fall Invitational but was hampered by equipment failures which prematurely ended their run at the Head of the Charles. The women's latest efforts proved that they are back on track.

The novice men and women also had promising results at the Head of the Schuylkill, finishing 14th out of 36 and 24th out of 47 boats respectively.

Coach Stephen Kish described the conditions at the race as being, "very beautiful and conducive to our high spirits. There was a slight headwind which slowed down the times somewhat."

The next test for the Bison crew will be this coming weekend at the Head of the Occoquan in Fairfax, VA. Each boat continues to gain valuable experience and expects success at Occoquan and at the upcoming Walker Lake Sprints, to be hosted by Bucknell.

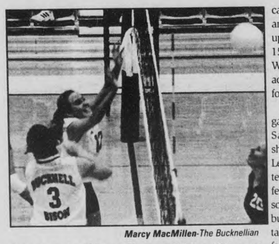
V-ball vies for tourney spot



Marcy MacMillen-The Bucknellian

Brooke Bader '01 and Shannon Walker '02 at net.

By Justin White

The women's volleyball team will now have the opportunity to prove its ability to perform under pressure, as its back is against the wall heading into the most challenging stretch of its Patriot League schedule.

The Bison split the two games they hosted this past weekend, defeating Lafayette and then losing to Lehigh. The team's record is now 10-9 overall, but more importantly 4-5 in the Patriot League, which puts them just a game behind Lehigh for the fourth place spot. Only the top four teams advance to the conference tournament on November 20.

Bucknell started its weekend with a game last Friday evening against Lafayette. The Leopards held on to win the first game 16-14, after Bucknell was up as much as 11-4 early on. The Bison were not rattled by this minor setback, continuing to put on the pressure to take the second game, 15-11.

The Bison then moved into the driver's seat for good, winning the third game, 15-8, and finishing off Lafayette 15-11 in the fourth game.

The Bison played without one of their big hitters, junior Brooke Bader, in this game. However, they were still able to put up big numbers—led by Shannon Walker '02, with 24 kills and an impressive .488 hitting percentage. Senior co-captains Michelle Lesh and Jen Post also came up big with 19 kills and 15 digs respectively. Whitney Williams also accumulated 66 assists for the Bison.

The Friday night game set the stage for a Saturday afternoon showdown against rival Lehigh. Both teams entered with identical conference records. The Bison came out aggressive but were unable to capitalize in the first game, falling short 15-11.

The team continued to battle in the second game but again could not maintain its momentum and lost 15-13. Trailing 2-0, the Bison mounted a short-lived comeback—capturing the third game 15-10. Lehigh finished off the match in strong fashion with a 15-9 victory in the third set.

The Bison played competitively all match long but just could not take that extra step towards victory. "We did a good job siding out but couldn't follow it up by getting points," said freshman Jen Wrigley, who had 11 kills and a team-high 24 digs.

Walker had another good performance with 13 kills. Bader also added 11 kills and 17 digs.

One of the defining statistics of the game was the .030 hitting percentage by the Bison in their three losing sets. The significance of the game to each team and the high level of effort that resulted accounted for such a low percentage.

Bucknell has three regular season games remaining, and the team will likely need to win all three to have a chance to advance to the Patriot League tournament later this month.

This weekend the Bison play host to Colgate on Friday and Army on Saturday. Coach Cindy Opalski said these games are, "like deposit-return; what you put in, you get out—and reap the rewards or suffer the consequences. The team needs to come ready to play hard and lay it all out on the line."

Water polo ends season on a low note

Josh Watts '00 ends career by setting scoring record, but team falls 10-8 to GW

Courtesy of Athletics Communications

Tate Greditzer '01 (#6) led the Bison in scoring in the '99 season. His 61 goals brought his career total at Bucknell to 99.

By Allison Kuhn

Although the Bucknell men's water polo team ended its season with two disappointing losses, senior Josh Watts ended his career on a high note by breaking the school record for goals in a single game.

Watts scored 13 goals in Bucknell's only victory at the Southern tournament, an 18-6 triumph over Washington and Jefferson. Watts surpassed the record-held by Sean Tierney '95 by one goal, which Tierney set in 1994 against Johns Hopkins.

Bucknell's most disappointing defeat was against George Washington, 10-8. The Bison needed to beat GW in order to advance on to Easterns. "They are a team very similar to us, and since we had already beaten them three times this season, it was very hard to win again," coach Mike Wooster said of GW.

The Bison had a two-goal lead and then fell apart due to deficiencies in several areas. "We shot very poorly, we only scored in two of the seven man-ups that we had and we were zero for six on counter attacks; all of that combined will do you in," Wooster said.

The Bison were also defeated by Salem-Teikyo, 17-13 in the fifth-place match. "It is the hardest game in the world to get up for," Wooster said. "We had just finished watching the championship game, which is where we were supposed to be." The Bison were led by Tate Greditzer '01, who netted five goals, and goalie Dave Kennedy '02, who made 17 saves.

Bucknell's only victory came against Washington and Jefferson, 18-6, in an easy, expected win. Watts, Justin McCarty '01, Billy Ruth '02 and captain Kevin Permisohn '01 had two goals apiece, while Kennedy had 10 saves.

Seniors Alex Bozic, Mike Knudtsen and Watts were Wooster's first recruiting class. "They are what made the team what it was last year. It was an unfortunate ending with some unexpected losses, but they are a great group of guys," Wooster said. "I've never coached better."

Sports

"January Madness"

College football is the only sport not to have a sanctioned national champion. The word "only" sounds pretty imposing, but not imposing enough to propel college football executives to make the changes necessary to bring legitimacy to its crown.

As is standard in most college sports, polls determine the top-ranked college football teams in the nation. The poll system is needed because the large number of teams in college sports (114 in I-A football) ensures that many of the top teams will not play head-to-head in the regular season, and the difficulty of each school's schedule will vary.

Commentary

Carmen Mauriello
Sports Editor

But while most other college sports invite their top-ranked teams to a tournament to determine an undisputed champion, college football's postseason consists of dozens of bowl games with a champion determined by the polls.

After the 1990-91 and 91-92 college football seasons ended with controversial split national champions, the Bowl Coalition was created to develop a legitimate national championship game.

The Coalition rotated the championship game between the Fiesta, Orange, Sugar and Cotton Bowls. It drew upon the champions of the ACC, SEC, Big Eight, Big East and Southwest conferences, but the champions of the Big 10 and Pac-10 remained locked into the Rose Bowl.

It produced one versus two matchups in 1993 and 1994 but was paralyzed in 1995, when both Penn State and Nebraska finished the regular season unbeaten. Number two Penn State, the Big 10 champion, was required to play in the Rose Bowl against lowly Oregon, which it dominated 38-20. Number one Nebraska defeated number three Miami, 24-17, in the Orange Bowl—the so-called national championship game.

Nebraska was voted national champions by the AP and Coaches polls—leaving Penn State empty-handed for its perfect season and fans outraged that the two best teams in the nation couldn't battle on the field for the title.

Shortly afterwards, the Coalition was replaced by the Bowl Alliance. It consisted of a national championship game that rotated between the Fiesta, Orange and Sugar Bowls, drawing from teams in the ACC, SEC, Big East, and the newly-formed Big 12 (a consolidation of the previous Big Eight and Southwest Conferences).

But the Alliance failed to correct the Coalition's fatal flaw: the exemption of the Big 10 and Pac-10 champions. The Rose Bowl had these conferences under contract into the 21st century and was unwilling to share their champions and the millions of dollars of revenue which they brought.

So it was inevitable that the same problem that buried the Coalition would come back to haunt the Alliance, and it did just that in the 1997-98 season. Undefeated Big 10 champ Michigan entered the postseason ranked number one in both polls, with unbeaten Nebraska at number two. After Michigan defeated number eight Washington State, 21-16, in the Rose Bowl and Nebraska dominated number three Tennessee, 42-17, in the Orange Bowl, the final polls resulted in a split national championship.

In 1998, the Bowl Championship Series revolutionized college football. By luring the Rose Bowl into conceding its monopoly on the Big 10 and Pac-10 champs, it guaranteed a one versus two championship game, which would rotate between the Sugar, Fiesta, Orange and Rose Bowls.

A definitive ranking system called the BCS was initiated, which consisted of the averages between the AP and Coaches polls, eight computer ranking systems, a strength of schedule component and losses.

It appeared to be college football's savior when it produced an undisputed one versus two matchup and national champion in the 1998-99 season.

But leave it to those darn Hokies to cause a stir. So far this season, Virginia Tech is 7-0 and ranked third by the BCS poll. If the season ended today, number one Florida State(9-0) and number two Penn State(9-0) would meet in the Sugar Bowl for the national championship—leaving Virginia Tech the odd man out.

Its obvious that the Hokies have an easier schedule than Florida State and Penn State, but does that mean they should have no shot at the national title - even if they win all their games.

Absolutely not. The BCS rankings can say which teams are the best in the nation, but they can't foresee what would happen if teams battled it out on the field. That's how the title must be determined—not by voters and computer rankings.

College football needs a single-elimination tournament where the top eight BCS teams compete for the national championship. For proof, look no further than its sister sport of college basketball, whose 64-team "March Madness" tournament has captured the imagination of the entire sports public. Whatever its regular season record, an invited team can become the undisputed national champion with six tournament wins.

It's fair for dominant teams that play in weaker conferences, like Virginia Tech and even Marshall, and for top ranked teams who stumble once in the season; under the current system, these teams have a minimal chance of competing for the championship. In the NFL, teams with six, seven and even eight losses frequently get an opportunity to compete in the playoffs for a Super Bowl ring.

The tournament idea has steadily gained support in the '90s with the failed attempts to create a legitimate championship game, but the game's executives stand in opposition. They stubbornly seek to preserve the century-old tradition of bowl games in college football—and the millions of dollars of revenue they create annually.

Its time for the college football execs to stop worrying about their wallets and start thinking of what's best for the game. Fans aren't going to take another century of controversial champions. They want to see one team hoisting the cup at the end of the season, by earning it on the field and not by catering to the voters.

College football will eventually resort to a tournament system to get an undisputed national champion. It's just a shame that every other postseason system must fail before it happens.

Freshmen key teams' success in '99

Several University athletes make contributions in first year of competition

Wettergreen: Seven shutouts in goal

By Chris Ellis

A look at Bison freshman athletes that have amde a substantial contribution to their teams in their first season:

FOOTBALL: JIM HORAN, JUAN MORALES

Bucknell's football game plan has traditionally been an effective yet conservative system of short passes, short-runs and tight defense. The successful team effort was the norm, but the big play was rare.

With the addition of two standout freshmen contributors, though, the future may be in for change.

Bucknell's biggest deep-ball threat and the team's most exciting passrusher are booth first-year players, and it didn't take long for either to make an immediate impact on the team.

For split end Jim Horan, his first experience with big-play heroics came in Bucknell's opening-day 37-10 win over Morgan State. Horan caught a 41-yard touchdown pass early in the third quarter, making the score 30-10 and breaking open what had been a tightly-contested game. The catch is Bucknell's longest play of the season and it helped Horan earn Patriot League rookie-of-the-week honors for the season's first week.

"He came from a high school that didn't throw the ball much, but we knew he had potential," head coach Tom Gadd said. "He's gone far beyond our expectations...as to his ability to make natural decisions and catch the ball even better than we had thought."

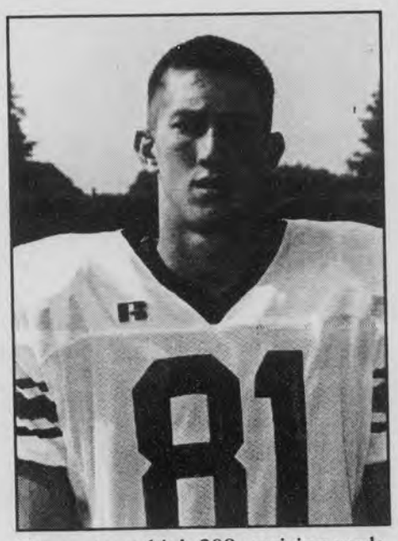
Horan leads the Bison with 309 yards receiving and is second on the team with 21 receptions. Just as importantly, his 14.7-yards-per-catch is a team high.

As dangerous as Horan is on offense, linebacker Juan Morales '03 is explosive on defense. Morales has only played in five games, as sees most of his action as either a third-down back or a pass-rushing specialist.

But while his total playing time is limited, his contributions are not. Morales has only 11 total tackles, but leads the Bison with six sacks for a total loss of -39 yards. Morales was named Patriot League Rookie of the Week following Bucknell's 38-28 win over Delaware State, and his presence in specialized situations gives the Bison another big-play defender.

"We knew he made plays in high school. But he's worked real hard between his senior year and getting here to gain weight and strength" Gadd said.

"He has real knack for pass rushing and has been a major contributor on third down."



Horan: team-high 309 receiving yards

WOMEN'S SOCCER: TARA UTCHEL

It didn't take long for women's soccer midfielder Tara Utchel to make a freshman from Pittsburgh, Pa's Sewickley Academy, scored on a corner kick with less than four minutes remaining in overtime to give Bucknell a 1-0 victory over the Dukes. Bucknell was outshot 11-8 in the game, but Utchel, whose performance in high school earned her Regional-All-American honors in her junior season and All-American honors in her senior campaign,

Utchel: second on team in assists and goals

came through with the first of her four goals on the season to help the Bison open 1-0.

Utchel is one of only five Bison players to start all 17 games for the team this year, and her four goals and three assists both rank second on the team. She has been even better in patriot League games, recording two goals and adding an assist while starting all six league contests.

VOLLEYBALL: JEN WRIGLEY

Bucknell volleyball outside hitter Jen Wrigley has done something that no recent Bucknell player-including Melissa Wharton, arguably the Bison's best player ever-has done: make an immediate contribution as a starter on the squad.

Though heavy losses to graduation have meant that the Bison have struggled to repeat last year's League-Championship performance, Wrigley's play throughout the season means that the future is bright.

Wrigley is fourth on the team with 197 kills through 19 games and has 21 service aces. "When you have someone like Jen, with a lot of potential and talent, it's good to put them in a competitive situation right away," said head volleyball coach Cindy Opalski. "She is the first player we've had in four or five years that's had this kind of immediate impact."

Wrigley's defense has been arguably the best part of her game thus far. Wrigley led the team with 260 digs and has been durable-she is one of only two Bucknell players to see action in all 80 of the team's games.

Wrigley: 197 kills and 260 digs in '99

But according to Opalski, Wrigley's upside-because of her attitude-are even more encouraging that her first-year play. "She's an incredibly talented kid-she's very quick, very athletic, and

very explosive from a physical point of view," Opalski said. "But she's also extremely coachable. She's very intense, very goal driven, and has the attributes you need to be successful. She's the kind of kid you want to have 13 or 14 of."

FIELD HOCKEY: SONJA WETTERGREEN

It is remarkable to see a freshman make an immediate contribution in athletics at the Division I level. But when that freshman excels at her sport's most mentally demanding position, the success is even more amazing.

It took a lucky flip of a coin for Bucknell's field hockey team to advance to the Patriot League tournament for the second year in a row, but the play of goaltender Sonja Wettergreen '03 kept the Bison in contention throughout.

Wettergreen stared fourteen games for the Bison-including all six of the team's Patriot League games-in helping the Bison to a 13-6 record and a 3-3 Patriot League mark. Wettergreen finished the season with a goals-against average of 1.69 and a save percentage of 83.2%. Perhaps her greatest accomplishment, though, came on September 18th, and Wettergreen faced 14 shots but allowed no goals, helping the Bison to upset perennial patriot League power Holy Cross, 1-0.

Morales: leads Bison with six sacks

Sigma Chi reorganizes

Fraternity meets suspension sanctions; still on probation

By Jim Leahy

Despite its past troubles in the past, the Sigma Chi Fraternity has recently taken some steps to rebuild its image. Following the recent suspension of the chapter and its placement on social probation, a massive reorganization effort headed by Assistant Dean of Students and Greek Life Roy Baker and the University Council on Greek Life (COGL) has paved a positive path to the future.

This path has not been a smooth one, however. Last summer, when COGL went through its annual evaluation of the chapter, they didn't like what they saw. This was not the first time the chapter received a poor review. In fact, the organization had failed their evaluation twice in three years. Therefore, the Council recommended to the University that the chapter be completely closed for three years.

Scott Solomon—The Bucknellian

Sigma Chi was placed on social probation for the remainder of the 1999-00 academic year.

Baker saw it differently. Working with Sigma Chi's National Organization, he decided that the fraternity could be salvaged.

The next step required that a massive reconstruction plan be established to facilitate the changes that needed to be made. Key components of the plan included revision of the chapter's constitution and by-laws, a change in its member recruiting and pledge education programs, reorganization of its alumni program and a full repayment of all back fees. When this was completed, the suspension would be lifted and probation would follow.

The plan also included penalties. The chapter was placed on suspension and could not give bids to students during Rush. In addition, some members of the fraternity were barred from the house.

In the meantime, the University allowed the fraternity to host a reception on Parents Weekend in early October and a tailgate party during Homecoming Weekend. According to Baker, those events went well with no reported problems.

On Monday, Oct. 25, Interim Dean of Students Allen Schweinsburg sent a letter to the campus community to announce the lifting of Sigma Chi's suspension. The social probation mentioned in the reorganization plan was imposed. It will last for the remainder of the 1999-2000 academic year.

According to the letter, "The conditions of social probation include obtaining approval for all social events. Meeting all requirements of the 'Statement of Relationship Between Bucknell University and Social Greek Organizations,' and regular meetings of chapter officers with the Council on Greek Life. Alcohol in the chapter house continues to be prohibited except at social functions approved by the council." It also said that "any violation of the terms of social probation may re-

See SIG, page 3

Kristallnacht remembered

By Laura Day

Sixty-one years ago on November 9, 1938, the world was permanently altered, history was made, and the security of daily life vanished. It was this night of infamy–the night of broken glass–that was reflected upon this past week.

Last Tuesday, members of Hillel, R.O.T.C., students, faculty, and welcomed guests took the time to remember the atrocities that Kristallnacht initiated and to once again promise that "they will never forget."

On Kristallnacht, Nazis destroyed 191 synagogues, closed 7,500 Jewish businesses, murdered 91 Jewish men and women and arrested 30,000 Jews who were shipped like cattle to concentration camps. This was just the beginning of the end.

The program held at the University on Tuesday night included a video, comments by last year's Kristallnacht keynote speaker, Fred Voss, a candle lighting ceremony and the keynote speaker Sgt. Arthur Amick.

Amick spoke and reflected on his experiences as a United States soldier who helped liberate the Buchenwald concentration camp on April 11, 1945. As a first-hand witness of the atrocities of the Holocaust, Amick saw the piles of bones, trenches of dead bodies, ovens of cremated people and gas chambers disguised as showers. Amick explained that there were some escape attempts made from Buchenwald.

"Some of the desperate broke out ... flame throwers and machine guns were there to receive them," he said.

Amick further reflected on one personal experience that tremendously impacted him. As he entered Buchenwald, he saw a man carrying a casket on his shoulder about two feet long. At that point, he realized the magnitude of the Holocaust. One tiny lifeless body triggered much gratefulness for his survival.

"For the grace of God, here I am," Amick said. Approximately 11 million individuals were killed by the Nazi regime and its collaborators; 65,000 people died at Buchenwald alone.

At this year's ceremony, Voss left the audience with one last thought on the Holocaust: "A dying person takes his soul with him, but leaves his name behind."

Amick taught the members of the audience that it is these names that today's generation must not forget, and it is these souls that must be remembered. Members of Hillel concluded the program with a candle-lighting ceremony, further emphasizing their vow to never to forget.

Counting Crows set to invade campus

Courtesy of Geffen Records, Inc.

Popular band Counting Crows will perform before a sold-out crowd in the University Fieldhouse Friday night.

By Carolyn Adams Hyman

Tomorrow night students will have a reason to party when the Counting Crows play in the Fieldhouse to a sold-out audience. Joe 90 will open the program, followed by Gigolo Aunts and then the Crows to complete the three-band show. The concert is sponsored by the Bucknell Activities Council, whose Concert Committee worked feverishly to bring the Counting Crows to campus.

Fans can expect to hear some new songs from the Counting Crows. Last week they released their new album, *This Desert Life*. Like *August and Everything After* and *Recovering the Satellites*, the band's other two studio albums, *This Desert Life* features more of lead singer Adam Duritz's soul searching ballads.

However, this album is lighter and features fewer melancholy broods than both previous albums, giving listeners the impression that Duritz may have recovered from some of the angst he seemed to be suffering with when writing the first two albums.

Once again, though, all of the songs on *This Desert Life* examine the one topic Crows fans are most familiar with, Duritz's emotional state. The first track "Hanginaround" features infectious, effervescent lyrics and rhythm about Duritz's desire to get out of the town he's been "bummin around" way too long in. Other fast songs such as "Mrs. Potter's Lullaby," "Four Days," "I Wish I Was a Girl" and "St. Robinson in His Cadillac Dream" outnumber the more somber, sobering sounds of "Colorblind" and "Speedway."

Moeller discusses bias and injustice in the media

By Heather Napolitano

Every day, people throughout the world turn to the media for coverage of the current events that are shaping their planet. Whether they tune into a television program, switch on the radio or turn the pages of a newspaper, author and Brandeis University Director of Journalism Susan Moeller contends that the bottom line remains the same: the people see what the media decides to present.

Jonah Half—The Bucknellian

Susan Moeller, author and professor at Brandeis University, spoke to a crowd of nearly 100 Monday night.

In her lecture on Monday night in the Langone Center Forum, Moeller discussed the topic of "Fairness in the Media: America's Preoccupation with Crisis," and how story coverage may be suffering from increasing bias.

"We have lost the element of proportion," Moeller said.

In support of her point, Moeller discussed the coverage of stories appearing on morning news broadcasts in the past month. The story that received the most attention was JonBenet Ramsey with 55 segments on ABC, CBS and NBC. The second was the World Series with 46 segments. The third was the murder of Matthew Shepard with 29 segments and the fourth was the South Pole Doctor who was airlifted breast cancer treatment with 22 segments. "A frightening line-up," Moeller said.

Similarly, on nightly news shows in the past month, JonBenet Ramsey dominated the headlines. This was followed by Payne Stewart's death, the Marilyn Monroe auction and a tie between the Thomas Copano death sentence and Farrah Fawcett's return to The Late Show.

> *"Being right has become less important than being first"*
>
> *—Susan Moeller, director of Journalism program at Brandeis University*

Moeller said that the media also presents uneven coverage of political candidates and races. She cited that in the first nine months of 1999, there were 68 minutes devoted to the republican race. George W. Bush, however, was featured in 40 of those minutes, leaving a mere 28 for the remainder of the candidates.

Borough invites student input

Group formed to re-evaluate businesses of downtown Lewisburg

By Peter Van Emburgh

With the cancellation of the Homecoming Parade on campus this year, some people grew concerned about the state of relations between the University and the borough of Lewisburg. Relations are about to improve, starting with the Lewisburg Downtown Visioning Project.

The Lewisburg Downtown Visioning Project is the first step initiated by the Lewisburg Downtown Partnership towards improving the Market Street section of Lewisburg. The Partnership is composed of the Borrough of Lewisburg, the businesses and the University.

As consultant to the partnership, Linda Sterling has the large task of helping to organize a massive development project. She will pull together the research and analysis and then make recommendations to the partnership based on her findings.

On Tuesday night, in the Brynwood Room on Sixth Street, University students gathered with Sterling to voice their thoughts and suggestions.

"I am extremely pleased with the cooperation of the University," Sterling said. "The students provided excellent and valuable input."

Public Safety Log

NOVEMBER 1, 1999

INFORMATION/VEHICLE ACCIDENT-Public Safety responded to Davis Gym for the report of a vehicle that backed into a parked car. The damage was minor and no injuries resulted from the accident.

INFORMATION-While on routine patrol, Public Safety observed a vehicle illegally parked between Olin Science and Dana Engineering. The officer attempted to interview the driver, who provided false information to the officer. A parking ticket and a university citation for failure to identify or falsely identifying oneself to a university official were issued.

INFORMATION-Public Safety responded to Kress Hall for the report of a student who was concerned for her safety as a result of an off campus situation. Lewisburg Police and East Buffalo Township Police were notified.

NOVEMBER 2, 1999

INFORMATION/MISSING PROPERTY-Public Safety responded to Delta Upsilon Fraternity for the report of missing kitchen utensils. A report was filed for insurance purposes. The investigation is continuing.

INFORMATION/VEHICLE ACCIDENT-Public Safety responded to South 6th and St. George Streets for the report of a vehicle driving into the path of an oncoming car. The accident resulted in moderate damage to the vehicles, but no injuries. Lewisburg Police responded.

NOVEMBER 3, 1999

INFORMATION-Dunkin Donut's restaurant contacted Public Safety to advise that they were attempting to locate some equipment loaned to Sigma Phi Epsilon Fraternity. The fraternity president advised Public Safety that the equipment had been returned at an earlier date. Lewisburg Police was notified.

INFORMATION-Public Safety responded to the residence for the report of a student who had become uncomfortable as a result of attention from a suspicious male, off campus and then on campus. The individual was located, identified and advised regarding university visiting policies.

MEDICAL ASSIST/TRANSPORT-Public Safety responded to the Langone Center for the report of an ill student. A Student Health Services driver transported the individual to Evangelical Community Hospital for treatment. The student later returned to campus.

NOVEMBER 4, 1999

INFORMATION-Original Italian Pizza contacted Public Safety regarding an on campus order that had been cancelled for late delivery. The restaurant owner was advised to contact Pennsylvania State Police to determine if a crime had been committed.

NOVEMBER 5, 1999

CRIMINAL MISCHIEF-A student reported to Public Safety that unknown person(s) did vandalize a snack machine located at Larison hall television room. Lewisburg Police and the machine vendor were notified. The incident is under investigation.

INFORMATION/MEDICAL AIDED-Public Safety responded to the Langone Center for the report of an employee with a hand laceration. The individual was transported by ambulance to Evangelical Community Hospital for treatment and was later released.

INFORMATION/ATTEMPT TO PURCHASE-Public Safety responded to Swartz Hall to assist East Buffalo Township Police to locate a student for interview in an incident of attempting to purchase alcoholic beverages off campus, although under the age of 21 years. The individual was issued criminal citations for attempt to purchase and presenting a false ID card.

NOVEMBER 6, 1999

UNDERAGE CONSUMPTION/DISORDERLY CONDUCT-A student reported to Public Safety that unknown person(s) did bang on her residence hall door in Swartz Hall. After an investigation, the Public Safety identified the two males who also admitted to consuming alcohol, although under 21 years of age. University citations were issued.

UNDERAGE CONSUMPTION/DISORDERLY CONDUCT-A student reported to Public Safety that she had observed empty cans of beer in a room at Swartz Hall. The resident of the room admitted to possession and consumption of alcohol, although under 21 years of age. University citations were issued.

CRIMINAL MISCHIEF-Public Safety observed damage to the side view mirror on a University owned vehicle, caused by unknown person(s) while the vehicle was parked on Coleman Road in front of Swartz Hall. The incident is under investigation.

INFORMATION/DOMESTIC ARGUMENT-Public Safety responded to Trax Hall for the report of a student who was upset over a domestic situation. After speaking with the individual, Public Safety referred the incident to Residential Life professional staff.

UNDERAGE CONSUMPTION/PUBLIC DRUNKENNESS/DISORDERLY CONDUCT-Public Safety was notified of an intoxicated and unruly person who was attempting to illegally enter a party at the Phi Kappa Psi Fraternity. The person, who did not have identification, was taken back to Public Safety by an officer. This person, later identified as a student, was intoxicated, although under 21 years of age and fought with Public Safety officers in an attempt to flee. The student was taken into custody by Public Safety and East Buffalo Township Police was which contacted to assist. University and criminal citations were issued.

UNDERAGE CONSUMPTION/DISORDERLY CONDUCT/PUBLIC DRUNKENNESS-Public Safety responded to Phi Kappa Psi Fraternity for the report of an intoxicated male who was attempting to start a physical altercation. The student was identified by Public Safety as under the age of 21 years and admitted to consuming alcohol. East Buffalo Township Police was contacted. University and criminal citations were issued.

NOVEMBER 7, 1999

DISORDERLY CONDUCT-Public Safety responded to a report of an intoxicated student who was violent and disorderly at Kappa Sigma Fraternity. This was the same student apprehended for the altercations at the Phi Kappa Psi Fraternity. University citations were issued. Criminal citations are pending.

INFORMATION/MISSING PROPERTY-A student reported that a bicycle was taken from the bike rack at the Langone Center. The incident is under investigation.

NOVEMBER 8, 1999

INFORMATION-Public Safety responded to Roberts Hall for the report of vandalism to a bathroom and missing university property. No witnesses and suspects were located in a search of the area. The incident is under investigation.

INFORMATION-A student reported to Public Safety about receiving a disturbing prank phone call in a Swartz Hall room. The individual was advised regarding the recourse for such action and will notify Public Safety if the calls continue.

MEDICAL TRANSPORT-Public Safety received the report of an ill student in Vedder Hall. A Student Health Services driver transported the individual to Evangelical Community Hospital for treatment. The student returned to campus later.

This week in BUCKNELLIAN headline history

Bisons Trample Lehigh, 27-0, Before Homecoming Crowd
Nov. 11, 1926

A Homecoming Day was never gayer. Banners flying, crowds cheering, the band playing, the sun shining and "Frosh" antics all added to the color of the day. Before a crowd of 8,000, many of whom were alumni, the Bucknell team, led by the formidable Walter Diehl, smothered the Lehigh aggregation by a score of 27-0. A decisive victory was desired and the wish was fulfilled.

Faculty approves Jan Plan: program begins next year
Nov. 8, 1968

The January plan, a voluntary independent study program, was approved this week by the faculty. Students seem enthusiastic about the program, but faculty question their true willingness to perform voluntary study. The program allows students to take an independent study course that will not count towards their GPA, they are simply available for the learning experience.

Government Grants Money for Flood Relief
Nov. 3, 1972

The University received a check for $91,450 from the federal government early last week as partial reimbursement for funds expended to repair damage done here by the June flood, John Zeller, vice president for administration and finance, stated.

The check, delivered by the U.S. Representative for this district, Herman Schneebeli, and issued by the Federal Office of Emergency Preparedness, was drawn from funds appropriated by Congress in emergency legislation, which enables private as well as public institutions to receive federal flood recovery assistance.

Editors Endorse George McGovern
Nov. 3, 1972

It is unfortunate that major themes of the 1972 presidential campaign have been reduced to terms of dollars and cents, for the real issues in this potential watershed election tunnel beneath the mountains of financial statements and economic game plans to touch the deeper rhythm of American constitutional principles.

Simply stated, the American people are being asked to determine what kind of a president they want for the next four years.

Clearly, the nation needs the leadership of a man whose consciousness couples technological change with social responsibility and who accords dignity to all men regardless of wealth or stature. That man is George McGovern.

Freshman hall planning to recolonize Lambda Chi Alpha
Nov. 11, 1983

A group of freshmen males recently approached Dean Commerford with a request to recolonize Lambda Chi Alpha. The fraternity had been closed the previous year due to lack of pledges. The group of men, mainly from 4th Kress, talked to Nationals and will be reestablishing the fraternity with help from the Susquehanna University chapter of Lambda Chi Alpha. Although the freshmen rushed, none of them pledged and they would like to reopen the fraternity as a mix of all the fraternity types on campus.

Proposal May Shut Off Fraternity Taps
Nov. 11, 1988

Fraternities will shut off their beer taps during the week beginning Jan. 1, if a proposal issued Wednesday by the Vice President on Student Life is passed. The proposal, "Statement on the Regulation of Alcohol on Fraternity Property," would allow taps to be on only during registered party times.

The statement restricts beer kegs, as well as all "common sources" of alcohol to parties registered with the Office of Residential Life for specific hours on Friday and Saturday nights.

Sojka holds open forum to address student concerns
Nov. 9, 1990

President Gary Sojka held and open forum in the Vaughan Lit. Auditorium this week to discuss the near riot that occurred at a

7th Street house on Halloween. Students say that the reason this large party was held off campus is because the University won't support registered parties during the week. Sojka said that at this time he cannot allow functions serving alcohol to occur on campus on weeknights.

Activists speak out against the dangers of landmines

By Jen LaBracio

Every 22 minutes someone is killed or maimed by a landmine.

Citing such horrific statistics, the national spokesperson for the landmine campaign and the associate director of the Vietnam Veterans of America Foundation stressed the unfortunate reality of the effects of landmines during war in the twentieth century and beyond.

Loung Ung, survivor of the Cambodian genocide and coordinator of the International Campaign to Ban Landmines, and Ed Miles, former Vietnam soldier and anti-landmine activist, explained the lasting consequences of landmine warfare in "From Vietnam to Kosovo: The Changing Faces of War" in the Langone Center Forum last Sunday.

"Today, 50 percent of people who step on mines do not survive. Ninety percent of these people are civilians," said Ung.

According to both Ung and Miles, the devastation caused by landmines is a result of the changing face of war in the twentieth century. War is no longer strictly a military operation, they said. It has expanded to incorporate civilian struggles like those of Africa, Kosovo, and East Timor.

"We're getting to wars now where 95 percent of the casualties are civilians and 50 percent are military," said Miles.

The effects of these landmines on unsuspecting civilians, especially children, can be devastating. According to Ung and Miles, a landmine is designed to cause everything under its victim to explode upwards into the body. Many times this explosion leads to death, but if the victim does survive, the loss or maiming of limbs is almost inevitable.

This tragic outcome is exactly the intention of the mines, said Ung. "A landmine is not designed to kill. It is designed to maim," she stressed.

Although landmines pose a problem in over 70 countries around the world, there are several countries in which landmines are a serious threat to civilian security. Cambodia is one of these countries.

"There are four to six million landmines in Cambodia—they cover over 50 percent of the land," said Ung.

Cambodia's landmines are the leftover products of the Khmer Rouge, an extremist organization that took over the country in 1975 and began the mass genocide of the Cambodian people.

Ung, a native Cambodian, had personal experience with this horrific event. She was five years old when the Khmer Rouge overtook her country and began the genocide.

"All I remember seeing were soldiers with guns on their backs and grenades on their belts, telling my family and I that we had to pack up and leave," she said.

Ung and her family were part of the more than two million Cambodian people ordered to leave their homes in the city and forced to relocate into rural work camps. This mass move was a part of the Khmer Rouge's overall intentions to turn Cambodia back to its roots as a solely agrarian country.

During this relocation more than 1.5 million Cambodians died or were executed, including Ung's mother, father, and five year old sister. Ung was forced to split from her family and become a child soldier for the Khmer Rouge until she managed to escape four years later.

"We only survived because our mother sent us off in different directions and told us to pretend to be orphans," she said.

Today, like in so many countries, the fields of Cambodia are still littered with these landmines, reminders of the violent past and ominous future. Not only do these mines threaten the lives of civilians, they have also disrupted every aspect of society including land, religion, and environment.

"How do you farm your land if it is deadly?" said Ung, a problem so commonly addressed in regions like Cambodia and Vietnam.

Currently, said Ung and Miles, a Mine Ban Treaty to remove landmines around the world has been drafted and ratified by 88 countries. The treaty does not, however, have the support of the United States, which is a major problem according to Ung and Miles.

"Without the US, the treaty is nothing," they said.

Due to this, Ung and Miles urged support for this treaty through methods such as lobbying, letter writing, and student activist groups, especially since an election year is quickly approaching.

The Women's Resource Center, the Residential Colleges, the Chaplain's Office, and International Student Services sponsored "The Changing Faces of War."

"We have lost the element of proportion"

MOELLER

From page 1

In newspapers, a similar bias was taking place. In four papers, Bush appeared in 50 percent of the total stories focusing on the race, while the nine other candidates split the print in the remaining 50 percent.

"In elections, the role of journalists is to stimulate debate and inform the public," Moeller said. "Not just to report the horse race."

Meanwhile, Moeller said that the coverage within stories is biased as well, particularly when it comes to issues of race. She contended that references to various races conjure up certain stereotypes in the minds of readers, viewers and listeners.

"We need to ask the question of relevance when race appears in a story," she said.

For example, Moeller discussed an article about a man who was accused of posing as a doctor. The closing line indicated that the clinic in which his impersonation took place was frequented by Hispanics. Moeller questioned the unexplained inclusion of this fact. Why do readers need to know this detail? Is it to imply that those who were fooled were not white?

"Racial identifiers are used to distinguish people of color from white people," she said.

Moeller also discussed the coverage of Payne Stewart's death vs. that of Walter Payton. The former received a significantly greater amount of coverage than the latter. She raised the question of why Stewart's death was portrayed more prominently. Was it a white vs. black issue, or did it relate to their visibility and the circumstances of their deaths? According to Moeller, the editors' response to such questions is that they are simply giving the audience what it wants.

The people who are the direct consumers of media, however, are now beginning to question these news sources. Some feel that journalists are getting sloppier and providing less information. They are also beginning to recognize that a bias may exist. In fact, Moeller said that 78 percent of people do believe that the media is biased. Questions have also been raised about the influence of advertisers over the editorials.

Moeller, herself, has devoted a great deal of her life to questioning and analyzing the media. In her most recent book, *Compassion Fatigue*, she critically examines the media treatment of the "Four Horsemen of the Apocalypse"—disease, famine, war and death. She has also authored two other books entitled *But Can She Type?* and *Shooting War: Photography and the American Experience of Combat*. In addition to her work as the Director of the Journalism Program at Brandeis, Moeller is also an Assistant Professor of American Studies and a media columnist for the *Christian Science Monitor*.

Moeller's diagnosis of the problems with the media is that, "Being right has become less important than being first."

Students, businesses offer suggestions

DOWNTOWN From page 1.

"To take both the businesses' and students' interests is quite a challenge," Assistant Dean of Students Ruth Burnham said. Burnham believes that the town is making an honest effort in valuing the needs and suggestions made by the students.

The diversity of interests among the merchants and students is ironically similar, according to Sterling. The students both assessed the strengths and weaknesses of the downtown section.

"The students really appreciate the beauty, accessibility, history, hometown appeal and architecture of downtown Lewisburg," Sterling said. "I got a lot of positive input."

Many students felt that the hours are inconvenient for their needs and that "the town shuts down after dark," Leah Lenox '01 said. One of the most popular suggestions is to establish a coffeehouse off-campus.

"The school may argue that we have the 7th Street Cafe, but students simply want to get off-campus once in a while," Lenox said.

Sterling noted that other students suggested a "hangout" place where people can listen to jazz music or other forms of entertainment.

"Lewisburg is a very unique and special place," Burnham said. "There's just a gap of interests between the older, established businesses and the more entrepreneurial ones."

The interests of the borough and the University did match with the recommendation of better communication between the two parties. One of the missions of the Lewisburg Downtown Partnership is to foster better relations with all parties.

"Another suggestion that both the businesses and students proposed was to make better use of the river," Sterling said. Waterfront activities, for example, was one of the ideas suggested.

Sterling said that the next step is to establish a central organization that links the three parties together. She plans on furthering the marketing study by distributing surveys to University students. She also plans on working with the merchants through ongoing business development programs, such as better business seminars.

"I feel that the meeting with the students was very effective," Sterling noted. "I just hope that we can open lines of communication."

"I think that the meeting was very constructive," Lenox said. "I hope it will help change some of the things that have frustrated not only myself, but much of the student body for a long time."

Microsoft is ruled a monopoly

By Brienne Terril

Federal judge Thomas Penfield Jackson declared that Microsoft does indeed hold a monopoly in computer operating systems, a crushing blow to the software giant's antitrust defense.

According to CNET News, although this statement, issued Nov. 5, is only a finding of fact, not a verdict, it does indicate that the judge is leaning in favor of the Justice Department and state prosecutors arguing against the company.

Three main facts indicate that Microsoft enjoys monopoly power, Jackson wrote. First, Microsoft's share of the market for Intel-compatible PC operating systems is extremely large and stable. Second, Microsoft's dominant market share is protected by a high barrier to entry. Third, and largely as a result of that barrier, Microsoft's customers lack a commercially viable alternative to Windows.

Microsoft enjoys so much power in the market for Intel-compatible PC operating systems that if it wished to exercise this power solely in terms of price, it could charge a price for Windows substantially above that which could be charged in a competitive market, Jackson added.

Arguments from both sides will continue and the judge will decide whether the facts show a violation of antitrust law and if so, what sanctions should be imposed. A final ruling could come by the end of the year, with penalties taking effect next year.

Microsoft harmed consumers

According to CNNfn, the Justice Department and 19 states sued Microsoft in May 1998 for a range of antitrust violations, including using its alleged monopoly in the PC operating system market to stifle competition in other segments of the computer industry.

Microsoft argued that is a vigorous but fair competitor and that the government has failed to show any harm to consumers, but Jackson disagreed, noting, according to CNNfn, that by engaging in illegal tactics to thwart its competitors, Microsoft has also harmed consumers.

Many of the tactics that Microsoft has employed have also harmed consumers indirectly by unjustifiably distorting competition, Jackson wrote.

According to ABC News, Jackson cited Microsoft for numerous occasions of anti-competitive behavior, including its dealings with America Online for browser choices and its contracts with PC makers, which forced them to feature the Internet Explorer web browser instead of Netscape's competing product.

Jackson did avoid the most pressing issue of the case though, whether it was legal for Microsoft to bundle its Internet Explorer Web browser with its Windows operating systems. He noted, however, according to ABC News, that Microsoft's other anti-competitive actions made bundling more onerous that it otherwise would have been.

Gates Response

Microsoft's founder and chief executive respectively disagreed with Jacksons view of the facts, stating, "If you want to look at what's great for consumers you have to look at our work and the work of our partners over the last 20 years. The law couldn't be more black and white The kind of innovation we do is absolutely encouraged."

Bill Neukom, Microsofts general counsel, cited law supporting Gates. "Its important to remember that antitrust laws are very clear on the point that companies are supposed to compete vigorously against each other that is how better products come to market quicker and with lower prices," he said. The Sherman Antitrust Act is designed to protect consumers, not competitors.

What's next?

The government will present their conclusions of law in early December followed by Microsofts presentation of its findings of law in mid-January. Jackson will then deliver the final decision in the case, not expected until early 2000. If the Justice Department is victorious, as the finding of fact indicates, the Justice Department and the 19 states involved in the case will decide what sanctions Jackson should impose.

According to ABC News, the judge might eventually consider five options:

- Breaking up the company in two different ways, the first being to split it into separate companies selling an operating system, business applications and Internet content.
- Dividing Microsoft into identical spin-offs and have them compete against each other.
- Forcing the company to allow competitors to sell their own versions of Windows by public auction or by publishing Microsoft's secret blueprints (the Windows source code).
- Requiring Microsoft to distribute rival software products if it includes its own versions of those programs within Windows.
- Forcing Microsoft to sell Windows for the same price to all the nation's computer makers.

SIG From page 1

sult in the chapter's immediate closure for three years at the sole discretion of the University."

Baker refused to comment on any past matters involving the fraternity. However, he did indicate that he was pleased with all that has happened within Sigma Chi in the past two months. According to Baker, the house is clean and the officers from the fraternity show up regularly at the IFC meetings, something they did not do in the past. Baker also pointed out that public relations, once not an extremely high priority, seem to be much better.

"I think that this could be a wonderful example for fraternities across the country on how to come back [from serious problems]," Baker said. He praised the way the University showed patience and how the reorganization plan worked.

"We are very pleased with this organization," Baker said.

Sigma Chi President Doug McCormick '00 refused to comment on Dean Schweinsburg's letter and the events over the past few months, but other members did want to address the problem and the ongoing reorganization.

"I'm glad we were able to work this out with the University," Chris Herron '01 said. "Now we can move on in a better direction and put this past trouble behind us."

NEWS BRIEFS

Germans Celebrate the 10th Anniversary of the Fall of Berlin Wall

Berliners braved the cold drizzle to join parties and concerts from the Brandenburg Gate to Checkpoint Charlie while celebrating into Wednesday the anniversary of the Berlin Wall's demise.

While they may have lacked the joyous spontaneity of the champagne-swigging revelers who hammered at the Wall with chisels 10 years ago, they were able to briefly forget the problems plaguing unified Germany.

Chancellor Gerhard Schroeder, his predecessor Helmut Kohl, former Soviet leader Mikhail Gorbachev and former U.S. President George Bush mounted the stage to applaud and be applauded by some of the people to whom they said the revolution really belonged.

Many believe it was the crystal-clear convictions and unadorned rhetoric of U.S. President Ronald Reagan, now deep in the dark embrace of Alzheimer's disease at his California home, that put the final nails in the coffin of the threadbare, repressive Soviet empire.

Some historians debate just how big Reagan's contribution was to the West's long-fought victory in the Cold War. Some suggest his tough line may even have prolonged the fight by hardening Moscow against concessions despite its crisis.

Cuban Officials Clam Moral Victory against the United States

Cuban officials are claiming a moral victory in the U.N.'s nearly unanimous vote Tuesday calling for an end to the 40-year economic embargo against Cuba.

The U.N. General Assembly overwhelmingly endorsed a resolution, by a 155-2 tally with eight abstentions, seeking an end to the blockade. The United States and Israel voted against the resolution.

The vote marked the eighth consecutive year the United Nations has passed such a resolution. The Assembly voted 152-2 with 12 abstentions last year.

The resolution referred particularly to the 1996 Helms-Burton Act which allows U.S. Citizens who were Cuban citizens before Cuban President Fidel Castro's 1959 communist revolution to file lawsuits in U.S. courts against international companies or individuals who "traffic" in confiscated property.

Cuba announced prior to Tuesday's vote that it will file at least a $100 billion lawsuit against the U.S. government to compensate the Cuban people for "the enormous damages" caused by the embargo.

The lawsuit will be one part of a new Cuban campaign to use all legal avenues to "fight the blockade and defend the rights of its people," Cuban National Assembly President Ricardo Alarcon said

Indian Cyclone Death Estimated at 10,000

Masked rescue workers struggled to clear mounds of bloated corpses 11 days after the fierce cyclone in India, and the Red Cross estimated Tuesday that 10,000 people had died, far more than Indian authorities were reporting.

A Red Cross disaster expert said the official death figure of 3,426 seemed inaccurate because thousands of bodies were cremated or buried by relatives or neighbors before official help arrived.

"It is difficult to tally because where the people have been able to cremate they haven't necessarily been able to report to government officials," Julian Francis told The Associated Press. "It's obviously hit-and-miss."

"The number of deaths from the disaster is likely to reach 10,000," he said, quoting a statement from the Federation of the Red Cross and Red Crescent Societies, the most authoritative estimate published yet.

Francis said more than 10 million were estimated to have lost their homes, livestock or livelihood. Many people were dying of starvation apart from gastroenteritis, he said.

U.N. officials in New Delhi said they were seeking an additional $50 million from donors to help relief and rehabilitation work in Orissa, one of India's poorest states. The United Nations already gave $1.8 million in donations.

US Supreme Court to Study State's Right to Sell Driver's License Information

The U.S. Supreme Court heard arguments Wednesday about whether Congress has the power to stop states from selling information about their residents that is acquired from state motor vehicles records.

While the challenge before the high court is over whether Congress has the right to regulate this kind of commerce, control of such personal information has become a life or death issue.

Congress passed the 1994 Drivers' Privacy Protection Act to limit states from disclosing the personal information that is required on applications for driver's licenses or auto license plates.

"It's just a very dangerous thing for someone to be able to call one phone number and get all the data on you and know everything about you and then go out to hurt you," Sen. Barbara Boxer (D-California) said.

Until the Drivers' Privacy Protection Act was passed, at least 35 states had made motor vehicle records public in some form, and many had routinely sold personal information to direct marketing firms, businesses, charities, other organizations — even to private individuals. New York, for example, earned $17 million in one year selling drivers' records, according to the U.S. Justice Department.

CAMPUS BRIEFS

Halftime Tent Tailgate Party

On Saturday, Nov. 13 the senior class will host a tailgate at halftime of this weekend's football game against Lehigh. The event will be held on the practice field next to the football stadium. Food and beverages will be served courtesy of The Bull Run Inn. Wings, sandwiches, veggies, soda, coffee, and hot chocolate will be offered. All students, faculty, staff and friends are welcome.

Counting Crows concert to begin earlier

The opening bands for the Counting Crows concert on Friday, Nov. 12 will begin at 8:30 p.m. instead of 9 p.m. Joe 90 will kick off the evening's festivities to be followed by Gigolo Aunts and Counting Crows.

Thanksgiving Recess Registration announced

All residence halls will be closed beginning at 10 a.m. on Wednesday, November 24 through 10 a.m. on Sunday, November 28. Students required to reamin on campus for all or part of the Holiday recess must register with the Office of Housing and Residential Life,125 Vedder Hall. Registration forms will be available in the OHRL, Monday November 15 through Friday, November 19. During the Recess, the exterior door locks of all residence halls and University-owned fraternity houses, excluding Faculty Court and Bucknell West, will be changed. Registered students will be issued a door key that will give them access to their facility durng the recess period. Keys may be picked up on Thursday, Novermber 18 and Friday November 19 in the OHRL. Student athletes required to be on campus during recess will be registered by their team's coach, however each individual student must pick up an outside door key to their residence hall. If you are a resident of Faculty Court or Bucknell West, you must register to stay even though the locks in those areas will not be changed.

EDITORIAL

Qualities we hope to find in our future University president

As of this coming summer, the University will swear in its sixteenth president. Bro Adams is off to Colby College, and the presidential search committee—consisting of two faculty members, one student and the trustees—must find the institution's next leader.

The obvious question arises, of course. What should the University look for in its next president?

The Bucknellian has centered on three key objectives that the University's next president should be prepared to undertake—a focus on student interaction, the redefining of wide-ranging objectives in a post-Capital Campaign era, and long-term commitment to the University.

The first goal is arguably the most important. Our next president needs to be more visible on campus. He or she must be active with students and work to gain a better understanding of students' perspectives. Through increased interaction, the president should become more familiar with student needs and wants concerning important campus issues.

Additionally, an interactive president can arguably build a heightened sense of community, and hypothetically promote better communication and compromise between administration and student body. The logic is clear: a president with a better "feel" of the campus can more clearly understand the needs and concerns of students. A University president is not necessarily a student's best friend, nor should he/she be. But a president with a demonstrated interest in campus issues of importance to students will necessarily recognize the potential value of student opinion.

Second, now that Adams has orchestrated the extremely successful Capital Campaign, which is nearing the $150 million mark, the University needs to refocus its objectives. Although a large amount of the capital campaign funding will go to increasing the University's endowment, its most visible contributions will come in the place of new facilities.

In the post-Campaign era, though, the University needs to refocus its commitment to the academic quality of Bucknell. The University has made great strides in its academic position under Adams' tenure, and is now poised to truly be recognized as one of the nation's elite liberal arts institutions.

But this objective will not be realized without a demonstrated priority given to the University's academic mission. Whether it be money diverted to recruiting and keeping top faculty members—Bucknell's average faculty salaries rank near the bottom of its 'frame of reference' schools—increasing financial aid for deserving students or channeling additional funding to diversity initiatives will only help in increasing the academic quality of the institution.

Because of these goals, we should be looking for a president with an extensive background in academia. A successful businessman may be right for many Universities, but Bucknell's priorities seem to indicate that a president who understands that the University's academic commitments come first would serve the school best.

Along similar lines, it would make sense to concentrate on candidates with experience at a small liberal-arts college. Bucknell is not a major research institution, and it should not pretend to be one. A president that is endowed with the 'feel' of a small school will better understand the unique needs of a University like Bucknell.

Lastly, the committee should emphasize long-term commitment in a new president. Consistency is the key here—when the turnover of an institution's leader is only five years (as in the case of Adams), it is difficult to develop a long-term unity between the many constituents of the University.

In all, President Adams has served the University well, especially in fundraising, but as we bring in President No. 16, Bucknell needs to look even deeper into its academic future.

Is it easy to get the classes you want with our current registration system?

Yes

By Rebecca Rowland

Of the universal complaints of college students, the one you are most likely to hearis that registration is too hard. Students complain of not getting into the classes they want or need, of being made to wait in long lines, and of the general inconvenience surrounding the registration process.

Here at Bucknell, our registration process is relatively low-tech. Whereas many schools have call-in or internet registration, we do it the old-fashioned way. We wait on line. And sometimes we wait some more. And sometimes we even get a little frustrated with our system of registering. Well guess what, its a perfectly fine way to get the classes you need.

Registration is a two-week event. Each class is given two or three days on which they exclusively register. The time periods are broken up by last name, which are randomly picked and changed every semester. Seniors register first, then juniors, then so on.

It is imperative that seniors register first. These are the students that have the strictest scheduling restrictions. They are the ones who need certain classes to fulfill their requirements for their majors.

Freshman can register last because they are the only class which primarily takes 100-level classes—the competition between sophomores and juniors for 200-level classes and between juniors and seniors for 300-level classes is much more severe than for any 100-level classes.

In a system that randomly gives students registration times based on last names, someone is inevitably going to be given the last time on the last day. But that same person will most likely get the best time on the fiest day the next semester. No one gets exactly what they want all of the time.

Some people have suggested an automated registration system. Great, that's all we need—more aspects of our lives ruled by the computer. The day computers do not make mistakes and work perfectly is the day computer-registration is a viable option. Until then, what if the site crashes? What if there is a black out and everyone's schedules are lost? What if you don't have a computer? What if ...see what I mean?

"In person" is the only way in which you can guarantee accuracy and immediate feedback if there is a problem. Not to mention if you walk up to a registrar's window and tell her your desired classes, you positively know that someone has recieved your schedule. Sure you can plug your classes and student ID in a website, but how will you know if it went through and if you got all of your classes?

Many students also have a problem with the maximum capacity restrictions of many classes. If only fifteen people are allowed into a class, what happens when a person majoring in the class's subject is blocked out because students not majoring in the class but with earlier registration times took their place? I agree that this is a problem. I have seen this reduce engineers to tears and management majors into fits of rage.

Fortunately, the professors here are reasonable. If you have to be in a class, your advisor can get you in. The point of attending college is to attend classes that will help you graduate with a degree in something—to make this impossible for students would be counter-productive.

It is well within a student's rights to demand that their school run efficiently. In the case of Bucknell's registration, however, I believe it runs efficiently now. Sure some people have to wake up early to make sure they get the classes they want and yes, some people might not even get all the classes they want. But if the class in question is one of supreme importance, its a safe bet that something can be done to ensure your enrollment.

No

By Matthew Trunnell

I have learned to dread the registration process each semester. Maybe I am just unlucky, but I seem to have the worst experiences with the Registrar's Office.

I see several problems with the current procedure for signing up for classes, all of which can be fixed with varying degrees of promptness. I recognize the steps the Registrar has taken in recent years to speed its methods, but in my opinion, it is a long way from the best that it could be.

On a campus that is armed to the teeth with fast networking, new lab and library computers, and more courses utilizing the web, it seems only natural that I should be able to register for my classes on the web. Registering in person feels too arcane. There really is no reason that a well-implemented web page form could not do the job (and I am not ignorant of the technology – I am a computer science major). Get rid of the time wasting, boring, outdated, standing-in-line delays. What are we waiting in line for? Bread?

If designing an effective web form seems too daunting a task, especially considering the joys of the BANNER implementation, then perhaps those in charge could borrow an idea from other schools and let students register over the phone. A touch-tone system might not save much time over writing your schedule down on those annoying planning sheets, but at least it would save you the trip and the wait in line. This is a popular tactic at large schools since so many students can register at the same time.

I would disagree strongly with my opponent's assertion that the registration schedule is fair. Perhaps she has simply been lucky in the draw. I, obviously, have not.

Many would say that in the real world, life is not fair – and therefore if you happen to get shafted by the first letter of your last name, you should just deal with it. But Bucknell *is not the real world*, nor is it intended to be. As far I as can tell, academia is generally meant to be a place where there is recourse, where your good deeds matter, and where life *can* be fair. There is no place in the real world where you would you turn to your RA when you neighbor is being loud; no place else where Public Safety would fine you for backing into a parking space.

Therefore, the Registrar should implore itself to create a process that is ideal – not one that would simply suffice with the fewest complaints. If students were registering on the web, then everyone could register first come first serve by class year. That way, if you are *really* motivated to get into a highly sought after class, then you could be at a computer the minute the forms are available to you. As it stands now, you may have to miss class – or worse, get up at the crack of dawn – to be the first in line. All the while hoping that your classes haven't closed since the last time you re-wrote your schedule.

It also seems that most classes are scheduled for the same time each semester. This is yet another plague, especially for double majors like myself. I think the current time schedule is assumed to work in most cases, so it has stuck. In a perfect world, we would all sign up for whatever courses we pleased, and let a computer program figure out a schedule that works for everyone. Such a program happens to be similar to the first program Bill Gates ever sold. He wrote it for his high school when he was a student there. In any case, a more intelligent schedule needs to be designed.

A larger problem that skirts on the edge of this problem is the issue of class size. This has nothing to do with the Registrar, but it is relavent nonetheless. We have all become accustomed to the fact that there are not enough course sections, especially in certain majors.

And why is it that some courses close at 15 or so students, but the Registrar continues to allow others to register? *Because there are statistics which must be kept at a certain level.* In my opinion, Bucknell is understaffed when it comes to faculty. In two of my classes, there are not enough chairs in the room for the 30+ students. Hire more faculty and solve this problem!

OPINIONS

Deciding the best option for your meal plan

By Matthew Trunnell

Are you as fed up with your meal plan as I am? Do you wish that you could eat whenever you wanted, forgetting about when you can and cannot get meal credit? If so, let me reveal the wisdom that comes from years of wrestling with that stubborn 800-pound gorilla we affectionately call University Dining Services.

With the endless trickery that surrounds eating on campus with a meal plan, one wonders how we put up with all the nonsense. When I was a first-year student, I led a crusade against the evils of the 19-meal plan. Why should freshmen be *forced* to buy it? Why is it that there is no choice?

If asked, Dining Service personnel are trained with several standard answers, among them, "first-years can only use one meal credit per meal time to ensure they have enough credits to last the entire semester." Or, my personal favorite, "eating disorders are more prevalent among first-year students, and the 19-meal plan discourages that." Ha!

The truth is that the huge profits from the 19-meal plan are used to "discount" the meal plans for upperclassmen. This little-perceived fact is the foundation for the pricing scheme for every other meal plan. It took hours of questioning before I discovered this.

What have we learned? If you are a first-year student and you are forced to buy the 19-meal plan, *you are out of luck*. Your payments are used to discount the block plan. Don't you feel better?

Why is it that you cannot use your meal credit between 11 A.M. and 12:30 P.M. on the weekdays in the Bison? Because it forces you pay for your meal with cash! This brilliant move is near the top of the laundry list of pretense that reveals the motive of Dining Services. They are here for one reason – not to feed the campus community, but *to make money*.

Another sly regulation for meal plan owners is known as the "Weekend Surprise." You wake up on some weekend morning and find that the Bostwick Cafeteria is closed. So, you stroll on down to The Bison only to find that – surprise! – your meal plan cannot be used on the weekends. Can you guess why? Because Dining Services makes more money that way.

If you still think that you are getting your money's worth by purchasing a Block Plan, think again. There is only one way to avoid losing money with either Block Plan, and that is if you use every credit at the cafeteria.

Dining Services charges an exorbitant $7.50 for dinner at the cafeteria. If you purchased a Block Plan, and ate *every* meal at the Bostwick Cafeteria, then you are alone in getting your money's worth.

For example, if you buy the 150 Block Plan for $965.00, you have 150 meal credits and $75 "cash" debit. If you subtract the $75 from $965, and divide the result by 150, you pay nearly $6 per credit. Recall that the most cash value per credit you will ever receive in The Bison is $4.25. Rip off? I think so. The 220 Block Plan is hardly better, at a calculated $5.11 per credit – assuming that you can eat 220 meals in a semester.

How can you avoid this evil and deceiving plot to rip you off? Most students discover by their Senior year that the only sound choice is to purchase the "Flexible Spending Plan," also known as "pure" declining balance. If you live on-campus, and are therefore bound by University policy to purchase a meal plan, then this is without a doubt the only way to go.

The curious way that the various Meal Plans are structured reinforces the problem of students being ripped off. Your first year is spent dreading the 19-meal plan. When you become a Sophomore, you immediately purchase the coveted Block Plan. After a year of trying to figure out how to use 220 meals in a semester (which really is difficult), you finally realize the only way to save money is to have no meal credit with only a cash debit.

Improvements are necessary for more enjoyable dining at all times

By Maren Johnson

It seems that often in our daily lives, when something has become so commonplace that we barely give it a second thought, we tend to overlook improvements that could be made.

For Bucknell students, the Bison is a part of our daily lives. We go there for meals, stop in for a snack, or just go to study and gather. Unfortunately, it seems that the Bison is not all that it could be. Lately, I've heard complaints that have triggered me to notice its shortcomings as well. My intention here is not to bombard the Bison and its staff with complaints and accusations, but rather to bring to light some aspects that could use improving.

First, the service, especially this year, seems less than friendly. I feel that I should take into consideration that it can be a hectic and sometimes unrewarding job, but it doesn't have to be. Any job is what you make of it. I know that I am making some generalizations here, but I feel that it has to be said. I think that it is ridiculous to have to stand around at the fast food counter until one of the staff feels like acknowledging you. This has occurred to me numerous times, and I'm sure that I'm not the only one.

Personally, this treatment makes me feel unwanted and put off. To then go to the register and not even be graced with a smile reiterates this feeling. I always make a point of being friendly or at least polite, no matter how much of a rush I am in, and I'm disappointed that many of the staff do not feel the need to reciprocate.

The next issue that I'd like to address is availability. We have a great smoothee bar that seems to always be vacant of employees and a wrap station that seems to be closed much of the time. I would imagine that the problem is lack of staff, but again, its disappointing to have these options and not be able to take advantage of them. Finally, and this is the largest problem that I see, the meal credit system in the Bison is absurd. The Bison, in part, is meant to be a place to get a quick bite to eat. One of the most popular times to just get a quick bite is on the weekends. However, we cannot have meal credit in the Bison on weekends. Not having done any research on the issue, I don't know what the reason for this is, but it seems inconvenient and unfounded to me.

Not everyone has large amounts of declining balance to use, and it's a waste not to be able to get meal credit. It seems to me that the weekends would be a logical time to be able to get meal credit all day long; or at the very least, after 12. I know that in writing this article I have most likely offended some people, but I want it understood that I'm not trying to undermine anyone's work. I simply feel that there are improvements to be made, and nothing will be done unless someone speaks up.

LETTER TO THE EDITOR

School spirit, satire, and statistics

TO THE EDITOR:

In the interest of continuing the dialogue about school spirit, and with the understanding that there are, of course, lots of different metrics one might use, let me offer some statistics:

a)96,753
b)6,228
c)5,000
d)3,160
e)1,137

Oh! You want a context? Sorry about that! No, these statistics do not include the correct trivia answer to the number of people who braved the early November breeze and streaked by last Saturday afternoon's (extruded meats) tailgate in the new, recently paved and soon to be landscaped parking lot on the south end of Christy Mathewson Memorial Stadium. Nor do these statistics include the exact number representing the cumulative 1999 calendar year headcount at faculty meetings. Sadly, the above figures are too high in both of these cases!

Actually, the statistics above reflect (respectively) the officially reported spectator attendance figures at the following football games last Saturday, *all* played under very similar weather conditions (sunny and mild, high 50s, and breezy):

a)Penn State vs. Minnesota
b)Colgate vs. Lehigh
c)Susquehanna vs. Lycoming
d)Bloomsburg vs. Mansfield
e)**Bucknell** vs. College of the Holy Cross

I know, I know! There are more important statistics to be concerned about. For example, we're very competitive on math and verbal scores, and lots of other important metrics. But really Bucknellians, Beaver Stadium aside, is *last* place the very best we can do relative to other Patriot League opponents, let alone Division II and III institutions! You have one more shot to "wake up the echoes" in this millennium. This Saturday afternoon, take a break, enjoy the fresh air, get out and watch the Bison take on the nationally ranked Mountain Hawks of Lehigh University. Unleash the spirit—go for it—GO BISON!!!

Professor Tim Sweeney

Bucknellians are more than meets the eye

Students demonstrate that they do not reflect the common stereotypes

By Rebecca Rowland

As I was walking across the quad this afternoon, I walked by two people. As we passed each other, one turned to the other and said "People here sure are conformists, aren't they?"

Well folks, there it is, another complaint about Bucknellians. Let's just add "conformists" to the long list of negative stereotypes: Greeks (yes, it is now an insult), alcoholics, spiritless, ignorant to the world around us, and snobby. Jeez! It's enough to bring anyone's self-esteem down a notch or two.

But no, Bucknellians, do not get too down on yourselves! Contrary to popular belief, we are intelligent individuals with more to offer than our latest copy of the J.Crew catalog.

Bucknell is a good school. Period. You cannot be stupid, or even slightly stupid, and be admitted to this school. Following that...Bucknellians are smart people. We consistently rank in the top 10% of our graduating classes, get above average SAT scores, and upon graduation, 98% find jobs or attend graduate school within the first 6 months.

Bucknell has a large number of interest groups, student-run clubs, and other "after-school" activities such as intramural sports and Greek organizations. The reason the University can sustain such a high number of activities is because Bucknellians like to get involved. 95% of students here are involved in at least one extra-curricular activity and many are involved in more. As a student body, we like to give back and work to improve what we see.

The student athletes at Bucknell are top-notch. Bucknell is consistently voted the number one school in regards to student-athlete graduation rates and GPAs in the Patriot League as well as the NCAA. We may not be a Big Ten school but at least we don't have 5,000 stupid jocks running around campus. Your average Bucknell Bison is a well-rounded individual.

Many students complain about Bucknell's less than metropolitan surroundings. We don't just complain, though, we act as well. Town-gown relations might not be something to write home about but Bucknellians give back to Lewisburg and Union County. The profits from the Management 101 projects go to local charities, every fraternity and sorority does local philanthropy work, English 218 reads to local kids once a week and BISON Volunteers is an entire student group dedicated to helping the locals.

Bucknellians are respectfuh We do not litter. You will not find graffiti on any of our buildings. Students here appreciate the extreme beauty of our campus. Similarly, many students develop close friendships with their professors. We like them and when we treat them with respect, they like us, too. Incidences of crime are also rare on this campus, indicating that students respect each other as well.

Perhaps the most amazing thing about Bucknell students is we know how to party and yet, we are still professionally and academically successful. Bucknellians party at least four out of seven nights a week. We ranked in the top 5% in a Harvard study of alcohol consumption in the hard liquor category. When we party, we party hard. But, as I mentioned before 95% of students have a job or are in grad school 6 months after graduation. Luck? Naw baby, we are just too smart!

Next time you get down on yourself and think that if only you had gone to Penn State you would be better off, remember, being a Bucknellian is an honor. We are good, smart decent people, no matter what anyone tries to tell you.

Winning the name game

By Jim Leahy

Pop Quiz. While standing in the spotlight, you are to name the leaders of four foreign nations. Could you do it? Last Wednesday, Texas governor and presidential hopeful George W. Bush couldn't.

Andy Hiller, reporter for a Boston television station, asked without warning a question of Mr. Bush during a press conference. Knowing that he had a weakness, Mr. Hiller asked Bush to identify the leaders of four nations who have been in the news to a great extent over the past few weeks. The countries were India, Pakistan, Taiwan, and Chechnya. And the score was 1 of 4 and for the one he did name, he only gave a first name, Lee, Taiwan's Lee Teng-hui. The other names were Atal Bihari Vajpayee of India, Pervez Musharraf of Pakistan, and Aslan Maskhadov of Chechnya. Now, don't get me wrong, I could not have answered that question correctly, but my situation is a bit different from that of Bush.

On Tuesday, Vice President Al Gore appeared on the Imus in the Morning radio show, a nationally syndicated program based on WFAN-AM in New York. His interview lasted almost twenty minutes and in it, he spoofed the George W. Bush situation. He said, "The other day I was talking to Utkir Sultanov. You know, the prime minister of Uzbekistan. And he asked me, 'Did you send a birthday card to Hamed?' That's of course Hamed Karoui, the prime minister of Tunisia. I had just been talking about him with Ion Sturza, the prime minister of Moldova. We're old friends. We actually met through a mutual friend, Lennart Meri, the president of Estonia, of course."

> *"Knowledge of global matters is an important characteristic of a president..."*

Funny as this may seem, the situation is serious. The world our next president will be dealing with is becoming complex. Globalization of every possible thing is changing the political landscape. Changes overseas in governments and ways to deal with conflict are also molding the landscape of politics. A president must be aware of these changes and he, or she for that matter, must be able to manage them.

Now, Mr. Bush is defending himself, saying that the quiz was unfair. But its basis is fair. As any candidate for president knows, every portion of your life is under scrutiny in the years leading up to the elections. If we knew now about President Clinton what we did not before we re-elected him, would he still be president today? I hope not. So finding out that Mr. Bush is not the best foreign policy man is better now. We can prevent some future problems.

Oh, and Mr. Bush, some words of advice for the future. Read or watch or surf the news. Knowledge of global matters is an important characteristic of a president and if you want my vote, know them.

Action in Washington: Political figures move forward with policies and campaigns as presidential race quickly advances

By Josh Guyan

Things are getting exciting in Washington. Candidates for the next presidential race are beginning to start their campaigns, congress and President Clinton are fighting again, and perfectly good budget is being held up due to the stupidity of one Senator. Here is a run-down of who is doing what and how in our nation's capital.

Clinton: Thumbs up. This lame-duck President doesn't seem to be showing the weakness he's supposed to. His polls are in the upper fifties and he is fighting with Congress to pass a budget while protecting funding for more teachers and police. Also trying to get Congress to pay UN dues owed by the US so we do not lose our General Assembly seat. It is amazing how much Clinton-fatigue really is out there and yet his polls are high because he has the backing of the people on almost every policy issue.

Al Gore: Thumbs down. Got in trouble this week after the press discovered he was paying $5,000 a week to Naomi Wolf to teach him how to be an alpha male to get votes. This is very bad on many levels. First, Bill Bradley is out fund-raising him and spending less so Gore does not exactly have money to burn. Second, paying this woman to make him a more attractive, assertive guy just makes it seem like he is trying to trick the American public into voting for him. I still think he is an excellent candidate, but he cannot seem to do anything right on the campaign trail.

Bill Bradley and John McCain: Thumbs up. Both got a big spread in Newsweek this week and were on the cover. They are both winning the public over with their seemingly authentic style. Both have a captivating story to tell, Bradley with his basketball metaphors, and McCain with his POW stories. I like both candidates and I think sincerity will get them a long way. The stories about basketball and the Hanoi Hotel could get old though.

Senator Robert Byrd (D) (WVa): Big Thumbs down. Threatens to torpedo the budget negotiations and bill unless he gets leniency for West Virginian coal companies. The deal is that a court ruled the coal companies had to stop dumping their waste into the rivers for environmental reasons. Senator Byrd is fighting for a proposal that would allow the coal companies to continue the dumping. Clinton is environmentally conscious and obviously can't let that go so he would have to veto the budget, which would put all the blame on the Democrats for stopping the budget, rightly so. Fortunately Senator Byrd lifted his threat to block the Foreign Relations bill, a major part of the budget.

George W. Bush: Big Thumbs down. Got in trouble this week for being a foreign affairs mental midget and for the environmental problems in Texas under his tenure as governor. I realize that he was ambushed with those questions on the foreign leaders, but he should have known them. At least he should have refused to answer, taking the high ground like Bill Bradley does. Overall he handled the situation very poorly, trying to turn the tables on the reporter and then being shut down when reminded that he was the one running for President.

Less widely known is his record on the environment in Texas, which was highlighted in a New York Times article this week. Houston is overtaking Los Angeles for the worst air quality in the country. LA. is on its way up and Houston on its way down. Bush is chummy with the business leaders doing most of the polluting in the state and is receiving mounds of campaign cash from them. He has made it clear that his policy on environmental issues is a self-regulating system by the businesses themselves. This could be very bad for his campaign if the American people realize the severity of the environmental issue before next November.

Congress: Thumbs down. Still fuling UN. dues because of family planning initiatives. This is monumentally stupid. We have a serious global population problem that will only be getting much, much worse and our Congress is going to make us lose our General Assembly seat because they do not want to fund programs designed to keep population increases in check.

The House passed a measure to counter an Oregon law passed after a referendum calling for the right of terminally ill patients to die with dignity. Doctors would be able to set up euthanasia for patients with less than six months to live (confirmed by two doctors), and the patient would push the button after signing a legal form. The people of Oregon voted for this in a referendum and the House does not like it so they want to override it. First, they have no business telling a terminally ill patient what they can or cannot do with their life. Second, the Republicans in the House are supposed to be big on state's rights, so what happened to Oregon's rights? Traditionally the Federal government has had a limited role in criminal law, but lately the Republicans in Congress (supposedly in favor of limited federal government) have been increasing government involvement.

Counting Crows kicks off *"Desert Life"* Tour CONCERT

from page 1

The long-awaited Couting Crows concert takes place tomorrow night in the Fieldhouse.

The album is an enjoyable collection of diverse melodies all featuring Duritz's familiar themes of love and love lost, identity and self-discovery. The record earned four and a half stars by *Rolling Stone* critics, half a star away from the coveted and prestigious rank of "Classic." Tomorrow night fans should listen for new tunes intermixed with familiar favorites.

This weekend has also been named "Best Friends Weekend" by RHA, and many students will host friends coming from home and other schools to see the Counting Crows perform. "I'm really happy Best Friends Weekend coincides with the Counting Crows concert because my friends and I are all fans and this is the only university that is hosting them on their tour," Kendra Jorgensen '03 said.

Comedienne brings laughter to Weis Center

courtesy of FLAG98

Suzanne Westenhoefer will perform her comedy routine live tomorrow night at 7:30 in the Weis Center.

By Ted Burnes

The common misconception about Friday, Nov.12, is that the fun starts when the band Counting Crows take the stage. However, the fun will actually start three hours earlier when comedienne Suzanne Westenhoefer performs live in the Weis Center.

Westenhoefer, with her combination of quick wit, amazing antics and wonderful humor, takes the stage at 7:30 p.m., not in the Bison, not in the Gallery Theater—the Weis Center. You know that this has to be big.

And big it shall be. With Westenhoeffer's fame and name preceding her appearance, the crowd is expected to be massive and the laughter mind-blowing.

A Lancaster County, Pa. native, she was working as a New York City barmaid in 1990 when her stand-up routine won an amateur night contest at a piano bar. Within two months, she was getting paid for gigs and within a year she was headlining a one-hour show in Manhattan.

In 1993, her HBO Comedy Special, now out on video, was nominated for a Cable ACE Award. She has appeared on more than a dozen shows including "Sally Jesse Raphael," "Politically Incorrect" and "The Jon Stewart Show." Her comedy, directed at a young audience with something for everyone, is an act that no student should miss.

As part of the University's "Best Friends Weekend Friday: Double Feature!!" Suzanne Westenhoefer performs at 7:30 p.m. and will be done in time to hit the Counting Crows show afterwards. The show is free and open to all. Doors open at 7 p.m..

Talented musician, Jenny Choi performs at Seventh Street Cafe

By Rebecca Wahl

Independent musician Jenny Choi will perform at 11 p.m. on Friday, Nov. 12 in the Seventh Street Cafe , as part of her current East Coast tour.

Choi included the University venue in a series of gigs that mark her second trip to the East. A junior at the University of Illinois Urbana-Champaign, Choi and her three-piece band have been performing to support her debut album, "Bittersweet," released last November.

"Bittersweet" contains eleven songs written and orchestrated by Choi. The album features a myriad of sounds and styles that range from folky pop to electronic dance. Most songs focus on Choi's primary instrument, the piano. Guitars, percussion, electronics and a string quartet are also used in various tracks. To convey the studio sound in front of a live audience, Choi has enrolled the talent of a local ten-piece backing band. Unfortunately, the band cannot fit into Choi's "tour wagon."

"When I write a song, I have a vivid idea of where that song could go. With this CD, I had the chance to realize the potential each song has, and that's where all the different instruments come in," said Choi.

Choi has been composing music since the age of five. Her career as a musical performer kicked into full-swing at fifteen. Choi has played over fifty concerts at Champaign-Urbana in the past year and her CD release party was attended by over 400 hundred fans. "Bittersweet" has been given positive reviews by local and national press and has sold out its first pressing. Choi's own future seems to be anything but bittersweet.

Arts & Entertainment

Exposed displays a wide array of artistic talents

By Sahana Ravindranath

Looking for something that will stimulate both your mind and senses? If so, "Blue Produce Blue" will provide live music, poetry readings, slide shows and much more.

The art group, Exposed, will bring this art extravaganza to campus. Exposed was started five years ago by a group of dedicated members. "Exposed was created as a venue through which students could meet, collaborate and engage with the rest of the campus community," said Dawn Lonsinger GR.

Lonsinger is one of the founding members, along with Mike Diamond '00, CJ Swenson '02, Jaskeerat Baweja GR and adviser/director Stuart Horodner.

"We have been collaborating on this show as an extension of the installation piece in the Langone Center. Since it is a collaborative display, the entirety of 'Blue Produce Blue' shall be unveiled within the opening," said Diamond.

Exposed's huge art expo will undoubtedly stretch the minds and imaginations of students as they endeavor to figure out what "Blue Produce Blue" means to them. "The display of student art work and the other activities surrounding the opening will reflect the theme of the show in all its meanings," Diamond said.

"The themes of these art shows are an attempt to extract adjectives from our dailiness and enact creativity as dialogue," Lonsinger said.

This purpose becomes evident through the themes of previous years—"75 Square Feet of Aluminum," "Eggs and Plastic" and "Velvet Elvis." Each of the shows focused on taking everyday items and expanding upon their meanings through different artistic interpretations.

The Exposed student art show will bring together an eclectic array of mediums including painting, drawing, photography , printmaking, graphic design, sculpture, fashion, crafts, film, video, glass, installation, conglomeration and much more.

Everyone is encouraged to get involved and experiment with their artistic side by submitting a piece to be displayed. There are no guidelines or directions to enter.

"It is always intriguing to see what our peers are thinking about or engaged in and the way they choose to display it. It is also interesting to see the way the works overlap or are in dialogue with each other," Lonsinger said.

Tim Choate-The Bucknellian

The Craft Center offers a wide variety of classes from pottery to jewelery making. They will also be hosting visiting artist, David Fobes Nov. 19th to the 21st.

Double Jeopardy fails to hold expectation of suspenseful

By Laura Reed

"I could kill you in the middle of Mardi Gras, and there is nothing anyone can do about it."

The trailer for "Double Jeopardy" paints the picture of a movie following the basic formula of Harrison Ford's popular movie, "The Fugitive." The main character is convicted of a crime that he didn't commit and has to fight to prove his innocence. To complete the formula, Tommy Lee Jones portrays a law enforcement official similar to his role of U.S. Marshal Sam Gerard. That premise was what drew me to the movie theater. However, the movie, although entertaining, soon failed to meet my expectations.

In the movie, Libby Parsons (Ashley Judd) has a wonderful life, complete with perfect husband and child. She goes sailing for a weekend alone with her husband, Nick Parsons (Brian Greenwood)—her dream vacation. That is when the dream ends.

The next morning she awakens to find herself and the boat covered in blood. She follows the trail of blood to the top of the ship, where she finds and picks up a blood-stained knife. Bad idea! Nick has disappeared and is declared legally dead soon afterwards.

Libby is put on trial and convicted of her husband's murder. The motive? A two-million dollar insurance policy that he had taken out prior to his murder. Unfortunately, Libby is sent to prison and is separated from her son, Matt, who is 4-years-old.

Matt is placed in the custody of Libby's best friend, Angie Green (Annabeth Gish). One month into Libby's prison sentence, Angie leaves town and fails to leave a forwarding address. Fortunately, Libby is able to catch up with Angie, who is now in California (Libby was from Washington State). As Libby is talking to her son on the telephone, Matt calls out two little words that change the entire focus of the movie, "Hi, Daddy!"

Clearly, Nick is not dead. The rest of the movie follows Libby through the remainder of hèr six-year prison term and after her release on parole. Tommy Lee Jones portrays Lehman, her parole officer.

The story sends Libby from Washington to California to Colorado to Louisiana to Georgia in her search for Matt, Nick and Angie. The central idea of "Double Jeopardy" is that Libby cannot be convicted twice for murdering Nick.

This idea, however, only works in the movies. In reality, if Libby were to actually murder Nick, it would happen at a different time and a different place and would therefore be a different crime.

My main expectation about this film was that it would be quite suspenseful and action-packed. Instead, it is about a woman whose only goal is to get her son back, no matter what the odds. This caused me to lose some interest in the movie, as I am usually interested more in movies that have a lot of suspense or action. Despite the interesting premise of "Double Jeopardy," the movie failed to match its own expectations and kept itself from being a truly quality movie.

Auditions for Winter Mainstage Production to be held

The Department of Theatre and Dance announces auditions for the Winter Mainstage production of "The Real Inspector Hound" by Tom Stoppard. Auditions will be held this Sunday, Nov. 14, and Monday, Nov. 15, in Vaughn Literature room 202. Monologues will be provided at the audition, but a pre-reading of the play is encouraged. It is on reserve at Bertrand Library under Theatre.

Directed by David Carpenter '00, the play will go up Feb. 26-29 in Harvey Powers Theatre as a double bill with another Stoppard play, "Artist Descending a Staircase," directed by Jeremy Walker '00.

"The Real Inspector Hound" takes a comic view of actors, critics and theatre in a bold and witty way.

Two theatre critics go to the theatre one evening to review a play, but end up getting more than they bargained for when the world of the stage and audience collide. Stoppard has been delighting audiences for over thirty years with many Tony award winning plays such as "Rosencrantz and Guildenstern are Dead," "The Real Thing" and most recently "Arcadia." His wit and intelligence have made him one of the premier playwrights of the twentieth century.

The show requires five men and three women. If you have any questions please call David Carpenter at 577-8253 or email him at dcarpntr@bucknell.edu or call Chris Fry in the Theatre Department at 7-1235.

"Treasure the tigers"

Phi Psi and Fiji team up to help 'Cats of the World'

By Eric Green

Tired of seeing the same squirrels day after day? If you are interested in tigers and other large cats, there is a place for you to visit right here in the local area. Located about twenty minutes from the University in Penn's Creek, T & D Cats of the World menagerie is a refuge for various exotic animals. With over forty large cats, the menagerie houses lions, tigers and cougars.

On the last Saturday in September, brothers and pledges from Phi Kappa Psi and Phi Gamma Delta fraternities traveled to the menagerie for a day of community service. The main task for the fraternities was to clear pre-cut trees from a two acre area intended for use as a pen for sick tigers. The students also carried large sections of heavy fencing across Mattev's property, and began assembly of the cages.

Courtesy of Phi Kappa Psi

The brothers of Phi Kappa Psi and Phi Gamma Delta helped clear areas to be used for tiger cages.

Since the owner and operator, Terry Mattev, is expecting between three and ten new tigers to arrive in the next month, this service project was both timely and much needed. One of the largest tigers living on the refuge is a beautiful Siberian Tiger, one of only approximately 400 remaining in the world. With such important residents, Mattev has his hands full with the daily care of so many precious animals—the menagerie goes through over 12,000 pounds of meat each month.

Through private donations and his own personal contributions, Mattev, a former State Trooper, funds and operates the menagerie on a full time basis. Aided only by his son and daughter, Mattev was extremely appreciative for the fraternities' help, and mentioned that he has never had such a large group of workers work such a long time. Mattev also commented that the students did more work in a day than he could do in a month.

"[Mattev] is the last line of defense for these animals," Orion Loundon '00, a Phi Gamma Delta brother, said. "We were able to build a good relationship with him, and he worked right alongside us."

"This was important to do with such a big group," Bridge said of the nature of the work, which entailed moving extremely heavy trees and fencing.

"It was a great feeling of accomplishment—guys had cuts, scapes and bruises by the end of the day," Loundon said. "But it was worth it and we'd like to do it again soon."

Bridge agreed, "I had a lot of brothers asking me when we were going again. The day was such a success that we hope to team up with FIJI again in the future to work together on other service projects."

"Nothing brings people closer than hard work," Loundon added.

"It was also great to know that we were helping animals that would be dead by now," Bridge added. Some of the tigers that Mattev acquires have been abused and are sick. The larger pens will allow the animals to live in a more natural setting.

T & D Cats of the World is open to the public on Sundays from May to August. Admission is free for children and for groups of students. Personalized educational tours also available.

Courtesy of Phi Kappa Psi

Phi Kappa Psi brothers Jarrett Bridge '00 and Dan Jacob '00 get ready to take a tree branch from Phi Gamma Delta pledges Rich Bailey '02, Travis Leonard '02 and Austin Lanham '01.

Wink Thinks

Jacqueline Flicker—The Bucknellian

Dear Wink,

I was raised in what could be considered somewhat of an upper class family. My father is an architect, and my mother makes her living playing the triangle as a professional musician. My parents have always listened to classical music in our house and, to say the least, I have grown up with it and have come to love it. Bach, Beethoven, Mendel, I love it. I get such a rush just thinking about it. I was never really ashamed of my music, I thought of it as my own special thing. While everyone else was playing Mariah Carey, or whatever was popular at the time, with the windows rolled down and the bass throbbing, I was in my car listening to my classical music with the windows rolled up content that my music was different, but equal in my eyes.

This year is my first at Bucknell and my relationship with my roommate is pretty good. While we aren't the best of friends, we get along and give each other the space that we need.

However, there is just one difference between us, and though it is nothing big, it makes for an awkward situation. You see, my roommate listens to what I think is considered rap music. He likes it a lot, but I am not such a big fan of it. As a matter of fact, the most pop-oriented music that I listen to is a little Ace Of Base. Well the other night he was listening to his music on the stereo, which I brought, and they were saying some really offensive things that I just couldn't understand. Some of them were talking about "I want to see you deceased," "How there ain't no love for a young G," I mean what on earth does that mean?

To say the least I was just plain offended, and therefore I asked him to turn it off stating that it wasn't music but rather was just a feeble attempt to make a record. Well he got mad and left, after yelling some obscenities at me. I know I regret what I said, it wasn't probably the correct thing to do, but I just don't know how to handle the situation. I really don't want to listen to his music, and it is my stereo. On the other hand I just want to get along with my roommate. Therefore, I am asking you, what should I do? How do I get to the point where I don't mind rap?

Sincerely,
Tired Of Tupac

Dear Tired Of Tupac,

I can understand how you may be frustrated with the fact that you may be offended at some of the lyrics that are in your roommate's rap music, after all, a lot of parents are. However, I think that there may be some flaws in your thought process regarding the music, and how you are handling the situation. Therefore, I think that the issue that needs to be addressed is not whether you like your roommate's music, but rather, than you be as accommodating to him as he is to you.

As a fan of rap I understand what you are saying. However, you shouldn't judge people or feel the need to confront them based upon their tastes, just as you wouldn't want people to judge you because you listen to classical music.

You said that it is your stereo and therefore you shouldn't have to listen to his music, I personally find this to be a cop out. It simply gives you the control because it is your possession, when in reality you should talk to you roommate to work out some kind of compromise. I think that your ability to compromise is the big issue here. So, you may not like his music, he may not like yours, but you still have to live and get along with your roommate and that entails making sacrifices, like listening to music that you may not have previously been exposed to.

I feel as though you really need to apologize to your roommate. He really didn't do anything to you besides call you a few names and it seems as though the situation really got out of control simply based upon something stupid. You should really try to talk things over with your roommate, and come to an understanding with each other. Think of some ideas where you can both listen to your music, like one of you listening to a discman or having times when each of you listens to your own music. Though these ideas may seem childish, they will probably help. Who knows, maybe after listening to some type of music other than classical, oh yeah that gets me excited, you may find that you like it. However, please don't consider Ace Of Base music, nobody should have to listen to that.

Basically, I think that you need to do some thinking about what needs to happen here and how you can be accomodating. Realize that your roommate did nothing wrong. Both of you just need to understand one another. It really comes down to learning to live with each other and though it may be different, "That's just the way it is."

When faced with a tough situation, don't simply react. If you think things out first, you may save yourself some trouble. Though we may all be different, we all have to learn to live with one another. In closing, I would like to leave you all with one of my (and another Bucknellian's) favorite rap quote, from a man named Tupac Amaru Shakur who sums it up when he says, "Picture me rollin' in my 500 benz." Until next-time relax, have fun, and let winks wisdom be your guide.

If you are interested in writing to Wink there is no need to worry—all questions are confidential and answers are always thorough. However, please write questions that are decent because we can't include material that is libelous or an invasion of privacy. Questions or comments can be sent to Eli Winkler at box C2815, attn: Wink Thinks.

Please note that Wink Thinks is meant to be instructional as well as entertaining. However, it is in no way a substitute for professional counseling.

Support group addresses eating issues

By Jennifer Leyton

How many times have we heard that strolling through campus is like walking through a J-Crew catalog? Everyone is dressed meticulously and has a picture-perfect figure. Young adults today face many obstacles, including those of a self image. This added pressure of living on a college campus does not help. However, there is help to be found: the Eating Disorder Support Group.

This support group is provided by psychological services and is run by Nancy Grant. The group is not just for those who have eating disorders but also for those who have had eating problems in the past as well as for students who would just like to discuss issues concerning eating. It is supportive, confidential, attended by a counselor, and meets every Wednesday from noon to one in the Lowry house.

Students can always go to psychology services for therapy or just to talk, but support groups are often more effective because they help a person feel less isolated and let them know they are not alone. One member commented, "I would describe the group as a small, comfortable group that provides an ideal environment for talking with one's peers."

"Relationships formed in these sessions usually extend past the time allotted for us to talk."
—Nancy Grant, Eating Disorder Support Group Coordinator

Grant says that she does not define the issues that will be discussed in the sessions and that she is merely a facilitator. Items discussed in these meetings include social pressures, the effects that eating in the Bison over the cafeteria have, how people observe you as well as the way that you eat, and the loneliness that may occur due to these disorders.

"Relationships formed in these sessions usually extend past the time allotted for us to talk," said Grant. It very often happens that members of the group become friends and help each other outside of these sessions. Another member commented, "As far as the group being helpful, it was helpful because it gave me girls to talk to who understood the struggles that I was facing."

The size of the group has been smaller than Grant would like this year, and she encourages students to come to these groups on Wednesdays even if it is just talk about any issues that have been upsetting. Finally, a student commented, "Being healthy does not mean being skinny or starving yourself to get there, it means being able to function daily and enjoy the world around you."

Women fall just short of league crown

Field Hockey loses to Lafayette 3-0 in championship contest; finishes season 14-7

By Jennifer Cruickshank

After a record-breaking season, the Bucknell field hockey team finished its year at Lafayette, falling to the Leopards in the Patriot League Championships. The Bison finished the season with a 14-7 record, tallying the most single-season victories in the history of Bucknell's field hockey program.

"We really had a great season," senior tri-captain Katey Twombly said. "I think we were all sad to see it come to a close."

The third-seeded Bison faced the second-seeded Fairfield Stags in the first round of the Patriot League Tournament at Lafayette. Bucknell lost a controversial double-overtime thriller at Fairfield during the regular season, and the tournament match was more of the same.

"We played well and had our chances, but it turned out to be their day."
—Field Hockey Tri-captain Katey Twombly '00

The Bison got on the scoreboard first, netting the first two goals of the game. Melissa Maher '02 netted the first goal of the match during a scramble in front of the Fairfield cage, then Twombly set up freshman midfielder Amy Marvel for the eventual game winner. The Stags would score only three minutes later, making the score 2-1, but the Bison defense held off the Stags' attack to secure a 2-1 victory. Defenders Katie Yingling '01, Monica McCorry '02 and tri-captain Malina Anderson '00 led Bucknell's defensive effort and stifled the Stag attack for the remainder of the game, allowing only three shots on freshman keeper Sonja Wettergreen.

With their two goals against Fairfield, the Bison set another record.

From left to right: Carli Graytock '00, Ron Hess '00, Dave Bronfenbrenner '00 and Jennifer Hart '00. Helped capture '99 Patriot League title.

Cross-country captains excel on, off course

By Rose Sedo

In simplest terms, a leader is one who knows where he wants to go, and then gets up and goes. Ideally then, other people follow the leader, and a collective vision or goal is eventually reached.

The leaders in this case, are Bucknell's four senior cross country captains. The goal was winning Patriot League Championships. Jennifer Hart '00, Carli Graytock '00, Ron Hess '00, and Dave Bronfenbrenner '00, are all responsible for leading the Bison men and women's cross country team in such a way as to ensure victory.

But what exactly are the duties of a captain? Obviously, one of the huge responsibilities is that besides motivating oneself, one must inspire the entire team to compete at an extremely high college level. This is often easier said than done.

On the women's side, there were not too many overwhelming obstacles in achieving unity and community among members.

"Instead of just having to worry about myself doing the right stuff, I have to worry about 30 other people doing the right things. When you factor in the mental aspect of cross country, it gets even harder," said Graytock.

Co-captain Jen Hart agrees. "When there are 30 girls on a team with very different personalities, it's sometimes hard to get everyone going in the same direction. But we've been lucky-there are 30 very self-motivated girls on the team who want to be at practice everyday, and we just basically have to take care of the details," said Hart.

For the men, there were the same kinds of sentiments on motivation.

"This team is so great that it

Women's soccer blasts Wagner in finale

Anne Willis—The Bucknellian

The Bison closed their season with an 8-1 victory over Wagner to finish with an 8-8-1 record (3-3 League)—their first .500 finish since 1996.

By Andrew Bevan

The Bucknell women's soccer team lost a difficult Patriot League contest to Navy, 3-0, two Sundays ago, which dropped them to fifth place in the Patriot League and out of contention for a spot in the Patriot League Tournament. However, the Bison responded well to this loss and bounced back in their final game of the season, defeating Wagner 8-1.

"We didn't play with fire to win it," head coach Chrissy Findlay said about the Navy game. "Navy is the best team in the League in my opinion, but they were not three goals better than us—which is disappointing."

The Midshipmen scored just over halfway through the first half and netted two more goals early in the second half to seal the win. Laurie Purse '03 had five saves in net for the Bison.

"Although we knew that our season was depending on the outcome of our game against Navy, we just couldn't get things to come together for us on Sunday. It was a very disappointing loss, especially for the seniors, but Navy is a very strong team who probably will end up winning the league," Katie McElligott '00 said.

The following Tuesday the Bison prepared to play their final game of the season in what turned out to be a very emotional evening, with five seniors making their last start for Bucknell. Also, Talia Ciccone '00, who was lost for the season two minutes into preseason practice with a knee injury, made her first start of the season. Ciccone was announced in the starting lineup and was on the field for the kickoff, but she was quickly substituted when the ball was played out of bounds because of her injury.

Four seniors scored on this memorable night. Sarah Stopper '00 got

Beyond the Bubble

Lions Not Invincible: Penn State's hopes for a national championship took a major blow Saturday. The Minnesota Golden Gophers used a last-second field goal to steal a 24-23 victory over the previously unbeaten Lions at Beaver Stadium. The loss dropped Penn State from #2 in the nation down to #8 and all but assured that they will not be playing in this year's national title game.

Trailing 20-15 in the fourth quarter, Minnesota quarterback Billy Cockerham hit Thomas Hamner with a 49-yard touchdown pass to give the Gophers a 21-20 lead. Penn State answered with a 44-yard field goal to reclaim the lead, 23-21. On their next possession, the Lions drove to into Minnesota territory once again. But on fourth-and-10 at the 33-yard line, coach Joe Paterno opted to punt rather than attempt a field goal.

The Gophers started from their own 20-yard line with 1:50 remaining and quickly moved the ball into field goal range. A spectacular catch by Arland Bruce put Minnesota at the Lions' 13-yard line with less than a minute left. After running two plays to set the ball up in the middle of the field, kicker Dan Nystrom nailed a 32-yard field goal with no time remaining on the clock.

"It's like a nightmare," Lions fullback Mike Cerimele said. "We have to wake up, snap out of it. It's reality. We lost. It's tough right now." Commenting on his decision to punt, Paterno said afterwards, "I thought it was a tough field goal, and if we missed it, we'd give them good field position. Sometimes you're right. Sometimes you're wrong. I'd probably still do it."

Tiger is Invincible: Tiger Woods became the first player since Ben Hogan in 1953 to win four straight tournaments, capturing the American Express Championship in Sotogrande, Spain. Woods drained a 12-foot birdie putt on the first playoff hole against Spanish star Miguel Angel Jimenez to win the final event of the year and become golf's first $6 million man. "I've had a great season, and it's nice to end it this way and to get a victory on a tough, tough, tough day," Woods said.

Only an hour earlier, it appeared one of the greatest rounds of Woods' career would be wasted when his second shot on the 17th hole rolled off the green and into the water, eventually resulting in a triple bogey. But Jimenez made a bogey on the last hole to fall back into a tie and allow Woods another chance.

Tiger has won eight times in his last 11 tournaments. He became the first player since Johnny Miller in 1974 with eight PGA Tour victories in one season. By finishing the year with four straight victories, he earned more than $6.6 million in 1999, nearly $3 million more than second-place David Duval.

Boggs to Retire: Tampa Bay Devil Rays' third baseman Wade Boggs is expected to announce his retirement from professional baseball within the next few days. According to the St. Petersburg Times, the future Hall-of-Famer and his agent, Alan Nero, have talked with the Devil Rays for the past several weeks about his future. Boggs, 41, apparently has accepted a personal services position with the organization that will include on- and off-field roles.

During his 18-year career, Boggs won five American League batting titles, was selected to 12 All-Star Games and earned two Gold Gloves. He also won a World Series with the New York Yankees in 1996. This past summer, he became the 22nd player in history to reach 3,000 hits. Boggs finished the 1999 season with a .301 batting average, his 15th time at .300 or better. His career average is .328 over 18 seasons spent with the Boston Red Sox, Yankees and Devil Rays.

Galloway Returns: Pro Bowl wide receiver Joey Galloway says he decided to end his season-long holdout and return to the Seattle Seahawks because he missed playing in the NFL. His holdout began when he missed the start of training camp Aug. 1. It has cost him $1.047 million: $837,117 in lost salary and $210,000 in fines.

Without Galloway, coach Mike Holmgren has the Seahawks off to a 6-2 start and in first place in the AFC West. The Seahawks host Denver on Sunday night. Galloway said he is ready to help his team right away, but wasn't sure when Holmgren will use him. On Monday, Holmgren said it would be difficult for Galloway to begin playing right away.

"I'm going to give it everything I have," Galloway said. "I want to play as soon as possible. The coach will have to make a decision later on in the week whether he thinks I'm ready to play or not."

TWO YEARS THAT LAST A LIFETIME FOR

Sports

Ultimate frisbee "gets over the hump" in tournament win

Courtney Yohe —The Bucknellian

Pete Wise '00 defends a Johns Hopkins player in an ultimate frisbee tournament last Saturday at Bucknell's intramural fields.

By Adam Feldman

Winning is all psychological!

Many sports teams have had the talent to win, but never seem to be able to win the close games. Players and coaches appear baffled when their teams fall apart in do or die situations.

"Why can't our team just get over that hump?" This has become a common question for teams stacked with talent but unable to win the big one. Many times learning how to win is the biggest key to becoming a true champion.

Spotlight on Club Sports: Ultimate Frisbee

Bucknell's ultimate frisbee team, the Mudsharks, has had a tradition of losing the close ones, especially this semester. This year the 'Sharks have a very young, inexperienced team with few returning players. However, the players that have returned, such as captains Matt Fisher '00 and Adam Feldman '01, have played in many close games.

Unfortunately, much of their experience with close games has been on the losing end. When the semester began, the two captains were optimistic that their experience with close games would give the team enough confidence to get over the hump and win a game that came down to the wire.

However, the 'Sharks seemed destined to lose by one or two. Throughout this season the Mudsharks went to tournaments and would go 1-3, losing by a combined score of three to five points. The 'Sharks were zero for the century when it came to games decided by one or two points.

Confidence began to dwindle and frustration continued to grow. Would the 'Sharks ever be able to win the close game? Do the 'Sharks know how to win? The athletic ability is there, the team has a strong sense of unity and good leadership, but yet the team continues to lose the close ones.

Until now.

This past weekend the MudSharks hosted their own tournament here at Bucknell University on the Intramural fields. The team went undefeated and proved to the ultimate community that they do know how to win.

What set the tone for this change was the 'Sharks first game against American University. The Mudsharks talent level was obviously higher then the team from American. However, the 'Sharks knew not to take any team lightly and started the game playing extremely well. The 'Sharks jumped out to an 8-5 lead and were playing great. Due to time restrictions the game was to be played to ten, rather then the typical thirteen. However, once again the 'Sharks seemed destined to lose. A few quirky plays later and the score was suddenly 8-8.

The 'Sharks then dropped a guaranteed score in the endzone and then allowed American to march all the way up the field and go to game point, 9-8. This is when the tide truly turned. Thanks to strong play from senior Pete Wise and Junior Steve Catherwood the 'Sharks scored the next two points to win 10-9. Following a sigh of relief, the 'Sharks stepped off of the field and suddenly became a new team.

At this exact point the 'Sharks realized that they could win the nail biters. This set the tone for the rest of the afternoon.

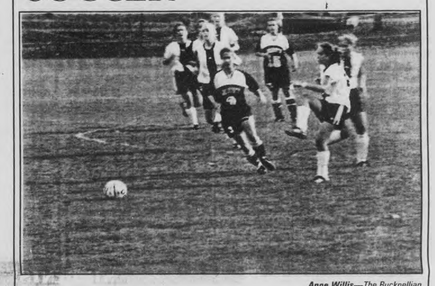
The Mudsharks second game was against a strong team from Johns Hopkins. The 'Sharks anticipated another extremely close game. However with their new "we can win" attitudes, and the help of some of younger players like Justin White '02 and Ken Taga '02, the 'Sharks blew away JHU 13-5. This set the stage for the Mudsharks final game against George Washington.

George Washington was also undefeated going into their game with the 'Sharks. The winner of this game was to be named winner of the tournament. The 'Sharks quickly fell behind 3-0 on some extremely sloppy offensive and defensive play. There even appeared to be some bickering between some of the players.

But the 'Sharks called a timeout and settled down. Following the timeout the 'Sharks came out on fire. They eventually took the half 7-6. This game semed destined to come down to the last play. However, the 'Sharks carried their momentum from the first half into the second half. The 'Sharks completely took the George Washington team out of their game. The 'Sharks set the tone for the second half with some stellar defense. Jason Klecka '03 made a layout "D" (Defense), announcing that the 'Sharks were here to play. The 'Sharks eventually won the game 13-9. At the end, the 'Sharks collapsed into a giant hug and gave a final cheer to GW for playing such an intense, spirited game.

The weekend was a superb success for the Bucknell Mudsharks. The tournament ran perfectly smoothly, while the 'Sharks learned that they have the ability to win the big one.

SOCCER from page 9



Anne Willis—The Bucknellian

Bucknell's 3-0 loss to Patriot League power Navy ended its postseason hopes.

things going for the Bison when she scored five minutes into the contest. McElligott followed with the game-winner and added one more later on to finish with 26 goals in her Bucknell career. She also had an assist to finish fourth on the all-time points list at Bucknell.

Fellow senior Colleen Butler notched two goals as well, and she increased her assist total to nine to finish seventh on the all-time assist list at Bucknell. Katie Senderowitz '00 scored her first goal of the season just before halftime, and sophomore Meredith Barnes added two goals of her own. Senior Kerrin Wetzel had five saves in net for the Bison.

"All in all we outplayed them. We played well on emotion," Findlay said. "It was obvious that our underclassmen were playing for our seniors. I was proud of everyone."

"It was a definitely a memorable night, which I wanted it to be for the seniors since we did not make it into the tournament," Findlay said.

The Bison finished the season 8-8-1 overall and 3-3 in the Patriot League, finishing at .500 for the first time since 1996.

Some notables for the team in '99 included the most overtime games (4) in the history of the program as well as the second best goals against average (1.3) in the team's history.

Individual accolades went to Tara Utchel '03, who was selected as Patriot League Rookie of the Year, and McElligott, who was named first team All Patriot League. She is the first player ever to be named All-League four years in a row. Kelly Irvin '03 was also named to the first team, and Barnes was named to the second team.

Findlay looks forward to the bright future of the young Bison. "I know with the talent and the work ethic of our team that the 2000 season is going to be our season. It is going to be the one. We are almost there," Findlay said.

FIELD from page 9

Those two goals brought the team's season total to 50, tying the previous Bison record of fifty goals in a single season. The Bison sought to break the record and win the Patriot League Championship against host Lafayette the following afternoon. Lafayette reached the finals after picking up a 4-2 win over fourth-seed Holy Cross on Saturday.

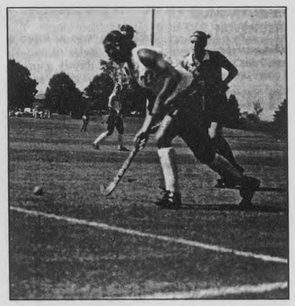
The Bison fell to Lafayette in a close overtime game earlier in the season, and in this game, held the favored Leopards scoreless for the majority of the first half. Lafayette converted a penalty stroke before intermission, and that would be all the scoring they would need.

The Leopards scored again with 20 minutes left in the game, and again in the final two minutes to capture the Patriot League Championship, 3-0. The score was not an indicator of the close nature of the match, and Wettergreen tallied 14 saves to keep the Bison competitive. Lafayette will advance to the NCAA Tournament as a result of the victory.

"Lafayette is a tough, nationally ranked team," added Twombly. "We played well and had our chances, but it turned out to be their day."

In accordance with their record-setting season, many Bison players received honors at the Patriot League awards banquet. Wettergreen was named the 1999 Patriot League Rookie-of-the-Year, while Twombly and tri-captain Jenny Zimmerman '00 earned first team All-League honors. Defensive forces Yingling and McCorry were named second team all-stars.

The Bison will graduate their three captains this year —Zimmerman, Twombly and Anderson.



Evans Mitchell—The Bucknellian

Lauren Campbell '02 controls the ball for the Bison.

Wrestlers open season at Army

Young team struggles in season-opening tourney

By Justin White

The Bucknell wrestling team hit the mats for its first tournament of the season on Nov. 6 at the West Point Invitational. The tournament served as a tune-up and a good evaluation of the team as the season starts.

The Bison only graduated two starters from last season, leaving them with seven returning starters. This provides them with some key leadership and experience.

The team's co-captains are senior Rashaan Williams and junior Ryan Fasnacht. Head Coach John Hangey said he also will look to Rocky Miller '01, Adam Webb '00 and Brian Pitzer '00 "to provide guidance and leadership and step it up this season."

The team's performance at the invitational showed some rust, which can be expected in such an early tournament. Hangey called it, "a good starting point for the team, with nowhere to go but up."

The team brought 20 wrestlers, forcing 13 Bison wrestlers to move up a weight class from where they normally wrestle, making it difficult for the team to play up to its ability.

The Bison were able to put together some strong individual performances in the tournament. Miller finished third in the 141-pound weight class, going 6-1 on the day. He lost his first bout, 8-7, but won six straight in wrestle-backs en route to the bronze finish.

Also impressive was sophomore Brian Falciglia, who went 4-2 in the tournament, placing fourth for Bucknell at 197 pounds.

Brian Pitzer went 3-1 on the day, taking second place in the 174-pound weight class. Pitzer beat Marc Dufresne, 8-4, in overtime in the finals to take the silver. Pitzer pinned Army's Lane Chereskin in 58 seconds, decisioned Seton Hall's Bobb Barber (16-4) and pinned Army's Peter Bakke in 1:51 to advance to the finals.

Pitzer was Bucknell's lone representative at the NCAA Championships last season. He was given a pre-season ranking of 11th in the nation by USA Wrestling after finishing 33-9 last season, including 20 wins by fall.

Bucknell begins its dual match schedule on Nov. 21 against Shippensburg and Lycoming.

PHILLIPS from page 14

and Phillips connected with him for an eight-yard score. Their two-point conversion attempt failed, but the Bison took their first lead of the game, 12-7, which they never would relinquish.

Fullback Jason Marrow '01 attributed the success of the Bison ground game—which rolled up 270 yards—to Phillip's outstanding performance. "Because of the success of the passing game, they weren't able to put as many players up front to stop the running game, and our tight ends were hurting them through blocking and through the air," Marrow said.

Holy Cross marched into Bucknell territory on its next possession, but Justin Lustig '00 forced and recovered a Hall fumble. Lustig had an outstanding day, registering seven tackles, a tackle for loss and two pass break-ups along with the forced fumble and recovery.

Bucknell took over on the Crusaders 48 and needed just two plays to reach the endzone. After rushing for a four-yard loss on first down, Dan Palko '00 more than made amends with his 52-yard touchdown reception from Phillips. Lundberg's PAT put the Bison up 19-7.

Bucknell's stingy defense held Holy Cross three-and-out, and the Bison again took over in Crusaders' territory and again only needed two plays to score.

This time the big play was junior LeMario Bradwell's 45-yard touchdown run. Lundberg's PAT failed, but the Bison were cruising 25-7.

The Crusaders displayed their resiliency, striking back with their first big play of the day, a 35-yard pass play from Hall to Nate Robbins. Hall sneaked in from the one and found Tony Thompson for the two-point conversion to slash Bucknell's advantage to 25-15.

Early in the fourth period, Bucknell again utilized the big play to seal the victory. Marrow rumbled 38 yards and then took in it from the two to stretch the Bison lead to 32-15.

Marrow's touchdown was his twelfth on the season, ranking him second in the Patriot League. It also brings his career total to 23, placing him fifth on Bucknell's all-time charts.

The Bison now stand at 6-3 (2-2 in the Patriot League) with two league games remaining. Lehigh (8-1) travels to Lewisburg this Saturday to give the Bison their stiffest test of the season.

The Mountain Hawks had their 20-game regular season winning streak snapped last Saturday when they squandered a 17-0 lead to fall to Colgate, 28-24.

The Bison defense forced four Holy Cross turnovers and held the Crusaders to four of 16 on third-down conversions, but it must be even surer to stop Lehigh's high-octane attack.

Linebacker Vince Ficca '01, who registered nine tackles (two for losses) and a half-sack against Holy Cross, recognized the team's improvement in guarding against the big play. The Bison defense only allowed Holy Cross one play of over 20 yards, while the offense ran up five such plays of its own.

"Without question, our strength (against Holy Cross) was our ability to stop the big pass," Ficca said. "That was really hurting us at the beginning of the season, but the linebackers and secondary have stepped up."

Lehigh's offense is led by quarterback Phil Stambaugh (2522 yards passing, 23 touchdowns, and the third highest passing efficiency rating in I-A football in '99) and running back Ron Jean (118 yards per game in '99). It has averaged 477.4 total yards and 44.6 points a game this season.

Bucknell will start McDowell at quarterback, but Phillips said he expects to see some time. "(McDowell) has brought this team far enough along over the last three years for him to have that opportunity," Gadd said.

A Bucknell win will spoil Lehigh's Patriot League title hopes and allow the Bison to ride a huge wave of momentum and confidence into next weekend's season finale at Fordham and into the 2000 season. But the Bison players know that this will be no easy task; they must play their best game of the season to win.

"We want to control the time of possession and run the ball," Palko said. "We don't want to get behind early and have to pass our way out of it."

Tim Choate—The Bucknellian

Jabulani Powell '02 dodges a Holy Cross tackler. Powell finished with 89 rushing yards on 19 carries against the Crusaders, and he added an eight-yard touchdown reception. As a sidenote, Bucknell's junior varsity squad defeated the Fork Union Military Academy, 14-11, on October 31 to finish its season at 3-1, the best record of a Bucknell JV squad since 1994. Its only loss was a 30-27 overtime thriller to Milford Academy .

CAPTAINS

from page 9

motivates itself. From year to year, we all have the desire to give it our all. It's a great thing," said Bronfenbrenner.

Another job of the captain is to provide the link between the coach and the athlete. Communication is always key.

"Hearing people out is the most important thing. I tend to lead by example, but the captains need to talk a lot. Deciding as a collection the way that things should be handled and communicated to the rest of the team members was definitely a priority," said Hess.

Being the "middleman" is also an essential task of a captain, and should not be overlooked.

A captain must maintain an objective point of view, since he or she stands on both sides of the fence. Subjectivity can create unwanted politics between team members and the coach.

"Seeing both sides of the issue has helped me to better understand the dynamics of a team. Being the one that has to balance the needs of the team with those of the coach has been a great experience," said Bronfenbrenner.

Looking back, it is pretty evident that these four individuals did the job, and did it well. Head Coach Gulden has had nothing but praise for all four seniors.

"Without a doubt, I truly believe that we would not have achieved what we did this season without these guys. They never avoided doing the right things. They weren't afraid to get things done. Although some people may have complained, they didn't compromise. That's why we got as far as we did," said Coach Gulden.

> *"Without a doubt, I truly believe that we would not have achieved what we did this season without these guys."*
> *—Cross-Country Coach Art Gulden*

The road to success was not always easy for the cross country team, but in fact it has not even really ended. NCAA Mid-Atlantic Regional Championships take place this weekend, but if the past is any indication of how the Bison will perform, there should be no disappointments.

Sports

Wooster's first recruiting class graduates as stars

Seniors Mike Knudtsen, Josh Watts, Alex Bozic graduate after helping take water polo team "to the next level"

By Allison Kuhn

Water Polo Coach Mike Wooster came to Bucknell in 1995 with the intention of stepping up the Bison men's water polo program. When Wooster began recruiting, he had no idea he would find such a phenomenal group of players as seniors Alex Bozic, Michael Knudtsen and Josh Watts.

"This class of players allowed our team to step up a level a year earlier than I expected. We seemed to be on the same pace as far as the development of the team. They are directly responsible for the program making the turn around that it has over the past year," Wooster said.

As a senior, Alex Bozic emerged as a leader. His feel for the game in the water has allowed him to excel throughout his four years. "I have always said that no one knows more about the game of water polo than Alex Bozic. He knows in his head the strategy of this game like no other player on this team," Wooster said.

Bozic's intelligent play opened up opportunities for other members of the team. "His strong grasp of the game helped the team excel as a whole while he was in the water," captain Kevin Permisohn '01 said.

Bozic has also been tremendously persevering in overcoming a knee injury and other obstacles that could have easily taken him out of the game. "Bozic's determination to continue as a member of the team despite some obstacles that he has had to face is commendable," fellow teammate Mike Knudtsen stated.

"Looking back on all four years, I will remember water polo for the rest of my life. It has been such an important part of my experience at Bucknell. I have developed a great relationship with Mike (Wooster) and everyone of the team has been great. As Mike's first recruiting class we have grown with him, and he has been an integral part of my growth as a player as well as a person," Bozic said.

Mike Knudtsen was not going to play water polo this year, until he was offered a spot as back-up goalie. When Knudtsen took on the position of back-up goalie, he gave to team the opportunity to scrimmage in practice.

"Mike did us a huge favor this year by playing. We couldn't have practiced without him. We really appreciated what he did," Wooster said.

Although Mike didn't travel with the team, he certainly put in the effort that was needed. "Mike has made us a better team because of all his hard work," Permisohn said.

Knudtsen returned to the team because of the friendships he had formed during his earlier years on the team. "I came back to help out because of the friendships that I had formed and because I really enjoy being part of a team. It is an experience that I will take with me for the rest of my life," Knudtsen said.

Although Knudtsen was the back-up goalie and not first string, he shut out Grove City in a tournament earlier this year at Bucknell.

Josh Watts has been a scoring threat to opponents since he first arrived at Bucknell in 1996. He has developed as a player over the years and has surfaced as a leader. Watts' scoring threat has made him one of the best in the East.

"Watts has been a big part of the program for two years. He came from a smaller program out West and has now become one of the top two-meter men on the East Coast. He will be hard to replace," Wooster said.

Watts' dominance has helped the team in a variety of ways. "As one of the premier scoring threats in the league, Watts drew a great deal of defensive attention which allowed many opportunities for other team members," Permisohn said.

This year Watts was able to break the team scoring record for most goals scored in a single game. Watts scored 13 goals against Washington and Jefferson in the final tournament of the season. "I was really excited that Josh broke the record, he deserved to be able to leave his mark on a team that he helped change and form," Knudtsen said.

The three seniors have left their mark and their efforts will continue to have an effect in the years that lie ahead for the Bucknell water polo program. "This year's seniors have created tremendous development of the freshmen on the team," Wooster said.

In addition to their talent and hard work, they have also created a team character that will continue as well. "As a whole this year's seniors had an integral part in maintaining team spirit," Permisohn said.

Along with their water polo bonds they have made friendships that will last forever. "We have been together since my first day at Bucknell. I can't imagine life here without Watts and Bozic. We will continue to stay friends for the rest of our lives," Knudtsen said.

Jonah Half—The Bucknellian

The seniors led the team to a 19-10 record in '99. The Bison fell just short of Easterns with a 10-8 loss to George Washington.

Prince Ali's Football Picks

By Ali Ahmed

(7-1) Dolphins 17 at (6-3) Bills 24

Dolphins will have a hard time running against the Bills and Huard will have a hard time winning it in the air. A play maker like Flutie has the best chance to crack the Miami defense.

(1-8) Browns 9 at (5-3) Steelers 34

Kordell seems to be getting better and Pittsburgh's defense is still dominating. But there's only one thing that matters. Bottom line, Cleveland stinks.

(5-3) Chiefs 9 at (4-4) Bucs 13

Two bad offenses and great defenses go at each other with ugly results. Bucs free safety Lynch will be key in nullifying the Chief's occasional big play ability.

(4-4) Packers 27 at (4-4) Cowboys 20

The Cowboys have too many injuries to win. Brett Favre will not allow his team to lose three in a row.

(5-4) Vikings 38 at (4-5) Bears 10

Jeff George has got the Vikings back on track. They should have an easy time with the Bears' defense.

(6-2) Colts 27 at (5-3) Giants 9

The Colts probably have the most balanced offense in the league. Rookie Edgerrin James continues to put up numbers, even against the better defenses in the league.

(4-4) Chargers 6 at (4-4) Raiders 10

Another defensively dominated game. So much for the Chargers off-season moves to pick up veteran help at quarterback. Even the defense is starting to show signs of weaknesses.

(3-5) 49ers 13 at (1-7) Saints 17

Upset of the week; Ricky Williams should have his second big game against one of the worst defenses in the league.

Last week : 4-4 **Season to date: 11-11**

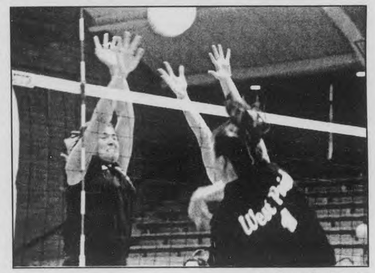
Second straight 1-1 weekend for Bison

VOLLEYBALL from page 14

mances, including Brooke Bader '01, who registered 20 kills while hitting .500 for the match. Wrigley had 28 digs while Lesh tallied 27 digs. Sophomore Shannon Walker also put down 18 kills.

"They stayed motivated," assistant coach O'Brien said. "They played their game and never backed down."

Bucknell's season draws to an end this Friday at Navy. "Sometimes you play for championships and trophies, but sometimes you have to play for pride," Opalski stated in reference to the upcoming game.



Tim Choate—The Bucknellian

The Bison avenged an earlier loss to Army, winning in four games.

Crew gains valuable experience at the Head of the Occoquan

By Sean Houston

The Bison crew traveled to Fairfax, VA this past weekend to compete in the Head of the Occoquan and had considerable success.

The women's varsity lightweight four placed eleventh in a very competitive field of 22 boats. Their success was particularly impressive considering that they were racing in an openweight event. The men's varsity lightweight eight were also very impressive, finishing third in a strong field of ten boats.

For the second straight weekend, the men were able to beat their rival, the University of Pittsburgh, and came close to beating Johns Hopkins.

With five second-year rowers in the boat, they have coalesced into a speedy boat in a remarkably short period of time and have shown improvement each weekend.

The experience gained during the fall season will make the lightweight eight a force to be reckoned with during the spring.

Due to the infrequency of lightweight-four events, the women will not be able to race again as lightweights again until the late spring. They have demonstrated excellent potential during the fall season.

This coming weekend the Bison will host the Walker Lake Sprints, their final race of the fall season.

The varsity women will row an openweight eight during this event. The novice men and novice women will also be competing.

A Penn-State hater in Lion Country

Commentary

Carmen Mauriello
Sports Editor

I hate Penn State.

Sports fans from this area are taught at an early age to love either Penn State or Notre Dame—and hate the other. I decided to continue a family legacy of Notre Dame fanaticism, vowing to hate the Nittany Lions to my dying day.

But I do love football. And there's no better place around here to watch a football game than in Happy Valley. So when my friends invited me to State College to watch Penn State's Homecoming game against Minnesota last Saturday, I gladly accepted.

The game took on added significance because with victories in its final three games, Penn State (9-0 and ranked #2 in the nation) would be selected to play in the Sugar Bowl on Jan. 2 for the national championship. But Minnesota (5-3) was a pesky, underrated Big 10 team, and I smelled an upset, with the Nittany Lions looking ahead to a huge match-up against Michigan the following Saturday.

I arrived in State College Friday evening to the sounds of trumpets blaring and the sight of fireworks. Over 100,000 people lined College Avenue to witness the annual Homecoming parade, and thousands of students participated in the traditional "guarding of the shrine."

"Better than the Bucknell Homecoming parade," I joked. Oh wait, we don't have one anymore.

My friends and I departed for the game (a noon start) at 10:15 a.m. Saturday and met up with two Penn State students, Dan and Tom, "true blue" Nittany Lions fans. After our introductions, they asked me about how much I liked the team. I told them that I hated Penn State with a passion and was going to root against them at the game.

They laughed and said it wouldn't be in my best interest to root for Minnesota in the midst of 15,000 crazed and, for the most part, drunken Penn State students in the student cheering section. My friends Jason and Brendan warned me that they would hand me over to the angry mob if I rooted against the Blue and White. I smirked.

We arrived at the stadium at 10:30 a.m. and got eighth row seats (seating in the student section depends upon how early you get to the game). The cheerleaders passed out blue and white pom-poms to all the entering fans. My friends forced one upon me, which I covertly deposited in the trash. I figured the next hour-and-a-half would be pretty boring, watching the teams perform their pre-game warm-ups.

We grabbed an exorbitantly priced meal of hot dogs and pretzels at the concession stand. The worker poured our spring water into paper cups, saying that plastic bottles were now prohibited in the stadium after a fan was blinded by a flying one at the last game. I gulped.

When we took our seats, I was amazed at how packed the stadium was already. A steady stream of fans wearing Penn State sweatshirts, hats and jerseys passed by, while the more extreme fans were busy painting their chests blue and white. There was even a kid in the front row painting his face and bald scalp blue and white.

About 20 rows up from me, a traitor wearing a Minnesota sweatshirt was recognized and a chant (shall we say, mildly derogatory toward his manhood) surfaced. I put my head down and gulped again.

The placekickers were taking practice kicks, and gradually more positions and players took the field. Glancing around, I could see hundreds of fans watching the Nittany Lions' warm-ups intently, and referring to their game programs for players' jersey numbers and statistics. I even found myself asking questions about who so-and-so was and making comments about nice punts or dropped passes.

Before I knew it, Penn State's legendary, 150 member Blue Band took the field. They put on an amazing show, and the stadium transformed into a sea of blue and white and a chorus of Nittany Lions' fight songs. I even joined in to the student section's rendition of the alma mater, a rhythmic chant of "we don't know the God damn words."

Then, Penn State's Lion mascot came out, and the crowd went nuts when he attacked Minnesota's mascot, Goldie the Gopher. Everyone was on their feet and screaming when Joe Pa and his boys took the field; Minnesota tried to sneak on, but couldn't manage to avoid the boos.

The Penn State defense stuffed Minnesota to open the game and the Nittany Lions' offense methodically marched down the field. When Mike Cerimele found the endzone from the five, Jason told me to turn around and watch out for flying drinks (he had been hit by a full Mountain Dew can the previous game). It was a student section tradition to fling foreign projectiles through the air to celebrate a Nittany Lions' score. I kept my eyes on several full cups of soda traveling down from the top rows, but luckily none came my way.

After Minnesota's offense again proved futile in its second possession and the Nittany Lions had another scoring opportunity, I assumed that the game would be a blowout and decided that it'd be more fun to root for PSU and join in the festivities. My 96,000 new friends agreed.

But somebody forgot to tell Minnesota that. Just when the Gophers looked ready to roll over and die, Minnesota's offense came alive with two scoring drives to take a 9-7 lead.

Even though Penn State rallied to take a 17-9 lead, there was much concern among the fans. I was right in the middle of it—having a great time might I add—contesting calls, screaming for PSU's defense to make a big play, calling out open receivers, provoking the Lion's antics and giving high fives. But inside my heart, my hatred of the Blue and White was stronger than ever.

When Minnesota's Billy Cockerham hit Thomas Hamner on a 49-yard scoring strike in the fourth quarter to give the Golden Gophers their first lead of the game, 21-20, I couldn't hold back any longer. While the students dropped their heads in shock, I (and I guess the guy in the Minnesota sweatshirt, too) rose my fists in triumph and started yelling, "Go Gophers!"

My friends began punching me and several students verbally assaulted me, but I would not retreat. My fun was just beginning.

Travis Forney's 44-yard field goal put the Nittany Lions ahead 23-21 late in the game, but Minnesota had one final chance with 1:50 remaining. A 46-yard bomb from Cockerham to Rob Johnson gave the Gophers first-and-10 at the Penn State 34, and the crowd was left holding its breath.

The drive was stalled by All-America linebacker LaVar Arrington's sack, and a fourth-and-16 play was the only thing standing in the way of the Nittany Lions' 10th win.

Cockerham launched a bomb down the left sideline, and the students rejoiced as it appeared the ball had hit the ground by the distant stick figures. But I switched focus to the Minnesota sideline, which was celebrating wildly. Disbelief and utter shock spread throughout the stadium as it was announced that the pass had been completed and Minnesota would have the ball, first-and-10 at the Nittany Lions 15.

I celebrated and tried to rub it in on my friends, but I didn't have the heart when I looked at Dan, head down and eyes watery. True freshman Dan Nystrom kicked a 32-yard field goal as time expired to give Minnesota a 24-23 victory, the biggest upset in college football this season—all but ending Penn State's hopes of a national title.

Instantaneously, silence ensued. Fifteen minutes of pure silence. 96,000 people not moving, not talking. Perhaps not even breathing.

I looked around, seeing real pain and suffering in thousands of faces, and realized that this was much more than a football game to those in attendance. Penn State is a big part of their identity, and the game was a very personal and emotional loss.

I've never seen that kind of devotion before, except in myself; I remembered how I used to feel after a Notre Dame loss. Then I sat down, ashamed of my juvenile antics, and shared some of the pain of that Beaver Stadium crowd.

Even though I returned to Bucknell Sunday hating Penn State more than ever, the school and its team earned the one thing I never could have imagined giving them: my respect.

Backup is magical in Bison win

Quarterback Lucas Phillips '01 sparks 32-21 victory over Holy Cross

By Carmen Mauriello

Junior quarterback Lucas Phillips came off the bench to throw three touchdown passes and lead the Bison football team to a 32-21 victory over Holy Cross last Saturday.

After Bucknell's offense managed just one first down in the first quarter and Holy Cross jumped out to a 7-0 lead, Bucknell head coach Tom Gadd replaced three-year starter Don McDowell '00 with Phillips.

"When the offense bogs down, you sometimes need to change quarterbacks to get a spark," Gadd said.

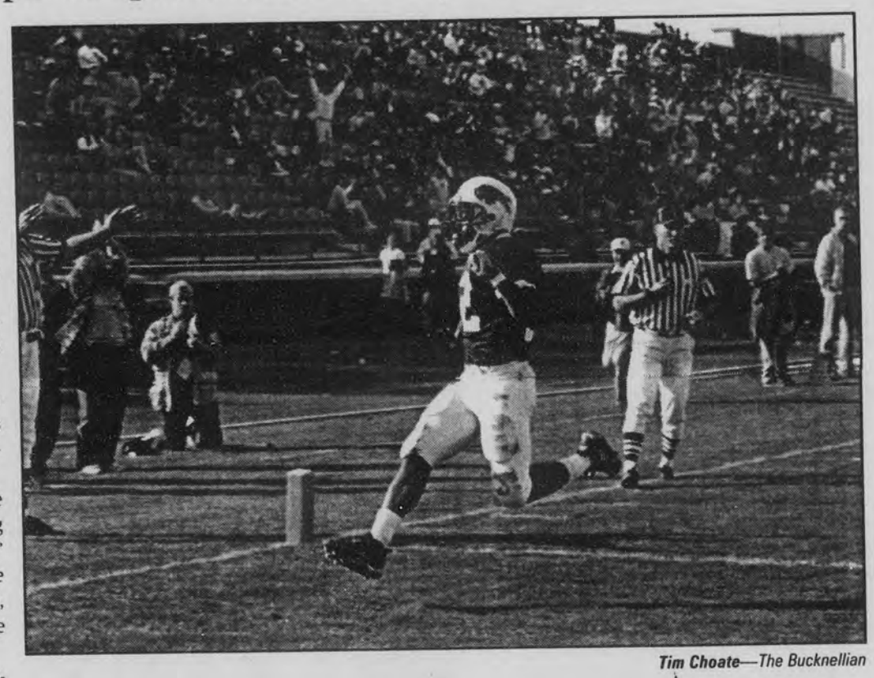
Gadd asserted that the quarterback switch was planned prior to the game to give Phillips valuable playing experience that would prepare him to lead the team next season.

"We made a decision when we put the gameplan in for this game that we were going to put Lucas in after three or four series," Gadd said. "Maybe it was something we should have done at Lafayette two weeks ago, but you don't like to make a change in a game when you're winning."

Phillips, who threw for 149 yards on 10-17 passing with no turnovers, said that he expected to go into the game in the first half, but only for two possessions.

"I've been waiting to play for so long and it was so much fun to get in," Phillips said. "It was to my advantage to watch the first three series, because I was able to study the defense."

Phillips immediately capitalized on his opportunity, driving the Bison 72 yards on 10 plays. He kept the drive alive with a key third down conversion to Jim Horan '03 to the Holy Cross 20, and again hooked up with Horan for a 15-yard score. Chris Lundberg '03 missed the extra point attempt, and the Bison trailed 7-6.



Tim Choate—The Bucknellian

Jabulani Powell '02 crosses the endzone on an eight-yard touchdown reception from Lucas Phillips '01. The score gave Bucknell a 12-7 lead, which it would never relinquish.

Later in the second period, Andy Carmona '02 intercepted Holy Cross' Brian Hall, giving the Bison offense excellent field position at the Crusaders 39.

Phillips marched Bucknell to the six-yard-line, completing three passes to Horan for 27 yards. But senior Brian Kramer's 24-yard field goal attempt sailed wide left, and the Bison went into the locker room down 7-6.

But the rejuvenated Bison quickly erased that deficit in the second half, as Phillips hit Greg Readinger '02 for 28 yards and the Bison ground attack took control to move the pigskin down the field. Jabulani Powell '02 toted the ball four times for 24 yards on the drive,

Volleyball plagued by inconsistency

By Justin White

The Bucknell volleyball team's performance last weekend was very representative of their entire season. At times they were stellar and at other times they were mediocre. However, the Bison walked away from their matches knowing that they gave their best efforts in the most crucial games of their season.

The team's hopes of advancing to the Patriot League Tournament were all but dashed with a loss to Colgate on Friday. However, the team's discouragement did not show the following day, as the Bison avenged an early season loss by beating Army impressively.

Bucknell entered these two conference match-ups needing victories in both in order to improve upon their fifth-place conference standing and qualify for the tournament as one of the top four Patriot League teams.

The Bison came out competitive in the first two games against Colgate. They lost the first game 10-15, followed by a 15-9 win in the second game. However, they came up short in the last two games, 9-15, and, 6-15, to fall 3-1. Coach Cindy Opalski called the match, "a typical up and down match against Colgate. We couldn't sustain our energy level."

Bucknell was led by co-captain Michelle Lesh '00 with 12 kills and 13 digs, along with Jennifer Wrigley '03, who contributed 11 kills and a game-high 19 digs.

The Bison improved their record to 11-10 overall and 5-6 in the conference with a 3-1 win over Army. Army jumped out to an early lead, capturing the first game, 13-15. Bucknell did not back down, and took the second game in convincing fashion, 15-9. The final two games proved to be difficult, but the Orange and Blue pulled them out, 16-14 and 15-13.

The team produced many solid perfor-

"If you think it can't happen to you, you're dead wrong"

Currently serving a 21-year DUI vehicular-homicide sentence, Kevin Price '93 discusses the dangers of alcohol-related blackouts

By Jennifer Jenchura

Speaking to a full house in the Weis Center on Tuesday evening, Kevin Price '93 described how a seemingly harmless drinking game severely altered his life forever.

In a presentation entitled, "It's Not a Game: Alcohol and Blackouts," Price described how drinking with college friends on a July 4 weekend two years after graduation turned into a nightmare.

Price is currently serving a 21-year prison sentence in the Garden State Correctional Facility. While in an alcohol-induced blackout, he took his car keys and went out for a drive with no specific place in mind. Driving for one hour north on the busy New Jersey Garden State Parkway he made a U-turn, and began driving on the wrong side of the road for about a mile south in the northbound lane. His wild drive ended as he crashed head-on into a van carrying six people, five of which died. Price spent three weeks recovering in a hospital.

A passing motorist pulled two passengers from the van, but the remaining four people were not quite as lucky. They burned to death inside. One of the passengers pulled from the van later died at a hospital and the last was left disabled.

"Why I did what I did [in my blackout] I don't know," Price said. To this day, he remembers nothing.

Price bluntly asked the audience about their curiosity in attending the presentation, and immediately addressed how his years at the University are not much different from those of students today.

"I drank the same as the average person at Bucknell did. I knew people who drank more, and some people in fraternities who didn't drink at all. I made a different choice," Price said. "There was always some place to go, always some place to drink."

Looking back over his college years, he attended fraternity parties, apartment parties and weekend tailgate parties. He pledgedKappa Delta Rho his freshman year. He admits that, since his senior year, the University has attempted to provide more activities for students without the need of alcohol.

He said in college he did not "have a clue what an alcohol-induced blackout was." He always remembered what he did the next day. He continued his drinking habits in college only because he thought once graduation came his drinking patterns would change.

Upon graduation, he landed a good job in Manhattan, working for an investment research and management firm and thought he was on the track to success. He was only able to drink when he and his college friends got together about once a month due to late work hours. While on vacation with his friends, however, he began to drink like he was in college again.

"There is no telling how much it takes to blackout," he said.

Price said that, "It doesn't take but one choice to change your life. If you think that it can't happen to you, you're dead wrong, ignorant, stubborn, and plain naïve."

see PRICE, page 2

Composer/ lyricist shares AIDS experience

By Rachel Laskow

With his hands on the piano and the microphone projecting his voice, composer/lyricist Steve Schalchlin shared his experience with AIDS through autobiographical songs Monday evening in Bucknell Hall. The songs are from his award-winning off-Broadway play *The Last Session* which was performed in Los Angeles this past year and in New York two years ago.

Schalchlin's performance, which was at times comical, demonstrated his sentiment that the hardest times can be cured with a smile. "The way I get through a lot of really terrible things is to laugh," he said.

The first song that Schalchlin performed was about the idea of rebelling against a memorial service. Schalchlin spoke about the feeling he had in December 1995 after he had been sick for two years. "I honestly didn't believe that I didn't have any time left on this planet" he said.

According to Schalchlin, he wrote the lyrics first and the music second. He said, "The more specific you get the more universal it becomes."

Schalchlin also performed songs about his parents and the phone calls he received after being tested for HIV.

One song discussed an ex-gospel singer, Gideon, and his last session in the studio when he makes a song for his lover named Jack. It is from this song that Schalchlin got the name for his play.

Schlachlin's performance brought up the question of whether it is worse to be the person who is suffering from AIDS or to see someone you love suffer. "The far worse thing would be to watch someone I love suffering," he said.

Schalchlin considered the next song that he performed, "Going it Alone," to be "the most tender moment of the whole show." According to Schalchlin, it was inspired by his thoughts of his partner Jimmy sleeping in the next room.

He introduced lighter moments to his performance by playing songs that sparked laughter among the audience. First he sang about a preacher who called him when he was very sick and told him he was a bad soul. Reflecting on that experience, Schalchlin sang, "I'd rather be me with AIDS than to have to be you without it."

On a more serious note, Schalchlin introduced the next song by saying, "I'm afraid the infection rate for AIDS is very high among young people." According to Schalchlin, the side effects and the medications feel worse than the disease.

Schalchlin reminded the audience that "there is not a single person in this room who has to be infected with HIV." A drug that saved his life also gave him diabetes and he joked, "Now I can't eat dessert anymore."

He stressed the importance of staying safe and avoiding the disease. "There is only one reason you would keep yourself safe–because you care about yourself, you care about the person who you are with."

After a short break, Schalchlin performed five songs which are not part of his play. He calls this portion "Quiet Session." According to Schalchlin, these songs began with the consternation as the millennium approaches. He said that he felt like people were talking and not saying anything. "The songs are not a specific story, but more of a meditation," he said.

Since his musical, Schalchlin has been traveling around the country talking with various groups about his experiences. His online diary, "Living in the Bonus Round," has been used at the Harvard School of Public Health as part of the course curriculum.

The Bucknell men's and women's basketball teams kicked off their 1999-2000 seasons with exhibition games in Davis Gym last weekend. For a preview of both teams and a synopsis of Bucknell's chances at reaching "The Big Dance," see pages 16-17.

P.U.L.S.E. hosts candid debate on sweatshops

By Elizabeth Muller

Sweatshops were the topic of debate Wednesday night as the Partnership for Unveiling Labor and Sweatshop Exploitation (P.U.L.S.E.) attempted to raise awareness of the issues and feelings surrounding the issue of sweatshops.

At 8 p.m., the debate fired off pitting anti-sweatshop and pro-market against one another. Professor of International Relations and Political Science Tom Travis, Professor of Economics and International Relations Peter Kresl and David Darlington '03 of the Global Residential College argued the pro-market side. The anti-sweatshop side was composed of Assistant Professor of Economics Geoff Schneider, Professor of International Relations Hilbourne Watson and Joell Molina '01 co-President of P.U.L.S.E.

"I thought it was very informative to hear from both sides. It was good to hear arguments from professors and students. It was a definite learning experience," said Marsha Lewis '02.

"It was really interesting to see these professors debating it out because I have had most of them in class. It also opened up pro-market side issues to me that I hadn't thought about before," said Laura Dunn '01.

These participants were volunteers from the University community who graciously agreed to aid the cause with their willingness to participate. The debaters were not necessarily voicing their personal viewpoints, but in some cases were playing "devil's advocate" in an attempt to provide a well-rounded set of arguments.

During the course of the debate, both sides presented answers to a series of prepared questions. They also had opportunity to answer additional impromptu questions which provided for some excitement in the dialogue. Video clips were also used to aid the questions. This provided information about the views of citizens outside the University community, such as Charles Kernaghan of the National Labor Committee and Milton Friedman, a University of Chicago economist.

The goal of P.U.L.S.E. in organizing such a debate was not to advocate either side of this argument. Impartiality was the focus, at least as much as was possible, despite the fact that the sponsoring organization is openly anti-sweatshop in their views and actions. The goal was instead to provide the arguments and counter arguments to an issue that has

Public Safety Log

NOVEMBER 11, 1999

BICYCLE ACCIDENT–Public Safety responded to Route 15 and Moore Ave. for the report of a bicycle accident. A student lost control of a bicycle and fell onto the roadway. The individual was transported by ambulance to Evangelical Community Hospital for treatment of a head laceration and later returned to campus.

HARASSMENT BY COMMUNICATION–A student reported to Public Safety that she received a phone call requesting her to participate in a phone survey and the questions were of a personal nature. The incident is under investigation by Public Safety and Lewisburg Police.

INFORMATION/SAFETY VIOLATION–Public Safety responded to the Smith Quad area for the report of a small fire. The individuals were burning leaves in a grill for a class project. Due to safety concerns, the fire was immediately extinguished.

NOVEMBER 12, 1999

ASSIST PENNSYLVANIA STATE POLICE–Public Safety responded to Roberts Hall for the report from Pennsylvania State Police of a student vehicle abandoned on Route I-80. The operator and owner of the vehicle were located and Pennsylvania State Police responded for the investigation. Traffic citations were issued by Pennsylvania State Police.

INFORMATION/UNIVERSITY PROPERTY DAMAGE–Public Safety responded to Swartz Hall for the report of broken windows. No witnesses or suspects could be located in a search of the area.

PUBLIC DRUNKENNESS/UNDERAGE DRINKING/MEDICAL TRANSPORT–Public Safety and Lewisburg Police responded to Smith Hall for the report of an intoxicated student. The individual was transported by ambulance to Evangelical Community Hospital for treatment and later returned to campus. The student admitted to drinking alcohol while under the age of 21 years and also to possession of false identification cards. Criminal and university citations for underage drinking, public drunkenness and possession of false identification cards were issued .

UNDERAGE CONSUMPTION–Public Safety responded to the Fieldhouse (concert) for the report of underage consumption. East Buffalo Township Police responded and issued a breath test to the visitor. A criminal and a university citation for underage consumption were issued.

PUBLIC DRUNKENNESS/MEDICAL TRANSPORT–Public Safety responded to the Fieldhouse (concert) for the report of intoxicated/unconscious male visitor. The individual was transported by ambulance to Evangelical Community Hospital for treatment and later released.

MEDICAL TRANSPORT–A University student suffered an allergic food reaction while at the Fieldhouse. The individual was transported by ambulance to Evangelical Community Hospital for treatment and later released.

NOVEMBER 13, 1999

MEDICAL TRANSPORT/PUBLIC DRUNKENNESS–While on routine patrol at the Fieldhouse, Public Safety received a report of an ill student. The individual was transported by ambulance to Evangelical Community Hospital Emergency Room for treatment and later released. East Buffalo Township Police responded and criminal and university charges were issued.

MEDICAL TRANSPORT–Public Safety responded to Kappa Sigma Fraternity for the report of a student with a back injury. The individual was transported by ambulance to Evangelical Community Hospital for treatment and later released.

INFORMATION/VEHICLE DAMAGE–Public Safety responded to the Lower Harris parking lot for the report of damage to a parked vehicle. No suspects or witnesses were located in a search of the area. The incident is under investigation.

INFORMATION/LOST OR STOLEN IDENTIFICATION CARD–A student reported to Public Safety that her Bucknell ID card was lost or stolen while she was at the Bull Run Inn. Lewisburg Police was notified.

NOVEMBER 14, 1999

UNDERAGE CONSUMPTION–While on routine patrol, Public Safety spoke with an intoxicated visitor near Rooke Chapel who was upset over a domestic situation. East Buffalo Township Police responded and criminal and university citations for underage consumption were issued.

UNDERAGE CONSUMPTION/DISORDERLY CONDUCT–Public Safety responded to Vedder Hall to assist Lewisburg Police with an intoxicated student who had urinated in public. Criminal and university citations for underage consumption and public urination were issued.

UNDERAGE CONSUMPTION / MEDICAL TRANSPORT–Public Safety responded to Carey House for the report of an injured student. Upon arrival, Public Safety determined that the student had sustained a kick to the head during horseplay at an event at Kappa Sigma Fraternity earlier that evening. The student admitted to consuming alcohol although under the age of 21. The student was transported to Evangelical Community Hospital emergency room for treatment. A university citation was issued.

VEHICLE ACCIDENT–Public Safety responded to South 7th St. for the report of a minor motor vehicle accident. No injuries were sustained and there was only minor damage to the cars.

ASSIST POLICE/LEWISBURG POLICE DEPARTMENT–While on routine patrol, Public Safety located a vehicle that was alleged to be involved in a theft at Dunkin Donuts, Lewisburg. During the investigation, a visitor admitted to having taken an ornamental ball from the establishment. A criminal citation was issued:

NOVEMBER 15, 1999

INFORMATION–Two students reported to Public Safety that each received phone calls at their rooms requesting them to participate in a phone survey and the questions were of a personal nature. The incident is under investigation by Public Safety and Lewisburg Police.

MISSING PROPERTY–A student reported to Public Safety that his unlocked bicycle was taken from the side of Coleman Hall. The incident is under investigation.

More University students travel to see Letterman

By Jim Leahy

What do you get when you combine 50 University students, one coach bus and New York City? The answer is a great time. Last Tuesday, "The Late Show" with David Letterman hosted yet another group of students from the University in its studio audience. Praised for our previous performances, this group seemed like it would keep the tradition alive.

The 48 degree Ed Sullivan Theatre, kept cold to keep the comedy fresh, provided little relief from the 20 degree wind chill of New York.

The evening's program was announced revealing that movie star, music artist and *GQ* Man of the Year for 1999 Will Smith would be the main guest on the show, and the band Creed would also appear. The studio erupted into applause and things were soon to begin. The CBS Orchestra was announced and Paul Schaffer, the director, came out to put the band through its paces and to get the crowd pumped up even more.

The one-hour taping contained a surprising amount of content. In addition to the primary guests, there were several other features. Perhaps the funniest of all was a conversation with the mayor of Kankakee, IL. His city rated last in the Places Rated Almanac; Letterman wanted to find out why and also brighten his spirits. Unveiled in front of the town hall there was a gazebo for the town that was given as a gift to that community. Some other cities included Philadelphia, 29th, and New York, 65th.

Biff Henderson and His Bullhorn were also featured along with the Top Ten list. The items on the list were things that Ronald McDonald would have in his Y2K bunker. The audience laughed at this and at virtually every other word spoken by the members of the show.

The Late Show airs weeknights on CBS at 11:35. Tapings take place from 5:30 to 6:30 p.m. in the Ed Sullivan Theatre on Broadway and 54th Street. Be prepared to laugh, and please, bring something warm to wear. It's cold in there.

PRICE from page 1

Price focused his talk on making the audience aware that actions do have consequences. He guarantees that he would not be in prison if he had not played the drinking game and strongly cautions students to think twice about doing what he did. As for himself, he proclaims that he will never drink again.

The road to recovery has not been particularly easy for Price. He pointed out that it took him two years to be able to clearly look at himself in the mirror and forgive himself for causing the car crash. He wants students to be aware that being drunk is not an excuse. Perhaps the most chilling moment of the entire presentation was when he admitted that although he goes to sleep knowing that "there are five people who are not here because of me," he will never remember that tragic night because he was in a blackout.

> *"The fact that this can happen to you should scare you all to death, because believe me, you do not want to go to prison."*
> *—Kevin Price '93*

"The fact that this can happen to you should scare you all to death, because believe me, you do not want to go to prison," he said. He feels that although his prison term is technically 21 years, he has been dealt a life sentence since he has to think about the five lives that are not here because of him.

"The only reason I can think that I am here is to talk to as many people as I can keep you from making the same decisions," he said.

Price regularly travels to many high schools, but never before encountered an audience as large as the one at the University. He was brought here on Tuesday though the support of the Dean of Greek Life Roy Baker and Coordinator of Drug and Alcohol Programs Bob Thomas.

Price said that he was happy to be able to visit his alma mater once again, although he admitted it was "a little awkward" to be at the University while incarcerated. During his speech, as in the rest of his life these days, two New Jersey police officers were also present on stage to accompany him.

The University warmly accepted Price as he broke down several times and was met by a standing ovation at the conclusion of his hour and a half presentation which closed with a chilling message.

"I can guarantee, based on statistics alone, that my situation will happen to someone in this audience."

PULSE from page 1

become a hot topic in our global system.

"It wasn't about who was right or wrong, it was about spreading awareness," said Shahriar Maleki '02.

The organization also attempted to free University students from the "bubble." It allowed students to decide for themselves and develop their personal viewpoints about the existence of sweatshops and their role in our capitalist system. This forum provided the opportunity for students and faculty alike. The debate attracted about 60 attendees, including Global Residential College members.

> *"It wasn't about who was right or wrong. It was about spreading awareness."*
> *—Shahriar Maleki '02*

"I thought it went well. It fit very well with what we are doing in Global now, it was very useful information," said Kate Dunbar '03.

All around the country student organizations like P.U.L.S.E. have recently been mobilizing to address the existence of sweatshops in our capitalist system. With similar actions, debates, protests, vigils and rallies, students have been taking a stand against the unfair and unjust practices that have grown out of our quest for making a profit. Students are in a very influential position to help further the work towards equality in our world.

As a direct result of this student activism, various universities around the country have been adopting stricter codes of conduct, which apply to companies that provide the items on sale in bookstores and sponsor sports teams.

NEWS BRIEFS

Progress Made Towards Lasting Peace in Northern Ireland

A lasting peace in Northern Ireland seemed a little closer Tuesday when leaders of the province's two main rival parties issued conciliatory statements on the contentious issue of disarmament.

The statements from the Catholic Sinn Fein and the Protestant Ulster Unionist Party (UUP) came after 11 grueling days of negotiations mediated by former U.S. Sen. George Mitchell. The statements are expected to clear significant obstacles to the creation of a four-party administration to govern the British province, as called for in the Good Friday accord of 1998.

"We now have a chance to create a genuine partnership between unionists and nationalists in a novel form of government," said UUP leader David Trimble, Northern Ireland's prime minister-in-waiting.

Trimble had staunchly opposed the inclusion of Sinn Fein in that government until the outlawed Irish Republican Army (IRA)—which the Unionists believe is closely connected with Sinn Fein—agrees to disarm.

But on Tuesday, Trimble said that "a genuine and meaningful response" to Monday's call from Northern Ireland's Canadian-led disarmament commission for the IRA to appoint a representative to the commission would clear the way for the establishment of the government.

The IRA is expected to release a policy statement on Wednesday or Thursday, appointing a representative to Canadian army Gen. John de Chastelain's commission.

NTSB to Remain in control of EgyptAir Flight Investigation

The National Transportation Safety Board will remain the lead investigative agency in the crash probe of EgyptAir Flight 990—at least for now, NTSB chairman Jim Hall said Tuesday.

Hall said he and FBI Director Louis Freeh agreed more evidence is needed before the investigation becomes a criminal probe.

Also on Tuesday, the State Department announced that the Egyptian government is sending teams of technical experts to the United States to, "pool their knowledge and information" with NTSB investigators "to help get to the next steps" in the crash probe, said State Department Spokesman James Rubin.

During a Tuesday evening press conference Hall said, "It is only prudent for the NTSB to consult with these experts and officials to fully evaluate this information prior to any final decision on whether the responsibility for this investigation should transfer to the Federal Bureau of Investigation."

At about 30 minutes after takeoff, when the plane was cruising normally at 33,000 feet (10,058 meters), one of the pilots may have left the cockpit, according to the cockpit voice recorder.

Someone in the cockpit, apparently in the co-pilot's seat, then spoke a prayer, a U.S. official said. The Boeing 767's autopilot was turned off moments later.

The aircraft went into a steep dive, and the engines were cut back and then shut off. At one point, a voice said to pull up the plane.

U.S. linguists reviewing the tape disagree on whether the reference to God suggested a criminal intention or was benign in nature, a government official said.

ence to God suggested a criminal intention or was benign in nature, a government official said.

Although the phrase heard on the cockpit recorder was characterized as a prayer, that doesn't necessarily mean it was related to the cause of the plunge. Arabic speakers, particularly Egyptians, commonly make references to God in everyday statements.

Investigators have assembled a team of Arabic speakers familiar with the dialects used by the pilots to translate the tape more accurately.

Russia Vows to Take as Long as Necessary to Defeat Chechen Rebels

Russian resolve to eradicate Chechnya's Islamic guerrilla movement will outlast the rebels, top Russian officials said as troops pushed to solidify gains made during a seven-week military offensive in the rebel republic.

Russian forces, who already control the northern third of Chechnya, inched south of the Chechen capital Grozny on Tuesday, bombing roads and mountain passes to cut off rebel retreat routes.

In the face of growing global criticism against the weeks-old campaign, Russian officials vowed once again that they would stay in Chechnya until their task was done, regardless of how long it took.

"A quick solution to the problem does not exist. Chechnya is forever," said the former secretary of Russia's advisory Security Council, Boris Berezovsky. "As long as Russia exists as a country, there will be problems in this region."

Berezovsky, who helped negotiate the end of Russia's 1995-1996 war with Chechnya and is now running for parliament as an independent candidate, offered up his own peace plan for the battle-damaged region: Chechnya should give up hope for an independent future and do what Russia says.

Russia effectively left Chechnya under the control of Islamic rebels after that war. From their Chechen bases, the rebels twice invaded the Russian republic of Dagestan this summer, and are blamed by Russian officials for a series of deadly bombings in Russian cities. Both the Chechens and the rebels deny responsibility for the bomb attacks.

Black Americans Make Economic Gains

The thriving U.S. economy has lifted African-Americans to unprecedented levels of employment and income, but they continue to lag behind whites in economic assets, educational achievement and access to health care.

Those findings are from the National Urban League's annual report, "The State of Black America," released Tuesday.

"There are two headlines," league president Hugh Price told CNN on Tuesday. "Things have never been better," he said, citing an all-time low unemployment rate, a growing black middle class and the lowest rate of out-of-wedlock births in 40 years.

"But, on the downside, there are gaps that persist," Price added, mentioning disparities in academic achievement, income and assets.

The 247-page report presents statistics, charts and essays on employment and wage gaps, health disparities and educational levels that alternately are encouraging and sobering.

Aside from praising the impact the booming economy has had on the nation's 35 million African-Americans, the book lays out causes and possible solutions to the gulfs that remain between the races.

University looks at high price of "C-Store" goods

Unusually high price of some products at C-Store alarms students, Dining Services

By Tracy Thiffault

It is no surprise to find out that the prices in the C-Store are higher on average than those at Weis Market. Stores that can buy goods in larger quantities can buy from distributors at lower prices.

However, what is surprising is that goods in the C-Store are marked up by the University an average of 20 percent to 40 percent above what they are purchased for. This leads to prices that can be 50 percent to 100 percent higher than Weis and an expensive burden for those students who do not have transportation away from campus.

According to Tim Tenon, director of dining services, the prices of goods in the C-Store include the cost at which the good was purchased in addition to a percentage for labor and overhead costs and an additional mark-up.

"We struggle with what [the additional mark-up] should be," Tenon said.

The purpose of the C-Store is to provide a service to the campus community but also to bring in revenue for the University. This revenue can be used to fund upgrades and other expenses such as the recent purchase of new tables and chairs for the Bison. Since the beginning of January, the C-Store has had sales of $338,000 and a profit of over $14,000.

The highest volume of sales can be attributed to bottled beverages, snacks and chips, according to Tenon. For this reason, these products are not marked up to the same degree as other slower moving products, such as detergent.

Another reason for the increase in price from Weis is that the C-Store purchases many of its products from Weis food suppliers. Because the C-Store orders such a limited amount, many times it is easier for them to receive the goods from the nearest Weis Market.

Tenon said that the C-Store tries to keep in line with prices of a convenience store for the products with high turnover, such as soda. "We are only one small location," he said, "therefore, we do not have the buying power of Wal-Mart."

"Could we take a look at where we're at and make adjustments, yeah," Tenon said.

In particular Dining Services is looking to make more footspace in the C-Store by possibly adding back-filled coolers for soda. They are also trying to accommodate students who desire more vegetarian products and health foods.

COMPARISON OF BASIC GOOD PRICES

Product	C-Store Price	Weis Price	Difference
2lb. Gold Medal Flour	$1.33	$0.79	$0.54
Snackwells Sandwich Cookies	$3.23	$2.29	$0.94

BSG STUDENT ELECTION PROFILES

PRESIDENT-CHRIS BOUCHOUX '01

After spending a year serving as BSG's Vice President of Operations, Chris Bouchoux has a good working knowledge of the inner, technical workings of student government.

But he also recognizes that student government has a broader mission, and serving as BSG President is the best way for Bouchoux to ensure that his message is carried out.

"The BSG has a dual role. The first is task-oriented," Bouchoux said, referring to jobs such as extending campus library hours and helping to improve the University weight room. "The second is communication-oriented. The student government needs to interact with students, faculty, administrators and alumni and find ways to get them more involved. We need to operate with the student perspective in mind."

Bouchoux also feels that an integral role of BSG is to promote campus unity by 'bridging the gap' between various constituencies on campus. By supporting for all campus groups and activities, the government can show students that diversity and tolerance is encouraged by student leaders. In particular, he noted that fostering a positive relationship between Greeks and non-Greeks is integral in advance all-campus ideas

"We need to show support for the alternative places and activities on campus," Bouchoux said. "BSG needs to show support for all forms of events on campus. At the same time, we have to respect that the Greek system plays a large role on campus and it should not be simply swept away."

A native of Bloomfield, New Jersey, Bouchoux is a history and legal studies major. In addition to his BSG experience, Bouchoux has served on Building on Foundations and as corresponding secretary for Phi Gamma Delta.

VP ADMINISTRATION—NINA CALO '02

Calo, a sociology major from Syracuse, NY, is running unopposed. She emphasizes BSG publicity as a major initiative for the coming year. She feels that the student government workings can be publicized better and become more of a voice on campus.

Calo has done work with Bison volunteers and is a member of Delta Delta Delta sorority, but does not hold any previous BSG experience.

She feels that school spirit is possible if BSG joins forces more effectively with the student organizations and the student body in general.

Calo stressed the importance of voicing her opinions as well as working well with others in the VP Administration position. She also mentioned that she, "is not one to back down."

She also believes that the qualities of accessibilty of BSG officers should also be representative of the University's next President.

"I would look for a President who was willing to spend time with students," Calo said. "I feel that if a President is willing to spend time wokring with students, he will have a better understanding of students' opinions and students will be better able to understand where the President is coming from."

VP OPERATIONS—MARSHA LEWIS '02

It is only her second year at the University, and Lewis has already made a number of contributions to the University through her vast array of activities. She has served as the freshman class president, as a student representative for the planning and budgeting committee and as a student representative on Trustee Access Day. She is also a member of the University concert committee, the Committee on Complimentary Activities (CCA), Council on Greek Life (COGL), Themes Offered to Create and Enhance New Spirit (TOKEN), the traditions task force, the community judicial board and Students for Asian Awareness at Bucknell (SAAB).

Lewis feels that she is a good candidate for this position due to the vital experience that she has attained as a member of BSG. She is familiar with the committees that she will be working with. Furthermore, she has had experience in leadership roles. She believes that she would be a good representative of the students. "I represent many aspects of student life" she said.

As the Vice President of Operations, Lewis would work to promote more school unity and to establish better relations between the students and the faculty and between the students and the administration.

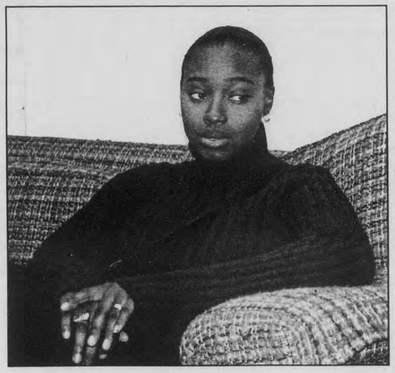
Lewis' hometown is Lovejoy, GA. Her major is International Relations with a concentration in East Asian Studies, and her minor is in legal studies.

The elections for BSG executive boar d positions will take place this coming Monday. All ballots can be cast over the web by logging onto the BSG homepage:

www.bucknell.edu

VP FINANCE

JAYNE MARIE ANGBAH '02



In her first three semesters, Angbah has already become an active member of the University community. She is the President of the NAACP, Vice-President of the National Society of Black Engineers a member of ACE, a member of Essential and a member of the newly formed hip-hop group Jalani.

Angbah believes that she is well qualified for the position of Vice President of Finance due to her leadership experience as an executive member of a number of clubs. "I am dedicated and passionate about the things I believe in," she said.

If elected a to this position, Angbah will strive to achieve several key goals. She will work to make the organization less exclusive and more accesible to the students. She will also work to make students more involved, since "BSG really is for the students. BSG is in some ways accessible, but I don't think students are as involved as they should be."

A native of the Bronx, NY, Angbah has yet to declare her major. She anticipates, however, that she will concentrate on Psychology or Pre-Med with a minor in African studies.

NATHAN SORBER '02

Sorber is an extremely involved candidate with significant BSG experience. A member of the Social Justice residential college last year, he is now the college's alumni representative.

Sorber currently serves on the BSG congress and helped create and run its Internal Affairs committee, which monitors all the workings of BSG. In this capacity, Sorber said, "I understand all the rules I'm going to have to follow."

He has also done work with Best Buddies and serves on the Council on Greek Life (COGL) as a non-greek student representative. "BSG is one of the only entities on campus that can go to non-Greeks and find out how they feel," Sorber said.

If elected as VP Finance, Sorber will oversee the Appropriations committee which allocates funds to student organizations and clubs. He does see some problems in this process, however, that he would like to restructure.

"A lot of times, appropriations is an untouched entity—a lot goes on behind closed doors," Sorber said. "I would like to see more open relations ... more reporting of appropriations to Congress and then to the student body."

Sorber is an economics and political science major from Wilkes Barre, PA.

Students active in "United Way" Campaigns

By Jennifer Leyton

Over the course of the past year, University students and faculty have taken an active role in the United Way Campaign. Their actions have contributed to the approximate $35,000 raised for the Lewisburg community.

According to the United Way campaign pamphlet, "In Union County our good fortune is often taken for granted, yet many friends and neighbors lack the stability of nutritious food, warm clothing, personal safety, and good health."

The United Way is a foundation that helps fund such organizations as Big Brothers/Big Sisters, the Hemlock Girl Scouts and the West End Ambulance in the Union County area.

Charles Root, professor of chemistry, is the campus director for this organization. This is his second and last year because he will retire at the conclusion of the second semester. Root's job is to raise as much money from members of the University community as possible to donate to one of the 24 causes that the United Way supports.

In the past, these contributions have come from the faculty and administration. However, Root said, "There is a feeling in Lewisburg that Bucknell students are freeloaders on the community." He does not feel that this steretype is true and wanted to prove this year that students do care. For this reason, Root sent out fliers asking students to contribute in any way possible.

Of the $35,000 raised, almost $4,000 was from student donations. This is the first time that students have contributed at all.

The goal for Union County was to raise $160,000, and the University has risen almost a fourth of that. Of the money that is raised, ninety percent goes to the 24 organizations that the United Way supports in the community. The other 10 percent goes to the national organization for advertising. All of the workers in the community volunteer and the Country Cupboard donates the office.

Many students feel that helping the United Way is a great way to give back to the community.

"The Lewisburg community gives so much to us, it is only fair that we help them in any way that we can," Erica Carlson '03 said.

IFC fined for BSG appropriations violation

By Jared Silliker

The Interfraternity Council has been charged and fined by the Bucknell Student Government for using University funds to purchase alcohol. The charge comes as a result of a dinner attended by members of the IFC executive board and many fraternity presidents—all of legal drinking age—at BJs restaurant in Selinsgrove.

The group organized the dinner as an "end-of-term" celebration, and although the reimbursement for the food was fully approved, charging alcoholic drinks to the organization's dual account was deemed in violation of University and BSG policies.

The IFC's dual account consists of monies collected as dues and fines from fraternity chapters. The organization also holds a traditional BSG account, but both are overseen by the BSG appropriations committee.

"We just want to make clear that this was not a malicious attempt to abuse University funds," Peter Kadens '00, IFC president, said.

Upon notification of the violation, the IFC immediately paid back the $220 that was charged for the alcoholic drinks. The issue was then brought before the BSG appropriations committee this past Tuesday.

"The University policy is very strict regarding the use of funds to buy alcohol," George McNamara '00, BSG vice president for finance and chair of the appropriations committee, said. "Once [the money] is in the University, it's considered University funds."

Given these policies, the IFC was fined an additional $100 for the violation.

"We were just enforcing University and BSG policy regarding the allocation and use of money," McNamara said.

"We took money from our dual account in order to use it for this event, and at the time, we did not feel that we were misusing University funds," Kadens added. "However, in retrospect, we do realize that University policy does not allow us to use our money to purchase alcohol."

"We decided to immediately rectify the situation by refunding BSG in full for the alcohol we purchased," Kadens said.

"This was a good learning experience for the IFC," Roy Baker, assistant dean of students for Greek life, said. "The way they corrected the error and came forward right away ... I commend them on how they handled it."

"We hope this misunderstanding does not tarnish the reputation of the Greeks because we have really accomplished a lot in the past year," Kadens said.

University introduces "FreshStart" program

Health Services initative aimed at student smoking cessation

By Katie Marston

Want to kick the habit? Well make no more butts about it. Bucknellians attending the FreshStart smoking cessation program, created by the American Cancer Society, learned valuable strategies this week.

"For anyone thinking of quitting, this is a good, non-threatening way to get motivated," according to Bob Thomas of Student Health Services.

FreshStart is a straightforward, no-nonsense quit smoking program. In four meetings, from 12-1 p.m. on Monday through Thursday, groups of 12 to 15 Bucknellians were led though the program by a trained ex-smoker. FreshStart has no gimmicks, meaningless activities or busywork, and claims to have been tested and to represent the most effective ingredients for success.

The program emphasizes that stopping smoking is a two-part process: stopping and staying stopped. The group helps the candidate to stop smoking as quickly as possible, focusing energy on planning ahead to avoid going back to the unwanted habit.

The four group meetings are conducted as work sessions in which the needs of the individual smokers are to be given more attention than the group process. The facilitator begins each meeting by asking for questions or individual reactions that participants wish to discuss. There is also an open question and answer period at the end of the session. As supplementary material, members are given a FreshStart kit, providing them with information and strategies to review at home.

FreshStart is a realistic program that helps the smoker to understand and deal with smoking as a chemical addiction, as a habit and as a psychological dependency. According to the American Cancer Society, some smokers use cigarettes in one or two of these ways, but most smokers experience their smoking as all three.

FreshStart works to give participants strategies for conquering smoking in their thoughts, feelings, and actions. Additionally, it gives concrete methods for handling the two biggest obstacles for many new ex-smokers: weight-control and stress management. FreshStart explains that the techniques learned in the program can be applied to other areas of life, long after successfully quitting smoking.

HOW TO BE AN ANGEL!

In the spirit of the season,

the BookStore AT BUCKNELL

is sponsoring a Literacy Tree.

Every angel on our tree represents a child attending a local Head Start Center, who would love to receive a book this holiday season.

Each time you buy a book as a book angel, the gold angel becomes the gift card which accompanies your selection. In place of the angel, a star with your name magically appears, a shining symbol of your generosity (it can be anonymous if you'd prefer).

If returned to the General Book department by December 8th, the Bucknell University Bookstore will wrap and deliver your gift to local area Head Start Centers.

Thank you for sharing the spirit of the season by encouraging a child to read.

The candidates are missing...again

This is typically the time of year when *The Bucknellian* sits down to discuss whom to endorse in the coming BSG elections. The leaders of Bucknell's student government serve as one of the largest and most meaningful student voices on campus, and *The Bucknellian* staff usually feels it important to throw our support behind whomever we feel is most qualified.

Suffice it to say that, this year, the discussions did not take very long.

Student Government elections have for years been hampered by a lack of candidates, but for the second consecutive year, the number of people looking to run for office has become alarmingly low.

Of the four top positions in Student Government, only one is being contended for by more than one candidate. The other three—including the position of President—are being run for 'unopposed.' Last year, only three of the positions had any candidates at all in the week before the election, and BSG had to all but plead for candidates for the Vice President of Finance election before George McNamara '00 finally earned the position.

This is not, of course, to say that *The Bucknellian* feels that any of the current candidates are unqualified. All five seem energetic and enthusiastic about their prospective position and student government, and all will look to bring fresh ideas to their offices. In particular, presidential candidate Chris Bouchoux '01 is especially energetic and insightful, and his experience on the BSG executive board combined with his ideas on the philosophy and role of student government will surely serve the campus community well. The problem is not the qualifications of the current candidates; rather, it is the lack of them.

The disinterest of students in the institution that affects them most is always distressing, but it is particularly so this semester. The University is in the midst of one of its biggest transition periods ever. The successful Capital Campaign is almost complete, and the benefits of this plan will begin to be realized. A large portion of the funds have been specifically appropriated already, but student input is still important. The University's renewed commitments to ethnic and geographical diversity require important student input as well. And perhaps most importantly, the University is less than a year away from selecting its next president.

Last week, *The Bucknellian* outlined what it would like to see in the University's next president, but the opinions represented may or may not represent those of the entire student body. While it is true that current BSG President Yoshi Maisami '01 is the only student that will serve on the formal search committee, the role of BSG in interpreting and communicating student opinion cannot be understated.

The possible reasons that students are not interested in student government are as numerous as they are old. Is it because BSG doesn't publicize itself, that it comes across as an elitist organization that only looks out for its own interests? Possibly, but BSG in general—and Maisami in particular—has done a good job of making the organization seem both more accessible and more receptive to student interests. Is it because students perceive that BSG has no real power at the University? This perception is often voiced, and it is true that BSG often only serves as a vehicle of student opinion and not a concrete policy-maker, but the importance of this vehicle cannot be downplayed. The fact that the only student on the Presidential search committee is a BSG representative should speak volumes of the organization's power.

Whatever the reasons are, though, they simply sound like excuses. The opportunities for leadership at the University are numerous, and student government represents only one of those opportunities. A BSG leadership position is not for everyone, and the pool of candidates should be somewhat self-selected. But a candidate pool of five people for only four positions reflects poorly on both the interest level of Bucknell students and infers to University policy makers that, perhaps, students really do not care what happens to the institution they are an integral part of.

Is the pornography industry degrading to women involved?

Yes

By Ryan Delahanty

Pornography in the United States is a multi-billion dollar industry. Magazines and videos are not only easy to purchase but seem to be available whether you are in a bookstore or on a city street. Pictures of scantily clad women adorn most major men magazines, regardless if they're pornographic.

In our society today, women look at people like Pamela Anderson Lee and see that they were able to make a lot of money by taking their clothes off. The promise of "getting rich quick" has an appeal that is hard to turn down. The problem is, adult entertainment largely objectifies and degrades women.

Instead of being seen as intelligent and equal, women are looked at in one way: as objects of desire. Women are seen as objects not people. There is an inherent problem with that; if women are viewed as such, then how is there ever going to be true equality in the workplace and society?

If you take a look at magazines like Playboy or Penthouse you realize that these women are not shaped like ordinary women. It is even more obvious in the video industry; instead of being the exception to the rule, "boob-jobs" have become the norm. If a guy sees a video with a woman with small breasts, he now asks himself "What's wrong with her?" When other women see pornographic videos and see the ultra-thin, blond hair, blue-eyed women with massive chests, they feel as though their bodies are not good enough. In severe cases ordinary women starve themselves and develop eating disorders just so they can look like the people in the movies.

Also a major problem, except for a few people like Pamela Anderson or Jenny McCarthy, is the ability for these women to get jobs after their "pornographic" work. This is truer for video actors. When asked, "Who was your previous employer?" you really don't want to say "I was a porno actor!" It's not a very good reference and will probably not help you get the job.

Take this fictional example of a "retired" porno star trying to find work. Remember Buck from Boogie Nights? He worked at a radio store but was only there to bring in some "booty." When he tried to get a loan for his own business, he was denied because he was an adult actor. The whole movie is about the ills of the porno industry, like the drugs and the out of control orgies. In today's atmosphere the drugs and wild orgies are toned down quite a bit but there is still the similarity that it is difficult to find work after being a porn star.

Perhaps the saddest casualty in the pornography industry is the women themselves. In order to stay in business they are forced to ignore the way they really look and feel, and play toward an audience of chauvinistic men. The watchers of porn videos don't care about how smart or funny the woman on screen is, all they care about is how she looks. These women have to fulfill every aesthetic requirement, real or imagined, of their viewers.

Forcing a woman to look and act differently than she would naturally is degrading, no matter how you look at it. Sadly, these women are a dime a dozen. No porn actress is special to her audience or co-stars. As long as there is pornography, there will be some girl looking to make it big in an industry that doesn't care about her as a person at all.

No

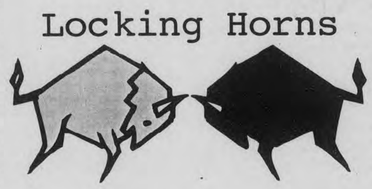
By Rebecca Rowland

In this post-feminist era, women have a choice. No, I take that back, they have many choices. This is the huge improvement made thanks to the '60s and '70s rights revolution—women no longer have to stay at home and cook. Many have chosen to be housewives, but a steadily growing number have chosen to work outside the home. Both decisions are fine, as long as the woman chooses the course of her life.

But what about a woman who chooses to place herself in a heavily stereo-typed, typically sexist environment? What about the women who work in the pornography industry? Is that a viable choice? Or are the women being exploited and degraded?

Tough question, right? Wrong. Women who choose to work in the pornography industry are no more victims of society than woman who choose to be stay-at-home Moms. Ironically, it is thanks to the feminist liberals that I can say that; it was these women whose rallying cry was "Let a woman chose for herself." Well, these women have chosen, and they chose to work with sex.

Locking Horns



Personal biases aside, what is pornography really? It is, and I use this word loosely, an "artistic" replication of one of the most basic human actions—sex. Taking this logic one step further, everyone does what a pornographer does, the only difference between the regular folk and the Jenna Jaimesons is that professionals put it on film. Some regular people even put sex on film, they just don't distribute it. So basically, actresses and models who work in the pornographic industry are only doing something that every other person does, just in a more exhibitionist manner. If these women are degraded then every woman who has ever had sex has also been degraded.

There is a flaw in my logic, you say; the reason these women are degraded is because the films of them engaging in sex are distributed to the public. Well again, that is not true. If a couple of non-pornographers film themselves engaging in sex and the man sells the video to the public, that woman has been degraded. Pornographic actresses, however, are fully aware of the fact that, as soon as their films are complete, they will be rushed to the hands of drooling men everywhere. This is these women's jobs—the more the films are distributed to the public the more revenue they make. The bottom line for these women is money; they better hope these films are distributed!

Maybe the objection to pornography is not the perceived mistreatment of the actresses and models but the reaction of the public. Female sexuality has always been a volatile topic. Does it make people uncomfortable to know that, somewhere, women are flaunting their bodies and sexual prowess? Perhaps it does, and perhaps this is the real reason so many people object to pornography. People prefer to see pornographic actresses as poor, exploited, degraded individuals, tricked into a life of debauchery rather than as calculating business women with large breasts. These women are not naive, the public underestimates them.

It takes a special kind of woman to be a pornographic actress. These women are acutely aware of their sexuality but even more than that, they are, for whatever reason, so secure in their bodies that they choose to use them for their livings. They choose to do that. Are they exploited? The two are mutually exclusive.

OPINIONS

The year in review: Congress shows few results concerning major issues

By Josh Guyan

This week the leaders in Congress and the President are finalizing the last of the budget appropriations bills for next year. After that Congress is pretty much done for the year. What exactly have Congress and the President gotten done this year that the people were calling for? This has been a largely do-nothing Congress, and with a lame-duck President no less.

After the tragic school shootings in several states, there was a massive public outcry for gun control which largely still exists. What did Congress do? Nothing. They passed some pathetically weak gun laws largely written and supported by the NRA. Our Congress this year followed the NRA's agenda on guns, not the American people's.

The other "major bill" they passed to combat gun violence in schools was to allow the posting of Ten Commandments in every classroom. This was simple posturing so the Congressmen could tell the people they believe in God. The reason it was only posturing is because the bill they passed is unconstitutional.

In 1980 the Supreme Court declared posting the Ten Commandments in schools to be unconstitutional. This law cannot take affect. This week a school in California decided they would post the Commandments anyway, but they will be quickly sued by groups like the ACLU and the Commandments will be taken down. This is not gun-control, people.

The Republicans largely fought gun control, but one thing the Republicans did want was a large tax cut. They tried to get almost $800 billion in tax cuts, but President Clinton vetoed the bill. Clinton tried to compromise with a smaller $300 billion in tax cuts, but it never happened because Congress did not think it was enough. So we got no tax cut at all.

There was wide support for campaign finance this year just like there is every year. The bill was championed by Senator and Presidential hopeful John McCain and had wide support from many Democrats and some Republicans.

Unfortunately the bill fell to a filibuster from an extremist Republican who was afraid of losing his PAC money. This, by the way, is what has happened every year for quite a while. It is a great campaign issue for McCain and he deserves it, but yet again we have no campaign finance reform.

The big issue much of this year and especially recently has been Medicare. People wanted it improved, extended and beefed up. People wanted to take back some of the power from HMOs and give it to patients and doctors. This would be largely done by allowing people to sue HMOs for mistakes in coverage. But did we get major Medicare legislation passed? Nope. The House and Senate bickered with each other and with the President and we got nothing. Yet again, another great campaign issue for Bradley and Gore, but we get no legislation.

We did get a few smaller things done. We added to the defense budget, Clinton finally got Congress to approve some more teachers and police officers. We are supposedly going to have a balanced budget, but in actuality we are about $11 billion over even with very creative accounting.

The only major thing they did this year was to bail out and extend Social Security. But it is obvious that nothing got done when the Congressional leaders are on C-SPAN discussing this year's achievements and all they can say is that they kept Clinton from raising taxes. Tom Delay had no major achievements to speak of whatsoever.

This year was bad news and the worse news is that we have another year of this to put up with. Then we have elections in 2000 where it looks very much like we might swap the parties in each branch. The Democrats might take over Congress with George W. in the executive. I wonder if they will bicker as much and continue to get absolutely nothing done.

As a side note, I would like to add that in order to watch Congressman Delay tell us how little Congress has done, I had to watch him on my computer because we do not have cable in our dorm rooms. I would just like to call attention to the fact that Ted Kaczynski, the Unabomber, has full cable in his prison cell at the maximum security Federal prison in Colorado.

Registration problems add unnecessary stress

By Jim Leahy

The right of passage from semester to semester has come and gone. Thank God! My first Bucknell registration is over and not a moment too soon. I am not saying that my story is an extreme nightmare but I did have my problems. And I know that I am not the only one.

Picking classes seems too easy. We are lulled into a peaceful state by the seeming simplicity of the whole process. We are given a yellow book with lots of numbers in it and a big yellow card and told to pick out a preferred schedule. After a few hours of number crunching and time juggling, the perfect schedule is born. Our advisor signs off on it and we are sent to the Registrar's office to have it entered into the computer. Problem is, every student here is making his or her own perfect schedule independently and they are just bound to overlap and conflict.

Personally, I had a problem from the very start. My time slot, it seemed, was the last one on the last possible day. And to make it worse, I had a class during that time. So, I dropped off my schedule earlier in the day and they promised me that it would be entered at the proper time. Much to my surprise, it was. But only two classes were put into the computer and I had to go find out why.

That afternoon, I went in and was told that they could not help me because the computers were down. Great! Tuesday, I met the nicest person in the office who gladly helped me wait list a class and other wonderful things. However troubled I was, my glee was evident. I did not have to deal with the window ladies. Now, they might be the nicest people but they are ruthless at their jobs, and rightly so. They have to deal with a bunch of whining college kids. Pity them.

My schedule did not end up too bad in the end. I was eventually put into three of the classes I wanted originally but the process leading up to this point was an adventure. Do you have any idea what two weeks of watching the closed course list grow is like? Probably you do. And most of you will agree that it is no fun. I equate it to watching someone hack off your fingers one by one, slowly and deliberately. Ouch.

Can this problem be solved? Probably. But I am not some schedule genius so I will not attempt to solve this problem. What must happen is for the Registrar to realize that the system they use is flawed. What about the web or that fancy Banner system accessible from the Bucknell web page? That might work. But there are arguments for and against that. Just look at last week's *Bucknellian* and the "Locking Horns." Rebecca Rowland and Matthew Trunnell skillfully debated that topic. Whatever the solution, though, I do hope that solutions are made or at least thought about. What happens remains a mystery. Keep your fingers crossed.

LETTERS TO THE EDITOR

Kristallnacht program positive for all

University event commemorating Pogrom Night is important educational experience

TO THE EDITOR:

Last weeks edition of *The Bucknellian* included an article by Laura Day headlined "Kristallnacht Remembered." In her article, Day provides a vivid description of a program organized by Hillel and held at the Larison Dining Hall on November 9 to commemorate one of the most important dates in recent German and Jewish history, Pogrom Night.

Events such as the one held on campus on November 9 are essential for students and faculty at Bucknell and for the community. They remind everyone of the dangers of anti-Semitic and racist theories propagated throughout Europe in the early 20th century which led to the brutal murder of almost 6 million European Jews in death camps. Hitler and his followers organized a genocide, the magnitude of which was unprecedented in human history. Today, this mass murder is known as the Holocaust. It can not be emphasized enough that the Holocaust is important for all of us to remember.

For those who were unable to attend the ceremony, I would like to provide some additional information. Already during the summer of 1938, German-Jewish doctors and lawyers had their licenses revoked by Nazi authorities. All Jewish women were forced to add Sara to their first names, the men Israel.

On November 7, 1938 Polish Jew Herschel Grynspan shot and killed a German diplomat in Paris in protest against the deportation of his family. The Nazis used this assassination as an excuse to round up, arrest, and kill Jews all over Germany and to destroy their businesses and synagogues. The Nazis made the German Jews pay for the damages; they were forced to sell all their valuables and deposit the money in a bank account, accessible only to the Nazis.

10,000 of the 30,000 German Jews arrested on Pogrom Night were sent to the concentration camp of Buchenwald. The camp had neither heat nor washrooms. In addition to the abuse by the SS-guards, the inmates were subjected to forced labor in the surrounding arms industry.

A Jewish resistance group, known as the International Underground movement, was begun in 1943. Many such groups, united in their anti-fascist beliefs, armed themselves with weapons smuggled into the camp. With these, they were successful in sabotaging parts of the Nazi arms industry and in protecting other inmates from brutalities and, in some cases, deportation.

Under growing pressure from the U.S. and U.S.S.R. troops, the Nazis began an "evacuation" of Buchenwald in April of 1945. During this, another 25,500 people were killed. On April 11 the various underground organizations took over and liberated the camp, arresting several dozen SS members and guards. When the 3rd U.S. Army arrived shortly thereafter, they were greeted by about 21,000 liberated survivors. On July 3, 1945, the U.S. Army handed Buchenwald over to the Soviet Army. In 1947, 31 former guards were convicted by a U.S. court of crimes against humanity. Two of the defendants were sentenced to death, four received life sentences.

Between 1949 and 1989, East Germany used the former concentration camp to educate visitors about the struggle of the various resistance groups against the Nazi regime. Since German unification the remodeled museum tries to provide visitors with the same experience.

The Pogrom Night of November 9, 1938 and the following events are an essential part of modern German, Jewish, and European history. Such murder, destruction, and grief will never be forgotten.

Skidmore incidents reveal ignorance of director and students

By Maren Johnson

For a disease that is not airborne or transmitted by sex, ignorance is certainly running rampant these days. It seems that the cure—knowledge and understanding—is in short supply. Just recently, it appears that ignorance affected the director of admissions not far from here at Skidmore College.

Apparently, Mary Lou Bates caught the disease just before a prospective students open house weekend. She seems to have caught it from the main carriers of the disease, who have yet to be found. These carriers decided that the best way to spread their disease was to make a public display of it. They proceeded to cover a truck with human feces and soiled toilet paper. Normally, we might consider this an immature prank, but it was more than that. The truck was parked near a student house for gay and lesbian students. It was obviously no coincidence that this vehicle was tagged.

I must say that I am glad Ms. Bates is not my parent, acting in such an ignorant and sheltered way as to want to guard me from the harsh realities of bigotry.

Here is where Ms. Bates joins the ranks of those infected with a serious case of ignorance: knowing that there would be many prospective students and their parents on campus, Bates immediately took it upon herself to remove every copy of the school newspaper that had covered the story. She and two of her cohorts promptly recycled an estimated 1,000 to 2,500 copies of *The Skidmore News* in order to protect visitors from having to hear of such an atrocity on campus. Ms. Bates made a public statement later that week, claiming that she was wrong and had acted as a parent, not as a director of admissions.

Does Ms. Bates think this deserves the sympathy and understanding that she obviously lacks? I must say that I am glad Ms. Bates is not my parent, acting in such an ignorant and sheltered way as to want to guard me from the harsh realities of bigotry. I am sure that Ms. Bates felt that she was doing everyone a favor by shielding them from the fact that not only is anti-gay sentiment a problem in our country, but in her own school as well. What I wonder is who Ms. Bates really thought she was protecting.

I guess that it is true that this disease we call ignorance affects the brain first. However, I must at least give the woman a hand, because in all this immaturity and stupidity she still remembered to recycle the stolen papers. Ms. Bates, for this, you are truly a paradigm of social consciousness.

Senior nights must be re-examined

TO THE EDITOR:

I write this letter as a concerned Bucknellian. In addition, as I write, I can't ignore the honor I have been given as president of the senior class. Sometimes it is hard to separate these two roles, but this has never been more difficult than in dealing with Senior Nights. Believe me, I am thankful for this role! I love serving with the rest of the class governance and I'm excited for the events of our last semester together.

For those who don't know, at Senior Nights, we (the senior class) contract with a local restaurant/bar and provide free transportation, food, and a DJ from 10 p.m. until 2 a.m. on a Thursday night. Around 400+ seniors, or about half of the class, come out for these events.

Well, why am I writing? This Thursday (Nov. 18th) a Senior Night will be held at Skip's, due to majority demand, favorable layout of the facility, and tradition. While it is great to see such support for class activities, I've relinquished as much involvement in this particular event as is possible (without completely abandoning my duties to generally keep an eye on and check the safety of the event), for reasons that I can no longer convince myself are insignificant.

First, in general, Senior Nights are only open to part of the class (those 21 and older); some seniors are being necessarily excluded from events funded by their own class money! Sure, the percentage isn't that large, but it exists. Senior class events, by their nature, should simply be open to *all* seniors.

Second, these events have traditionally run until 2 a.m., on Thursday nights, which doesn't help anyone with early classes or interviews on those Friday mornings after. Granted, people *should* make responsible personal decisions, but throwing a party until 2 just makes those decisions harder.

Third, Senior Nights inevitably center around alcohol—true, this is not inconsistent with many seniors' normal social lives, but it's arguably not the most appropriate way to spend class money. And with the alcohol comes extremely irresponsible, disrespectful behavior: more than one incident of theft already, vandalism, etc. I know it's only a few people who get this extreme, but it still happens. Interacting with the owners and managers of these establishments before and after Senior Nights, I've honestly been embarrassed as I've apologized for those actions.

Lastly, and what's most urged me to finally write: this Thursday, vans will bus students over to Skip's, where strippers will be performing next door to Senior Night (connected buildings). So, not only are we indirectly supporting the management of an establishment that participates in a morally questionable enterprise (to say the least!), but we are *going on the same night*, busing people right up to the doors. Is this how we want to be? Is this what we want to stand for? Is this how we want to portray ourselves to the community, and more importantly, to the other classes? Have we even stopped to ask ourselves these questions lately? Why not?

Look, I have no problem with the spirit and intention of these kinds of events. It's great to see so many people out, spending time together—that's the good part! It's just getting more and more difficult for me to feel proud of our class putting on these events.

It is my job to represent the senior class well, and I want to respond to the majority interests. But we need to re-examine the real value of Senior Nights, especially this most recent one at Skip's. I thought it was important to share the struggles and thought processes with you. Thanks for reading all this. I urge us all to think hard, speak up, and find some better ways to bring the class together, through improved Senior Nights or other activities.

Jessica Jackley
President, Class of 2000

University Professors to read in Bucknell Hall

Poet Karl Patten and fiction writer Joshua Harmon will give a reading of their works, sponsored by the Stadler Center for Poetry at 8 p.m. this Sunday, Nov. 21 in Bucknell Hall.

Professor emeritus of English at the University, Patten is the author of two books of poetry, *The Impossible Reaches* and *Touch: Poems*. He is also cofounder and coeditor of *West Branch*, a twice-yearly magazine of poetry and fiction first published in 1977.

A graduate of Williams College, he holds master's and doctoral degrees from Boston University where he served as instructor on English prior to coming to the University in 1956.

The recipient of several fellowships to the Virginia Center for the Creative Arts, the Millay Colony and Yaddo, he has received the Cook Award, the Travis Award, the Millay Award for Poetry and the Lindback Award for Distinguished Teaching at the University.

Joshua Harmon is a visiting professor of English at the University. He holds an MFA in fiction from Cornell University, where he was twice awarded teh Andrews Award in Fiction.

His stories have appeared in many journals, including *Agni, Alaska Quarterly Review, Antioch Review, Black Warrior Review, Chelsea, Fiction, Indiana Review, Massachusetts Review, Quarterly West* and *Witness*.

The reading is open to the public and free of charge and refreshments will be served following the reading.

Upcoming "Cocktails"

Friday, Nov. 19

"Anything for You"
directed by Jennifer Schweiger '00
starring Blaze Berdahl '02 and Angela Kahn '00

Monday, Nov. 22

"Electric Roses"
directed by Kate McDevitt
starring Theo Avgerinos '00, Sandy something '00 and someone else I don't know

Students in the Theater 240 directing class will produce their shows throughout the remainder of the semester in the Tustin Studio theater. All of the shows begin at 5 p.m. and are free of charge.

Concert Chorale will "swing"

Scott Solomon-The Bucknellian

The Concert Chorale rehearses for their upcoming performance at 2:30 p.m. this Sunday in the Weis Center. A mixed chorus of students conducted by William Payn, the chorale will perform a series of songs with a finale of swing music, honoring the show's theme, "Come Swing with the Concert Chorale." Last month ,the Chorale participated in Paul Winter's premiere of *The World Tree* hosted by the University.

Courtenay Mastain

The Concert Chorale will give a program this weekend in the Weis Center. The program will include "We are the Music Makers" by Joe D. Markley; music for double choirswith works by Heinrich Schutz, John Tavener and Hanley Jackson; Latin motets of the 20th century by Arvo Part and Ludovicus Bardo; and four partsongs by Franz Schubert.

A section devoted to swing favorites will include "It Don't Mean a Thing (if it ain't got that swing)" by Duke Eilington and "River, Stay 'Way from my Door" arranged by Jacques Rizzo.

Sopranos Renee Awad '02, Meghan Murphy '02, Caitlin McGeehan '03, Laura Sassano '02 and Jennifer Schweiger '00 will sing another work, "The Manhattan Transfer in Concert," arranged by Jerry Nowak.

With William Payn conducting, pianist David Cover, violoncelloist Zoya Jenks, electric guitarist Dick Adams, electric bassist Chris Wheeland, drummer Jack Lawton and pianist Micheal Taylor will accompany the Chorale.

Formed in 1964by Allen Flock, the Concert Chorale is a mixed chorus of students who present annual programs of secular and sacred music.

In addition to its public concerts, the ensemble has traveled extensively across the country singing with the Washington National Symphony Orchestra, the Chorale of Simon Bolivar of Caracas, Venezuela, the Baltimore Symphony Orchestra and the Pennsylvania Ballet.

The concert will be held at 2:30 p.m. this Sunday, Nov. 21 in the Weis Center and isopened to the public free of charge.

The Colorado String Quartet

Courtesy of the Weis Center

Violinists Julie Rosenfeld, Deborah Redding, violist Francesca Martin Silos and celloist Diane Chaplin will perform as part of the *Grace Notes!* series at 8 p.m. this Friday, Nov. 19 in the Weis Center. Prior to the performance, the quartet will provide a lecture and demonstration as part of the *Prelude* series at 7 p.m. tonight in the Weis Center Instrumental Rehearsal Room. Both events are open and free of charge.

A portable education

Semester at Sea offers an alternative learning environment

By Kristen Jancuk

If you could live anywhere in the world for a whole semester, where would it be? This is the dilemma that many students face when deciding where to study abroad. The possibilities are seemingly endless. However, there is a way to make the decision easier: go everywhere.

Semester at Sea gives students the opportunity to travel to many different countries during their semester abroad, while at the same time receiving an extensive education aboard the S.S. Universe Explorer. Currently six University students are involved in the Semester at Sea program.

"An increasing number of students are taking advantage of the opportunity to include a global educational experience as a part of their undergraduate course of study," said Paul Watson, Director of Enrollment Management.

Not only is the experience educational, it is an adventure as well. This semester, the S.S. Universe Explorer has traveled to Japan, Hong Kong, Vietnam, Malaysia and India and will continue on to Egypt, Turkey, Croatia, Italy and Morocco before returning to the U.S. just prior to Christmas.

The Semester at Sea program is directed by the Institute for Shipboard Education and is academically sponsored by the University of Pittsburgh. Each semester approximately 600 students from around the country and around the globe participate in the program. Students attend classes daily aboard the ship and spend four to six days in port in each of the countries they visit.

The S.S. Universe Explorer is a "floating university." Not only does it have classroom facilities, computer labs and a library, it is also equipped with a swimming pool, fitness center, theater and student union.

Academically the program sponsors over seventy upper and lower level courses from a variety of study areas and credits are transferable. The faculty is comprised of professors from all over the world.

Courtesy of Institute of Shipboard Education

University students (left to right) Alexander Boyer, Paige Brewster, Adam Sqrinci, Anne Richards, Jeanette Williams, and Richard Ciccione enjoy their semester at sea.

When in port, students can participate in many different activities and travel opportunities designed by the Institution or may chose to travel by themselves. However, although students enjoy free time and fun while visiting each country each class offered on the S.S. Universe Explorer has a field requirement that must be completed in port sometime during the semester.

The itineraries for the spring and fall semesters vary slightly. During the spring voyage, which departs from Nassau, Bahamas, in February and returns in May, students travel to Cuba, Brazil, South Africa, Kenya, India, Vietnam, Malaysia, China and Japan.

The Institute for Shipboard Education has recently announced a summer program for 2000. The program will cover 65 days beginning on June 14 and will visit Spain, Norway, Russia, Belgium, Portugal, Italy, Egypt and Israel before returning to Greece on Aug. 18.

Financial aid is available for both the semester programs and the summer program, and students can often combine aid from their home campus with grants from the program. Students who do not qualify for aid at their home institutions may still obtain aid from the program as well.

The Mission Statement of the Institute for Shipboard Education summarizes the Semester at Sea Experience with this closing statement. "The Institute offers programs in international education that incorporate direct contact with people and their cultures. These programs afford the opportunity to develop cross-cultural understandings of human commonalties and global interdependence, while simultaneously recognizing, defining and respecting individual potentials and cultural diversities."

Wink Thinks

Jacqueline Flicker—The Bucknellian

Dear Wink,

I live in an apartment with two close friends. We get along great though we come from different lifestyles, which is most obvious when we go grocery shopping. My two friends will buy filet mignon while I am on a more macaroni and cheese budget. It hasn't been a problem until another one of our friends came to visit recently. We all know her and commiserated with her unfortunate living situation, which is an entirely different story, and didn't mind when she slept on the couch for a few nights.

Now, however, she has sort of unofficially moved in. Having her sleep on the couch is no big deal but she raids the refrigerator with no attention to whose food she is eating. My roommates don't mind, but on my budget I watch every cracker. This girl isn't hurting for money but hasn't offered to either share rent or pay for the groceries she is eating. I don't think the three of them realize the tension or hardship this creates for me. What should I do?

Sincerely,
Counting Crackers

Dear Counting Crackers,

Let me first off tell you that there is nothing wrong with a little mac and cheese—for a lot of people in college that is all it takes to survive. I feel for you in your situation though. I am sure that it must be tough being kind of an outsider to the whole situation due to your budget. I think that there are basically two problems here, both of which seem to be causing some issues for you. However, there is no need to worry. As always, I am here to lend a helping hand.

I think that the problem that seems to be troubling you the most is the whole filet mignon diet. Let me tell you first off, any girl who eats filet mignon every day has to be packing on the pounds, so try to think of it as a good thing that you are just on a mac and cheese budget. It's like Jenny Craig, you just pay for the cost of your food. But really, I think that if you feel uncomfortable with extravagant tastes and extensive budgets of your roommates, you should definitely tell them. After all they may have no idea that you are on a tight budget. If you never tell them, how will they ever learn and be able to change their spending patterns? I realize that it may be somewhat awkward for you to tell them that you are on a tight budget, and being from different lifestyles doesn't really make it any easier. However, if they are in fact your friends they should understand. People don't become friends with people based upon the kind of lifestyle they lead, but because of their personalities. So my question to you is would you rather have your friends keep buying expensive food, go broke, and end up selling pencils on a street corner, or can you just endure a little bit of pain, and sit down and talk with your friends to resolve the situation?

Your other problem is a little less complicated. I would simply say kick the girl out. It really isn't your problem that she may be in a tough living situation, any living situation is better than no place to live. It really seems to me that she has taken advantage of you and your roommates, even though you may be the only one who realizes it. I think that maybe it's time for some good old-fashioned confrontation. Now, I don't mean slap her upside her head when she goes to get something out of the fridge, but simply lay down the law to her. She really doesn't have much of a choice, either pay rent or get out, if you decide that's what you want to do. It really isn't fair to you and any houseguest should be grateful, which doesn't really seem to be the case here. You should probably talk with your other roommates before deciding on a plan of action. To tell the truth, there's no excuse for her behavior.

Though it may be tough to be put in an awkward situation, if in the end you benefit from it, I would say it's totally worth it. What's 10 minutes of pain for a semester of relaxation? As Nike says, " Just do it." Until next time relax, have fun, and let Wink's wisdom be your guide.

If you are interested in writing to Wink there is no need to worry—all questions are confidential and answers are always thorough. However, please write questions that are decent because we can't include material that is libelous or an invasion of privacy. Questions or comments can be sent to Eli Winkler at box C2815, attn: Wink Thinks.

Please note that Wink Thinks is meant to be instructional as well as entertaining. However, it is in no way a substitute for professional counseling

Safety at Bucknell: past and pr esent

Campus lighting and emergency call boxes come under fire

By Melinda Lemke

Last fall, the University community experienced a tragic event when a campus employee was brutally sexually assaulted. Unfortunately, it took this event to raise awareness that even an idyllic seemingly safe campus like Bucknell is vulnerable. While a man has been arrested in the case from last September, a year later, friends, students and faculty continue to question what the University has done to reduce the risk of crime and assault on campus.

Dennis Hawley, Director of the Physical Plant, recently indicated that a project has been instituted to add new call boxes, as well as restructure campus lighting. The Physical Plant, Office of Housing & Residential Life, Public Safety and the Women's Resource Center have all played an intricate role in providing input to this project.

Students have also had the opportunity to provide input into the project by participating in annual "campus walks," which survey campus lighting and emergency call boxes. Locations where bulbs are burned out or hedges need to be trimmed are noted. Dark areas are also listed for possible light additions. Although a campus walk has not taken place this year, the Physical Plant, Public Safety and WRC are presently coordinating one for the end of fall semester.

The new lighting to be installed on campus will be mainly in the area surrounding the new dorm located by Swartz Hall. New "architectural" light fixtures will be installed on the sides of the building, which will help to better illuminate dark areas and reduce glare. The Physical Plant plans to install new lighting in certain marked areas across campus that will do the same. Although this new lighting will stay with the architectural design of the campus, it has improved features, reflecting light out and down instead of up and out. This feature makes surrounding areas brighter and greatly reduces glare, a problem found presently on campus. There are over 300 lights on the University campus, of which 30 percent have been added in the last six to seven years. The Physical Plant found that adding new lights was simply not enough, because it allows dark areas to persist. In the past, by installing a light in one area, shadows were simply created in another area. This new plan will hopefully help to reduce this problem and move the University in the right direction.

Presently, there are 28 call boxes on campus, designated by blue lights and yellow boxes, that in emergency, directly connect the caller with the Public Safety dispatcher. The proposed plan will install eight new call boxes in what are termed "high priority areas." These locations include the BU West/West field area, the entrance to the farm parking lot, the exit of the farm parking lot, on the side of the building at Cooley Hall, the entrance to the Gateway Parking lot, from the fieldhouse to the Route 15 underpass, along the road west of the Weis Center and the upper stadium parking lot.

Like the new lighting, the emergency call boxes have added features and a different look. The call boxes no longer have to be located on telephone posts or situated in areas hidden from view. The new call boxes have the adaptability to be placed on the side of a building or will be structured in posts low to the ground, so they are clearly identifiable.

The new boxes have a "Help" button to be used in emergency, instead of having to pick up the receiver. They also have a built-in keypad that combines the emergency function with the practicality of a phone. The funds for the new lighting and call boxes are available, however it is less clear how long this project will take to be completed. The locations of existing emergency call boxes are mapped out in "Your Car on Campus." As the new call boxes are constructed however, the Physical Plant plans to have them listed in "Notes & Notices."

So will all the changes that the University has embarked upon really amount to an improvement in campus safety? One would tend to answer affirmatively; however, the new lighting and additional call boxes are only a partial answer to this question. The University can add all the new lighting and call boxes that it chooses, but it cannot account for every square inch of campus.

Even if it could, it cannot account for the thoughts and actions of all individuals that reside in or have access to the University community. Harassment, sexual assault and violence are not "women's" issues, but issues that affect us all. Until people start respecting one another as equals, crimes of this nature will not cease to exist here or elsewhere, thus continuing their detrimental effect on society as a whole.

Branching out for charity

Giving tree and literacy tree provide help for those in need

By Jen LaBracio

As the fall semester comes quickly to a close, it means more than final papers, projects, and exams. On a much happier note, it is also a sign that the holiday season is almost upon us.

The last leaves are falling to the ground, the weather is turning colder, and before we know it the celebration of the holidays will be in full swing. Unfortunately, however, the holiday season is not always a time of celebration; for some people, it can be a cruel reminder of poverty, sadness and solitude.

So before you get caught up in all of the holiday cheer, be sure to take a moment to think about those less fortunate than you during this holiday season by participating in two charity programs the University is offering throughout the upcoming weeks.

The Giving Tree, sponsored by BISON volunteers, and the Literacy Tree, sponsored by the Bucknell Bookstore, are two great ways to get involved and help the less fortunate during this holiday season.

The Giving Tree is a special community service program designed to help children, senior citizens, and other needy people of the local community.

The Tree, located on the bottom floor of the Langone Center, is decorated with "flakes" on which gift requests are written.

Everyone is urged to take a flake, sign it out, purchase the requested gift, wrap it, and return it to LC 207 by December 8, 1999.

BISON volunteers encourage all students, groups, faculty, staff, and organizations to get involved in this charity project. Cash donations will also be accepted.

If literacy is important to you, then you might want to head down to the Bookstore and look at their Literacy Tree.

Located in the center of the Bookstore, the Literacy Tree is filled with angel cutouts, each of which represents a child attending a local Head Start Center in the community. To participate, pick an angel, select a book and purchase it, and return it to the General Book department of the Bookstore by Dec. 8.

If returned by this date, the Bookstore will wrap and deliver your gift to a child at a local Head Start Center. You can also choose to have your name appear on the Literacy Tree in place of the angel that represented the child you chose to help.

Do not let these opportunities to help some of the needy people of our community slip by you this holiday season. The next time you are in the LC, make sure to pull a flake from the Giving Tree or pop in the Bookstore to look at the Literacy Tree-you could make it a happy holiday for those less fortunate than yourself.

SCIENCE & TECHNOLOGY

Autobiographical memory enables human intimacy and characterizes childhood bonds

Susan Engel, director of teaching programs at William College, explores the function and context of memory

By Katherine Nowak

A tired, Shakespearean academic, following yet another dull lecture, goes to a bar and is offered Shakespeare's memory by a man. Excited and astonished, he accepts, inheriting with it Shakespeare's youth, guilts, frustrations and anxieties. Before long, he finds himself becoming more and more tortured by them until he cannot bear them anymore, giving Shakespeare's memory away, author Jorge Luis Borges in Shakespeare's Memory writes. How do we come about learning others' memories and how do we express our own memories to others? Susan Engel, Professor of Developmental Psychology at Williams College emphasizes the convergence of two fields in the memory processes: the fields of narrative and memory.

Author of *Stories Children Tell: Making Sense of the Narratives of Childhood* and *Context is Everything: The Nature of Memory*, Engel today directs The Hayground School, an experimental school on Long Island. Engel has taught persons of all ages, from three to 90, and shared her work with the University in her engaging lecture "Laying Claim to the Past: Autobiographical Memory" at the third psychology colloquium on Nov. 12 in the Langone Center Gallery Theater.

The "selling and borrowing" of memories, according to Engel, is an interpersonal process. Often intimate, between a mother and child or between lovers, the sharing of memories provides for an exclusive bond. To inherit someone's memory would mean to inherit all of his or her joys and sorrows, real or imagined. More realistically, one shares in another's memory. Inheritance, as Borges' character experienced, would be too much to bear.

The identifying posts of memory encompass a wide range of phenomena. Episodic memory is the memory of events at particular places in particular times. Implicit memory is personal memory, otherwise called "specific memory" by the famous developmental psychologist Piaget. Autobiographical memory is memory for information about ourselves during past events. Like the other memories, it is not always accurate, but reconstructed at the time of remembering. Psychologist Katherine Nelson, in investigating autobiographical memory, saw the development of one's individual life story, from childhood onward, as necessary for acquiring an identity. Nelson was one of the first to ask "how do children organize early memories?" She believed that when parents talk to children, they influence the formation of autobiographical memories, which are then organized into "scripts." Frederic Bartlett, who studied the social transmission of memories, reinforced Nelson's idea of memory cohesiveness by saying that memory happened "across people's minds." Memories are a social process. Soviet psychologists Lewin and Vygotsky said to never just look at what a child does alone, but to look at the interaction between a child and a more competent adult or partner. What becomes intrapersonal is at one time an interpersonal process. Hence, story-telling involved in retrospection and remembrance is shaped by the values and beliefs of a particular culture.

Engel presented an autobiographical account of how she came about thinking like she does. Visiting elderly to talk about her books, she confronted the loneliness that older people feel when no one is there to listen to their memories. Their passage out of the world begins when the ability to articulate memories is no longer available. The psychology of the birth of life, the birth of the human infant, is described by psychologist Margaret Maaler as the ability to exchange memories with others. When you leave the world, you often fail to surround yourself with listeners.

Studies of Mother-Child Dyads

As a graduate student, Engel began her interest in a child's "birth of life" by conducting language studies. She observed the process between children and mothers by which a child learned the meanings and names of objects from the mother. She noticed that what infants often talked about was the "here and now" with no reference to the past nor future. However, when mothers reminisced, there was much talk about the past and this in turn was how children would come to talk about former experiences, often establishing ties between the object name and meaning they were learning to grasp and a prior recollection of that object. The process of memory, Engel determined, is a highly collaborative one.

Courtesy of W.H. Freeman & Company

Susan Engel defined the characteristics of memory, stressing the role of place, company, and purpose in the incidence of recollection in her talk at the University on Nov.12.

"One talks about the past because she or he has a partner to do so with," Engel stated. In the context of the mother-infant covenant, the mother spins the story, eliciting both relief and pleasure in her infant in doing so by showing her understanding of the child. The process is highly collaborative and highly interpersonal. There are, however, individual differences in mother's roles in which Engel was interested.

Her study of mother and children, "Learning to Reminisce," involved visits to the homes of mothers and toddlers at regular time intervals for six months. The data collected was everyday, habitual conversation— the habit of it, Engel said, captured the unfolding phenomena.

Engel soon noticed that the mother and child varied a great deal in how much they talked about the past. There were dyads who had, what Engel labeled, a reminiscing style, characterized by frequent talk of the past in a manner that was pleasurable, cognitive and affective. In contrast, the practical remembering style was characterized by rare occasions of talk about the past and spare conversations which used the past to illuminate something in the present context. The practical rememberers focused on the "here and now" with the past as a sidebar to the present. The quantity and quality of their remembering task or event was differently discussed— there was no scaffolding of images and recollection. Instead, it was a question and answer scenario, much varied from the context of reminiscers, in which a child was observed to contribute more and more at each retelling of the story, learning to richly recount his or her past within the joint effort of the mother-child dyad. In terms of language development, remembering assisted the development of semantic and grammatical skills, teaching a child how to keep a story going. The deeply collaborative reminiscing style paralleled a "reminiscing couple."

"If you engage in a lot of rich reminiscing with mothers, by the time you're three you're able to construct such recollection. Some children grow up to be practical rememberers while others become reminiscers," Engel said.

Memory of Pre-schoolers

The second study conducted by Engel was performed within the preschool setting. "There were salient differences between preschoolers and toddlers," Engel said.

Talking about the past is a big piece of how to remember, but learning how to tell a story and learning what an audience manifests is pivotal. After all, it is often the audience who shapes the story, and the social-interactive aspect once again comes into play. Children use one another as scaffolders, although not in the same manner as mothers shape a story. They are, however, interested listeners. Questions and replies make the process between children a collaborative one.

"Children often make announcements that are invitations at further exploration. An announcement is their invitation to the other child for inquiry and conversation," Engel stated.

In saying, "I went fishing ..." a child invites inquisition.

"Criteria for a good story is a high point— a tension or a problem," Engel explains. "Not only do adults know this, but so do children." A child acknowledges ways to fulfill his audience's criteria. If his partner expresses interest in the grotesque, a child who has announced, "I went fishing," will present the gory details of the hook, blood and fish in an appeal to the listener— the audience.

"That's how context and person shape our sensitivity to our audiences," Engel concluded.

Narrative Research

Engel's third line of work was narrative research, which examined the different stories people tell depending on the situation. "Adults often ask children to tell a story to people to whom ordinarily the child would not," Engle said. Why the story is being told and to whom hence becomes lost. The number one reason why children and adults would tell a story is to make friends, or to make and to maintain intimacy. Through reminiscing, one becomes close with others, maintaining this closeness through revelation and disclosure.

The number one reason why children and adults would tell a story is to make friends, or to make and to maintain intimacy.

"In telling a story, two partners are often reminding each other that they experienced something together— that they are close," Engel stated.

We use memory to manage and negotiate friendships as well. Children often use stories about the past to negotiate who's in and who's out. "This is quite prevalent in the management of social relationships," Engel said. There are gender differences, however, she pointed out.

Disagreement about the past often occurs between children; not usually occurring between a mother and her child. In pre-schoolers, negotiation of relationships by disagreeing about what has and what has not happened is extensive. The power of remembering and disagreeing increases as we age, becoming a strong form of interaction. Engel, in reading an interview with director Barry Sonnenfeld, director of *Wild Wild West*, *Men in Black*, and *The Addam's Family*, showed that it is not only children who disagree in memories. In recalling his childhood wounds, Sonnenfeld said, "All I ate were TV dinners."

His mother recalled this differently, saying "he was such a picky eater— he wanted to eat the same thing over and over."

"I didn't eat lunch with children until the sixth grade— my mother would come and get me for lunch," Sonnenfeld said.

"He was a very shy child," his mother said.

"I recall the first Earth Day. It was 2 a.m. and I was with my girlfriend and Jimi Hendrix was about to play. Over the loudspeaker roared 'Barry Sonnenfeld, call your mother.'" Sonnenfeld recalls. His mother instead recalls Barry being an easy child to raise.

"When we talk about ourselves, we shape who we think we are," Engel said. "There are therefore differences in what we remember." There are differences in the cues that stimulate recollection and there are often distortions in what people are capable of remembering. John Dean, a U.S. government official and White House counsel to President Richard Nixon, was a key figure in the Watergate scandal. His testimony was tape-recorded. The author of John Dean's Memory later professed that conversation with Dean was not consistent with the recordings. Dean failed to get any of the details right when later asked to repeat his disclosure. Dean was, however, consistent in meaning and precise in assessing the roles of each person involved in the retained confession. Distortion in memory thus becomes the rule, not the exception. Memory is a constructive process— never a replication. It is a story that you create.

The extent to which narrative shapes what you are able to remember may often be significant.

"Being that memory is a fundamental social activity, I wanted to pull these factors together," Engel stated. "I wanted to establish the contexts in adulthood in which we remember and how demands of situations differ and thus make remembering different."

Contexts of Memory Recall

The first context is that of the intimate context. As one becomes more intimate with someone, recollections of the past become increasingly telegraphic. In Leo Tolstoy's *Anna Karenina*, two lovers speak of establishing their affair. On the background of 1860's Saint Petersburg society, in 19th century Russia, Anna falls in love with a young officer. She is about to leave when he makes an inquiry about a note she had once inscribed in the past that connoted her inability to be with him. She explains, writing "TICNAD." The officer understands, reading her new message as "then I could not answer differently." The lovers thus communicate their intimacy, focusing not on narrative or accuracy of the past, but on the validation of each other's memories.

Apart from the intimate context, three formal contexts of memory exist. The first is that of therapy, in which remembering is a central point. "We pay money for someone's help in our construction of memory. This memory is not of historical truth but of narrative truth," Engel said. The therapist offers the patient insight, with danger lying in the fact that no checking or verifying exists, since there is no outside reference. The therapist can thus lead a patient to believe something that has never occurred. Collaboration is therefore different in every aspect. Memories are not shared because both people did not participate in the memory. One person is doing the retelling, the other is interpreting. Engel describes one instance in which a therapist helped a patient recall a case of sexual abuse.

"The therapist had dropped a pen which elicited a scream from the patient 'Don't get near me or I'll kill you!" Gradually, the therapist helped the woman recall an incident of sexual abuse by her father which took place in the kitchen of her home. The context involved a spoon being dropped— the "pen."

Such sessions contain parallels to Freud's ideas, in that symptoms often reflect past events. Successful therapists guide their patients in reconstructing actual past events, not inducing any parts of memories, but allowing for consensus.

The second formal setting of memory is that of the courtroom. This context is perhaps the most formal and most intriguing in that heavy dependence lies upon whether or not an individual will be capable of remembering. The goal is thus very different from the previous two, intimacy and therapy. Memory is taken beyond the realm of psychology— its nature is used to reveal whether someone will or will not be punished.

In the courtroom, there is a person asking the questions and a person answering.

The audience plays no interactive role— they are silent. They are the jury. They can offer no feedback and thus the lawyer, the person asking the questions, has no knowledge of whether the story he and the witness are eliciting is being understood. The judge is the overseer of the interaction— he directs the talk. The process of memory recollection within the courtroom setting is thus dispersed across these roles. The stakes are high for whether the person answering remembers or not. Juries often experience someone who is not able to recollect a certain detail as not reliable. A single mistake made by the witness can lead the jury to conclude the witness as untrustworthy. But recollection, Engel reminds, can never be fully reli-

Music industry steps up fight against MP3 piracy online

By Scott Hagadorn

Probably one of the biggest nightmares the Recording Industry Association of America (RIAA) has ever seen, digital music in the MP3 format, is wreaking havoc on the recording industry and effectively giving new meaning to the word "copyright." The RIAA's members include all of the major record labels, and among its duties is the enforcement of copyright law.

MP3, an abbreviation for MPEG-1 Audio Layer 3, is the most popular way to store digital music. The music format's popularity is due to its ability to compress music files on your computer while retaining CD-quality sound.

Earlier this year, the word "MP3" set new standards as it outpaced "sex" for the most frequently searched term on the Internet. "MP3" likewise just happens to be the most popular keyword for RIAA officials, except they aren't looking to download their favorite classics, but to arrange cease and desist orders for sites offering copyrighted music for free download.

Just last week 71 college students at Carnegie Mellon University in Pittsburgh were disciplined for the illegal distribution of MP3 files on the University's intranet. An unannounced random search instigated by the RIAA resulted in the findings. The students were told they could regain their Internet access by attending a forum on copyright law.

Another example of the RIAA's work happened at The University of South Carolina at Spartanburg. In reaction to a recent offense, officials there are now monitoring its campus network using software that can search for music being offered for download. The student in question had effectively turned his PC into a jukebox and was selling pirated MP3s. Although the RIAA was prepared to take the student and university to court due to his violations of copyrighted information, appeasement was reached with the installation of the monitoring software and cooperation with the student.

Is the RIAA fighting a battle that can never be won?

The RIAA's battle against the potential for MP3 copyright infringement started to become more prevalent in October of last year when it sought an immediate injunction to stop further production of Diamond Multimedia's newly introduced Rio, a portable MP3 playback device. From here, the litigation over MP3 distribution has blossomed.

Although no formal action has been taken by the University, several warnings have been issued by Information Services & Resources urging students to comply with the Appropriate Usage Policy. The AUP prohibits the distribution of any copyrighted material.

Both CMU and USCS are enlisted in the RIAA's anti-piracy soundbyting campaign. A program containing over 300 members, the RIAA campaign was developed to increase colleges' awareness of the illegality of reproducing and distributing music. The RIAA is ultimately setting out to control the distribution of digitized music with the formation of the Secure Digital Music Initiative (SDMI). Last December, the RIAA joined with the Recording Industry Association of Japan, other leaders of the technology industry and the five major record labels to form SDMI. The goal is to convince manufacturers to configure new portable music devices and PCs with a technology that allows consumers to rip tracks from CDs for personal use only, and prevents illegal distribution over the Internet.

Is the RIAA fighting a battle that can never be won? Who is to say that today's music piracy is not the ultimate business model of tomorrow? Portals such as Excite, Lycos, Yahoo and AOL are latching on to the world of compressed music. This past June, AOL purchased Winamp-maker Nullsoft, while later this year made deals with MP3-tailor Emusic. Lycos likewise raised questions with the RIAA when it when it hired a Norwegian company to develop an online search engine dedicated to locating MP3s. Many of the MP3s queried were pirated.

The Internet is the new frontier, the "Wild West" of the digital world. Another transition in music formats is being challenged in an all-out battle between the power of digitized data and the power of the man trying to stop it. The winner? Search and see for yourself.

Human exploitation threatens Malagasy fauna

Penn States's Natalie Vasey discusses ecology and behavior of Malagasy lemurs, primates unique to the island of Madagascar

By Alex Piel

Part I: Madagascar and concern for its demise

Two hundred fifty miles off the southeast coast of Africa lies an island larger than California and Oregon combined. As the fourth largest island in the world, Madagascar extends over 1,000 miles long and in parts, 360 miles wide. It can be divided into three main sectors: the East Coast, filled with steep-sloped mountain ranges and rainforest; the Central Highlands, filled with seemingly infinite rice fields; and the West Coast, home of the baobabs and thorny forest. About 13 million Malagasy inhabit Madagascar, though it is uncertain when these early immigrants discovered and settled this magnificent island. With dual Indonesian and African origin, the country is a wonderfully woven quilt of ethnically different physical features, language and agricultural customs. Despite this rich diversity, the Malagasy people unite with a common language enriched by words imported from Bantu tongues, Swahili, Arabic, English and French.

Madagascar is home to thousands of endemic species of plants and animals. Travelers call the island "holy," insisting that to travel there is a spiritual journey. Madagascar has gained recent attention for the vast destruction of its landscape by humans. With wreckless abandon, forests are being eliminated and habitats destroyed as the Malagasy people hope to expand their agricultural ways. This hope for expansion and concern for the environment has presented a particularly sensitive conflict between what the Westerners desperately want to save and what the Malagasy people need to develop.

"There is no limit to the ways through which all concerned must strive to keep Madagascar in the forefront of others' minds when thinking about environmental difficulties the world faces today," Michael Pereira, professor of biology and animal behavior at the University, stated. "More than 85 percent of the rainforest that existed in Madagascar in 1960 is now gone," he added.

But it is not just the non-human creatures that are of interest here. "The people of Madagascar are unique, melding in yet uncertain ways histories from East Africa, the Middle East, India, but most predominantly Indonesia. Much remains to discover about human history and cultural processes by better understanding the people of Madagascar."

Barb Wood — The Bucknellian

Dr. Natalie Vasey spoke to the University on Nov. 12 about two Malagsy lemur species.

We can learn from not only the people there, but also the animals. One of the many distinguishing characteristics of Madagascar is that it is the only home for free-living lemurs. With two species of lemur (*Lemur catta* and *Eulemur fulvus rufus*) on campus, this is particularly relevant to the students studying these endangered animals. Research on these animals is important for a number of reasons, said Pereira. Most importantly, time is running out. "Humankind began to permanently settle in Madagascar only about 1,200 years ago, when there were roughly 50 species of lemurs, and some larger than today's mountain gorilla ... now there are only about 28 left." He continued, "yet these animals represent an incredible radiation of primate diversity that remains almost completely undescribed due to Madagascar having been closed to Western scientists from 1970 or so until the early 1980s." With such valued life in great jeopardy, Madagascar desperately needs conservation laws. In the process, however, the Malagasys' needs must not be forgotten, for it is they who contribute to such a paradise.

Part II: Vasey proposes lemur conservation tactics

Researchers flock to Madagascar desperate to study what remains and to find a way to save what has prevailed until now. On Friday, the University welcomed a recent visitor of Madagascar who gave a lecture on two lemur species and the conservation tactics used by these animals.

From Penn State University, Dr. Natalie Vasey spoke on "Ecology, Behavior, and Reproduction in Two Sympatric Malagasy Lemurs." An anthropologist and primate biologist, Vasey did her undergraduate work at Berkeley and her masters at New York University at Stony Brook. From there, she traveled to St. Louis where, at Washington University, she worked under Robert Sussman studying red-ruffed lemurs (*Varecia variegata*) and white-fronted lemurs (*Eulemur fulvus afvores*), also the subjects of her lecture Friday night.

Courtesy of Godric's Lemur Gallery

A black-and-white ruffed lemur, *Varecia variegata*, hangs from a branch.

Vasey went to Madagascar to study the ecology of these animals. Located on the west side of the South Masoala peninsula near the Andranobe River, little was known about their ecological tactics and interaction with the environment. She organized their ecology into three categories: habitat use, diet and activity pattern. She addressed the first two in her lecture. Vasey proposed that the lemur's community and diet was most influenced by climate changes, body size, reproduction strategies and predation pressures. She predicted that as reproductive investment, body size and spatial food patch increase, these species will begin to show energy conservation tactics. She also thought that we should see sex differences in male and female reproductive investments as a function of these increases.

In first comparing the two species, Vasey noted the distinct differences between them. Whereas the ruffed lemurs show high reproductive investment, large home ranges and body size, short gestation periods and frugivorous (fruit-eating) feeding patterns, the white-fronted are not as large, have smaller home ranges and exhibit long gestation periods. Due to the short gestation period and higher number of infant-births/pregancy in the ruffed lemurs, Vasey predicted she would see more energy conservation tactics in them, especially during seasonal food scarcity and during times of high reproductive investment. She studied differences within and between the two species based on reproductive stages and sex differences. Concentrating on adults only, Vasey tracked her animals eight to thirteen hours a day for five to eight consecutive days during a 13-month period. Due to the similar resemblance of these animals and their large home ranges, she often needed to radio collar them to maintain accurate identification. Using the largest national park in Madagascar as her study site, Vasey maintained her site during a year that saw her area receive over five meters of rain, not unusual for this western coast of Madagascar.

Courtesy of Godric's Lemur Gallery

A ringtailed lemur, *Lemur catta*, sitting in the sun.

Vasey went on to discuss similarities and differences between the species and between the sexes of each species. The biggest distinction between the two species, says Vasey, is the vertical strata of the trees that they inhabit. According to her, the red-ruffed lemurs range 50 meters and higher in the trees during all seasons. On the contrary, the white-fronted lemurs rarely climb to those heights. She argued that possible reasons for such niche separations can be attributed to food patch size, diet and forest sites used. "Some diurnal and seasonal shifts in forest sites and vertical strata contribute to thermoregulation and predator avoidance."

In her first set of conclusions, Vasey provided her evidence for energy conservative tactics in both species. She claimed that, in the red-ruffed lemurs, higher energetic investments show shifts in ecological variables in tandem with seasonal food availability. On the contrary, the white-fronted lemurs, though a smaller primate, showed lower reproductive investments and less patchy available food, but not energy conservation tactics. Why the difference? According to Vasey, life history traits and reproductive differences accounted for differences in behavior.

Vasey discussed seasonal changes and behavioral patterns of each species. Her goal of discovering more about ecological and energetic conservation tactics was achieved as her data suggested much that was not previously known. Such research is necessary to promote the awareness of the unique species on Madagascar. Without studies such as this and those which currently occupy Dr. Michael Pereira, the lemurs would remain one of the oldest, yet most mysterious of the primate taxa. "Research on life history, physiology, genetics, infectious disease and behavior will be pivotal to support preservation of whatever populations of lemurs might eventually be protected successfully. It is these efforts that will serve crucially as a model for how to do the same work years later on continents where conservation issues may eventually become as desperate," Pereira said.

MEMORY

FROM Page 8

able. An individual can get one detail wrong but get the rest of the account right. Engel has reiterated this in her lectures to courtroom figures.

The third formal context of memory is that of autobiography. It is a process of self-justification and self-exploration, a memory transmission that is often compelling to audiences because they believe the story to have really happened. Readers are thus grabbed by memoirs and autobiographies. In these works, the writer experiences a total emergence of his sense of self, often struggling between subjectivity and objectivity. All occasions and contexts can blur in writing an autobiography. An example was the excerpt from Tolstoy's *Anna Karenina*, whose nature was not fictional but autobiographical. The tension between the lovers was Tolstoy's autobiographical account of the courtship between him and his wife. Thus, a blend of the intimate, the unbosoming and the autobiographical emerges. The audience is not silent as in the case of the jury. The audience is a group of interested strangers. Thus, the process can become formal and deliberate, the ability to form an autobiographical story lying at where to begin and when to communicate the central piece to understanding.

Engel is currently collecting data on when children begin autobiographical remembering. She believes it to be at the age of five or six. When asked at this age to recount the past in a context-dependent setting, children have the ability to recall memories successfully. Engel read a recollection of a 9-year-old boy, who spoke of his dying brother. In this context-dependent moment, the boy's reason for communicating the past was his way of communicating life.

"We trust memory against all evidence ... the power of memory lying in its kinship with imagination ... memory is thus a kingdom of its own," Engel read in closing, reciting the work of Patricia Hempel in *A Romantic Education*. Context-specific, memories communicate powerful messages to mothers, lovers, friends and formal audiences. Accuracy is often discarded in the former and emphasized in the latter. The ability to transmit autobiographical memory remains pivotal in affirming our presence in the world and our significance in the role of social relationships. The value of memory is thus constant and persistent in the discourse of everyday life. Along with its value, come its pains, remorse and apprehension. Whether we would thus accept the proposition of Shakespeare's memory takes on a very different suit.

Robot scouts may replace human police

By Jon Anson

Until recently, the idea of robotic armies seemed like a far-fetched concept reserved for cheap science-fiction movies. However, researchers at the University of Minneapolis are working to make such an idea a reality, reports *New Scientist*. They have recently developed small robots that will eventually be used to replace police officers in dangerous situations such as hostage negotiations or police sieges and raids. At the head of the research is Nikos Papanikolopoulos, who envisions a group of robotic scouts being lobbed by grenade launchers into buildings that are too dangerous for police to enter. Armed with cameras, microphones and other sensors, the robots will be able to send back vital information about a situation to officers distant from the scene itself.

AP

Courtesy of New Scientist

Each robot scout is about the size and shape of a roll of toilet paper, and moves around by rolling and hopping. The most significant features of these robots are a jumping mechanism and the software that was written to enable them to jump. Jumping is accomplished by sending a radio signal to the robot, which causes it to release a spring-loaded leg and launch itself into the air. The robots developed by Papanikolopoulos and his colleagues also have the ability to climb stairs and hurdle small barriers. Long distance locomotion is accomplished by rolling on two independent wheels at either end of the robot's cylindrical frame. Small armies of these scouts will work together in order to collect necessary images and information for police officers.

A number of these robotic scouts would be deployed at once and would all be controlled by a mobile base. The remote bases will allow police to safely operate robotic scouts from as far as 400 meters away, says *New Scientist*. Some robots will be armed with video cameras that can tilt and pan, while others will have microphones and vibration sensors. The concept of simultaneously using several robots is significant, as multiple robots can provide diverse information about a situation by beaming back video images from several different angles. This will allow officials to accurately assess the safety of a situation before sending in human officers.

There are a wide variety of possible applications for these robotic scouts and many different groups are interested in developing this technology. Papanikolopoulos' research at the University of Minnesota is being sponsored by the U.S. military and is scheduled for completion in 2002. To date, they have successfully tested the robot's locomotion system and the ability of the video cameras to tilt and pan. While the main application for these robots will be police rescue operations, they could also be used for intelligence-gathering by both the military and civilian organizations. While the military would like to try to use such robots as spies, a corporation like CNN would like to use robotic scouts to get first-hand footage of dangerous situations.

Your brain's built-in rhythm is inescapable

By Tamanna Hye

For the college student, sleep is virtually non-existent. When a student does manage sleep on those few occasions, he or she looks forward to it as a respite from the stresses of daily life. But it is not as worry-free as is believed or hoped, according to *New Scientist*. Jan Born, a neuroendrocrinologist at the University of Luebeck in Germany reports that, "even as we doze, our brains somehow keep track of our daily schedule and signal the release of a stress hormone one hour before we have to get up."

The hormone is adrenocorticotrophic, or ACTH. It helps to regulate the nervous system. It is this stress hormone which helps us to wake up each morning from sleep. The pituitary gland releases concentrations of ACTH in the blood before a person wakes up. In a recent study, Born and her colleagues found out that the pituitary gland "responds to an anticipated event during sleep ... just as it does when a person is awake, and adjusts ACTH levels accordingly."

Researchers concluded that, "...expectation and anticipation, which are associated with conscious wakefulness, intrude into sleep." This also attests to the fact that some people can wake up without using an alarm clock, says *New Scientist*.

"Waking up is an act of will, and not an involuntary response." Our brain can keep track of time and adjust the ACTH levels, which "gives the body tremendous flexibility in adjusting to sudden changes in sleeping patterns."

Planning is thus the key to getting a good night's sleep. If a student plans his or her day before going to bed, he or she can be assured to get a better night's rest, even if it is only a few hours worth. The body will prepare to awaken with sufficient or insufficient amount of sleep.

THE BUCKNELLIAN Sports

Athlete of the Week

Becky Marshall '02, who finished 12th at the cross-country Mid-Atlantic Regionals to pace the women's team to a third place finish.

Women's XC heads to Nationals

By Rose Sedo

There are mixed feelings as the Bucknell cross-country season draws to an end. The men's season is over, but the women have the honor of competing at the NCAA Championships for the first time ever.

This past weekend was the deciding factor of the season. The Bucknell men's and women's cross-country teams competed at the Mid-Atlantic Regionals at Lehigh University in Bethlehem, PA in hopes of obtaining a spot at nationals. In order to qualify automatically, Bucknell had to finish among the top two in either race.

While the women's team placed third with 115 points behind top-10 teams Georgetown (44 points) and Villanova (51 points), the men's team placed a disappointing ninth overall with a team total of 203 points.

The results for the women were extraordinary. Becki Marshall '02, Andrea Beisser '03, and tri-captains Carly Graytock '00 and Jen Hart '00 earned all-regional status by virtue of their top-25 finishes.

"We almost had our entire top-five girls up there as all-regional, and that's never happened before," Graytock said.

Marshall was once again the top runner for the Bison, finishing 12th with a time of 17:34.70. Beisser placed 19th in 17:59.02, Graytock 23rd in 18:04.57 and Hart 24th in 18:04.9.

Although the women ran very impressively, they finished third and weren't guaranteed a spot in the NCAA Championships.

Much of the rest of their weekend was filled with anticipation, regarding whether or not they would be chosen as one of 13 at-large selections.

But the women didn't have to worry. On Monday, the women's team was officially selected to move on to nationals.

They will travel to Bloomington, Indiana to compete against 30 other teams and 38 individuals this coming Monday, Nov. 22.

"What they did was an amazing feat. They haven't had a let down all season; they've stayed healthy and injury free," coach Art Gulden said. "This is how cross-country is supposed to work."

Although the men's team in the past has achieved national status, this is the first time that the Bucknell women's cross-country team has achieved this honor. Excitement is running high for Monday's race.

"It has been incredible to see how the team has evolved over the past four years. The men's team has created a legacy under coach Gulden, and hopefully, the women's team is beginning a trend that will lead to the same levels of success," Hart said.

On the men's side, David Bronfenbrenner '00 was the top runner for the Bison, crossing the finish line in 20th place with a time of 31:21.07 and achieving all-region status. Second on the men's team was Brad Wertz '01, who finished in 39th place with a time of 31:51.30.

The men's results were somewhat disappointing, but the difference between garnering a third place versus a ninth place finish was really quite simple to Gulden.

"Ron Hess was the missing link between third and ninth place for us. Unfortunately we never recovered from losing such a great asset to the team, but it has been an excellent season for the men, all things considered," Gulden said.

As the women's cross-country team prepares for the upcoming NCAA Championships race on Monday, the University wishes them lots of luck and success.

Graytock '00: finished 23rd

Bison have their eyes on the prize

Helen Hunt.—The Bucknellian

The 1999 Bucknell women's basketball team returns four starters from a squad that finished '98 with a 13-14 overall record (8-4 Patriot League). The Bison open their '99 campaign this Saturday with a game at Delaware State at 6:00 p.m. The season stretches until the Patriot League Tournament in March. For a preview of the team, see page 17.

Swimmers improve to 2-1 with win over Drexel

Tyler Wynn '02 and Darby Golino '03 pace teams to second-place finish at Army Invitational

By Katie Yingling

As cold as the past two weeks have been on Bucknell's campus, the Bison men's and women's swimming teams have been just as hot.

The past two weekends have left the Bison with a victory over Drexel and a second place finish in the Army Invitational.

When the Bison faced Drexel at home on Saturday, Nov. 6, the men walked away with a 137-102 victory, while the women won 132-107.

The men were paced by double winner Jeff Sharpe '01, who won the 50- and 100-yard freestyle events. Freshman Gonzalo Diaz also won two events, capturing the gold in the 500 and 1000-yard freestyle events.

Sophomore Abby Weaver claimed two of the women's events as well, winning both the 50 and 100-yard freestyle events.

Last Saturday the Bison placed second in the Army Invitational, falling to Army while placing ahead of both Fordham and Seton Hall. The men claimed one first and two second place finishes. Tyler Wynn '02, Benjamin Lim '01, Chris Neary '02 and Sharpe combined to win the 200-yard medley relay. Bucknell took second in the 400-yard freestyle relay with Neary, Lim, Sharpe and junior John Ferriter. Wynn placed second in the 200-yard backstroke as well.

The Bucknell women took first place in three events and second in four. Freshman Darby Golino paced the Bison, placing second in the 100- and 200-yard backstroke. Golino was also a member of the championship 400-yard medley relay, 200-yard medley relay and second place 800-yard freestyle relay.

Junior Molly Lowe won the 200-yard butterfly, and Weaver placed second in the 100-yard freestyle. The championship 200 and 400-yard medley relay teams consisted of Golino, Weaver, Kelly Wilson '00, and Lauren Mosler '03. The second place 800-yard relay team was made up of Golino, Weaver, Kate Wood '00, and senior Nicole Brandemarti '00.

The Bison are hoping for similar results at the Rutgers Invitational this coming Friday and Saturday.

Crew finishes third at Susquehanna

By Sean Houston

The Bucknell crew raced in its final event of the fall season this past weekend. The Bison played host to Marietta, Ithaca, Rochester, Lehigh, Lafayette and Mercyhurst in the first annual Susquehanna Sprints.

Bucknell earned a third place finish overall, finishing just behind Ithaca and Rochester in an extremely competitive field.

The novice men were particularly impressive for the Bison. They won their heat, and went on to convincingly win the novice event.

"We're all pretty excited at winning," coxswain John Waterman '03 said. "We were a little off during the heat, but we brought it all together in time to win. We had a good lane and managed to finally pull away from Ithaca during the last 500 yards."

Other members of the boat were: freshmen Aaron Casagrande, Jeffrey Bolle, Jeffrey Dasch, Michael Brooks-Williams, Michael Andrieu, John Purcell, Gerald Bell, and Aaron Bates.

"It was a spectacular day for the team and a great way to end the fall season."
—Steve Kish, crew coach

The varsity women rowed an open weight eight, and they also raced extremely well, winning their heat and finishing third among nine boats. Their performance was even more impressive when considering that their boat included some lightweight rowers.

The varsity men and novice women raced well, but were narrowly beaten by the other competitors, finishing seventh out of eight boats and eighth out of 10 boats respectively.

"It was a spectacular day for the team and a great way to end the fall season," coach Steve Kish said.

The fall season was marked by steady improvement among the novice men, and consistently strong finishes by the varsity women. There is every indication that the spring will hold even more success for the Bison.

The next big event for the Bucknell crew will be the Erg Armageddon, to be hosted in Davis Gym on Sunday, Feb. 20.

BEYOND THE BUBBLE

Martinez, Johnson Chosen as '99 Cy Youngs

Pedro Martinez and Randy Johnson were selected earlier this week as this year's recipients of the Cy Young Award, which is presented annually to the top pitcher in each league. The two became just the second and third pitchers in history to win the award in both leagues during their careers.

Martinez was 23-4 with a 2.07 ERA for the Boston Red Sox in 1999. He is the fourth person to win the AL Cy Young in a unanimous decision. The Baseball Writers' Association of America gave the 28-year old right-hander all 28 possible first-place votes, for a total of 140 points. Baltimore's Mike Mussina finished second with 54 points, followed by New York Yankees reliever Mariano Rivera with 27 points and Cleveland pitcher Bartolo Colon with 14.

It came as no surprise that Martinez was given the honor this year. He started the season 15-2, giving him a shot at becoming baseball's first 30-game winner since 1968. A stiff right shoulder in the second half of the season kept him from reaching the benchmark, yet he still finished with big leads in all the major pitching categories. Martinez had five more wins than anyone else, and his ERA was 1 1/3 runs better than the second-best in the league, New York's David Cone, who finished at 3.44. He also led the AL with 313 strikeouts. Anaheim's Chuck Finley was second with 200. The only question that remains now is whether Martinez will also win the American League's Most Valuable Player Award.

"(The MVP) would mean a lot, probably more than this Cy Young alone," Martinez said Tuesday after the Cy Young voting was announced. "I've already achieved that, so the MVP would be something different, especially to a pitcher."

Randy Johnson, a 6-foot-10 left-hander, was 17-9 with a 2.48 ERA for the Arizona Diamondbacks this year. He received 20 first-place votes, 11 seconds and one third for 134 points in balloting by the Baseball Writers' Association of America. Houston's Mike Hampton finished second with 110 points, and Atlanta's Kevin Milwood was third with 36.

The "Big Unit", who led the NL in complete games with 12, had 364 strikeouts in 271 2/3 innings. He finished 19 strikeouts short of the strikeout record set by Nolan Ryan in 1973, winding up with the fourth-highest single-season total. In seven of Johnson's losses, Arizona scored two runs or fewer, including a stretch in which the Diamondbacks were shut out in four straight starts of his. He had a 1.41 ERA in those games. "I'd like to think this award isn't solely based on wins and losses," said Johnson on Monday. "There was a lot more to the season I had than wins and losses. Quite honestly, I feel this was the best year I had in my career."

Lewis Records Unanimous Decision Over Holyfield

Lennox Lewis recorded a unanimous decision over Evander Holyfield Saturday night at the Thomas & Mack Center in Las Vegas, making him the undisputed heavyweight world championship. The fight was a rematch of a March 13 bout at Madison Square Garden in which Lewis dominated Holyfield throughout, but the final result was a highly controversial draw.

Bill Graham scored it 117-111, Chuck Giampa scored it 116-112 and Jerry Roth had it 115-113, all for Lewis. "I was glad the scoring was like it was," Lewis said. "Now there is no doubt."

Holyfield, 37, didn't argue with the ruling. "I'm not embarrassed by my performance," he said after the fight. "I came out and gave it all I got. When it falls into the judges' hands, things happen. I'm not happy with the decision, but I have to live with it. I didn't knock Lennox Lewis out. I have to take the decision and the reality that he's the undisputed heavyweight champion of the world."

Lewis' victory raised his career record to 34-1-1. Holyfield slipped to 36-4-1.

Sprewell Still Holding a Grudge Against P.J.

Latrell Sprewell admitted to reporters this week that he is still very bitter over the much-publicized choking incident between he an Golden State Warriors' head coach P.J. Carlesimo two years ago. Sprewell, who was a Warrior at the time, assaulted his coach during practice on December 1, 1997. The story leaked to the press and quickly became a national controversy. Sprewell ended up serving the largest non-drug suspension ever handed out in NBA history as a result. He was then traded to the New York Knicks after the suspension.

This Saturday, Sprewell and Carlesimo will meet on a basketball court for the first time since the incident occurred when the Knicks travel to Oakland to take on the Warriors. And Sprewell has no intention of apologizing to his former coach. "I think I've apologized over and over again," he said Tuesday. "I don't see why I have to apologize again." He later added, "Bitterness, hatred, whatever you want to call it, it's there. I just want to go in there and crush them. I'd just love it if we just killed them."

Responding to Sprewell's remarks, Carlesimo said, "I'm perfectly comfortable in saying it's over with. I don't harbor any resentment. He's done a great job of moving on and I'm trying to do the same thing."

THE BUCKNELLIAN Sports

Athlete of the Week

***Becky Marshall '02**, who finished 12th at the cross-country Mid-Atlantic Regionals to pace the women's team to a third place finish.*

Women's XC heads to Nationals

By Rose Sedo

There are mixed feelings as the Bucknell cross-country season draws to an end. The men's season is over, but the women have the honor of competing at the NCAA Championships for the first time ever.

This past weekend was the deciding factor of the season. The Bucknell men's and women's cross-country teams competed at the Mid-Atlantic Regionals at Lehigh University in Bethlehem, PA in hopes of obtaining a spot at nationals. In order to qualify automatically, Bucknell had to finish among the top two in either race.

While the women's team placed third with 115 points behind top-10 teams Georgetown (44 points) and Villanova (51 points), the men's team placed a disappointing ninth overall with a team total of 203 points.

The results for the women were extraordinary. Becki Marshall '02, Andrea Beisser '03, and tri-captains Carly Graytock '00 and Jen Hart '00 earned all-regional status by virtue of their top-25 finishes.

"We almost had our entire top-five girls up there as all-regional, and that's never happened before," Graytock said.

Marshall was once again the top runner for the Bison, finishing 12th with a time of 17:34.70. Beisser placed 19th in 17:59.02, Graytock 23rd in 18:04.57 and Hart 24th in 18:04.9.

Although the women ran very impressively, they finished third and weren't guaranteed a spot in the NCAA Championships.

Much of the rest of their weekend was filled with anticipation, regarding whether or not they would be chosen as one of 13 at-large selections.

But the women didn't have to worry. On Monday, the women's team was officially selected to move on to nationals.

They will travel to Bloomington, Indiana to compete against 30 other teams and 38 individuals this coming Monday, Nov. 22.

"What they did was an amazing feat. They haven't had a lot down all season; they've stayed healthy and injury free," coach Art Gulden said. "This is how cross-country is supposed to work."

Although the men's team in the past has achieved national status, this is the first time that the Bucknell women's cross-country team has achieved this honor. Excitement is running high for Monday's race.

"It has been incredible to see how the team has evolved over the past four years. The men's team has created a legacy under coach Gulden, and hopefully the women's team is beginning a trend that will lead to the same levels of success," Hart said.

On the men's side, David Bronfenbrenner '00 was the top runner for the Bison, crossing the finish line in 20th place with a time of 31:21.07 and achieving all-region status. Second on the men's team was Brad Wertz '01, who finished in 39th place with a time of 31:51.30.

The men's results were somewhat disappointing, but the difference between garnering a third place versus a ninth place finish was really quite simple to Gulden.

"Ron Hess was the missing link between third and ninth place for us. Unfortunately we never recovered from losing such a great asset to the team, but it has been an excellent season for the men, all things considered," Gulden said.

As the women's cross-country team prepares for the upcoming NCAA Championships race on Monday, the University wishes them lots of luck and success.

Graytock '00: finished 23rd

Bison have their eyes on the prize

Helen Hunt.—The Bucknellian

The 1999 Bucknell women's basketball team returns four starters from a squad that finished '98 with a 13-14 overall record (8-4 Patriot League). The Bison open their '99 campaign this Saturday with a game at Delaware State at 6:00 p.m. The season stretches until the Patriot League Tournament in March. For a preview of the team, see page 17.

Swimmers improve to 2-1 with win over Drexel

Tyler Wynn '02 and Darby Golino '03 pace teams to second-place finish at Army Invitational

By Katie Yingling

As cold as the past two weeks have been on Bucknell's campus, the Bison men's and women's swimming teams have been just as hot.

The past two weekends have left the Bison with a victory over Drexel and a second place finish to the Army Invitational.

When the Bison faced Drexel at home on Saturday, Nov. 6, the men walked away with a 137-102 victory, while the women won 132-107.

The men were paced by double winner Jeff Sharpe '01, who won the 50- and 100-yard freestyle events. Freshman Gonzalo Diaz also won two events, capturing the gold in the 500 and 1000-yard freestyle events.

Sophomore Abby Weaver claimed two of the women's events as well, winning both the 50 and 100-yard freestyle events.

Last Saturday the Bison placed second in the Army Invitational, falling to Army while placing ahead of both Fordham and Seton Hall. The men claimed one first and two second place finishes. Tyler Wynn '02, Benjamin Lim '01, Chris Neary '02 and Sharpe combined to win the 200-yard medley relay. Bucknell took second in the 400-yard freestyle relay with Neary, Lim, Sharpe and junior John Ferriter. Wynn placed second in the 200-yard backstroke as well.

The Bucknell women took first place in three events and second in four. Freshman Darby Golino paced the Bison, placing second in the 100- and 200-yard backstroke. Golino was also a member of the championship 400-yard medley relay, 200-yard medley relay and second place 800-yard freestyle relay.

Junior Molly Lowe won the 200-yard butterfly, and Weaver placed second in the 100-yard freestyle. The championship 200 and 400-yard medley relay teams consisted of Golino, Weaver, Kelly Wilson '00, and Lauren Mosler '03. The second place 800-yard relay team was made up of Golino, Weaver, Kate Wood '00, and senior Nicole Brandemarti '00.

The Bison are hoping for similar results at the Rutgers Invitational this coming Friday and Saturday.

Crew finishes third at Susquehanna

By Sean Houston

The Bucknell crew raced in its final event of the fall season this past weekend. The Bison played host to Marietta, Ithaca, Rochester, Lehigh, Lafayette and Mercyhurst in the first annual Susquehanna Sprints.

Bucknell earned a third place finish overall, finishing just behind Ithaca and Rochester in an extremely competitive field.

The novice men were particularly impressive for the Bison. They won their heat, and went on to convincingly win the novice event.

"We're all pretty excited at winning," coxswain John Waterman '03 said. "We were a little off during the heat, but we brought it all together in time to win. We had a good lane and managed to finally pull away from Ithaca during the last 500 yards."

Other members of the boat were freshmen Aaron Casagrande, Jeffrey Bolle, Jeffrey Dasch, Michael Brooks-Williams, Michael Andrieni, John Purcell, Gerald Bell, and Aaron Bates.

The varsity women rowed an open weight eight, and they also raced extremely well, winning their heat and finishing third among nine boats. Their performance was even more impressive when considering that their boat included some lightweight rowers.

"It was a spectacular day for the team and a great way to end the fall season."
—Steve Kish, crew coach

The varsity men and novice women raced well, but were narrowly beaten by the other competitors, finishing seventh out of eight boats and eighth out of 10 boats respectively.

"It was a spectacular day for the team and a great way to end the fall season," coach Steve Kish said.

The fall season was marked by steady improvement among the novice men, and consistently strong finishes by the varsity women. There is every indication that the spring will hold even more success for the Bison.

The next big event for the Bucknell crew will be the Erg Armageddon, to be hosted in Davis Gym on Sunday, Feb. 20.

BEYOND THE BUBBLE

Martinez, Johnson Chosen as '99 Cy Youngs

Pedro Martinez and Randy Johnson were selected earlier this week as this year's recipients of the Cy Young Award, which is presented annually to the top pitcher in each league. The two became just the second and third pitchers in history to win the award in both leagues during their careers.

Martinez was 23-4 with a 2.07 ERA for the Boston Red Sox in 1999. He is the fourth person to win the AL Cy Young in a unanimous decision. The Baseball Writers' Association of America gave the 28-year old right-hander all 28 possible first-place votes, for a total of 140 points. Baltimore's Mike Mussina finished second with 54 points, followed by New York Yankees reliever Mariano Rivera with 27 points and Cleveland pitcher Bartolo Colon with 14.

It came as no surprise that Martinez was given the honor this year. He started the season 15-2, giving him a shot at becoming baseball's first 30-game winner since 1968. A stiff right shoulder in the second half of the season kept him from reaching the benchmark, yet he still finished with big leads in all the major pitching categories. Martinez had five more wins than anyone else, and his ERA was 1.1/3 runs better than the second-best in the league, New York's David Cone, who finished at 3.44. He also led the AL with 313 strikeouts. Anaheim's Chuck Finley was second with 200. The only question that remains now is whether Martinez will also win the American League's Most Valuable Player Award.

"(The MVP) would mean a lot, probably more than this Cy Young alone," Martinez said Tuesday after the Cy Young voting was announced. "I've already achieved that, so the MVP would be something different, especially to a pitcher."

Randy Johnson, a 6-foot-10 left-hander, was 17-9 with a 2.48 ERA for the Arizona Diamondbacks this year. He received 20 first-place votes, 11 seconds and one third for 134 points in balloting by the Baseball Writers' Association of America. Houston's Mike Hampton finished second with 110 points, and Atlanta's Kevin Millwood was third with 36.

The "Big Unit", who led the NL in complete games with 12, had 364 strikeouts in 271 2/3 innings. He finished 19 strikeouts short of the strikeout record set by Nolan Ryan in 1973, winding up with the fourth-highest single-season total. In seven of Johnson's losses, Arizona scored two runs or fewer, including a stretch in which the Diamondbacks were shut out in four straight starts of his. He had a 1.41 ERA in those games. "I'd like to think this award isn't solely based on wins and losses," said Johnson on Monday. "There was a lot more to the season I had than wins and losses. Quite honestly, I feel this was the best year I had in my career."

Lewis Records Unanimous Decision Over Holyfield

Lennox Lewis recorded a unanimous decision over Evander Holyfield Saturday night at the Thomas & Mack Center in Las Vegas, making him the undisputed heavyweight world championship. The fight was a rematch of a March 13 bout at Madison Square Garden in which Lewis dominated Holyfield throughout, but the final result was a highly controversial draw.

Bill Graham scored it 117-111, Chuck Giampa scored it 116-112 and Jerry Roth had it 115-113, all for Lewis. "I was glad the scoring was like it was," Lewis said. "Now there is no doubt."

Holyfield, 37, didn't argue with the ruling. "I'm not embarrassed by my performance," he said after the fight. "I came out and gave it all I got. When it falls into the judges' hands, things happen. I'm not happy with the decision, but I have to live with it. I didn't knock Lennox Lewis out. I have to take the decision and the reality that he's the undisputed heavyweight champion of the world."

Lewis' victory raised his career record to 34-1-1. Holyfield slipped to 30-4-1.

Sprewell Still Holding a Grudge Against P.J.

Latrell Sprewell admitted to reporters this week that he is still very bitter over the much-publicized choking incident between he an Golden State Warriors' head coach P.J. Carlesimo two years ago. Sprewell, who was a Warrior at the time, assaulted his coach during practice on December 1, 1997. The story leaked to the press and quickly became a national controversy. Sprewell ended up serving the largest non-drug suspension ever handed out in NBA history as a result. He was then traded to the New York Knicks after the suspension.

This Saturday, Sprewell and Carlesimo will meet on a basketball court for the first time since the incident occurred when the Knicks travel to Oakland to take on the Warriors. And Sprewell has no intention of apologizing to his former coach. "I think I've apologized over and over again," he said Tuesday. "I don't see why I have to apologize again." He later added, "Bitterness, hatred, whatever you want to call it, it's there. I just want to go in there and crush them. I'd just love it if we just killed them."

Responding to Sprewell's remarks, Carlesimo said, "I'm perfectly comfortable in saying it's over with. I don't harbor any resentment. He's done a great job of moving on and I'm trying to do the same thing."

Brooke Bader '01 (#12) kills a pass from Whitney Williams '02 (#2) in Bucknell's five-set loss to Patriot League champion Navy last Friday.

V-ball ends season with 3-2 loss to Navy

By Justin White

The Bison volleyball team fought valiantly all season and finished the season in similar fashion this past Friday. The team traveled to the Annapolis with nothing left to prove but did not back down to Navy in a heartbreaking 3-2 loss.

The five-game loss was one of the Bison's closest matches of the season. Navy began the match strong to win the first game, 8-15. Bucknell stormed back to capture the second and third games, 15-3 and 15-11 respectively. The Bison had a combined hitting percentage of over .400 for the two winning games.

Game four saw Navy even the match with a convincing 15-2 win. The Midshipmen completed the comeback by putting away the Bison, 15-11, in rally scoring. Navy clinched a share of first place in the Patriot League with the win.

The Bison were led by co-captain Michelle Lesh '00, who registered 19 kills, 13 digs and a .304 hitting percentage. Shannon Walker '02 punched in 14 kills. Jennifer Wrigley '03 had 11 kills and 20 digs.

Brooke Bader had 11 kills and topped the conference with the highest hitting percentage in '99, a .295 average.

"The game was back and forth but, in the end, Navy had more energy," Lesh said.

The Bison finished with a final record of 11-11 and 5-7 in the Patriot League. Lesh and co-captain Jennifer Post are the only players that the team will be losing to graduation.

FOOTBALL

from page 18

row on the next eight plays. The pair pounded the ball down the field, with Marrow scoring from the one. Lundberg's PAT was blocked, but the Bison took a 20-17 lead.

Late in the second quarter, LeMario Bradwell '01 fumbled and Lehigh took over near midfield. On second down, Stambaugh hit Jean out of the backfield and the elusive runner sliced through the Bison defense for a 40-yard score.

Despite being down 24-20 at halftime, Gadd was pleased with his squad's 19:16 to 10:44 advantage in the time of possession.

"I thought that's where our advantage was," Gadd said. "I thought we'd come out (in the second half) and be able to run the football and start to tire them out a little bit."

The Bison struck first in the second half, after Redd intercepted Stambaugh and returned the ball to Lehigh's 28.

McDowell hit Corey Hurley '01 for a 17-yard gain, and Marrow reached the endzone for the third time on the day. Lundberg's PAT gave the Bison a 27-24 lead.

But Lehigh came up with a 12-play, 57-yard drive to recapture the lead, 31-27, with 3:45 remaining in the third period.

After being held to negative yardage on their next possession, Gadd resorted to trickery to try and get a spark. The Bison faked a punt but Redd was stopped well short of the first down—leaving the defense in a precarious situation. But the veteran unit stepped up and held Lehigh to a field goal, keeping it a one-possession game.

On a third-down play on Bucknell's ensuing possession, McDowell was picked off by Brendan Moore, who returned it 37 yards for a back-breaking score. Lehigh took a commanding 41-27 lead with 14:15 left in the game.

The Bison offense managed just two first downs on its final three possessions, and Jean closed the scoring with a two-yard touchdown jaunt.

Gadd identified Moore's interception as the turning point in the game.

"They got a break in the fourth quarter with the interception score, and then we didn't answer after that," Gadd said.

The loss drops the Bison to 6-4 overall and 2-3 in the Patriot League. They will close their '99 season this weekend when they travel to the Bronx to challenge winless Patriot League foe Fordham in hopes of avenging last year's 20-17 disappointment.

The game takes on special significance because, with a win, Bucknell's senior class will tie the school record of wins by a class with 29.

"This is a real big game for us because it's payback for last year," Summers said. "They caught us off guard last year, but we're definitely not going to let that happen again."

Prince Ali's Picks

By Ali Ahmed

(7-2) Seahawks 24 at (5-4) Chiefs 10
With the return of Galloway, the Seahawks can now rival the passing offense of the Vikings. The Chiefs defense should be a good test as to how good the Seahawks really are.

(6-3) Lions 20 at (4-5) Packers24
Changes in the offensive system should open up the passing game for the Packers. Freeman needs to be more involved. The Lions are not for real.

(5-4) Steelers 23 at (7-2) Titans 17
Steelers will come out and try to make up for painful loss at home last week. Thigpen must have a big game for the Titans.

(5-4) Raiders 16 at (3-7) Broncos 17
The Broncos have not played as badly as their record shows. The Raiders offense once again will not be able to complement it's defense.

(6-3) Patriots 17 at (7-2) Dolphins 13
Considering his situation, Drew Bledsoe is playing better then any other QB in the league. Miami really needs Marino to return, but even that might not be enough for them to win this one.

(4-6) Bears 9 at (4-5) Chargers 10
The Chargers will need to be successful running the ball so their defense does not have to spend too much time on the field. Curtis Enis will have a hard time running against that Charger defense.

(5-4) Giants 20 at (5-4) Redskins 17
With a strong front seven and Strahan dominating, the Giants will be able to stop the run and use their safeties on the wide receivers. Even the Giants should be able to score on the Skins' defense.

(3-6) Panthers 27 at (2-8) Browns 17
The only thing I can say about the Browns performance last week is LUCKY. So the Browns should go back to their old form and start losing again.

MEN'S BASKETBALL PREVIEW

Five Bison seniors continue their championship quest

Injury to outside threat Jake Ramage '01 puts damper on team looking to avenge two title game losses in three years

By Chris Ellis

After a season in which he watched his team come within five points of the NCAA tournament, Bison head coach Pat Flannery is as optimistic as any coach who returns eleven letterwinners and five top seniors.

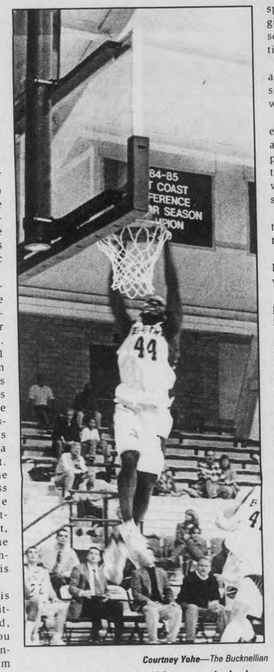
But he is as also cautious as any coach who had just watched his second-leading scorer and his top recruit succumb to injury.

Still, despite the injuries and a rapidly-improving Patriot League, Flannery sees his team in a similar position as last season—a position to contend for a Patriot League title.

"I'm very optimistic and upbeat about this season," Flannery said. "If you would have talked to me three days ago, I'd be even more upbeat and optimistic, and if you'd have talked to me three weeks ago, I'd be more optimistic than that."

The events that Flannery is referring to are the losses of guard Jake Ramage '01 and forward/center Brian Werner '03 to injury. Ramage, who averaged 11 points per game last season and served as the team's top outside threat, tore his ACL and will be lost for the season, while Werner discovered that pain in his foot was the result of a stress fracture in the foot. Werner is day-to-day. The losses—especially the loss of Ramage, who led the team with 58 three-pointers last season—will hurt, but it is the structure of the Bucknell system that convinces Flannery that his team won't miss a beat.

"All the kids in this program are very committed and very dedicated, and that's something you can't force on them," Flannery said. "This program has never been about just one or two people, and I'm very proud of that."



Courtney Yohe—The Bucknellian

Forward Boakai Lalugba '03 goes to the basket.

Flannery's senior leadership would agree. Co-captain Dan Bowen '00, an All Patriot-League selection last season who will be asked to assume even more of a leadership role in Ramage's absence, has the job of instilling in his teammates the same confidence that helped to earn him all-Patriot League honors last season.

"As players, we can't worry about who will be there and who won't," Bowen said. "We have to look at who's going to get the opportunities now. Sure it hurts losing Jake, but it's not something we're going to dwell on."

"I don't want my years here to end the way it did for the (senior) class last year. The little things push you to work hard when you're so close to being where you want to be."
—Dan Bowen '00

In addition to fighting the loss of Ramage, the Bison also have to deal with the specter of losing the Patriot League Championship game for the second time in three years. Bucknell lost three games to Lafayette last season by a total of 14 points, the final loss coming in the nationally-televised League Championship game. Bucknell squandered a half-time lead in that contest and saw a late rally fall short in a 67-63 loss. For some players, that loss still burns.

"I don't want my years here to end the way it did for the (senior) class last year," Bowen said. "The little things push you to work hard when you're so close to being where you want to be."

"If anybody every hung their head at the end of last season, I'm not aware of it at all," Flannery said. "This is a group with a purpose and a mission."

The Bison open their regular season schedule on Friday in a first-round tournament game against Maine. The team's first home game is on Tuesday against Robert Morris. Here's an overview of what to expect from this year's squad and the rest of the Patriot League.

BACKCOURT

For the better part of four seasons, the Bison have gone into their season with a clear floor general. J.R. Holden '98 ran the point for the Bison for three years, and Willie Callahan '99 saw the vast majority of minutes at the point last year. But this season, the Bison have no fewer than three people are vying for the starting job at the point. None of the three have experience as a starting college point guard, but the athleticism of all three makes the point Bucknell's deepest—and most intriguing—position.

The incumbent for the job is Bryan Bailey '02, who saw action, primarily as Callahan's backup, in 23 games last season. Bailey joined the Bison squad as a walk-on and didn't expect to see considerable time last year, but his natural quickness and athletic ability caught the eye of Flannery and the Bison staff, and he responded. Bailey, who spend most of his time at shooting guard in high school, averaged ten minutes per game last season. Bailey started at the point in Bucknell's 102-68 exhibition win over the Delaware Dynamite on Saturday.

"He came here having a whole lot to learn, and he still has a lot to learn," Flannery said. "But he brings quickness and speed, and he's a real quick learner. He's come along really well."

Pushing Bailey are a pair of freshmen guards with considerable success at the point in high school. Chris Zimmerman, a product of nearby Shamokin High School, averaged 19.4 points and 10 assists per game for Shamokin and dished out a team-high seven assists against the Dynamite. Zimmerman wants the starting job, but after coming from a successful high school program, understands that victories most important.

"The main thing here is winning," Zimmerman said. "If that means (I contribute by) getting two minutes here and two minutes there, that's OK. All that matters is winning.'

Dan Blankenship '03 will be Bucknell's other point guard. Blankenship, a recruit from Wheeling high school in Moundsville, West Virginia, may also see time at off-guard.

"The addition of these guys puts us in a great situation at point guard," Flannery said. "We've had great competition from all of them.'

The picture is much clearer at off-guard, where Brian Muckle '00 will log most of the minutes for the Bison in the absence of Jake Ramage. Muckle started 25 games last season and will bring needed experience to a backcourt struggling to regroup after the loss of its top scorer.

The "wild-card" at the off guard position is Shawn Asbury '00, who has seen limited action in his first three seasons with Bucknell, but figures to get quality minutes this season. Asbury, a 6-4, 210 pound guard, split time between the varsity and JV teams last season and led the jayvee in points and rebounds. When the Bison leadership talks about 'opportunity' for others in Ramage's absence, Asbury is the first player that comes to mind.

"I'm really happy for Shawn Asbury," Bowen said. "he's worked hard all the time while he's been here, and he'll get a real chance to contribute."

FRONTCOURT

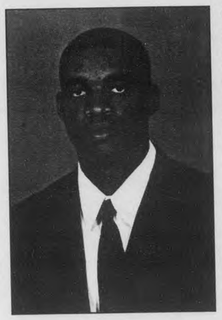
Selfishness.

It's not a quality that is common for Division I basketball coaches to try to instill in their players—and for many programs, getting top players to share the ball is priority number one. But without Ramage and without a proven 'go-to' scorer, a chief aim of Flannery will be attempting to coax his top players into looking for the shot on more occasions.

"This is a very unselfish bunch, and in a lot of ways that's good, but it's time for them to be more selfish," Flannery said, gesturing toward seniors Muckle, Bowen and Valter Karavanic '00. "Especially after what happened with Jake, we need them to step up and shoot the ball more. They need to be little more selfish this year, and be looking to score more."

Bowen, a preseason all-League selection at center, led the Patriot league in rebounding and blocked shots last year, but averaged less than eleven points per game—partly because he averaged only seven shot attempts per game. Bucknell's biggest (6-9, 24) and strongest player, Bowen's inside presence will be counted on to make up for the loss of Ramage's outside threat.

Dyrika Cameron '00 will serve as Bowen's backup and will also see some time at forward. The 6-6, 230-pound Cameron saw action in all 29 Bucknell games last season and adds another physical presence to the team's inside game.

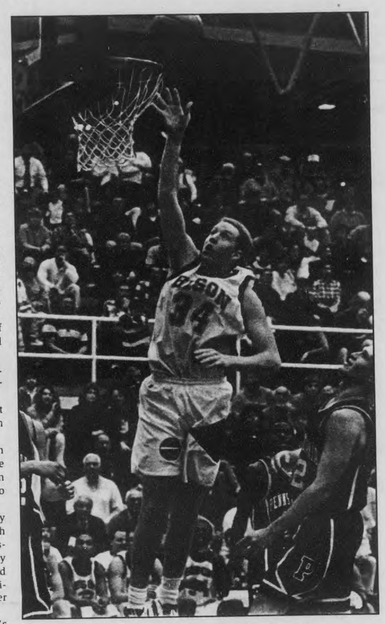


Forward/Guard Shawn Asbury '00

At forward, Karavnic will serve as Bucknell's chief 3-point threat. Karavanic, a first-team Academic all-American last season made 36 of 99 3-pointers last season and was the team's leading scorer last year. Karavanic also shot the ball fewer than 10 times per game last season, and will also be asked to pick up more of the scoring slack.

If Cameron doesn't get the starting nod at the other forward slot, minutes will be split between a number of younger players. Peter Santos '02 saw action in 26 games last season and was used by Flannery to inject energy and intensity into games, but his explosiveness and athletic ability will be hurt by a broken femur suffered during the off season. Santos played eight minutes in Bucknell's exhibition win, but will continue to battle to get back to top playing shape.

If he can recover from injury, Werner will also be asked to contribute minutes at forward. Bucknell's most prized recruit, Werner averaged 25 points and 13 rebounds per game at Chaminade high School, a top program in the Long Island area. Werner played 19 minutes and scored 13 points on five of seven shooting against the Dynamite, but will need to recover before becoming a significant contributor.



Center Dan Bowen '00 takes it up strong against Pennsylvania.

Boakai Lalugba, another top freshman recruit, will likely take some of Werner's minutes if he is not able to play in the early season. Lalugba also averaged a double-double in high school and scored eight points against the Dynamite. Freshman Hardenburgh and sophomore walk-on Brad Webb will also see some time at forward positions.

"We all know what it takes to get to the championship game. This year, we'll know what it takes to win that game."
—Valter Karavanic '00

Bucknell's balance should go a long way in helping the team compete in the patriot league, a league which has become more talented in every recent season. Lehigh and Holy Cross both now offer athletic scholarships, and the Crusaders will be led by new Coach Ralph Willard, who has seen time with big-name programs and has NCAA tournament experience.

But the league's stiffest challenges, as always, will come from Navy and Lafayette. Navy's depth and athleticism mirrors Bucknell's, and Lafayette lost few key players from the team that won the Patriot League and hug tough with #2 seed Miami in the NCAA tournament last season. Rejoining a team that already boasts last season's Patriot League player of the year Brian Ehlers is Lafayette senior Stefan Ciosci, who returns after missing all of last season with a torn ACL. Ciosci was the League Player of the year in the 1997-98 campaign and was one of the best big men in small-college basketball before his injury. The Patriot League is tougher than ever, and Bucknell will have to rely on its depth-and perhaps more importantly, its senior leadership and experience in big games-to compete for a title again.

"We all know what it takes to get to the championship game," Karavanic said. "This year, we'll know what it takes to win that game."

Guard Bryan Bailey '02

Sports

WOMEN'S BASKETBALL PREVIEW

Bison women look to avenge crushing tournament loss

By Jennifer Cruickshank and Chris Ellis

After a long stretch of victories at the end of last season and a disappointing loss to Army in the Patriot League Tournament, the Bucknell women's basketball squad is ready to return to the top of the Patriot League this year.

Behind three-time League all-star Lori Houck '00 and last year's Patriot League Rookie of the Year Vicki Quimby '02, the Bison are confident and prepared to start their season.

"As a coaching staff, we are very excited about the outlook for the season-coming off of what we accomplished last year,"head coach Kathy Fedorjaka said.

Courtney Yohe—The Bucknellian

All-Patriot League selection Lori Houck '01 (defending) looks to help the Bison rebound from a disappointing Patriot League Tournament loss to Army last season.

Fedorjaka and the Bison will open their regular season on Saturday, November 20th as they travel to Delaware State to face the Hornets. Bucknell remains on the road until they close out the month with its first home game of the season against Hampton University on Tuesday, November 30th in Davis Gym.

The Bison opened their competitive preseason with an exhibition game against The Legacy on Saturday, Nov. 6, winning the contest 90-55.

Behind Quimby's first-half scoring surge, the Bison jumped out to an early 42-24 lead and never looked back.

Quimby and freshman Molly Creamer each poured in 21 points to lead the Bison to victory. Quimby was nine of 16 from the field while fetching a team-high nine rebounds. Creamer, in her first action at Bucknell, was nine for 13 from the floor, including shooting two-for-two on three-point shots. Creamer also grabbed six rebounds and dished out six more assists.

Looking to better last year's 13-14 record (8-4 Patriot League), the Bison return with 4 starters and are predicted to finish third in the Patriot League behind Holy Cross and Navy.

"In an outlook of the season, in terms of progression, I would say one ofthe biggest improvements is the athletic ability overall," Fedorjaka said. "Kids challenge each other."

BACKCOURT

Bucknell's chances at making a run in the Patriot League tournament last season were hampered when starting point guard Leslie Blue '98 tore her ACL with seven games remaining in the regular season. Blue was the team's floor leader and a defensive sparkplug, and the team suffered, losing a first-round tournament game to seventh-seed Army.

But now, Blue's injury seems like a blessing.

Rebekah May '02 started the final seven games of the season and earned experience she otherwise may not have gotten. May, a 5-5 guard from Hershey, Pa., will likely be entrusted with the job of leading the Bison attack.

May will be spelled by Molly Creamer '03. Creamer, who also will see minutes at shooting guard, averaged 15 points per game for Mendham High School in New Jersey.

Bucknell's will again be strong at shooting guard, where Lori Houck '00 returns for her fourth chance at reaching the NCAA tournament. Houck has improved in each of her four seasons at Bucknell and was named an All-Patriot League selection last season after averaging over 16 points per game.

Kate Franks '03 and Leah Zimmerman '02—who missed most of last season after tearing her ACL—will back up Houck.

Courtney Yohe—The Bucknellian

Bucknell's women's basketball team will be a squad primarily composed of underclassmen this season. The team features four freshman and six sophomores on its 13-player squad.

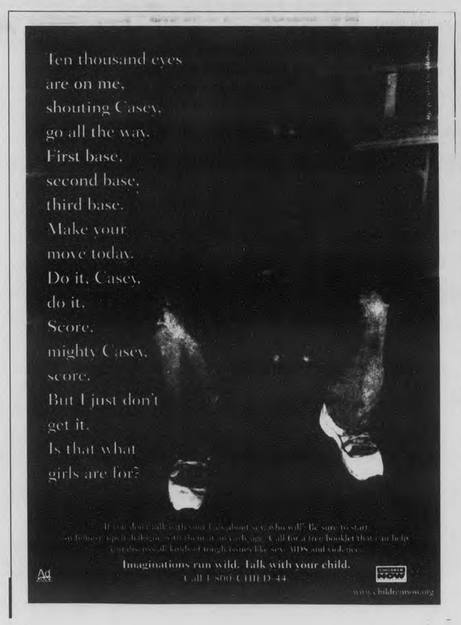
FRONTCOURT

The Bison were also plagued by injury at center last season. Jen Winhofer '02 returns to the Bison after missing almost half of the 1998-99 season with a broken foot. Winhofer played 20 minutes in Bucknell's 90-55 win over the Legacy and grabbed seven rebounds.

Kate Rounsley '02 and Jaclyn Reitnouer '03 will back up Winhofer.

But perhaps the key to Bucknell's success this year lies in the hands of sophomore Vicki Quimby '02. Quimby, the Patriot-League Rookie of the year and a second-team all-league performer last season, averaged 14.4 points and 7.4 rebounds per season while adjusting to college basketball.

Lyndsay Earhart, a senior co-captain, who started 22 of 27 games last season, Monique Leblanc '02 Sarah Gordon '03 and Kate Florence '02 will also vie for time at forward positions. Florence missed most of her rookie season with injuries.



WITHOUT YOUR SUPPORT, THIS STORY MIGHT HAVE HAD A VERY DIFFERENT ENDING.

MEN'S BASKETBALL PREVIEW

Five Bison seniors continue their championship quest

Injury to outside threat Jake Ramage '01 puts damper on team looking to avenge two title game losses in three years

By Chris Ellis

After a season in which he watched his team come within five points of the NCAA tournament, Bison head coach Pat Flannery is as optimistic as any coach who returns eleven letterwinners and five top seniors.

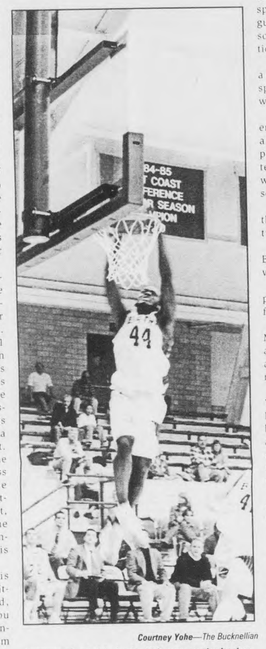
But he is as also cautious as any coach who had just watched his second-leading scorer and his top recruit succumb to injury.

Still, despite the injuries and a rapidly-improving Patriot League, Flannery sees his team in a similar position as last season—a position to contend for a Patriot League title.

"I'm very optimistic and upbeat about this season," Flannery said. "If you would have talked to me three days ago, I'd be even more upbeat and optimistic, and if you'd have talked to me three weeks ago, I'd be more optimistic than that."

The events that Flannery is referring to are the losses of guard Jake Ramage '01 and forward/center Brian Werner '03 to injury. Ramage, who averaged 11 points per game last season and served as the team's top outside threat, tore his ACL and will be lost for the season, while Werner discovered that pain in his foot was the result of a stress fracture in the foot. Werner is day-to-day. The losses—especially the loss of Ramage, who led the team with 58 three-pointers last season—will hurt, but it is the structure of the Bucknell system that convinces Flannery that his team won't miss a beat.

"All the kids in this program are very committed and very dedicated, and that's something you can't force on them," Flannery said. "This program has never been about just one or two people, and I'm very proud of that."



Courtney Yohe—The Bucknellian

Forward Boakai Lalugba '03 goes to the basket.

Flannery's senior leadership would agree. Co-captain Dan Bowen '00, an All Patriot-League selection last season who will be asked to assume even more of a leadership role in Ramage's absence, has the job of instilling in his teammates the same confidence that helped to earn him all-Patriot League honors last season.

"As players, we can't worry about who will be there and who won't," Bowen said. "We have to look at who's going to get the opportunities now. Sure it hurts losing Jake, but it's not something we're going to dwell on."

> *"I don't want my years here to end the way it did for the (senior) class last year. The little things push you to work hard when you're so close to being where you want to be."*
> —Dan Bowen '00

In addition to fighting the loss of Ramage, the Bison also have to deal with the specter of losing the Patriot League Championship game for the second time in three years. Bucknell lost three games to Lafayette last season by a total of 14 points, the final loss coming in the nationally-televised League Championship game. Bucknell squandered a half-time lead in that contest and saw a late rally fall short in a 67-63 loss. For some players, that loss still burns.

"I don't want my years here to end the way it did for the (senior) class last year," Bowen said. "The little things push you to work hard when you're so close to being where you want to be."

"If anybody every hung their head at the end of last season, I'm not aware of it at all," Flannery said. "This is a group with a purpose and a mission."

The Bison open their regular season schedule on Friday in a first-round tournament game against Maine. The team's first home game is on Tuesday against Robert Morris. Here's an overview of what to expect from this year's squad and the rest of the Patriot League.

BACKCOURT

For the better part of four seasons, the Bison have gone into their season with a clear floor general. J.R. Holden '98 ran the point for the Bison for three years, and Willie Callahan '99 saw the vast majority of minutes at the point last year. But this season, the Bison have no fewer than three people are vying for the starting job at the point. None of the three have experience as a starting college point guard, but the athleticism of all three makes the point Bucknell's deepest—and most intriguing—position.

The incumbent for the job is Bryan Bailey '02, who saw action, primarily as Callahan's backup, in 23 games last season. Bailey joined the Bison squad as a walk-on and didn't expect to see considerable time last year, but his natural quickness and athletic ability caught the eye of Flannery and the Bison staff, and he responded. Bailey, who spend most of his time at shooting guard in high school, averaged ten minutes per game last season. Bailey started at the point in Bucknell's 102-68 exhibition win over the Delaware Dynamite on Saturday.

"He came here having a whole lot to learn, and he still has a lot to learn," Flannery said. "But he brings quickness and speed, and he's a real quick learner. He's come along really well."

Pushing Bailey are a pair of freshmen guards with considerable success at the point in high school. Chris Zimmerman, a product of nearby Shamokin High School, averaged 19.4 points and 10 assists per game for Shamokin and dished out a team-high seven assists against the Dynamite. Zimmerman wants the starting job, but after coming from a successful high school program, understands that victories most important.

"The main thing here is winning," Zimmerman said. "If that means (I contribute by) getting two minutes here and two minutes there, that's OK. All that matters is winning."

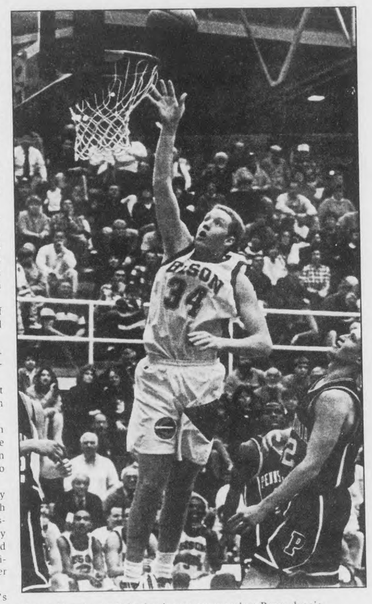
Dan Blankenship '03 will be Bucknell's other point guard. Blankenship, a recruit from Wheeling high school in Moundsville, West Virginia, may also see time at off-guard.

"The addition of these guys puts us in a great situation at point guard," Flannery said. "We've had great competition from all of them."

The picture is much clearer at off-guard, where Brian Muckle '00 will log most of the minutes for the Bison in the absence of Jake Ramage. Muckle started 25 games last season and will bring needed experience to a backcourt struggling to regroup after the loss of its top scorer.

The "wild-card" at the off guard position is Shawn Asbury '00, who has seen limited action in his first three seasons with Bucknell, but figures to get quality minutes this season. Asbury, a 6-4, 210 pound guard, split time between the varsity and JV teams last season and led the jayvee in points and rebounds. When the Bison leadership talks about 'opportunity' for others in Ramage's absence, Asbury is the first player that comes to mind.

"I'm really happy for Shawn Asbury," Bowen said. "he's worked hard all the time while he's been here, and he'll get a real chance to contribute."



Center Dan Bowen '00 takes it up strong against Pennsylvania.

FRONTCOURT

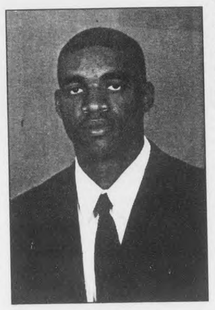
Selfishness.

It's not a quality that is common for Division I basketball coaches to try to instill in their players—and for many programs, getting top players to share the ball is priority number one. But without Ramage and without a proven 'go-to' scorer, a chief aim of Flannery will be attempting to coax his top players into looking for the shot on more occasions.

"This is a very unselfish bunch, and in a lot of ways that's good, but it's time for them to be more selfish," Flannery said, gesturing toward seniors Muckle, Bowen and Valter Karavanic '00. "Especially after what happened with Jake, we need them to step up and shoot the ball more. They need to be little more selfish this year, and be looking to score more."

Bowen, a preseason all-League selection at center, led the Patriot league in rebounding and blocked shots last year, but averaged less than eleven points per game—partly because he averaged only seven shot attempts per game. Bucknell's biggest (6-9, 24) and strongest player, Bowen's inside presence will be counted on to make up for the loss of Ramage's outside threat.

Dyrika Cameron '00 will serve as Bowen's backup and will also see some time at forward. The 6-6, 230-pound Cameron saw action in all 29 Bucknell games last season and adds another physical presence to the team's inside game.



Forward/Guard Shawn Asbury '00

At forward, Karavnic will serve as Bucknell's chief 3-point threat. Karavanic, a first-team Academic all-American last season made 36 of 99 3-pointers last season and was the team's leading scorer last year. Karavanic also shot the ball fewer than 10 times per game last season, and will also be asked to pick up more of the scoring slack.

If Cameron doesn't get the starting nod at the other forward slot, minutes will be split between a number of younger players. Peter Santos '02 saw action in 26 games last season and was used by Flannery to inject energy and intensity into games, but his explosiveness and athletic ability will be hurt by a broken femur suffered during the off season. Santos played eight minutes in Bucknell's exhibition win, but will continue to battle to get back to top playing shape.

If he can recover from injury, Werner will also be asked to contribute minutes at forward. Bucknell's most prized recruit, Werner averaged 25 points and 13 rebounds per game at Chaminade high School, a top program in the Long Island area. Werner played 19 minutes and scored 13 points on five of seven shooting against the Dynamite, but will need to recover before becoming a significant contributor.

Boakai Lalugba, another top freshman recruit, will likely take some of Werner's minutes if he is not able to play in the early season. Lalugba also averaged a double-double in high school and scored eight points against the Dynamite. Freshman Hardenburgh and sophomore walk-on Brad Webb will also see some time at forward positions.

> *"We all know what it takes to get to the championship game. This year, we'll know what it takes to win that game."*
> —Valter Karavanic '00

Bucknell's balance should go a long way in helping the team compete in the patriot league, a league which has become more talented in every recent season. Lehigh and Holy Cross both now offer athletic scholarships, and the Crusaders will be led by new Coach Ralph Willard, who has seen time with big-name programs and has NCAA tournament experience.

But the league's stiffest challenges, as always, will come from Navy and Lafayette. Navy's depth and athleticism mirrors Bucknell's, and Lafayette lost few key players from the team that won the Patriot League and hug tough with #2 seed Miami in the NCAA tournament last season. Rejoining a team that already boasts last season's Patriot League player of the year Brian Ehlers is Lafayette senior Stefan Ciosci, who returns after missing all of last season with a torn ACL. Ciosci was the League Player of the year in the 1997-98 campaign and was one of the best big men in small-college basketball before his injury. The Patriot League is tougher than ever, and Bucknell will have to rely on its depth-and perhaps more importantly, its senior leadership and experience in big games-to compete for a title again.

"We all know what it takes to get to the championship game," Karavanic said. "This year, we'll know what it takes to win that game."

Guard Bryan Bailey '02

Sports

WOMEN'S BASKETBALL PREVIEW

Bison women look to avenge crushing tournament loss

By Jennifer Cruickshank and Chris Ellis

After a long stretch of victories at the end of last season and a disappointing loss to Army in the Patriot League Tournament, the Bucknell women's basketball squad is ready to return to the top of the Patriot League this year.

Behind three-time League all-star Lori Houck '00 and last year's Patriot League Rookie of the Year Vicki Quimby '02, the Bison are confident and prepared to start their season.

"As a coaching staff, we are very excited about the outlook for the season-coming off of what we accomplished last year,"head coach Kathy Fedorjaka said.

Fedorjaka and the Bison will open their regular season on Saturday, November 20th as they travel to Delaware State to face the Hornets. Bucknell remains on the road until they close out the month with its first home game of the season against Hampton University on Tuesday, November 30th in Davis Gym.

The Bison opened their competitive preseason with an exhibition game against The Legacy on Saturday, Nov. 6, winning the contest 90-55.

Behind Quimby's first-half scoring surge, the Bison jumped out to an early 42-24 lead and never looked back.

Quimby and freshman Molly Creamer each poured in 21 points to lead the Bison to victory. Quimby was nine of 16 from the field while fetching a team-high nine rebounds. Creamer, in her first action at Bucknell, was nine for 13 from the floor, including shooting two-for-two on three-point shots. Creamer also grabbed six rebounds and dished out six more assists.

Courtney Yohe—The Bucknellian

All-Patriot League selection Lori Houck '01 (defending) looks to help the Bison rebound from a disappointing Patriot League Tournament loss to Army last season.

Looking to better last year's 13-14 record (8-4 Patriot League), the Bison return with 4 starters and are predicted to finish third in the Patriot League behind Holy Cross and Navy.

"In an outlook of the season, in terms of progression, I would say one ofthe biggest improvements is the athletic ability overall," Fedorjaka said. "Kids challenge each other."

BACKCOURT

Bucknell's chances at making a run in the Patriot League tournament last season were hampered when starting point guard Leslie Blue '98 tore her ACL with seven games remaining in the regular season. Blue was the team's floor leader and a defensive sparkplug, and the team suffered, losing a first-round tournament game to seventh-seed Army.

But now, Blue's injury seems like a blessing.

Rebekah May '02 started the final seven games of the season and earned experience she otherwise may not have gotten. May, a 5-5 guard from Hershey, Pa., will likely be entrusted with the job of leading the Bison attack.

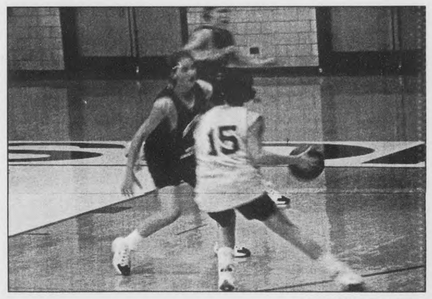
May will be spelled by Molly Creamer '03. Creamer, who also will see minutes at shooting guard, averaged 15 points per game for Mendham High School in New Jersey.

Bucknell's will again be strong at shooting guard, where Lori Houck '00 returns for her fourth chance at reaching the NCAA tournament. Houck has improved in each of her four seasons at Bucknell and was named an All-Patriot League selection last season after averaging over 16 points per game.

Kate Franks '03 and Leah Zimmerman '02—who missed most of last season after tearing her ACL—will back up Houck.

FRONTCOURT

The Bison were also plagued by injury at center last season. Jen Winhofer '02 returns to the Bison after missing almost half of the 1998-99 season with a broken foot. Winhofer played 20 minutes in Bucknell's 90-55 win over the Legacy and grabbed seven rebounds.



Courtney Yohe—The Bucknellian

Bucknell's women's basketball team will be a squad primarily composed of underclassmen this season. The team features four freshman and six sophomores on its 13-player squad.

Kate Rounsley '02 and Jaclyn Reitnouer '03 will back up Winhofer.

But perhaps the key to Bucknell's success this year lies in the hands of sophomore Vicki Quimby '02. Quimby, the Patriot-League Rookie of the year and a second-team all-league performer last season, averaged 14.4 points and 7.4 rebounds per season while adjusting to college basketball.

Lyndsay Earhart, a senior co-captain, who started 22 of 27 games last season, Monique Leblanc '02 Sarah Gordon '03 and Kate Florence '02 will also vie for time at forward positions. Florence missed most of her rookie season with injuries.

Boxing's ills require some strong medicine

The headlines in Monday's USA Today read, "Lewis wins a fair fight, finally," and, "Finally, a bout without controversy."

They were in reference to Lennox Lewis' unanimous decision victory over Evander Holyfield Saturday, which made him the undisputed heavyweight boxing champion of the world.

Commentary

Carmen Mauriello
Sports Editor

Undisputed is a word rarely used to describe boxing in the 90s. You know you have a problem when a fair fight becomes the exception, with controversy the rule.

In recent years, heavyweight boxing has become more of a circus than a professional sport, with ringmaster Don King and his puppet Mike Tyson in the center ring.

Boxing's downfall began when Tyson, who dominated the heavyweight division during the late 80s, was convicted and jailed for rape in 1989. The sport's image was tarnished, as its most publicly recognizable figure was identified as a violent criminal.

In the early 90s, boxing became commercialized and popularized through the workings of King, a ruthless promoter who had served jail time for manslaughter.

His pay-per-view empire increased the stakes of boxing, multiplying fighters' purses and arenas' revenues while leaving television viewers and ticket purchasers holding the bill.

The higher stakes led many fighters to take big paydays against easy opponents instead of risking defeat against top challengers. The trend accelerated in 1991, when Riddick Bowe relinquished his WBC belt to avoid fighting top-ranked Lewis. George Foreman gave up both his IBF and WBA belts in 1995 to avoid fighting top opponents.

Multiple illegitimate champions resulted, and fans were left to look at fighters' family trees to determine the true champion. Also, many controversial decisions placed judges' character under fire.

George Foreman won an embarrassing decision over Axel Schultz in 1995; even sunglasses couldn't hide the shame in the 46-year-old's eyes.

Last May's majority draw decision in Lewis-Holyfield I, in which Lewis outpunched Holyfield by a three to one margin, was declared a fix by nearly all boxing analysts.

The decision invoked federal and state investigations into the judging of Eugena Williams, an IBF-appointed judge who decided for Holyfield by two points, and the close relationship between judges and promoters. The investigation resulted in last week's indictment of IBF president Bob Lee on 32 counts. The charges involve the fixing of rankings for bribes, and they implicated seven managers and promoters as well as 23 fighters.

And don't forget the antics of Tyson. After his 1995 release, Tyson was anxious to get back into the ring and show his friends some of the new tricks he'd learned at summer camp.

Tyson's infamous "bite fight" against Holyfield will go down as one of the most disgusting displays in sports history, as he attempted to replay a scene from *Silence of the Lambs* by gouging both of Holyfield's ears. His disqualification ignited a near-riot in Las Vegas' MGM Grand Casino, causing it millions of dollars in lost revenue.

After a 15-month suspension, Tyson fought Francois Botha last January and admitted to an attempt to break his opponent's arm. A six-month jail term for assaulting some elderly motorists in Maryland followed.

Then Tyson knocked Orlin Norris to the canvas with an illegal late hit after the first round of their bout this October, and Norris couldn't continue (because of a knee injury)! Although referee Richard Steele deducted two points for the blow and previously gave Tyson warnings about late hits, he declared it an "accidental foul" and the bout a "No Contest."

All this was on the shoulders of Lewis and Holyfield when the two men stepped into the ring last Saturday. "This will bring vindication to one fighter and it can uplift the sport if the result is looked upon without a jaundiced eye," King said before the fight.

After battling for 12 rounds, Lewis won a unanimous decision, dominating more on the scorecards but less in the ring than the first bout.

"It went the way the first fight should have with everybody knowing Lennox should have won that fight," said Roy Jones, light heavyweight champion and TVKO commentator. "They were thinking that, and when they judged the close rounds and they had to give someone the benefit of the doubt, they leaned in Lennox's favor."

"Everyone should be happy 1999 will end with...the right man sitting in the most prestigious throne in sports," ESPN.com's Tim Graham said.

Maybe so. But I still think that there's a lot wrong with boxing. I'm sick of referees stopping bouts early and promoters maneuvering their fighters around top contenders. I'm sick of judges. I'm sick of Mike Tyson and Don King. And I'm sick of pay-per-view.

I've spent hours devising an intricate plan to salvage boxing. Let fighters box. Let them beat the crap out of each other, a la Rocky (I know this poses health risks, but you don't come into this profession planning to take up rocket science when you retire).

And force them to fight better foes, more often. Pretty soon we'll start seeing advertisements for the next big heavyweight fight—in July! No more points for dancing around the ring or hiding in the corner, only for power punches (may I suggest wearing headgear and using a scoring system like the Olympics).

Also, a sport looking to repair its tarnished image should not employ two convicted felons.

Why would sports enthusiasts pay $50 for six minutes of boxing when they can watch thousands of hours of football and basketball for peanuts? Boxing needs to become more accessible, more honest, more American and, most importantly, more fun.

Let's leave the sideshow acts for the WWF and make boxing a sport again.

Jean's five scores bury Bucknell

Bison start strong but can't match Lehigh's scoring punch in 48-27 loss

By Carmen Mauriello

Lehigh running back Ronald Jean is listed at five feet, six inches and 183 pounds on the team's roster sheet. Lucky for him he's fast.

Last Saturday, Jean taught the Bison defense that there's no substitute for speed, exploding for five touchdowns and a Patriot League record 370 all-purpose yards to lead Lehigh to a 48-27 victory over Bucknell.

"Ron Jean is a special player," Bucknell coach Tom Gadd said. "We knew that before. There's only been one team that stopped him -and that was Colgate. And they're the only ones that beat (Lehigh). If you can't stop Ron Jean, you can't beat Lehigh."

In the game's opening minutes, the blue-collar Bison offense appeared to swap places with the Mountain Hawks' high-scoring attack. After Lehigh was forced to settle for a field goal on its opening drive, the Bison offense took over on its own 34 and took command. Jabulani Powell '02 rushed three times for 26 yards and Don McDowell '00 went 3-3 passing, including an 18-yard scoring strike to Dan Palko '00. Chris Lundberg '03 booted the extra point to give the Bison a 7-3 lead.

The Bison defense then came up big when Shawn Redd '01 sacked Lehigh quarterback Phil Stambaugh and Matt Summers '02 recovered at the Mountain Hawks 13. After three running plays moved the ball inside the five, fullback Jason Marrow '01 hit paydirt, and Lundberg's PAT put the Bison ahead 14-3 with 7:03 remaining in the first quarter.

But Jean quickly changed all that. He returned the ensuing kickoff 95 yards for a score, axing the Bison lead to 14-10.

Tim Choate—The Bucknellian

LeMario Bradwell '01 turns the corner. Bucknell rushed for 180 yards against Lehigh.

"Everyone was pretty confident (after our second touchdown). The defense was playing real good," McDowell said. "Jean's return took our momentum away."

McDowell led the Bison to the Lehigh 21 on their next drive, but Brian Kramer '00 bobbled the snap on a fake field goal and Lehigh took over on downs. Stambaugh completed three passes for 38 yards to move Lehigh inside the red zone, and Jean found a seam on a nine-yard touchdown run to put the Mountain Hawks ahead 17-14.

Two penalties moved Lehigh's kickoff back 10 yards, and Powell's 38-yard return gave the Bison excellent field position at the Mountain Hawks 47. Holy Cross star Lucas Phillips '01 was rotated in at quarterback for the Bison. After hitting Jim Horan '03 for nine yards on first down, Phillips handed the ball off to Powell and Mar-

Three Bison named Academic All-District

Kuhn '01, Evans '01 and Palko '00 eligible for Academic All-American honors

Helen Hunt—The Bucknellian

Robert Kuhn '01, Dave Evans '01 and Dan Palko '00 (from left to right) were the award winners.

By Joshua Gish

Three members of the Bison football team have been selected to the 1999 GTE Academic All-District 2 Football First Team.

Wide receiver Dan Palko '00, linebacker Robert Kuhn '01 and strong safety Dave Evans '01 were named to the All-District First Team in recognition of their excellence on and off of the football field.

Bucknell's selection of three members to the team tied the Naval Academy for the second most by any school, topped only by Penn State's four honorees. District Two encompasses schools from Pennsylvania, New Jersey, West Virginia, Maryland, Delaware and Washington D.C.

Dan Palko was honored for his scholastic achievements again this year, carrying a 3.20 GPA in Accounting.

Some of his notable accomplishments include standing on the Bucknell Academic Athletic Advisory Committee and being a member of the Patriot League Academic Honor Roll.

Palko also has excelled on the field, accumulating 2,222 all-purpose yards and 12 touchdowns in his career.

This season, Palko has continued his prowess as a versatile offensive weapon, rushing for 182 yards on 32 carries, leading the Patriot League with an average kickoff return of 26.2 yards and ranking second on the team with 25 receptions for 259 yards and three touchdowns.

Following his graduation in May, Palko will begin full-time work with the accounting firm KPMG.

Kuhn, also a repeat addition to the academic team, had started as outside linebacker for the Bison before suffering a season-ending concussion six games into the '99 season.

Kuhn tallied 29 tackles, including two for lost yardage, and two pass breakups this season. He displayed promise last season by placing eighth on the squad with 42 stops, three tackles for loss and four sacks.

Academically, Kuhn is excelling as a Mathematics major and an English minor, boasting a 3.69 Grade Point Average.

His scholastic record includes selection to the Dean's List, Patriot League Academic Honor Roll and last year's District Two Second Team.

Evans is Bucknell's newest addition to the academic team. He has started one game as strong safety in '99 and is an outstanding member of the Bison special teams.

Evans was named the Lewisburg Touchdown Club's Special Teams Player-of-the-Week following his performance as strong safety during Bucknell's 49-20 defeat of Duquesne in mid-October.

A past member of the Patriot League Academic Honor Roll and a Dean's List student, Evans has maintained an outstanding GPA of 3.80 in his field of Civil Engineering.

Palko, Kuhn and Evans are all eligible for selection to the National Academic All-American honor, which will be voted on early in December.

Sports Trivia

1. Who held the NFL record for most touchdown receptions before Jerry Rice?

2. Who are the only three MLB pichers to win the Cy Young award in both leagues?

3. Who is the NFL's all-time sack leader?

1. Steve Largent 2. Pedro Martinez, Randy Johnson and Gaylord Perry 3. Reggie White

Shooting sends authorities scrambling

Estranged husband of University employee suffers self-inflicted gunshot wounds

By Jared Silliker

In an event that had many rumors stirring throughout the campus and Lewisburg community, the estranged husband of a University custodian apparently shot himself on Monday, Nov. 22, in the Moore Ave. parking lot adjacent to the Langone Center.

The victim has been identified as Dean Loss, who remains in care at Geisinger Medical Center in Danville. Union County district attorney D. Peter Johnson has not yet released Loss' name or any other information regarding the incident or its investigation.

Loss suffered stomach wounds and was transported by ambulance to Montandon, where he was airlifted to Geisinger. Heavy fog prevented the helicopter from landing on campus.

Stemming from Johnson's unwillingness to release information, a virtual gag order is in effect for University employees, police officers and investigators involved. In this, many details of exactly what transpired prior to the gunshot are unknown at this time.

The Daily Item reported Wednesday that a witness said police approached Loss "like a raging bull." It is not known whether the police had any contact with Loss before the shot was fired.

Left at the scene was the off-white station wagon Loss was driving, its passenger window blown out, and a large rifle on the ground.

Loss seems to have been trying to contact his ex-wife although under a protection-from-abuse restraining order from seeing her.

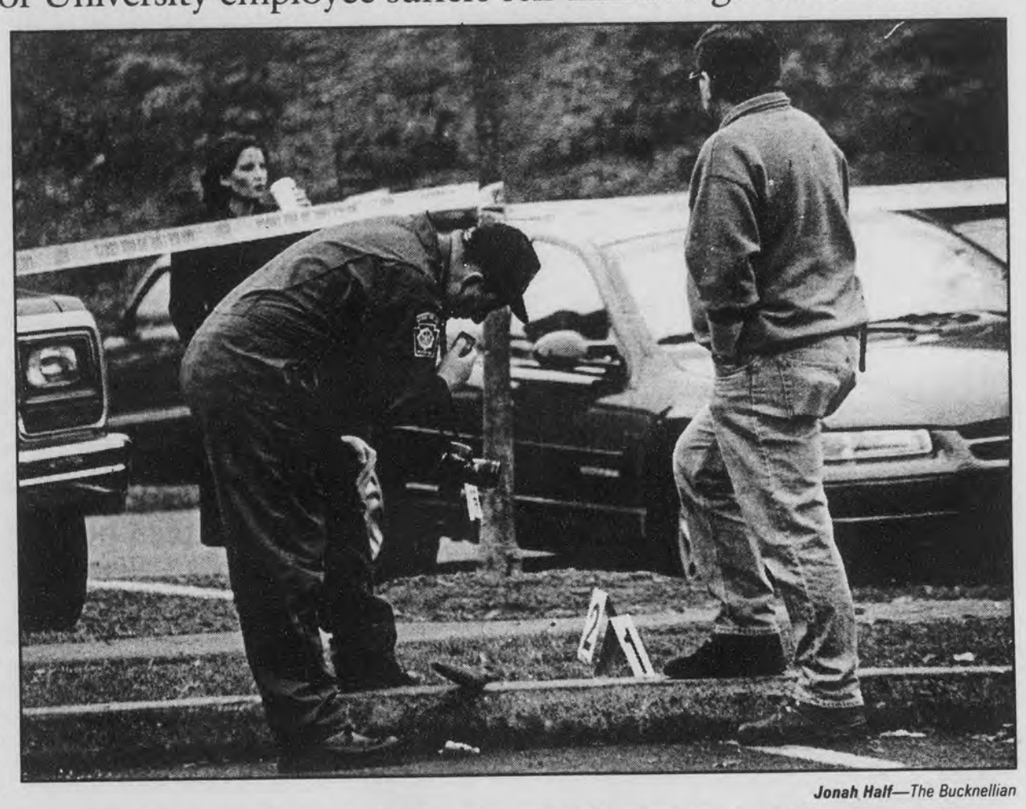
It is unknown exactly who called the police, although it appears that Loss' ex-wife initiated the response after hearing that he was on campus.

Steve Troisi '00, was stopped by Loss earlier in the morning along Moore Ave. Troisi was late for class, and did not talk with the eventual victim long. Loss asked Troisi if he was going into the Langone Center and then stated, "My wife's in there."

Troisi replied that he was not (entering the LC) and continued on towards Taylor Hall. "He was very polite and calm, and even had on a gray Bucknell sweatshirt."

Troisi then saw Loss drive "slowly and suspiciously" into the aforementioned parking lot and park in the

see SHOOTING, page 2



Jonah Half—The Bucknellian

Local authorities inspect a shotgun in the Moore Ave. parking lot, which was roped off on Monday, Nov. 22, after a man apparently shot himself in the stomach. Dean Loss, the enstranged husband of a University employee, remains under care at Geisinger Medical Center in Danville.

A portion of the AIDS Quilt, on display in the Center Room of the Langone Center, was opened to the University community last Monday. Consisting of several three-foot by six-foot panels, the display commemorates the lives of those who have died of AIDS. In its entirety, the quilt is made up of more than 27,000 panels created by friends, lovers and family members of the disease's victims. This piece of the world-renowned memorial was brought to the University by the NAMES Project Foundation and will be open through December 2 from 10 a.m. to 6 p.m.

Trustees' *Strategic Tenets* elicts powerful faculty response

By Heather Napolitano

In the weeks since the mid-November release of *The Board of Trustees' Guiding Strategic Tenets* to the University, members of the faculty have expressed deep concern about various aspects of the now controversial document. The Board of Trustees, however, insists that it is simply an articulation of their perspective on the institution and on potential guidelines that would effectively preserve its legacy.

"I think that the faculty members are, in general, concerned on two levels," Faculty Chair and Professor of Political Science John Peeler said. "One is with the process by which the document was produced, and two is with the actual tenets themselves."

Michael Payne, professor of English, indicated that constituents of the faculty are disturbed by the trustees' failure to consult themselves, the administration, or the Office of the President before publishing this text.

"I think that one of the first things that I and my colleagues thought ... is that this is not the kind of process that we've been used to" he said.

In terms of the content, a number of the 23 tenets have been met with opposition from faculty members. According to Payne, examples of such opposed tenets concern topics of curriculum and admissions.
